PREFACE TO PART I, NUMBER 3

In style and arrangement this installment of Part I closely follows the guiding principles of the previous parts. However, because of the war and the death of Charles E. Hellmayr in 1944, the method of collaboration had to be changed somewhat from that followed in Part I, Number 1. As before, the senior author is mainly responsible for the compilation of the bibliographic references and for the outline of geographical distribution. Because of war conditions, however, his manuscript did not reach this country until after his death. It was impossible, therefore, to submit to him any changes found necessary because of material in Field Museum and certain critical specimens examined in other American collections. Such emendations have been kept as few as possible.

In the case of some of the Charadriiformes, I prepared the manuscript and submitted it to Dr. Hellmayr, who made certain additions and suggestions. Likewise, I am responsible for the compilation of the list of specimens in Field Museum and in the Conover Collection, and for additions to the bibliography after 1939. Literature has been taken into account up to December 31, 1944 (as given in the Zoological Record). Some new forms described since that date and before December 31, 1946, and a few important papers will be found mentioned in the footnotes.

As before, the authors have been greatly benefited by the cordial co-operation of many institutions and individuals, who have lent material and submitted information. To all of them we wish to express our appreciation. Among those who have helped are Dr. John W. Aldrich, U. S. Fish and Wildlife Service; Dr. Arthur Allen, Cornell University, Ithaca; Dr. Alfred M. Bailey, Colorado Museum of Natural History; Professor J. Berlioz, Musée d'Histoire Naturelle, Paris; Mr. James Bond, Academy of Natural Sciences, Philadelphia; Mr. H. W. Brandt, Cleveland, Ohio; the late Major Allan Brooks, Okanagan Landing, Canada; the Chicago Academy of Sciences; Dr. Herbert Friedmann, United States National Museum; Professor O. Fuhrmann, University of Neuchâtel; Count Nils Gyldenstolpe, Vetenskapsakademien, Stockholm; the Museum of the University of Kansas, Lawrence; Captain N. B. Kinnear, British Museum (Natural History); Professor A. Laubmann, Zoological Museum, Munich; Messrs. F. C. Lincoln and W. L. McAtee, U. S. Fish and Wildlife Service; Mr. J. D. Macdonald, British Museum (Natural

History); Dr. Alden H. Miller, Museum of Vertebrate Zoology, Berkeley, California; the late James Moffitt, California Academy of Sciences, San Francisco; Mr. Olaus Murie, U. S. Fish and Wildlife Service; Dr. Robert T. Orr, California Academy of Sciences; Dr. James L. Peters, Museum of Comparative Zoology, Cambridge, Massachusetts; Mr. William H. Phelps, Caracas, Venezuela; Dr. R. A. Philippi-B., Museo Nacional de Chile, Santiago; Professor William Rowan, University of Edmonton, Alberta; Mr. R. M. de Schauensee, Academy of Natural Sciences, Philadelphia; Count Josef Seilern, Lukov; Professor Morriz Sassi, Naturhistorisches Museum, Vienna; Mr. L. L. Snyder, Royal Ontario Museum, Toronto; the late P. A. Taverner, National Museum of Canada, Ottawa; Mr. W. E. Clyde Todd, Carnegie Museum, Pittsburgh; Mr. A. J. van Rossem, Los Angeles, California; Dr. Josselyn Van Tyne, Museum of Zoology, University of Michigan, Ann Arbor; Dr. Alexander Wetmore, United States National Museum; Dr. John T. Zimmer, American Museum of Natural History, New York.

We are also indebted to Dr. Charles Baehni, Director of the Conservatoire et Jardin Botaniques, Geneva, Switzerland, for his custodianship of the manuscript after Dr. Hellmayr's death.

Of the Museum Staff, especial acknowledgment is due to the late Dr. Wilfred H. Osgood, Curator Emeritus, Department of Zoology; Mr. Karl P. Schmidt, Chief Curator, Department of Zoology; and Dr. Austin L. Rand, Curator, Division of Birds, for their help and advice to the junior author; to Mr. Melvin A. Traylor, Jr., Associate, Division of Birds; to Mr. Emmet R. Blake, Associate Curator, Division of Birds, who was responsible for the compilation of the index; and to Miss Lillian A. Ross, Associate Editor of Scientific Publications, for reading proof and seeing through the press the last six parts of the *Catalogue of Birds of the Americas*.

The final volume, Part I, No. 4, containing the Falconiformes, is now in course of publication.

PART I

NO. 3

BY CHARLES E. HELLMAYR AND BOARDMAN CONOVER

Order CHARADRIIFORMES

Suborder CHARADRII

Superfamily JACANOIDEA

Family JACANIDAE.¹ Jacanas

Genus JACANA Brisson

Jacana Brisson, Orn., 1, p. 48, 5, p. 121, 1760—type, by tautonymy, "*Jacana*"
Brisson=*Parra Jacana* Linnaeus.

Parra Linnaeus, Syst. Nat., 12th ed., 1, p. 259, 1766—type, by subs. desig.
(Gray, List. Gen. Bds., p. 70, 1840), *Parra Jacana* Linnaeus.

Asarcia Sharpe, Cat. Bds. Brit. Mus., 24, pp. 68, 86 (after July 10), 1896—
type, by monotypy, *Parra variabilis* Linnaeus=*Parra spinosa* Linnaeus.

**Jacana spinosa lowi* van Rossem.² LOW'S JACANA.

Jacana spinosa lowi van Rossem, Trans. San Diego Soc. N. H., 9, p. 11,
Nov. 21, 1938—Santiago, Tepic (=Nayarit), Mexico (type in British
Museum examined).

¹ About the anatomy, cf. Forbes, Proc. Zool. Soc. Lond., 1881, pp. 639-647.

² *Jacana spinosa lowi* van Rossem: Similar in coloration to *J. s. spinosa* but
somewhat smaller. Wing, 110-116 (in a male from Jalisco, 120); (females) 128-
130 mm.

The difference in size separating this recently segregated race is much less
marked than would appear from the describer's figures. Wings of males from
Sinaloa and Tepic measure 110, 112, 112, 112, 115, 116; (females) 128, 129, 130, 130.
A single male from Jalisco (Zapotlan) has longer wings (120 mm.) and cannot be
told from one or two Vera Cruz males with the same length. It is probable that
complete intergradation takes place in Jalisco and Colima, whence no material
is available.

Additional material examined.—Sinaloa: Mazatlan, 4; Presidio de Mazatlan, 3.
Nayarit: San Blas, 1; Santiago, 1; Tepic, 5.—Jalisco: Zapotlan, 2.

Parra gymnostoma (not of Wagler) Sclater, Proc. Zool. Soc. Lond., 24, p. 283, 1856—part, Mazatlan; Finsch, Abhandl. Naturw. Ver. Bremen, 2, p. 363, 1871—Mazatlan; Lawrence, Mem. Bost. Soc. N. H., 2, p. 312, 1874—part, Sinaloa (Mazatlan).

Jacana spinosa gymnostoma Ridgway, Bull. U. S. Nat. Mus., 50, (8), p. 12, 1919—part, Jalisco (Zapotlan; Ocotlan; Guadalajara), Sinaloa (Mazatlan; Presidio), and Tepic (San Blas; Santiago; Tepic); Peters, Bds. World, 2, p. 228, 1934¹ (in part).

Range.—Tropical zone of northwestern Mexico, from Sinaloa south through Nayarit (Santiago, San Blas, Tepic) to Jalisco (Zapotlan, Ocotlan, etc.).

Field Museum Collection.—1: Mexico (Tepic, Tepic, 1).

****Jacana spinosa spinosa* (Linnaeus). CENTRAL AMERICAN JACANA.**

Fulica spinosa Linnaeus, Syst. Nat., 10th ed., 1, p. 152, 1758—based on "The Spur-winged Water Hen" Edwards, Nat. Hist. Bds., 1, p. 48, pl. 48 (=young); brought from Carthagenia in South America, errore.¹

Parra variabilis Linnaeus, Syst. Nat., 12th ed., 1, p. 260, 1766—based upon "The Spur-winged Water Hen" Edwards, Nat. Hist. Bds., 1, p. 48, pl. 48; "Carthagenia," Colombia, errore.¹

Parra gymnostoma Wagler, Isis, 1831, col. 517—Mexico (type in Munich Museum examined; descr. of young); Sclater, Proc. Zool. Soc. Lond., 24, p. 283, 1856—part, Acapulco, "New Grenada, Santa Martha" and Honduras (crit.); Schlegel, Mus. Pays-Bas, Ralli, p. 66, 1865—Mexico, Costa Rica, "Nouvelle Grenade," and "St. Thomas"; Merrill, Proc. U. S. Nat. Mus., 1, p. 167, 1878—Fort Brown, Texas; Salvin, Proc. Zool. Soc. Lond., 1883, p. 428—Acapulco, Guerrero, Mexico; Cory, Bds. Haiti and San Dom., p. 159, col. pl., 1885—"Le Coup," Haiti.

Parra cordifera Lesson, Rev. Zool., 5, p. 135, 1842—Acapulco, Guerrero, Mexico; Des Murs, Icon. Orn., livr. 7, sig. 9, pl. 42, 1846—Acapulco (fig. of type which is stated to be in Paris Museum).

Parra hypomelaena(?) (not of Gray) Sclater, Proc. Zool. Soc. Lond., 24, p. 143, 1856—David, Chiriqui (one young).

Parra violacea Cory, Bull. Nutt. Orn. Cl., 6, pp. 130, 155, July, 1881—near Gantier, Haiti (type in collection of C. B. Cory, now in Field Museum of Natural History, examined).

Jacana violacea Cory, Auk, 5, p. 51, 1881—Cuba, Haiti, and San Domingo (descr.).

¹ "The Spur-winged Water Hen" of Edwards, based upon a spirit specimen in Sir Hans Sloane's possession, seems to be referable to the Central American form, judging from the absence of rectal wattles and from the trifid posterior margin of the frontal lappet, although its locality is given as "Cartagena," Colombia, where only the black Jacana (*hypomelaena*) is met with. Mr. Todd (Ann. Carnegie Mus., 10, p. 219, 1916) accordingly proposed Panama as corrected type locality. This was a very unfortunate choice, not only on account of the improbability that this region supplied the type, but also because *spinosa* merely occurs in extreme western Panama (Chiriqui), while in the east *hypomelaena* occurs, as will be shown.

Jacana spinosa Elliot, Auk, 5, p. 297, 1888 (monog.); Cory, Bds. W. Ind., p. 252, 1889—Cuba and Hispaniola; idem, Cat. W. Ind. Bds., p. 92, 1892—Cuba, Isle of Pines, Jamaica, Hispaniola, and Puerto Rico; Scott, Auk, 9, p. 15, 1892—Westmoreland, Jamaica; Cory, l.c., p. 272, 1892—San Diego de los Baños, Cuba; Cherrie, Field Columb. Mus., Orn. Ser., 1, p. 25, 1896—Rio Ozama, Dominican Republic; Mearns, Auk, 19, p. 79, 1902—Pelican Bay, Lake Okeechobee, Florida (Oct., 1899); Peters, l.c., 30, p. 371, 1913—Xcopen, Quintana Roo; Wetmore, Bull. U. S. Dept. Agric., 326, p. 38, 1916—Puerto Rico; Griscom and Crosby, Auk, 42, p. 532, 1925—Brownsville, Texas.

Asarcia variabilis Sharpe, Cat. Bds. Brit. Mus., 24, p. 86, 1896—part, a-f, o'-t", Texas (Brownsville), Jalapa (Santa Ana), Vera Cruz (Jomotla; Teapa), Yucatan (Buctotz; Cozumel Island), British Honduras (Orange Walk; Belize River), Guatemala (Huamuchal; Lake Peten), Nicaragua (Momotombo; Escondido River), Honduras, Costa Rica and Haiti; Bangs, Auk, 18, p. 358, 1901—Divala, Chiriqui; Salvin and Godman, Biol. Centr.-Amer., Aves, 3, p. 342, 1903—part, Mexico (excepting Sinaloa, Tepic, and Jalisco) and Central America to Chiriqui; Bangs, Bull. Mus. Comp. Zool., 39, p. 142, 1903—Ceiba, Honduras; idem, Auk, 24, p. 291, 1907—Puntarenas, Costa Rica; Carriker, Ann. Carnegie Mus., 6, p. 424, 1910—Costa Rica (Tenorio, Barranca de Puntarenas, Ichomogo, Miravalles, mouth of Matina River).

Asarcia spinosa Bangs and Zappey, Amer. Nat., 39, p. 196, 1905—Santa Rosalia Lagoon, Laguna Grande, Pasadita, and the Cienaga, Isle of Pines (habits).

Jacana spinosa violacea Todd, Ann. Carnegie Mus., 10, p. 217, 1916—Santa Ana and Pasadita, Isle of Pines (crit.); Peters, Bull. Mus. Comp. Zool., 61, p. 406, 1917—El Batey, Dominican Republic; Ridgway, Bull. U. S. Nat. Mus., 50, (8), p. 13, 1919—Greater Antilles (monog.; full bibliog.); Barbour, Mem. Nutt. Orn. Cl., 6, p. 71, 1923—Cuba (habits); Wetmore, Sci. Surv. Porto Rico and Virgin Islands, 9, p. 349, 1927—Trujillo, Puerto Rico; Bond, Proc. Acad. Nat. Sci. Phila., 80, p. 495, 1928—Lake Miragoane and near Forte Liberte, Haiti; Danforth, Auk, 46, p. 363, 1929—Haina, Laguna del Salodillo, Etang Miragoane and Gonaives, Hispaniola; Moltoni, Atti Soc. Ital. Sci. Nat., 68, p. 312, 1929—Rio Haina, Hispaniola; Wetmore and Swales, Bull. U. S. Nat. Mus., 155, p. 142, 1931—Hispaniola (monog.); Peters, Bds. World, 2, p. 228, 1934 (range); Conover, Condor, 47, p. 211, 1945 (not valid race).

Jacana spinosa spinosa Ridgway, Bull. U. S. Nat. Mus., 50, (8), p. 9, 1919—Guatemala to Chiriqui (monog.; full bibliog.); Kennard and Peters, Proc. Bost. Soc. N. H., 38, p. 448, 1928—Almirante, Panama; Peters, Bull. Mus. Comp. Zool., 69, p. 409, 1929—Toloo Lagoon, Honduras; idem, l.c., 71, p. 303, 1931—Changuinola River, Almirante, Panama; Griscom, Bull. Amer. Mus. N. H., 64, p. 137, 1932—Hacienda California, Guatemala; Stone, Proc. Acad. Nat. Sci. Phila., 84, p. 303, 1932—Laguna Toloo, Honduras; Peters, Bds. World, 2, p. 229, 1934—Guatemala to western Panama; Griscom, Bull. Mus. Comp. Zool., 78, p. 305, 1935—Chiriqui (Pacific slope east to Remedios) and Almirante, Panama; Van Tyne, Misc. Publ.

Mus. Zool. Univ. Mich., 27, p. 15, 1935—Flores, Peten, Guatemala; Carriker and de Schauensee, Proc. Acad. Nat. Sci. Phila., 87, p. 415, 1935—El Pilar, Guatemala; Dickey and van Rossem, Field Mus. Nat. Hist., Zool. Ser., 23, p. 165, 1938—Lake Olomega, San Sebastián, and Lake Guija, El Salvador.

Jacana spinosa gymnostoma Ridgway, Bull. U. S. Nat. Mus., 50, (8), p. 12, 1919—part, southern and eastern Mexico and lower Rio Grande Valley, Texas (monog.; full bibliog.); Peters, Bds. World, 2, p. 228, 1934—part, lower Rio Grande to Yucatan; Griscom, Bull. Mus. Comp. Zool., 75, p. 373, 1934—Acapulco and Pié de la Cuesta, Guerrero.

Range.—Lower Rio Grande Valley, Texas, and south through eastern and southern Mexico and Central America to extreme western Panama (Almirante Bay region; Chiriqui, east to Remedios).¹ Also Cuba, Isle of Pines, Jamaica, and Hispaniola.² Accidental in Puerto Rico.

Field Museum Collection.—66: Mexico (Tampico, Tamaulipas, 36; Matamoros, Campeche, 1; San Felipe, Yucatan, 2; Yucatan, 2); Cuba (Oriente, 1; Palacios, Pinar del Rio, 4); Hispaniola (Gantier, Haiti, 1; San Luis de San Domingo, Santo Domingo, Dominican Republic, 2); Guatemala (Petén, 1); El Salvador (San Sebastian, La Paz, 4; Laguna Olomega, San Miguel, 2); Nicaragua (Grenada, Grenada, 1; San Emilio, Rivas, 1); Costa Rica (Puntarenas, 2; Bebedero, Guanacaste, 2; Ballina, Guanacaste, 1; Limón, Limón, 3).

Conover Collection.—14: Mexico (Cruz, Tamaulipas, 1; Tamaulipas, 1; Apatzingan, Michoacan, 1); Cuba (Cunaga, Isle of Pines, 2); Guatemala (Iztapa, Santa Rosa, 4; Quezaltenango, 1); Panama (Cricamola, Bocas del Toro, 2; Bocas del Toro, 2).

¹ After closely comparing ninety-six adults from numerous localities between Brownsville, Texas, and Costa Rica, I am quite unable to maintain the distinction of *J. s. gymnostoma* from Mexico. The size of the frontal lappet varies a good deal individually but is not connected with any particular geographic area, the shield being largest in one bird from Brownsville and in another from Crooked-Tree Lagoon, British Honduras. There is no constant difference in the tone of the under plumage, nor does the larger size of the Mexican birds exist. A single female from Acapulco (*cordifera*) resembles in size (wing, 135) others of the same sex from eastern Mexico (Vera Cruz), being decidedly larger than *J. s. lowi*. About the "Santa Marta" record of *P. gymnostoma* by Sclater (Proc. Zool. Soc. Lond., 24, p. 283, 1856), cf. Todd, Ann. Carnegie Mus., 14, p. 187, 1922, under *Jacana spinosa spinosa*.—C.E.H.

² A comparison of twenty-nine examples from the Greater Antilles with a good series from Central America does not show any constant difference in coloration or in the size of the lappets, as stated by Ridgway.—B.C.

Additional material examined.—Isle of Pines: Nueva Girona, 3.—Cuba: Caaban, 5.—Dominican Republic: Enriguillo, 2; Lake of Rincon, 1.—Haiti: Lake Assuei, 3; Etang Saumatre, 1; Miragoane, 1; Fort Liberty, 2.—Jamaica: Hodges, Long Pond, 1.

**Jacana spinosa hypomelaena* (Gray).¹ BLACK JACANA.

Parra hypomelaena Gray (and Mitchell), Gen. Bds., 3, p. [589], pl. 159, 1846—no locality given (type from Bogotá in British Museum examined); Sclater, Proc. Zool. Soc. Lond., 24, p. 283, 1856—Santa Marta, Cartagena, and Bogotá, Colombia² (crit.); idem, l.c., 25, p. 20, 1857—Bogotá; Cassin, Proc. Acad. Nat. Sci. Phila., 1860, p. 196—Atrato River, Colombia; Salvin, Proc. Zool. Soc. Lond., 1870, p. 218—Calobre, Panama (crit.); Wyatt, Ibis, 1871, pp. 116, 383—Cienaga, Lake Paturia, and delta of the Magdalena River, Colombia; Sclater and Salvin, Proc. Zool. Soc. Lond., 1879, p. 546—"Santa Elena,"³ Antioquia, Colombia (eggs descr.).

Parra melanopygia (not of Sclater) Lawrence, Ann. Lyc. Nat. Hist. N. Y., 7, p. 301, 1861—Lion Hill, Panama; Sclater and Salvin, Proc. Zool. Soc. Lond., 1864, p. 372—Lion Hill; Salvin, l.c., 1867, p. 161—Santa Fe, Veraguas; idem, l.c., 1870, p. 218—Calobre and Castello, Veraguas (crit.); idem and Godman, Biol. Centr.-Amer., Aves, 3, p. 341, 1903—Veraguas (Castillo, Santa Fe, Calobre).

¹*Jacana spinosa hypomelaena* (Gray) in typical appearance has the body plumage uniform black with a more or less pronounced bottle-green gloss, especially above, and a purplish sheen on scapulars and inner secondaries. Specimens with this "extreme" type of coloration are, however, less frequent than individuals with a varying amount of purplish or maroon suffusion on middle back, scapulars, upper wing coverts and secondaries. The under wing coverts are always uniform olivaceous black. There are two well-developed rictal wattles, and the posterior margin of the frontal lappet is distinctly bifid. Birds from the Panama Railroad and Agua Dulce agree perfectly with the type and other Colombian skins. In juvenile plumage, *J. s. hypomelaena* is readily distinguished from *spinosa*, *intermedia*, and *jacana* by sooty blackish instead of rufous rump, sides, and under wing coverts.

A small series from Veragua is very interesting, showing as it does complete intergradation between *hypomelaena* and *spinosa*. While two from Calobre may be termed typical *hypomelaena* in respect to black coloration of plumage, rictal lobes and bifid frontal lappets, two others, both with rictal appendages, have more or less purplish maroon suffusion on middle back and wings, and in one of them there is a small median lobe between the two large lateral divisions of the frontal lappet. In two others, finally, the rictal lobes are greatly reduced in size; the posterior margin of the frontal lappet is distinctly trifid as in *spinosa*; and the middle back and scapulars are just as extensively rufous as in the Central American form, though of a darker tone (between morocco red and claret brown), the upper tail coverts being either chestnut or taupe brown. Below they are olivaceous black like *hypomelaena* on throat and breast, but shaded with purplish on the abdomen and with more or less claret brown on the flanks, particularly in the Castillo bird, where it also involves most of the under wing coverts. Such specimens, which are clearly intergrades with the northern form, are probably responsible for Griscom's record of *J. s. spinosa* from Remedios Lagoon in Veraguas.

Additional material examined.—Panama: Santa Fe, Veraguas, 1; Calobre, Veraguas, 6; Castillo, Veraguas, 1; Agua Dulce, 6; Lion Hill, 2.—Colombia: Barranquilla, 2; Antioquia, 1; St. Elena, Antioquia, 2; Bogotá, 9; Santa Marta, 2; La Playa, 7; Puerto Berrio, 2; Monteria, 1.

² The locality "David, Panama," based on a young bird secured by T. Bridges, refers, of course, to *J. s. spinosa*.

³ This locality is certainly a mistake. It does not occur on Salmon's original label, which merely bears "Antioquia." The bird probably came from Remedios on the Rio Ite, which flows into the Magdalena River.

Parra nigra (not *Parra nigra* Gmelin)¹ Schlegel, Mus. Pays-Bas, Ralli, p. 65, 1865—New Granada (crit.); Salvadori and Festa, Bull. Mus. Zool. Torino, 14, No. 339, p. 12, 1899—Laguna Pita, Darien, Panama; Salvin and Godman, Biol. Centr.-Amer., Aves, 3, p. 342, 1903—part, Panama (Calobre; Lion Hill; Laguna de Pita) and Colombia.

Jacana nigra (not *Parra nigra* Gmelin)¹ Elliot, Auk, 5, p. 296, 1888—Colombia (Cartagena; Antioquia; Barranquilla; Santa Marta) and Panama (descr.; synon. in part); Sharpe, Cat. Bds. Brit. Mus., 24, p. 84, 1896—Panama (Lion Hill; Calobre, Veraguas) and Colombia (Antioquia; Bogotá); Bangs, Proc. New Eng. Zool. Cl., 2, p. 14, 1900—Loma del Leon, Panama; Allen, Bull. Amer. Mus. N. H., 13, p. 126, 1900—Cienaga, Colombia; Chapman, l.c., 36, p. 226, 1917—Puerto Barrio, Calamar, Magdalena River, Barranquilla, and La Playa, Colombia; Stone, Proc. Acad. Nat. Sci. Phila., 70, p. 246, 1918—Lake Agua Clara (Trinidad River) and Mindi, Canal Zone, Panama; Ridgway, Bull. U. S. Nat. Mus., 50, (8), p. 15, 1919—part, Panama and Colombia (excl. of Guabinas, Rio Cauca); Todd and Carriker, Ann. Carnegie Mus., 14, p. 187, 1922—Cienaga, Mamatoco, Don Diego, and Fundacion, Colombia (crit.); Hallinan, Auk, 41, p. 309, 1924—Rio Chilibre and Darien Radio Station, Canal Zone, Panama; Darlington, Bull. Mus. Comp. Zool., 71, p. 377, 1931—Cienaga and Rio Frio, Magdalena, Colombia; Griscom, l.c., 72, p. 321, 1932—Perme, Panama.

Jacana spinosa hypomelaena Peters, Bds. World, 2, p. 229, 1934—Panama (from the Veraguas eastward) and northern Colombia.

Jacana hypomelaena Griscom, Bull. Mus. Comp. Zool., 78, p. 305, 1935—Panama (Veraguas and eastward).

Range.—From Veraguas, Panama, east through northern Colombia to the Santa Marta region and south to the lower Cauca (Nechi) and the upper Magdalena valleys.

Field Museum Collection.—10: Panama (Colon, 4); Colombia ("Bogotá," 3; Monteria, 1; "St. Elena," Antioquia, 2).

Conover Collection.—5: Colombia (Nechi, Antioquia, 4; Cuturu, Antioquia, 1).

****Jacana spinosa melanopygia* (Sclater).² BLACK-RUMPED JACANA.**

¹ *Parra nigra* Gmelin (Syst. Nat., 1, (2), p. 708, 1789) is exclusively based upon "Le Chirurgien noir" Brisson (Orn., 5, p. 124), which is based in its turn on "Jacana tertia species" of Marcgrave (Hist. Nat. Bras., p. 191), a bird of northeastern Brazil (cf. Hellmayr, Field Mus. Nat. Hist., Zool. Ser., 12, p. 490, note 7, 1929). Schneider (Journ. Orn., 86, p. 85, 1938), who recently unearthed Marcgrave's original drawing, claims that it represents *Gallinula chloropus galeata* (Lichtenstein). However, the description in Marcgrave's work is evidently a composite of characters of the ordinary Brazilian Jacana (*J. s. jacana*) and of the Gallinule. In no case does *Parra nigra* Gmelin refer to the Black Jacana of northwestern South America and Panama.

² *Jacana spinosa melanopygia* (Sclater): Nearest to *J. s. hypomelaena* and agreeing in olivaceous black under parts; but back, scapulars, proximal wing coverts

Parra melanopygia Sclater, Proc. Zool. Soc. Lond., 24, "1856," p. 283, pub. Jan., 1857—"Santa Marta in New Grenada" (type in collection of E. and J. Verreaux, its present location unknown).

Jacana melanopygia Chapman, Bull. Amer. Mus. N. H., 36, p. 225, 1917—Cali and Rio Frio, Cauca, Colombia (crit.).

Jacana nigra (not *Parra nigra* Gmelin) Ridgway, Bull. U. S. Nat. Mus., 50, (8), p. 15, 1919—part, Guabinas, Cauca, Colombia; Osgood and Conover, Field Mus. Nat. Hist., Zool. Ser., 12, p. 43, 1922—Rio Cogollo, Catatumbo, Maracaibo, Rio Aurare, and Encontrados, Zulia, Venezuela.

Jacana spinosa melanopygia Peters, Bds. World, 2, p. 229, 1934—Cauca Valley, Colombia, and Maracaibo region, Venezuela.

Range.—Known from the upper and middle Cauca Valley in western Colombia and from the region about Lake Maracaibo and Merida, western Venezuela.

Field Museum Collection.—10: Venezuela (Rio Aurare, Zulia, 1; Maracaibo, Zulia, 1; Encontrados, Zulia, 4; Rio Catatumbo, Zulia, 2; Lagunillas, Merida, 1; Emigrante, Merida, 1).

Conover Collection.—8: Colombia (Timba, Valle, 6); Venezuela (Rio Cogollo, Perija, Zulia, 2).

****Jacana spinosa intermedia* (Sclater).¹ INTERMEDIATE JACANA.**

and tertials maroon, this area being abruptly defined from the greenish black color of the hindneck and rump. Wing, 115–120, (female) 125–138 mm. The series at hand is quite constant in its characters, differing decidedly from *J. s. hypomelaena*; but, what is even more remarkable, we cannot find any difference whatsoever between the Maracaibo birds and those from the Cauca Valley in spite of the fact that the intervening Magdalena Valley is tenanted by the entirely black form (*hypomelaena*). As both Chapman and Ridgway likewise insist on the fact that the population of the Cauca Valley (whence a series totaling nearly twenty specimens from Cali, Rio Frio and Guabinas was available) consists exclusively of maroon-backed birds, there can be no question about the geographical nature of this character and even if similar examples occasionally turn up in the range of *J. s. hypomelaena*—one has been recorded by Todd from Bonda in the Santa Marta region—this cannot materially affect the situation. Although we cannot explain its disrupted distribution, the claims of the present form to recognition must be sustained. On the other hand, the applicability of the name *melanopygia* is altogether uncertain. The type, whose present whereabouts are unknown, was received from the brothers Verreaux, together with specimens of *J. s. hypomelaena* and *J. s. spinosa*, as being from Santa Marta, where only *hypomelaena* is now known to occur. Perhaps the true origin of the lot was Panama, in which case the type might have been an intergrade of the kind discussed under the preceding heading. Compared to the rufous-backed Veraguan skins, the present series differs by much darker maroon to Victoria Lake instead of between morocco red and claret brown, dorsal area; dusky green gray instead of claret brown to Victoria Lake rump.

¹*Jacana spinosa intermedia* (Sclater): Exactly like *J. s. jacana* but smaller and rufous dorsal area decidedly darker, morocco red rather than mahogany red. Wing, 112–120, (female) 128–136.

By the darker coloration above, this form leads in the direction of *J. s. melanopygia* of the Maracaibo region, but it is easily distinguished by the much lighter

Parra intermedia (Verreaux MS.) Sclater, Proc. Zool. Soc. Lond., 24, "1856," p. 282, pub. Jan. 1857—Venezuela; (type in collection of E. and J. Verreaux, its present location unknown).

Jacana spinosa intermedia Peters, Bds. World, 2, p. 229, 1934—Venezuela; Conover, Condor, 47, p. 211, 1945 (disc.).

Jacana spinosa jacana Belcher and Smooker, Ibis, 1935, p. 286—Trinidad (nest and egg descr.).

Range.—Northern Venezuela, from the eastern slope of the Andes to the Paria Peninsula, south to the Orinoco Valley, west to eastern Colombia (La Morelia, Caqueta) and the island of Trinidad.

Field Museum Collection.—5: Venezuela (Maracay, Aragua, 4; Lake Valencia, Aragua, 1).

Conover Collection.—5: Colombia (Morelia, Caqueta, 3; Belen, Caqueta, 1; Villavicencio, Meta, 1).

tone of the dorsal area and the entirely rufous flanks and under wing coverts, both of which are mostly, if not wholly, greenish black in its western ally. A single bird from Trinidad and three from Ciudad Bolivar, Orinoco, are typical of *intermedia*.

Additional material examined.—Colombia: La Morelia, Caqueta, 1.—Venezuela: El Cuji, Lara, 1; Duaca, Lara, 1; Valencia, Carabobo, 2; Guanoco, Sucre, 2; San Antonio, Sucre, 3; Altagracia, 3; Sacupana, Orinoco Delta, 2.

****Jacana spinosa peruviana* Zimmer.¹ PERUVIAN JACANA.**

Jacana spinosa peruviana Zimmer, Field Mus. Nat. Hist., Zool. Ser., 17, p. 253, Dec. 10, 1930—Masiseo, lower Ucayali River, Loreto, Peru (type in Conover Collection, Field Museum of Natural History); Peters, Bds. World, 2, p. 230, 1934 (range).

Parra jacana (not of Linnaeus) Sclater and Salvin, Proc. Zool. Soc. Lond., 1866, p. 200—Nauta, Peru; iidem, l.c., 1873, p. 309—Nauta and Santa Cruz, Peru; Taczanowski, Orn. Per., 3, p. 331, 1886—part, Nauta and Santa Cruz.

Parra melanopygia (not of Sclater) Berlepsch, Journ. Orn., 37, p. 320, 1889—Sarayacu, lower Ucayali River.

Jacana jacana Sharpe, Cat. Bds. Brit. Mus., 24, p. 82, 1896—part, spec. m-n, Pebas and Elvira, Peru (spec. examined).

Range.—Tropical zone of northern Peru (Pebas; Nauta; Elvira; lower Ucayali River).

Conover Collection.—6: Peru (Masiseo, Loreto, 1; Yarinacocha, Rio Ucayali, 5).

****Jacana spinosa scapularis* Chapman.² BLACK-STRIPED JACANA.**

Jacana scapularis Chapman, Amer. Mus. Nov., 31, p. 3, March 2, 1922—Chone, Manavi, Ecuador (type in the American Museum of Natural History, New York); idem, Bull. Amer. Mus. N. H., 55, p. 201, 1926—Chone and Santa Rosa, Ecuador.

Parra jacana (not of Linnaeus) Sclater, Proc. Zool. Soc. Lond., 28, p. 290, 1860—Babahoyo, Ecuador; Taczanowski, l.c., 1877, p. 329—Pozo de

¹*Jacana spinosa peruviana* Zimmer: Similar to *J. s. intermedia*, but rufous dorsal area slightly darker, claret brown rather than morocco red; sides of body with less, if any rufous; under wing coverts either wholly or partly black. Wing, (female) 135–138.

Judging from the few specimens at hand, this is rather an unsatisfactory race which needs substantiation by an adequate series. One of the two adult Ucayali birds has no rufous either on flanks or under wing coverts, while the other specimen, like one from Pebas, has both these parts just as extensively rufous (though slightly darker in tone) as *J. s. intermedia*. Size is apparently the same. From *J. s. melanopygia* it is easily separated by markedly lighter (claret brown, rather than maroon) back, scapulars and tertials, and particularly by purplish instead of greenish black rump and upper tail coverts.

It would not be surprising to find that this form intergrades with *intermedia* in eastern Ecuador.

Additional material examined.—Peru: Pebas, 1; Elvira, 1; Sarayacu, Rio Ucayali, 1.

²*Jacana spinosa scapularis* Chapman: Nearest to *J. s. jacana*, but distinguished by lighter back, the presence of a broad black stripe across the scapulars, and by having the light zone of the three outer primaries very nearly white (instead of pale green as on the other remiges). On the under parts the black of the chest generally extends in an irregular line down the center of the breast and belly. Immatures can be identified by the light outer primaries. Wing, 116, (female) 134.

Additional material examined.—Ecuador: Balzar, 1; Vines, "Yanayacu," 1; Isla la Silva, 2.

Lamberedo, near Lechugal, Tumbez, Peru; idem and Berlepsch, l.c., 1885, p. 112—Yaguachi, Ecuador; Taczanowski, Orn. Per., 3, p. 331, 1886—part, Tumbez; MacFarlane, Ibis, 1887, p. 209—Guayaquil, Ecuador; Salvadori and Festa, Boll. Mus. Zool. Torino, 15, No. 368, p. 42, 1900—Naranjal and Vinces, Ecuador; Goodfellow, Ibis, 1902, p. 231—"Rio Napo," Ecuador (errore).

Parra intermedia (not of Sclater) Lawrence, Ann. Lyc. Nat. Hist. N. Y., 10, p. 238, 1869—Puna Island, Ecuador (crit.).

Gran Chaco Exp., Vogel, p. 62, 1930—Formosa (Lapango, San José, and Las Taperas, Santa Cruz); Peters, Bds. World, 2, p. 229, 1934 (range, excl. of Trinidad); Pinto, Rev. Mus. Paul., 19, p. 89, 1935—Rio Gongogy and Cahype, Bahía; idem, l.c., 20, p. 44, 1936—Inhúmas, Goyaz; idem, l.c., 22, p. 124, 1938—Pará (Santarem), Maranhão (Miritiba), Bahía (Rio Gongogy; Cahype), Goyaz (Inhúmas), Matto Grosso (Miranda; Coxim; Aquidauana), São Paulo (Itapura; Ubaituba; Ypiranga; Jundiáhy; São Carlos; Pirituba), Paraná (Jacarézinho); idem, l.c., 23, p. 545, 1938—Manacapuru, Rio Solimoes, Brazil; Gyldenstolpe, K. Svensk. Vetensk. Akad. Handl., (3), 22, p. 42, 1945—João Pessoa, Rio Jurua, Brazil (disc.); idem, l.c., (3), 23, p. 70, 1945—Bolivia (Victoria, Reyes and Bresta, El Beni; Tatarenda, Tarija), (disc.).
- Jacana jacana intermedia* (not *Parra intermedia* Sclater) Naumburg, Bull. Amer. Mus. N. H., 60, p. 83, 1930—Rio Solimoes, Brazil.
- Jacana spinosa dorsalis*(a) Brodtkorb, Proc. Biol. Soc. Wash., 52, p. 185, Dec. 15, 1939—Horqueta, Paraguay (type in Museum of Zoology, University of Michigan).¹

Range.—From the Guianas over the greater part of Brazil and eastern Bolivia to Argentina (south to the provinces of Córdoba and Buenos Aires), Paraguay and Uruguay.¹

Field Museum Collection.—40: British Guiana (Buxton, 14; Potaro Landing, 1; Georgetown, 3; New Amsterdam, 5; unspecified, 1); Dutch Guiana (Paramaribo, 2; Wanika Kreek, 1); Brazil (Bõa Vista, Amazonas, 5; São Bento, Maranhão, 1; Jua, Ceará, 1; Quixadá,

¹ Birds from the tableland of Brazil and the adjoining districts of Argentina and Paraguay agree well with a Guianan series, while those from the Amazon Valley have a tendency to darker dorsal coloration. Some individuals come very close to *J. s. intermedia*, but others are not distinguishable from Guiana skins. The latter, moreover, vary a good deal and certain birds are just as dark as the Amazonian examples, one from near Paramaribo being even darker. The specimen taken near Frejus, southern France, recorded by Gurney (Ibis, 1901, p. 400), must have been an escape from captivity.

Ninety additional specimens from the entire range examined.

Ceará, 3; Santa Rita, Bahía, 1); Paraguay (Patino, 1); Argentina (Lagunas de Malvina, Tucumán, 1).

Conover Collection.—46: British Guiana (Buxton, E. C., Demerara, 5); Dutch Guiana (Paramaribo, 1); Brazil (São Francisco, Maranhão, 1; Ibiapaba, Piauí, 2; Deserto, Piauí, 2; Rio Manacapuru, Amazonas, 3; Caxiricatuba, Pará, 6; Rio Parana, Goyaz, 1; Vaccaria, Matto Grosso, 1); Paraguay (Villa Rica, 7; Colonia Nueva Italia, near Villeta, 3; 20 km. east of Islapoi, Chaco, 1); Bolivia, Santa Cruz (Comparapa, 1; Nueva Moka, 3; Rio Surutu, 1); Argentina (Alvarez Yonte, Buenos Aires, 1; Concepción, Tucumán, 7).

Superfamily CHARADRIOIDEA

Family ROSTRATULIDAE.¹ Painted Snipes

Genus NYCTICRYPHES Wetmore and Peters²

Nycticryphes Wetmore and Peters, Proc. Biol. Soc. Wash., 36, p. 143, May 1, 1923—type, by orig. desig., *Totanus semi-collaris* Vieillot.

**Nycticryphes semi-collaris* (Vieillot). SOUTH AMERICAN PAINTED SNIPE.

Totanus semi-collaris Vieillot, Nouv. Dict. Hist. Nat., nouv. éd., 6, p. 402, 1816—based upon "Chorlito golas obscura y blanca" Azara, No. 405, Paraguay.

Tringa atricapilla Vieillot, Nouv. Dict. Hist. Nat., nouv. éd., 34, p. 474, 1819—based on "Chorlito cabeza y cuello oscuros" Azara, No. 406, Buenos Aires.

Rhynchaea hilairea Lesson,³ in Férussac, Bull. Sci. Nat. Géol., 26, p. 191, July, 1831—no locality (type in collection of M. Pecquet-Deschamps, Caen); idem, Illust. Zool., livr. 6, pl. 18, Feb. 23, 1833—"in provincia San-Paulo," Brazil; Tschudi, Unters. Faun. Peru., Orn., p. 300, 1846—"forests of central Peru."

¹ For characters of the family, cf. Lowe, Ibis, 1931, pp. 507-530, 762; 1932, pp. 390-391.

² *Nycticryphes* Wetmore and Peters differs markedly from *Rostratula* Vieillot, an Old-World group, by having the bill more curved at the tip, the tip expanded on both mandibles, with the distal end distinctly pitted; a median groove to the distal end of the gonys; a slight web between outer and middle toes; and the tail strongly wedge-shaped, the median rectrices tapered and soft in structure at the tip with the median upper and lower tail coverts longer than the lateral tail-feathers.

³ *Rhynchaea hilairea* Cuvier (Reg. Anim., 2nd éd., 1, p. 524, 1829) and *R. hilairea* Lesson (Traité d'Orn., p. 557, 1831) are nomina nuda. The specimen in the Paris Museum (cf. Oustalet, Miss. Sci. Cap Horn, 6, p. B. 294, 1891), therefore, has no claim to be the type.

Rhynchaea occidentalis King, Zool. Journ., 4, No. 13, p. 97, April-July, 1828—"Straits of Magellan" (type apparently lost).

Rhynchaea semicollaris Darwin, Zool. Beagle, 3, Birds, p. 131, 1841—Montevideo, Rio Plata; Fraser, Proc. Zool. Soc. Lond., 11, p. 118, 1843—Chile; Des Murs, in Gay, Hist. Fís. Pol. Chile, Zool., 1, p. 429, 1847—central provinces of Chile; Peale, U. S. Expl. Exp., 8, p. 226, 1848—Chile; Bibra, Denks. Math.-Naturw. Kl. Akad. Wiss. Wien, 5, p. 131, 1853—near Santiago, Chile; Cassin, in Gilliss, U. S. Astr. Exp., 2, p. 194, 1855—vicinity of Santiago; Germain, Proc. Bost. Soc. N. H., 7, p. 313, 1860—Santiago (breeding habits); Schlegel, Mus. Pays-Bas, No. 27 (Scolopaces), p. 18, 1864—Buenos Aires and Santiago de Chile; Sclater, Proc. Zool. Soc. Lond., 1867, p. 339—Chile; idem and Salvin, l.c., 1868, p. 144—Conchitas, Buenos Aires; Philippi, Anal. Univ. Chile, 31, p. 277, 1868—central provinces [of Chile] "to Straits of Magellan"; Reinhardt, Vidensk. Medd. Naturh. Foren., 1870, p. 38 (note), 1870—Province of São Paulo; Durnford, Ibis, 1876, p. 164—Belgrano, Buenos Aires (nest and eggs); Reed, Anal. Univ. Chile, 49, p. 567, 1877—Laguna de Cauquenes, Colchagua, Chile; Durnford, Ibis, 1877, pp. 42, 199—Chubut Valley, Patagonia, and Buenos Aires Province; idem, l.c., 1878, p. 403—Chubut Valley (rare); Sharpe, Proc. Zool. Soc. Lond., 1881, p. 16—Coquimbo, Chile; Salvin, Cat. Strickl. Coll., p. 608, 1882—Valparaíso, Chile; idem, Proc. Zool. Soc. Lond., 1883, p. 429—Coquimbo; Barrows, Auk, 1, p. 314, 1884—Concepción del Uruguay, Entre Ríos; Taczanowski, Orn. Pér., 3, p. 378, 1886—"Peru" (ex Tschudi); Seebohm, Geog. Distr. Charad., p. 459, pl. 19, 1887 (crit.); Withington, Ibis, 1888, p. 472—Lomas de Zamora, Buenos Aires; Sclater and Hudson, Arg. Orn., 2, p. 182, 1889—Argentina (habits); Holland, Ibis, 1891, pp. 16, 20—Est. Espartillar, Buenos Aires; idem, l.c., 1892, p. 211—same locality (breeding); Waugh and Lataste, Act. Soc. Scient. Chile, 5, p. lx, 1895—Peñaflor, Santiago; Reed, Anal. Univ. Chile, 93, p. 210, 1896—Chile; Lane, Ibis, 1897, p. 310—Arauco, Chile (habits); Kerr, l.c., 1901, p. 236—Paraguayan Chaco; Grant, l.c., 1911, p. 467—Los Yngleses, Ajó, Buenos Aires; Gibson, l.c., 1920, p. 65—Cape San Antonio, Buenos Aires (breeding habits); Jaffuel and Pirion, Rev. Chil. Hist. Nat., 31, p. 113, 1927—Marga-Marga, Valparaíso, Chile.

Rhynchaea hilaerea Burmeister, Syst. Uebers. Th. Bras., 3, p. 378, 1856—Paraguay, Chile, and the La Plata region.

Rhynchaea hilaerea Burmeister, Journ. Orn., 8, p. 261, 1860—Rio Paraná, Argentina; idem, Reise La Plata St., 2, p. 504, 1861—Rio Paraná.

Rostratula semicollaris Sharpé, Cat. Bds. Brit. Mus., 24, p. 690, 1896—Argentina (Buenos Aires, Lomas de Zamora, Córdoba, Mendoza), Uruguay (Montevideo), Chile (Coquimbo, Santiago, Arauco), and "Peru"; Lillo, Anal. Mus. Nac. Buenos Aires, 8, p. 214, 1902—Rio Salí and Laguna de Malvinas, Tucumán; Ihering, Rev. Mus. Paul., 5, p. 288, 1902—São Paulo and "Rio de Janeiro (Sarapuhy)"; idem, Cat. Faun. Braz., 1, p. 56, 1907 (range); Hartert and Venturi, Nov. Zool., 16, p. 252, 1909—Barracas al Sud, Buenos Aires, and Laguna de Malvinas, Tucumán; Dabbene, Anal. Mus. Nac. Buenos Aires, 18, p. 221, 1910 (range in Argentina); Scott and Sharpe, Rep. Princet. Univ. Exped. Patagonia, 2, p. 342, 1910—Ensenada, Buenos Aires (descr.); Sanzin, El Hornero, 1,

p. 148, 1918—Mendoza; Tremoleras, l.c., 2, p. 14, 1920—Uruguay (Montevideo, Canelones, Treinta y Tres, Cerro Largo); Daguerre, l.c., p. 263, 1922—Rosas, Buenos Aires; Serié and Smyth, l.c., 3, p. 41, 1923—Santa Elena, Entre Ríos; Giacomelli, l.c., p. 80, 1923—La Rioja.

Nycticryphes semicollaris Peters, Bull. Mus. Comp. Zool., 65, p. 298, 1923—Huanuluan, Rio Negro; Pereyra, El Hornero, 3, p. 163, 1923—Zalaya, Buenos Aires; Wilson, l.c., p. 353, 1926—Venado Tuerto, Santa Fé; Wetmore, Bull. U. S. Nat. Mus., 133, p. 163, 1926—Buenos Aires (Lavalle) and Uruguay (below San Vicente); Pereyra, El Hornero, 4, p. 24, 1927—Zelaya, Buenos Aires; Hellmayr, Field Mus. Nat. Hist., Zool. Ser., 19, p. 391, 1932—Coquimbó to Arauco, Chile; Peters, Bds. World, 2, p. 230, 1934 (range); Laubmann, Verh. Orn. Ges. Bay., 20, p. 267, 1934—Hersilia, Santa Fé; Pereyra, El Hornero, 5, p. 366, 1934—Argentina (descr. plumages, habits); Pinto, Rev. Mus. Paul., 22, p. 125, 1938—La Plata and Rio Negro.

Range.—Central provinces of Chile (from Coquimbó to Arauco), and from the Paraguayan Chaco and Uruguay south to the Rio Negro Territory, Argentina.¹ Also recorded from São Paulo, Brazil (A. de Saint Hilaire, Lund).

Field Museum Collection.—1: Argentina (Tunuyan, Mendoza, 1).

Conover Collection.—5: Paraguay (Laguna General Diaz, Chaco, 2); Chile (Paine, Santiago, 1); Argentina (Concepción del Uruguay, Entre Ríos, 1; Rosas, Province of Buenos Aires, 1).

Family HAEMATOPODIDAE. Oyster-Catchers

Genus HAEMATOPUS Linnaeus

Haematopus Linnaeus, Syst. Nat., 10th ed., 1, p. 152, 1758—type, by monotypy, *Haematopus ostralegus* Linnaeus.

Ostralega Brisson, Orn., 5, p. 38, 1760—type, by tautonymy, "*Ostralega*" = *Haematopus ostralegus* Linnaeus.

Ostralega Bonnaterre, Tabl. Enc. Méth., Orn., 1, p. lxxxii, 1791 (emendation).

Ostralegus Macgillivray, Man. Brit. Orn., 2, p. 58, 1842 (emendation).

Prohaematopus Mathews, Bds. Australia, 3, (1), p. 12, Apr. 2, 1913—type, by orig. desig., *Haematopus quoyi* Brabourne and Chubb = *Haematopus ater* Vieillot and Oudart.

**Haematopus ostralegus bachmani* Audubon. BLACK OYSTER-CATCHER.

Scolopax nigra (not *Scolopax niger* Menschen, 1787) Gmelin, Syst. Nat., 1, (2), p. 659, 1789—based on "Black Snipe" Pennant, Arct. Zool., 2, p.

¹ The records of the Painted Snipe from "Peru," where Tschudi claims to have shot examples in "the forests," and "Straits of Magellan" (King) are obviously erroneous.

469, and Latham, Gen. Syn. Bds., 3, (1), p. 153, "islands between northern Asia and America"—Aleutian Islands.

Haematopus bachmani Audubon, Bds. Amer., folio ed., 4, pl. 427, fig. 1, 1838 (present location of type unknown);¹ idem, Orn. Biogr., 5, p. 245, 1839—"mouth of the Columbia River"—near Puget Sound, Washington (cf. Burns, Auk, 51, p. 403, 1934); Turner, Contr. Nat. Hist. Alaska, 2, p. 151, 1886—Alaska (Aleutian Islands west to Kiska and islands south of Aliaskan Peninsula); Ridgway, Bull. U. S. Nat. Mus., 50, (8), p. 40, 1919 (monog.; full bibliog.); Preble and McAtee, N. Amer. Fauna, 46, p. 81, 1923—St. George Island, Pribilof Islands; Low, Bull. Brit. Orn. Cl., 44, p. 19, 1923 (range); Murphy, Amer. Mus. Nov., 194, p. 13, 1925 (crit.); Bailey, Auk, 44, p. 197, 1927—southern Alaska (nesting); Grinnell, Univ. Calif. Pub. Zool., 32, p. 100, 1928—Lower California; Bent, Bull. U. S. Nat. Mus., 146, p. 320, 1929 (range; life hist.); Webster, Wilson Bull., 53, p. 141, 1941—Sitka (nesting habits); idem, Condor, 43, p. 175, 1941—Alaska (status; life hist.); idem, l.c., 44, p. 205, 1942 (growth; pls.); idem, Wilson Bull., 55, p. 42, 1943 (descr. pullus and comparison with that of *palliatu*s); Gabrielson, Auk, 61, p. 122, 1944—Aleutian Islands (nesting).

Haematopus ostralegus bachmani Stresemann, Orn. Monatsber., 35, p. 73, 1927 (char.; range); Peters, Bds. World, 2, p. 231, 1934 (range).

Range.—Breeds in the Aleutian Islands and on the west coast of North America from the Alaska Peninsula south to the Pacific coast of central Lower California; winters from southern Alaska to Lower California.

Field Museum Collection.—22: Alaska (Morzhovoi Bay, 1; Wolf Rocks, 1; Dall Island, 1; Craig, Prince of Wales Island, 2; Walrus Island, 1; unspecified, 1); British Columbia (Bear Island, 1; Vancouver Island, 1); Washington (Bird Rock, San Juan County, 1; Clallam Bay, 1); California (Eureka, 1; Carmel Bay, 4; Santa Cruz Island, 3; unspecified, 1); Mexico, Lower California (Santa Rosa Island, 1; San Geronimo Island, 1).

Conover Collection.—9: British Columbia (Sidney Island, 1; Queen Charlotte Islands, 3); Washington (Jefferson County, 2); Oregon (Netarts, 2); California (San Luis Obispo County, 1).

****Haematopus ostralegus frazari* Brewster.² FRAZAR'S OYSTER-CATCHER.**

Haematopus frazari Brewster, Auk, 5, p. 84, Jan., 1888—Carmen Island, Gulf of California (type in collection of W. Brewster, now in Museum of

¹ Probably lost; cf. Stone, Proc. Acad. Nat. Sci. Phila., 1899, p. 17 (note).

² *Haematopus ostralegus frazari* Brewster, though very similar to *H. o. galapagensis*, is clearly the southern representative of *H. o. bachmani*, with which it hybridizes or intergrades in the central parts of Lower California (cf. Bancroft, Condor, 29, pp. 51–54, 1927).

Comparative Zoology, Cambridge, Mass.; cf. Bangs, Bull. Mus. Comp. Zool., 70, p. 175, 1930); Bryant, Proc. Calif. Acad. Sci., (2), 2, p. 275, 1889—Magdalena Bay and Santa Margarita Island, Lower California; Townsend, Proc. U. S. Nat. Mus., 13, p. 138, 1890—Concepción Bay, Lower California; Sharpe, Cat. Bds. Brit. Mus., 24, pp. 117, 730, 1896—part, spec. a, i, Tres Marias Islands and Colima (Rio Zacatula); Brewster, Bull. Mus. Comp. Zool., 41, p. 74, 1902—Lower California; Grinnell and Daggett, Auk, 20, p. 33, 1902—Los Coronados Islands; Salvin and Godman, Biol. Centr.-Amer., Aves, 3, p. 348, 1903—part, Lower California and Tres Marias Islands; Bailey, Auk, 23, p. 384, 1906—near San Blas, White Rock, and Isabel Island, Tepic; Thayer and Bangs, Condor, 9, pp. 78, 80, 1907—Cerro and Natividad Islands, Lower California (crit.); McLellan, Proc. Calif. Acad. Sci., (4), 15, p. 294, 1926—Tres Marias (Maria Madre, Maria Magdalena) and Isabel Island; Bancroft, Condor, 29, p. 51, 1927—Scammons Lagoon, Lower California (breeding; crit.; disc. relationship with *bachmani*; black phase).

Haematopus palliatus (not of Temminck) Grayson, Proc. Bost. Soc. N. H., 14, p. 284, 1872—Tres Marias Islands; Lawrence, Mem. Bost. Soc. N. H., 2, p. 308, 1874—Sinaloa (Mazatlán), Isabel Island, Tres Marias Islands, and Colima (Rio Zacatula); Belding, Proc. U. S. Nat. Mus., 5, p. 527, 1883—Los Coronados Islands; idem, l.c., 6, p. 351, 1883—La Paz, Lower California; Evermann, Auk, 3, p. 92, 1886—Ventura County, California; Nelson, N. Amer. Fauna, 14, p. 34, 1899—Tres Marias Islands, Isabel Island, and coast near San Blas, Tepic (crit.; meas.); Salvin and Godman, Biol. Centr.-Amer., Aves, 3, p. 347, 1903—part, Tres Marias Islands, Isabel Island, Sinaloa (Mazatlán), and Colima (Rio Zacatula).

Haematopus palliatus frazari Ridgway, Bull. U. S. Nat. Mus., 50, (8), p. 37, 1919—Lower California to Guerrero (monog.; full bibliog.); Low, Bull. Brit. Orn. Cl., 44, p. 19, 1923 (range); Murphy, Amer. Mus. Nov., 194, p. 9, 1925 (crit.; range); McLellan, Proc. Calif. Acad. Sci., (4), 16, p. 12, 1927—San Blas to Matanchen, Nayarit; Grinnell, Univ. Calif. Pub. Zool., 32, p. 99, 1928—Lower California (range); Bent, Bull. U. S. Nat. Mus., 146, p. 316, 1929 (life hist.); van Rossem, Trans. San Diego Soc. N. H., 7, p. 133, 1932—Tiburón Island, Sonora; (?)Griscom, Auk, 50, p. 299, 1933—Puerto Jiménez, Costa Rica (crit.); Webster, Wilson Bull., 55, p. 41, 1943 (descr. pullus and relationship shown by it); van Rossem, Occ. Pap. Mus. Zool. Louisiana State Univ., 21, p. 77, 1945—Sonora (distr.).

Haematopus ostralegus frazari Stresemann, Orn. Monatsber., 39, p. 73, 1927 (char.; range); Peters, Bds. World, 2, p. 231, 1934 (range).

Range.—Coast and islands of Lower California (Natividad and San Luís Islands being the most northerly recorded breeding stations on the west and east sides, respectively) and the west coast of Mexico, including the Tres Marias Islands and Isabel Island, south to Colima and Guerrero; casual on migration to northern Lower California and southern California (San Diego, Santa Barbara Islands, San Clemente Island, and Ventura County); (?)accidental in Costa Rica (Puerto Jiménez, Sept. 29, 1926).

Field Museum Collection.—12: Mexico, Lower California (Los Coronados Islands, 6; San Martin Island, 2; San Bonito Island, 1; Natividad Island, 1; Espiritu Santo, 1; unspecified, 1).

Conover Collection.—3: Mexico, Lower California (Los Coronados Islands, 1; Ildefonso Island, 1; La Paz, 1).

****Haematopus ostralegus prattii* Maynard.¹ BAHAMA OYSTER-CATCHER.**

Haematopus (sic) *prattii* Maynard, App. to Cat. W. Ind. Birds, p. 34, 1899—Flemmings Key, Bahama Islands (cotypes in collection of C. L. Maynard, now in Museum of Comparative Zoology, Cambridge, Mass.; cf. Bangs, Bull. Mus. Comp. Zool., 70, p. 175, 1930); Bangs, Auk, 17, p. 284, 1900—Flemmings Key (crit.).

Haematopus palliatus (not of Temminck) Bryant, Proc. Bost. Soc. N. H., 7, p. 121, 1859—Bahama Islands; Newton, Ibis, 1861, p. 115—St. Thomas; Sundevall, Oefvers. Vetensk.-Akad. Förh., 1869, p. 588—St. Bartholomew (crit.); Gundlach, Journ. Orn., 23, p. 331, 1875—Cuba; idem, l.c., 26, p. 188, 1878—near San Juan, Cuba; Cory, Bds. Bahama Is., p. 158, 1880—Andros and Inagua; Seebohm, Geogr. Distr. Charad., p. 305, 1887—part, Cuba and Bahama Islands; Cory, Auk, 4, p. 230, 1887—Cuba, Puerto Rico, St. Bartholomew, and Bahama Islands (descr.); idem, Bds. W. Ind., p. 230, 1889 (descr.); Northrop, Auk, 8, p. 76, 1891—Andros; Cory, l.c., pp. 297, 334, 351, 1891—Caicos Island, Abaco, and Inagua; Ridgway, l.c., p. 334, 1891—Abaco; Cory, l.c., 9, p. 48, 1892—Maraguana; Bonhote, Ibis, 1903, p. 301—Grassy Creek, Andros (crit.); Riley, Auk, 22, p. 354, 1905—Long Island.

Haematopus palliatus prattii Ridgway, Bull. U. S. Nat. Mus., 50, (8), p. 37, 1919—Bahama Islands (monog.); Murphy, Amer. Mus. Nov., 194, p. 7, 1925—Bahama Islands (crit.); Wetmore and Swales, Bull. U. S. Nat. Mus., 155, p. 144, 1931—Jevéro, Dominican Republic (Nov. 28; crit.).

Haematopus palliatus prattii (sic) Low, Bull. Brit. Orn. Cl., 44, p. 19, 1923—Bahama Islands.

Haematopus ostralegus prattii Stresemann, Orn. Monatsber., 35, p. 73, 1927—Bahama Islands; Peters, Bds. World, 2, p. 231, 1934 (range); Bond, Proc. Acad. Nat. Sci. Phila., 94, p. 94, 1942—Abaco to Grenadines.

Haematopus palliatus palliatus Wetmore, Sci. Surv. Porto Rico and Virgin Islands, 9, p. 349, 1927—Puerto Rico, Desecheo, Culebra, Culabrita, and St. Thomas.

¹*Haematopus ostralegus prattii* Maynard may be separated from *H. o. palliatus* by its thicker, less tapering bill. Wing, 250–270; depth of bill, 13½–15; width of bill, 7.5–8.3 mm.

Two birds from St. Thomas and St. Croix agree in shape of bill with the Bahama series, but have shorter wings (242–245). As Wetmore has lately recorded this form also from Hispaniola (Jevéro), it appears pretty certain that the records of Oyster-Catchers from Cuba, Puerto Rico, and St. Bartholomew belong here likewise.

Range.—Bahama Islands (Flemmings Cay; Exuma Cay; Long, Abaco, Andros, Inagua, Caicos, and Maraguana Islands); Greater Antilles (Cuba, Hispaniola, Puerto Rico), Virgin Islands (St. Thomas, St. Croix), and Lesser Antilles (St. Bartholomew; "Abaco to Grenadines").

Field Museum Collection.—10: Bahama Islands (Long Island, 1; Andros, 6; Great Inagua, 1; Caicos Island, 1; Maraguana, 1).

Conover Collection.—2: Virgin Islands (St. Thomas, 1; St. Croix, 1).

***Haematopus ostralegus palliatus Temminck. AMERICAN OYSTER-CATCHER.**

Haematopus palliatus Temminck, Man. d'Orn., 2nd ed., 2, p. 532, 1820—Brazil¹ (restricted to Rio de Janeiro by Berlepsch, Nov. Zool., 15, p. 304, 1908, type probably in Leyden Museum);² Wied, Beitr. Naturg. Bras., 3, (2), p. 746, 1833—seacoast of eastern Brazil; Burmeister, Syst. Uebers. Th. Bras., 3, p. 366, 1856—coast of Brazil; Sclater and Salvin, Ibis, 1859, p. 228—mouth of the Rio Nagualate, Pacific coast of Guatemala; Salvin, l.c., 1865, p. 190—Chiapam, Guatemala; Schlegel, Mus. Pays-Bas, 29, (Cursores), p. 74, 1865—part, spec. 3-7, Cajútuba (Pará) and "Brazil"; Léotaud, Ois. Trinidad, p. 398, 1866—Trinidad (Aug. to Oct.); Lawrence, Ann. Lyc. Nat. Hist. N. Y., 9, p. 141, 1868—Costa Rica; idem, l.c., p. 210, 1869—Mérida, Yucatan; Pelzeln, Orn. Bras., 3, p. 298, 1870—Sapitiba (Rio de Janeiro)³ and Cajútuba (Pará), Brazil; Lawrence, Bull. U. S. Nat. Mus., 4, p. 46, 1876—Tehuantepec (San Mateo, San Francisco; Feb., April), Oaxaca, Mexico; Sumichrast, La Naturaleza, 5, p. 232, 1881—Oaxaca (Tehuantepec, Santa María del Mar) and Chiapas (Tonalá); Salvin, Ibis, 1889, p. 379—Cozumel Island, Mexico; Hartert, l.c., 1893, pp. 308, 325—Aruba and Curaçao; Sharpe, Cat. Mus., 24, pp. 114, 730, 1896—Virginia (Cobb's Island), Texas (Corpus Christi), Mexico (Cozumel Island), Guatemala (Chiapam), Veragua, Florida (Indian River), Costa Rica and Brazil (Santa Catharina); Ihering, Rev. Mus. Paul., 3, p. 426, 1899—Iguapé, São Paulo; Hartert, Nov. Zool., 9, p. 307, 1902—Aruba and Curaçao; Salvin and Godman, Biol. Centr.-Amer., Aves, 3, p. 347, 1903—part, North America, Mexico (Tehuantepec, Santa María del Mar, San Mateo, and San Francisco, Oaxaca; Tonalá, Chiapas;

¹ Temminck, in a preceding paragraph of the same page, speaks of this Oyster-Catcher as being "une race distincte . . . du Brésil et de toute l'Amérique méridionale." It is thus clear that Brazil must be regarded as type locality, which Berlepsch was perfectly justified in restricting to Rio de Janeiro, while Brabourne and Chubb's later action (Bds. S. Amer., 1, p. 37, 1912), in arbitrarily selecting "Venezuela," may well be ignored.

² Although not listed as such, spec. No. 5, from "Brésil" in the Leyden Museum (cf. Schlegel, Mus. Pays-Bas, 29, p. 75, 1865) is most probably Temminck's type.

³ Sapitiba, a place on the seacoast near Rio de Janeiro, was erroneously located in Matto Grosso by both Sharpe and Ridgway.

Mérida, Yucatan; Cozumel Island), Guatemala (Nagualate, Chiapám), Costa Rica (Bahía de Salinas), Veraguas, and Brazil; Thayer and Bangs, Bull. Mus. Comp. Zool., 46, p. 146, 1905—San Miguel Island, Pearl Archipelago, Panama; Ihering, Cat. Faun. Carnegie Mus., 6, p. 415, 1910—Costa Rica (Bahía de Salinas); Rendahl, Ark. Zool., 13, No. 4, p. 24, 1920—Bayoneta Island, Pearl Archipelago, Panama (crit.).

Haematopus brasiliensis Lichtenstein,¹ Verz. Doubl. Zool. Mus. Berlin, p. 73 (in text), Sept., 1823—Brazil (type in Berlin Museum).

Haematopus articus (sic) Jardine, ed. Wilson's Amer. Orn., 3, p. 35, pl. 64, fig. 2, 1832—North America² (type in collection of Sir W. Jardine, present location unrecorded).

Haematopus arcticus Jardine and Selby, Illust. Orn., Part 9, pl. 125, Feb., 1833—North America.

Haematopus palliatus palliatus Ridgway, Bull. U. S. Nat. Mus., 50, (8), p. 32, 1919—North America to Yucatan (monog.; full bibliog.); Todd and Carriker, Ann. Carnegie Mus., 14, p. 187, 1922—Rio Hacha, La Goajira, Colombia (May 2); Low, Bull. Brit. Orn. Cl., 44, p. 19, 1923 (range); Murphy, Amer. Mus. Nov., 194, p. 5, 1925 (crit.; range); Bent, Bull. U. S. Nat. Mus., 146, p. 309, 1929 (life hist.; range in part); Webster, Wilson Bull., 55, p. 41, 1943 (descr. pullus and relationship as shown by same); Murphy, Auk, 62, p. 116, 1945—Pearl Islands, Panama (Pacheca; San Miguel).

Haematopus ostralegus palliatus Stresemann, Orn. Monatsber., 35, p. 73, 1927 (char.; range); Peters, Bds. World, 2, p. 231, 1934 (range in part); Pinto, Rev. Mus. Paul., 22, p. 126, 1935—Primeira Cruz, Maranhão, and Iguapé, São Paulo; Belcher and Smooker, Ibis, 1935, p. 287—Trinidad (ex Léotaud) and Little Tobago (ex Kirk); Griscom, Bull. Mus. Comp. Zool., 78, p. 306, 1935—Veraguas and Pearl Islands, Panama; Murphy, Ocean. Bds. S. Amer., 2, p. 975, 1936 (crit.; range).

Haematopus palliatus subsp. Griscom, Bull. Amer. Mus. N. H., 64, p. 130, 1932—Champerico, Guatemala.

Range.—Atlantic and Gulf coasts of North and Central America from Virginia to Yucatan; Pacific coast of America from the Isthmus of Tehuantepec, Mexico, to the Bay of Panama; locally on the coast

¹*Haematopus brasiliensis* Wied (Reise Bras., 1, pp. 105, 173, 1820; 2, p. 338, 1821) is a nomen nudum.

²North American specimens, in spite of a tendency to greater development of the white markings on primaries and the white chin-spot, do not seem to be separable from those of South America, though it is interesting to note that Bonaparte (Compt. Rend. Acad. Sci. Paris, 43, p. 420, 1856) tried to distinguish between *H. arcticus* and *H. palliatus*.

of Colombia (La Goajira), Venezuela (including the Leeward Islands from Aruba to Los Roques), and Brazil south to Santa Catharina.¹

Field Museum Collection.—15: North Carolina (Pea Island, Dare County, 2); South Carolina (Mount Pleasant, 7; Dewees Island, Charleston County, 1; Bull's Bay, Charleston County, 1; Santee Sound, 1); Texas (Padre Island, 1); Mexico (Rio Lagartos, Yucatan, 1); Dutch West Indies (Aruba Island, 1).

Conover Collection.—7: South Carolina (Cape Romain, 2; Dewees Island, 2; Caper's Island, 1; Santee Sound, 1; Copahee Sound, 1).

****Haematopus ostralegus galapagensis* Ridgway.² GALÁPAGOS OYSTER-CATCHER.**

Haematopus galapagensis Ridgway, Auk, 3, p. 331, July, 1886—Chatham Island, Galápagos (type in U. S. National Museum); idem, Proc. U. S. Nat. Mus., 9, p. 325, 1886—Chatham Island (full descr.); idem, l.c., 12, pp. 116, 120, 123, 128, 1889—James, Chatham, and Indefatigable Islands; idem, l.c., 19, p. 621, 1896 (monog.); Sharpe, Cat. Bds. Brit. Mus., 24, p. 116, 1896—Indefatigable Island (char.); Rothschild and Hartert, Nov. Zool., 6, p. 186, 1899—Albemarle, Hood, Bindloe, James, Indefatigable, Tower, and Chatham Islands; idem, l.c., 9, p. 412, 1902—Indefatigable Island (young descr.); Snodgrass and Heller, Proc. Wash. Acad. Sci., 5, p. 262, 1904—Seymour Island; Gifford, Proc. Calif. Acad. Sci., (4), 2, pp. 47, 114, 1913—Albemarle, Barrington, Bindloe, Charles, Chatham, Gardner-near-Hood, Hood, Indefatigable, James, Narborough, Seymour, Tower, Delano Rock, and islets near Jervis (habits; meas.).

Haematopus palliatus (not of Temminck) Sclater and Salvin, Proc. Zool. Soc. Lond., 1870, p. 323—Indefatigable Island; Sundevall, l.c., 1871, p. 125—Galápagos Islands; Salvin, Trans. Zool. Soc. Lond., 8, p. 502, 1876—Indefatigable Island (habits).

Haematopus leucopus galapagensis Seebohm, Geogr. Distr. Charad., p. 307, 1887 (crit.).

Haematopus palliatus galapagensis Ridgway, Bull. U. S. Nat. Mus., 50, (8), p. 39, 1919 (monog.); Low, Bull. Brit. Orn. Cl., 44, p. 19, 1923—Galápagos Islands; Murphy, Amer. Mus. Nov., 194, p. 9, 1925 (crit.); Swarth, Occ. Pap. Calif. Acad. Sci., 18, p. 57, 1931 (crit.); Webster, Wilson Bull., 55, p. 41, 1943 (descr. of pullus).

Haematopus ostralegus galapagensis Stresemann, Orn. Monatsber., 35, p. 19, 1927—Galápagos Islands (crit.); Peters, Bds. World, 2, p. 232, 1934 (range); Murphy, Ocean. Bds. S. Amer., 2, p. 981, 1936 (crit.).

¹ A specimen from Santa Catharina in the British Museum is typical *palliatus*. No material is available from Rio Grande do Sul. A single example from Aruba Island, Dutch West Indies, in shape of bill, is somewhat intermediate to *H. o. prattii*.

² *Haematopus ostralegus galapagensis* Ridgway: Very close to *H. o. frazari*, but upper parts darker with less white on the wing coverts, and feet larger. From *H. o. palliatus*, the Galápagos Oyster-Catcher is immediately separable by lacking all trace of white on the primaries.

Range.—Galápagos Archipelago (excepting Culpepper and Wenman Islands).

Field Museum Collection.—7: Galápagos Archipelago (Hood Island, 3; Indefatigable Island, 2; Tower Island, 1; James Island, 1).

***Haematopus ostralegus pitanay** Murphy.¹ PERUVIAN OYSTER-CATCHER.

Haematopus palliatus pitanay Murphy, Amer. Mus. Nov., 194, p. 1, Nov. 17, 1925—Pisco Bay, Ica, Peru (type in the American Museum of Natural History, New York); idem, l.c., p. 8, 1925—Chile (Algarroba, Cruz Grande) to Guayaquil, Ecuador (crit.); Chapman, Bull. Amer. Mus. N. H., 55, p. 190, 1926—Santa Elena and Tembleque Island, Guayas, Ecuador; Webster, Wilson Bull., 55, p. 41, 1943 (relationship as shown by pullus).

Haematopus palliatus (not of Temminck) Fraser, Proc. Zool. Soc. Lond., 11, p. 116, 1843—sandy shores north of Valparaíso, Chile; Des Murs, in Gay, Hist. Fis. Pol. Chile, Zool., 1, p. 406, 1847—Chile; Cassin, in Gilliss, U. S. Astr. Exp., 2, p. 197, 1855—Chile; Germain, Proc. Bost. Soc. N. H., 7, p. 314, 1860—near the seacoast, Santiago (nesting habits); Philippi, Reise Wüste Atacama, p. 163, 1860—Chañaral, Atacama, Chile; Pelzeln, Reise Novara, Zool., 1, Vögel, p. 117, 1865—Chile (egg); Schlegel, Mus. Pays-Bas, 29, (Cursores), p. 74, 1865—part, spec. nos. 1, 2, Algarroba, Chile; Sclater, Proc. Zool. Soc. Lond., 1867, p. 339—Chile; Philippi, Anal. Univ. Chile, 31, p. 272, 1869—central provinces of Chile; Sclater and Salvin, Ibis, 1870, p. 499—Ancud, Chiloé; Taczanowski, Proc. Zool. Soc. Lond., 1877, p. 748—Santa Lucia, Tumbes, Peru; Salvin, l.c., 1883, p. 429—Paracas Bay, Ica, Peru; Taczanowski, Orn. Pér., 3, p. 350, 1886—Peruvian localities; Macfarlane, Ibis, 1887, pp. 204, 205—bays of San Nicolas and San Juan, Ica, and San Lorenzo Island, Lima, Peru; Seeböhm, Geog. Distr. Charad., p. 305, 1887—part, Chile; Philippi, Ornith., 4, p. 159, 1888—Chañaral, Atacama, Chile; Reed, Anal. Univ. Chile, 93, p. 210, 1896—Chile; idem, Rev. Chil. Hist. Nat., 9, p. 50, 1905—Chile; Chubb, Ibis, 1919, p. 261—San Lorenzo Island, Peru; Coker, Proc. U. S. Nat. Mus., 56, p. 495, 1919—Chincha Islands, Chilca Bay, and Isla Vieja, Peru (breeding); Gigoux, Rev. Chil. Hist. Nat., 28, p. 87, 1924—Caldera, Atacama, Chile.

Haematopus frazari (not of Brewster) Sharpe, Cat. Bds. Brit. Mus., 24, pp. 117, 730, 1896—part, spec. b-h, k, l, Chile (Arauco, Santiago) and Peru

¹*Haematopus ostralegus pitanay* Murphy: Most similar to *H. o. palliatus*, but smaller, and white subterminal markings on inner primaries absent or greatly reduced. Resembling *H. o. frazari* in the last-named character, but smaller, and with the black of the foreneck abruptly defined against the white belly, whereas the Mexican form has a black-and-white mottled zone on the lower end of the blackish gular area. Wing, 230-248, (female) 240-260.

Birds from Peru and Chile agree well together. Specimens from Ecuador, according to Murphy, show an approach to *H. o. palliatus* by having a slight suggestion of white on the inner primaries.

Additional material examined.—Peru: San Lorenzo Island, 1; Paracas Bay, 1.—Chile: Arauco, 1; Prov. Santiago, 1; unspecified, 6.

(Paracas Bay); Lane, Ibis, 1897, p. 303—Arauco, Chile; Schalow, Zool. Jahrb., Suppl., 4, p. 663, 1898—Chile.

Haematopus ostralegus pitanay Stresemann, Orn. Monatsber., 35, p. 73, 1927 (crit.); Hellmayr, Field Mus. Nat. Hist., Zool. Ser., 19, p. 382, 1932—Cucac and Rio Inio, Chiloé Island, Chile (crit.; range); Peters, Bds. World, 2, p. 232, 1934 (range); Bullock, Rev. Chil. Hist. Nat., 39, p. 247, pl. 16, 1935—Isla la Mocha (nesting); Zotta, El Hornero, 6, p. 289, 1936—Mendoza (Feb., 1918); Murphy, Ocean. Bds. S. Amer., 2, p. 978, 1936 (crit.; range).

Haematopus ostragelus (sic) *pitany* Bullock, Rev. Chil. Hist. Nat., 41, p. 201, col. pl. 8, fig. 11, 1937 (egg).

Range.—Pacific coast of South America from the Gulf of Guayaquil, Ecuador, to Chiloé Island, Chile; accidental in Argentina (Mendoza).

Conover Collection.—4: Chile (Cucac, Chiloé Island, 2; Rio Inio, Chiloé Island, 2).

****Haematopus ostralegus durnfordi* Sharpe.¹ DURNFORD'S
OYSTER-CATCHER.**

Haematopus durnfordi Sharpe, Cat. Bds. Brit. Mus., 24, pp. 107, 117, pl. 6, 1896—Tambo Point, Chubut (type in the British Museum); Scott and Sharpe, Rep. Princet. Univ. Exped. Patagonia, 2, Orn., p. 270, 1910—Tambo Point; Dabbene, Anal. Mus. Nac. Buenos Aires, 18, p. 215, 1910—Patagonia.

Haematopus palliatus (not of Temminck) Darwin, Zool. Beagle, 3, Birds, p. 128, 1841—Rio de la Plata; Durnford, Ibis, 1878, p. 403—Tambo Point and mouth of Chubut River, Chubut; Seebohm, Geogr. Distr. Charad., p. 305, 1887—part, Patagonia (Tovar Harbor, Chubut); Sclater and Hudson, Arg. Orn., 2, p. 176, 1889—Tambo Point; Oustalet, Miss. Sci. Cap Horn, 6, p. B. 289, 1891—Tambo Point and Tovar Harbour; Aplin, Ibis, 1894, p. 207—Uruguay; Hartert and Venturi, Nov. Zool., 16, p. 250, 1909—near Chiquita, coast of Buenos Aires; Dabbene, Anal. Mus. Nac. Buenos Aires, 18, p. 215, 1910—Patagonia and Buenos Aires; Grant, Ibis, 1911, p. 466—Tuyú and Cape San Antonio, Ajó, Buenos Aires; Gibson, l.c., 1920, p. 61—Lagoon de Palenque and Lagoon de Milan, Buenos Aires (breeding habits); Tremoleras, El Hornero, 2, p. 13, 1920—Colonia, Uruguay; Wetmore, Bull. U. S. Nat. Mus., 133, p. 144, 1926—Buenos Aires (Rio Ajó, near Lavalle) and Uruguay (near Montevideo; La Paloma, Rocha).

¹*Haematopus ostralegus durnfordi* Sharpe: Differs from *H. o. palliatus*, which it resembles in the white-marked primaries, in having the breast along the junction of the black and white areas heavily mottled. It is very similar to *H. o. galapagensis*, but has much smaller feet and at least some white on the primaries. Six birds from Buenos Aires (Tuyú and Cape San Antonio) show considerable variation in the extent of white on remiges and in the color of the shafts of the primaries.

A little-known race.

Haematopus palliatus durnfordi Peters, Bull. Mus. Comp. Zool., 65, p. 294, 1923—San Antonio del Oeste, Rio Negro; Low, Bull. Brit. Orn. Cl., 44, p. 73, 1923 (range); Murphy, Amer. Mus. Nov., 194, p. 7, 1925—Lavalle and Cape San Antonio, Buenos Aires (crit.); Wetmore, Univ. Calif. Pub. Zool., 24, p. 427, 1926—San Antonio del Oeste, Rio Negro (June 29); Renard, El Hornero, 4, p. 412, 1931—Mar Chiquita, Buenos Aires.

Haematopus ostralegus durnfordi Stresemann, Orn. Monatsber., 35, p. 73, 1927 (range); Peters, Bds. World, 2, p. 232, 1934 (range); Murphy, Ocean. Bds. S. Amer., 2, p. 983, 1936 (crit.).

Range.—Atlantic coast of South America from Uruguay to Chubut (Tambo Point; Puerto Tovar) and Santa Cruz (Deseado).

Conover Collection.—1: Argentina (Deseado, Santa Cruz, 1).

Haematopus ostralegus malacophaga Salomonsen.¹ ICELAND OYSTER-CATCHER.

Haematopus ostralegus malacophaga Salomonsen, Ibis, (12), 6, p. 58, Jan., 1930—Thorsa, Iceland (type in Copenhagen Museum); Peters, Bds. World, 2, p. 232, 1934 (range).

Haematopus ostralegus (not of Linnaeus) Reinhardt, Vidensk. Medd. Naturhist. Foren., 1853, p. 71—Julianehaab and Godthaab, Greenland; idem, Ibis, 1861, p. 9—Julianehaab, Godthaab, and Nanortalik, Greenland; Bent, Bull. U. S. Nat. Mus., 146, p. 305, 1929 (life hist.).

Haematopus ostralegus (sic) Winge, Medd. Grönl., 21, p. 157, 1898—Greenland.

Haematopus ostralegus ostralegus Ridgway, Bull. U. S. Nat. Mus., 50, (8), p. 30, 1919—part, Iceland, Färoe Islands, and Greenland; Murphy, Amer. Mus. Nov., 194, p. 5, 1925—part, Greenland.

Range.—Resident on Iceland and the Färoe Islands; accidental in Greenland (about six records).

***Haematopus leucopodus** Garnot.² MAGELLAN OYSTER-CATCHER.

Haematopus leucopodus Garnot, Ann. Sci. Nat., 7, p. 47, 1826—"baie des Français, ile de la Soledad, Malouines"—East Falkland Island (type in Paris Museum); idem, Voy. Coquille, Zool., 1, (2), livr. 12, p. 542, July 4, 1829—Falkland Islands; Low, Bull. Brit. Orn. Cl., 44, p. 19, 1923 (range); Murphy, Amer. Mus. Nov., 194, p. 11, 1925 (crit.; meas.; plumages);

¹*Haematopus ostralegus malacophaga* Salomonsen: Similar to *H. o. ostralegus* Linnaeus, of Scandinavia, etc., but larger, while the bill, in thickness, is intermediate between the nominate race and *H. o. occidentalis* Neumann, of the British Isles. Wing, 252–276.

Two females from Greenland (Jacobshaven, Godthaab) were found by Salomonsen to be identical with Icelandic specimens.

²*Haematopus leucopodus* Garnot is quite distinct specifically, and differs from *H. o. pilanay* by glossy black (instead of hair brown) back and wings; wholly white upper tail coverts (the median ones not variegated with brown); black (instead of white) under wing coverts; the extension of the black color all over

Wetmore, Univ. Calif. Pub. Zool., 24, p. 427, 1926—Beagle Channel, Tierra del Fuego; Stresemann, Orn. Monatsber., 35, p. 73, 1927 (char.; range); Hellmayr, Field Mus. Nat. Hist., Zool Ser., 19, p. 383, 1932—Chiloé Island, Chile (crit.); Reynolds, Ibis, 1932, p. 37—Snipe Island, Beagle Channel; Peters, Bds. World, 2, p. 234, 1934 (range); Reynolds, Ibis, 1935, p. 87—Barnevelt, Otter Islands, etc., Cape Horn region; Murphy, Ocean. Bds. S. Amer., 2, p. 985, 1936 (crit.; range); Webster, Wilson Bull., 55, p. 42, 1943 (descr. pullus).

Haematopus leucopus Lesson, Voy. Coquille, Zool., 1, (1), livr. 5, p. 210, Oct. 17, 1827—Falkland Islands (diag.); Boeck, Naumannia, 1855, p. 509—Chiloé Island, Rio Pudeto, and Bay of Reloncavi, Llanquihue, Chile; Sclater, Proc. Zool. Soc. Lond., 28, p. 386, 1860—East Falkland Island; Abbott, Ibis, 1861, p. 156—Falkland Islands (breeding); Philippi, Anal. Univ. Chile, 31, p. 272, 1868—southern Chile to Straits of Magellan; Sclater and Salvin, Proc. Zool. Soc. Lond., 1878, p. 437—Penguin Island (Messier Channel), Tom Bay, and Elizabeth Island, Straits of Magellan; Sharpe, l.c., 1881, p. 15—Cape Sambo (Trinidad Channel), Tom Bay, and Hugh Bay, Straits of Magellan; Seebohm, Geogr. Distr. Charad., p. 306, 1887—Falkland Islands, Straits of Magellan, and Chile ("near Valparaiso") (crit.); Ridgway, Proc. U. S. Nat. Mus., 12, p. 136, 1889—Elizabeth Island, Straits of Magellan; Oustalet, Miss. Sci. Cap Horn, 6, p. B. 121, 1891—Patagonia (Misioneros), Tierra del Fuego (Bahía Orange), and Straits of Magellan (Elizabeth Island; Packewaia and Burnt Island, Beagle Channel; Bouchier Bay; Wollaston and Hermit Islands); Sharpe, Cat. Bds. Brit. Mus., 24, pp. 113, 730, 1896—Chile, Straits of Magellan (Tom Harbour, Elizabeth Island, Penguin Island, Hermit Island, Tom Bay, Hugh Bay, Cape Sambo), and Falkland Islands (San Salvador Bay, Berkeley Sound); Reed, Anal. Univ. Chile, 93, p. 210, 1896—Magallania and southern Chile; Schalow, Zool. Jahrb., Suppl., 4, p. 663, 1898—Punta Anegada, Tierra del Fuego; Salvadori, Ann. Mus. Civ. Stor. Nat. Genova, 40, p. 625, 1900—Penguin Rookery (Staten Island) and Rio Pescado, Straits of Magellan; Dabbene, Anal. Mus. Nac. Buenos Aires, 18, p. 373, 1902—Tierra del Fuego (Packewaia, Isla Wollaston) and Staten Island; Vallentin, Mem. Proc. Manchester Lit. Phil. Soc., 48, No. 23, p. 39, 1904—Falkland Islands (eggs descr.); Reed, Rev. Chil. Hist. Nat., 9, p. 50, 1905—Chile; Crawshaw, Birds Tierra del Fuego, p. 123, 1907—Useless Bay and San Sebastian Settlement (breeding); Scott and Sharpe, Rep. Princet. Univ. Exped. Patagonia, 2, Orn., p. 265, 1910—Montez Ranch, near Rio Coy, Santa Cruz, and Valle del Lago Blanco, Chubut (Sept. to Nov.); Dabbene, Anal. Mus. Nac. Buenos Aires, 18, p. 215, 1910 (range); Blaauw, Not. Leyden Mus., 35, p. 70, 1912—Island east of Achao, Chiloé; Brooks, Bull. Mus. Comp. Zool., 61, p. 149, 1917—Falkland Islands (nesting habits); Wace, El Hornero, 2, p. 198, 1921—Falkland Islands; Bennett, Ibis, 1926, p. 322—Falkland Islands.

the chest; yellow (instead of crimson) eyelids; decidedly shorter, stouter tarsi; and wider nails with prominent lateral flange.

Birds from Chiloé Island are identical with others from Magallania and the Falkland Islands. The locality "Valparaiso" is very questionable.

Additional material examined.—Falkland Islands, 10.—Magallania: Tom Bay, 4; Hugh Bay, 1; Penguin Island, 1; Elizabeth Island, 2; Hermit Island, 1.

Ostralega leucopus Lesson, Man. d'Orn., 2, p. 301, 1828—Falkland Islands; idem, Voy. Coquille, Zool., 1, (2), livr. 16, p. 721, May, 1830—Falkland Islands.

Haem[atopus] luctuosus Cuvier, Règ. Anim., nouv. éd., 1, p. 504, 1829—Falkland Islands (type in Paris Museum); Schlegel, Mus. Pays-Bas, 29, Cursores, p. 74, 1865—Falkland Islands (crit.).

Range.—Southern South America, from Chiloé Island on the west coast and the Chubut River on the east side of the Andes south to the Cape Horn region; Falkland Islands.

Field Museum Collection.—2: Argentina (Rivadavia, Chubut, 1); Falkland Islands (unspecified, 1).

Conover Collection.—4: Chile (Rio Inio, Chiloé Island, 3; Lomas Bay, Tierra del Fuego, 1).

***Haematopus ater Vieillot and Oudart.¹ QUOY'S BLACK OYSTER-CATCHER.**

Haematopus niger (not *Scolopax nigra* Gmelin, 1789) Quoy and Gaimard, in Freycinet, Voy. Uranie et Physic., Zool., livr. 4, p. 129, pl. 34, Sept., 1824—part, Falkland Islands (specimen in Paris Museum examined); Garnot, Ann. Sci. Nat., 7, p. 47, 1826—Falkland Islands; Fraser, Proc. Zool. Soc. Lond., 11, p. 116, 1843—along rocky shores of Chile; Des Murs, in Gay, Hist. Ffs. Pol. Chile, Zool., 1, p. 406, 1847—Chile; Hartlaub, Naumannia, 3, p. 215, 1853—Valdivia, Chile; Boeck, l.c., 1855, p. 509—Corral, Valdivia, Chile; Schlegel, Mus. Pays-Bas, 29, Cursores, p. 76, 1865—part, Nos. 1-3, Magellania and Chile (Algarroba) (crit.); Pelzeln, Reise Novara, Zool., 1, Vogel, p. 117, 1865—Chile; Philippi, Anal. Univ. Chile, 31, p. 272, 1868—central provinces of Chile; Housse, Rev. Chil. Hist. Nat., 28, p. 51, 1924—Isla la Mocha, Arauco, Chile; Gigoux, l.c., p. 87, 1924—Caldera, Atacama, Chile.

Haematopus ater Vieillot and Oudart, Gal. Ois., 2, p. 88, pl. 230, 1825—part, "au détroit de Magellan" (type in Paris Museum examined by C. E. H.);² Peale, U. S. Expl. Exp., 8, p. 245, 1848—Valparaiso, Chile; Cassin,

¹ *Haematopus ater* Vieillot and Oudart is readily distinguished from the other entirely black species of the genus by its elevated, excessively compressed bill. As pointed out by Murphy, it has no genetic relationship to *H. o. bachmani*.

² Vieillot's description is not diagnostic, while the range as given includes that of several species. Inspection of the material in the Paris Museum shows that he did not distinguish between the Magellanic and the Australian species (*H. fuliginosus*). Neither of the two mounted specimens labeled "Huitrier noir. *H. ater*, Vieill.," is marked as "type," but the one bearing "No. 258. par MM. Quoy et Gaimard. Expéd. Freycinet. De la baie des Chiens Marins, Nouvelle Hollande" has a note "Gal. 230," which, according to the early custom in the Paris Museum, means that it is the original of pl. 230 in the "Galerie des Oiseaux." This bird is the Magellanic Black Oyster-Catcher with very deep and excessively compressed bill, and agrees perfectly with specimens from Tierra del Fuego. "Shark's Bay, Australia," of course, is incorrect; the bird was doubtless secured on the Falkland Islands, which may be accepted as type locality. The second specimen, collected by Péron during the voyage of *Le Naturaliste* under Captain Baudin in "Nouvelle Hollande" is the Australian species.

in Gilliss, U. S. Ast. Exp., 2, p. 198, 1855—Chile; Sclater, Proc. Zool. Soc. Lond., 28, p. 386, 1860—Falkland Islands; Abbott, Ibis, 1861, p. 155—East Falkland (breeding); Sclater, Proc. Zool. Soc. Lond., 1867, pp. 331, 339—Chile; idem and Salvin, Ibis, 1870, p. 499—Puerto Laguna, Chonos Archipelago, Chile; Salvin, l.c., 1875, pp. 372, 377—Mas Afuera; Durnford, l.c., 1878, p. 403—Tambo Point and mouth of Chubut River, Chubut; Sclater and Salvin, Proc. Zool. Soc. Lond., 1878, p. 438—Elizabeth Island, Straits of Magellan; Sharpe, l.c., 1881, p. 15—Port Henry, Straits of Magellan; Salvin, l.c., 1883, p. 429—San Lorenzo Island, Lima, Peru; Taczanowski, Orn. Pér., 3, p. 351, 1886—same locality; Macfarlane, Ibis, 1887, p. 205—San Lorenzo Island, Peru; Sclater and Hudson, Arg. Orn., 2, p. 176, 1889—Tambo Point, Chubut; Ridgway, Proc. U. S. Nat. Mus., 12, p. 136, 1889—Elizabeth Island, Straits of Magellan; Oustalet, Miss. Sci. Cap Horn, 6, p. B. 119, 1891—Santa Cruz (Puerto Deseado), Hermit and Wollaston Islands, and Tierra del Fuego (Ushuaia; Bahía Orange); Sharpe, Cat. Bds. Brit. Mus., 24, pp. 121, 731, 1896—Falkland Islands (Johnson Harbour, Berkeley Sound, Stanley), Chubut (Tambo Point), Straits of Magellan (Elizabeth Island, Port Henry), Chile, Mas Afuera, and Peru (Callao, Mollendo, San Lorenzo Island); Reed, Anal. Univ. Chile, 93, p. 210, 1896—Chile; Schalow, Zool. Jahrb. Suppl., 4, p. 664, 1898—Isla de los Pájaros, Coquimbo, Chile; Salvadori, Ann. Mus. Civ. Stor. Nat. World, 2, p. 234, 1934 (range); Reynolds, Ibis, 1935, p. 87— islands in the Cape Horn region; Castellanos, El Hornero, 6, p. 29, 1935—Puerto Parry, Staten Island; Bullock, Rev. Chil. Hist. Nat., 39, p. 247, 1935—Isla la Mocha (nesting); Philippi, l.c., 6, p. 234, 1936—Arica, Tacna, Chile; Murphy, Ocean. Bds. S. Amer., 2, p. 988, 1936 (monog.); Webster, Wilson Bull., 55, p. 42, 1943 (descr. pullus).

Haematopus townsendi Audubon, Birds Amer., folio ed., 4, pl. 427, fig. 3, 1836 (or later); idem, Orn. Biog., 5, p. 247, 1839—no locality given (type now in U. S. National Museum); idem, Birds Amer., 8vo ed., 5, p. 245, 1842—"coast of California;"¹ Oberholser, Proc. Biol. Soc. Wash., 31,

¹ According to Cassin (U. S. Ast. Exp., 2, p. 198, 1855), said to be from "Oregon." The type collected by Townsend was undoubtedly one of the birds

p. 47, 1918 (nomencl.); Low, Bull. Brit. Orn. Cl., 44, pp. 16, 19, 1923 (synon.; range).

Haematopus unicolor? (not of J. R. Forster, 1844) Gould, Proc. Zool. Soc. Lond., 27, p. 96, 1859—Falkland Islands (egg descr.).

Haematopus quoyi Brabourne and Chubb, Birds S. Amer., 1, p. 37, 1912—new name for *Haematopus ater* Sharpe; Brooks, Bull. Mus. Comp. Zool., 61, p. 150, 1917—Falkland Islands; Coker, Proc. U. S. Nat. Mus., 56, p. 496, 1919—Peru (Chincha Islands, Chilcay Bay, Asia Island, Independencia Bay, Paracas Bay, and [?] Lobos de Tierra); Wace, El Hornero, 2, p. 198, 1921—Falkland Islands; Bennett, Ibis, 1926, p. 322—Falkland Islands.

Range.—Coasts of South America, from lat. 7° S. in Peru, on the Pacific side, and from Chubut¹ on the east, south to Cape Horn; Falkland Islands; occasional on Mas Afuera.

Field Museum Collection.—1: Chile (Caldera, Atacama, 1).

Conover Collection.—5: Chile (Rio Inio, Chiloé, 5).

Family CHARADRIIDAE. Lapwings and Plovers

Subfamily VANELLINAE. Lapwings

Genus VANELLUS Brisson

Vanellus Brisson, Orn., 1, p. 48; 5, p. 94, 1760—type, by tautonymy, "*Vanelus*" Brisson=*Tringa Vanellus* Linnaeus.

Gavia (not of Forster, 1788) Gloger, Hand- und Hilfsbuch Naturg., 1, p. 433, 1842—substitute name for *Vanellus* Brisson.

**Vanellus vanellus* (Linnaeus). LAPWING.

Tringa Vanellus Linnaeus, Syst. Nat., 10th ed., 1, p. 148, 1758—based chiefly on Faun. Svec., No. 148, Sweden.

Vanellus Capella Schaeffer, Mus. Orn., p. 49, 1789—no locality cited.

Vanellus vulgaris Bechstein, Orn. Taschenb., 2, p. 313, 1805—new name for *Tringa vanellus* Linnaeus; Feilden, Ibis, 1889, p. 495—Barbados (Dec. 24, 1886).

Vanellus cristatus Wolf and Meyer, Naturg. Vög. Deuts., 1, p. 110, with pl., 1805—new name for *Tringa vanellus* Linnaeus; Holbøll, Naturhist.

obtained by him during his voyage around South America. Oberholser (Proc. Biol. Soc. Wash., 31, p. 47, 1918) suggests Falkland Islands as type locality of *H. townsendi*.

¹ In the absence of specimens we hesitate to accept Smith's record of a "black oyster-catcher" (Zoologica, N. Y., 9, p. 288, 1927) from the Coronilla Islands, off Uruguay, as pertaining to *H. ater*.

Additional material examined.—Peru: San Lorenzo Island, Callao, Mollendo, 5.—Chile, 9.—Straits of Magellan, 6.—Falkland Islands, 8.

Tidskr., 4, p. 371, 1843—Fiskenaesset, Greenland (Jan.); Reinhardt, Ibis, 1861, p. 9—Greenland (Fiskenaesset, Jan. 7; Julianehaab); Schiøler, Dansk. Orn. Foren. Tidssk., 11, p. 174, 1917—Nanortalik, Sukkertoppen and Godthaab, Greenland.

Vanellus vanellus Dutcher, Auk, 3, p. 438, 1886—Merrick, Long Island (Dec., 1883); Sharpe, Cat. Bds. Brit. Mus., 24, pp. 166, 735, 1896 (monog.); Piers, Auk, 15, p. 195, 1898—Ketch Harbour, Nova Scotia (March 17, 1897); Fleming, l.c., 18, p. 272, 1901—Hog Island, Bahamas (Nov., 1900); Beebe, l.c., 23, p. 221, 1906—Meccox Bay, Waterville, Long Island (fall, 1905); Brewster, l.c.—White Hills, Newfoundland (Nov. 23, 1905); Ridgway, Bull. U. S. Nat. Mus., 50, (8), p. 65, 1919 (monog.; full bibliog.); Brimley, Auk, 44, p. 248, 1927—Siler City, North Carolina (Nov. 11, 1926); Ingersoll, l.c., 45, p. 208, 1928—Newfoundland (Dec., 1927, flocks seen); Bent, Bull. U. S. Nat. Mus., 146, p. 144, 1929 (life hist.); Taverner, Auk, 46, p. 231, 1929—St. Augustine, Quebec (Dec. 15, 1927); Peters, Bds. World, 2, p. 235, 1934 (range); Salomonsen, Dansk. Orn. Foren. Tidssk., 29, p. 112, 1935—Angmagssalik, Greenland (descr.); Cottam and Knappen, Auk, 56, p. 153, 1939 (food of in North America); Reimann, l.c., p. 332, 1939—Long Island, New York (fall, 1910); Cooke, Bd. Banding, 16, p. 126, 1945—Newfoundland (banded in England); Soper, Auk, 63, p. 226, 1946—Cumberland Sound, Arctic Canada (Oct., 1926).

Range.—Breeds in Europe and northern Asia; winters in southern Europe, northern Africa, and southern Asia; casual in Greenland, Cumberland Sound, Labrador (Cartwright, Jan., 1917; Anatalok Bay, Dec. 22, 1927), Quebec (St. Augustine, Dec. 15, 1927), Newfoundland (White Hills, Nov. 23, 1905; Bonavista, Dec., 1927), New Brunswick (North Head, Jan. 6, 1928), Nova Scotia (Ketch Harbour, March 17, 1897), Long Island, New York (Merrick, Dec., 1883; Meccox Bay, Waterville, fall, 1905; fall, 1910), North Carolina (Siler City, Nov. 11, 1926), Bahamas (Hog Island, Nov., 1900), Barbados (Dec. 24, 1886).¹

Field Museum Collection.—2: Labrador (Hopedale, 2).

Genus *BELONOPTERUS* Reichenbach

Belonopterus Reichenbach, Av. Syst. Nat., p. xviii, "1852" (=1853)—type, by orig. desig., *Tringa cayennensis* Latham = *Parra cayennensis* Gmelin.

Belonopterus Scott and Sharpe, Rep. Princet. Univ. Exped. Patagonia, 2, p. 278, 1910 (emendation).

**Belonopterus cayennensis cayennensis* (Gmelin). CAYENNE
LAPWING.

¹ The range "small islands in Norton Sound, Alaska" as given by both Bent and Ridgway was evidently based on the account of Dall and Bannister (Trans. Chicago Acad. Sci., 1, p. 293, 1869) who in turn based their record on the description of a bird seen by a Russian some time before.

Parra cayennensis Gmelin, Syst. Nat., 1, (2), p. 706, 1789—based on "Vanneau armé, de Cayenne" Buffon, Hist. Nat. Ois., 8, p. 65, Daubenton, Pl. Enl., pl. 836, and "Vanneau" Fermin, Descr. Surinam, 2, p. 193, 1769, Cayenne.

Tringa cajennensis Latham, Ind. Orn., 2, p. 727, 1790—same basis.

Vanellus cayananensis Vieillot, Nouv. Dict. Hist. Nat., nouv. éd., 35, p. 206, 1819—part, Cayenne.¹

Charadrius lampronotus Wagler, Syst. Av., 1, fol. 5, Genus Charadrius, sp. 48, 1827—part, descr. "avis adult. tempestate pluviarum?," Cayenne.

Vanellus cayennensis Cabanis, in Schomburgk, Reisen Brit. Guiana, 3, "1848," p. 750, 1849—savannas; Sclater, Proc. Zool. Soc. Lond., 23, p. 163, 1855—"Bogotá"; Bonaparte, Bull. Soc. Linn. Normandie, 2, p. 39, 1857—Cayenne, French Guiana; Schlegel, Mus. Pays-Bas, 29, Cursors, p. 57, 1865—part, spec. Nos. 1, 2, Guiana; Sclater and Salvin, Proc. Zool. Soc. Lond., 1867, p. 591—Mexiana Island, Brazil; iidem, l.c., 1869, p. 252—Lake Valencia, Venezuela; Wyatt, Ibis, 1871, p. 383—La Cruz (alt. 4,000 ft.) and Lake Paturia, Rio Magdalena, Colombia; Harting, Proc. Zool. Soc. Lond., 1874, p. 450—part, Venezuela, Guiana, and Amazonia (descr.); Sclater and Salvin, l.c., 1879, p. 546—Retiro, Concordia, and Frontino, Colombia; Berlepsch, Ibis, 1884, p. 441—Angostura, Rio Orinoco, Venezuela; Salvin, l.c., 1886, p. 178—British Guiana; Seebohm, Geogr. Distr. Charad., p. 216, 1887 (in part); Grant, Ibis, 1912, p. 274 (range).

Belonopterus cayennensis Sharpe, Cat. Bds. Brit. Mus., 24, pp. 163, 735, 1896—part, spec. a-i, v-x, Colombia (Cartagena, Antioquia), British Guiana (Quonga, Annai), and Brazil (Mexiana Island); Stone, Proc. Acad. Nat. Sci. Phila., 1899, p. 302—Plain of Tolima, Colombia; Berlepsch and Hartert, Nov. Zool., 9, p. 129, 1902—Altigracia, Caicara, and Quiribana de Caicara, Orinoco, Venezuela; Hagmann, Zool. Jahrb. (Syst.), 26, p. 44, 1907—Mexiana Island (nest and eggs descr.); Berlepsch, Nov. Zool., 15, p. 305, 1908—Cayenne; Stone, Proc. Acad. Nat. Sci. Phila., 65, p. 192, 1913—La Pedrita, Rio Uracoa, Venezuela; Snethlage, Bol. Mus. Goeldi, 8, p. 84, 1914—part, Mexiana Island, Brazil; Cherrie, Sci. Bull., Mus. Brookl. Inst., 2, p. 370, 1916—Orinoco region; Chapman, Bull. Amer. Mus. N. H., 36, p. 222, 1917—Colombia (Atrato River, Caldas, Las Lomitas, San Antonio, Cali, La Manuelita, El Roble, Salento, Puerto Berrio, and Barrigon); Osgood and Conover, Field Mus. Nat. Hist., Zool. Ser., 12, p. 41, 1922—Rio Cogollo and Catatumbo, Zulia, Venezuela; Delacour, Ibis, 1923, p. 139—llanos of Guarico and Apure, Venezuela.

Belonopterus cayennensis cayennensis Todd and Carriker, Ann. Carnegie Mus., 14, p. 186, 1922—Fundación, Colombia; Laubmann, Wiss. Erg. Deuts. Gran Chaco Exp., Vögel, p. 60, 1930 (char.; range); Darlington, Bull. Mus. Comp. Zool., 71, p. 376, 1931—Aracataca, Magdalena, Colombia.

Belonopterus chilensis cayennensis Peters, Bull. Mus. Comp. Zool., 65, p. 296, 1923 (char.; range); idem, Bds. World, 2, p. 236, 1934 (range); Brodkorb,

¹ The bird (whose divergencies from Cayenne specimens are noted) sent from Brazil (i.e. Rio de Janeiro) by Delalande to Paris, and Azara's "Terutéro o Tetéu" (No. 386) are referable to *B. c. lampronotus*.

Occ. Pap. Mus. Zool. Univ. Mich., 293, p. 2, 1934 (crit.); Griswold, Auk, 53, p. 457, 1936—La Jagua, Panama (May 17, 1936; range); Brodkorb, Occ. Pap. Mus. Zool. Univ. Mich., 349, p. 2, 1937—Caviana Island, Brazil (crit.); Brandt, Auk, 55, p. 288, 1938—Port Obaldia, Panama (Aug. 27, 1934); Pinto, Rev. Mus. Paul., 22, p. 126, 1938 (range); Wetmore, Proc. U. S. Nat. Mus., 87, p. 192, 1939—El Sombrero, Guarico, Venezuela.

Belonopterus chilensis cayannensis Wetmore, Bull. U. S. Nat. Mus., 133, p. 170, 1926 (char.; range).

Range.—Savannas of Panama (La Jagua, near Pacora), Colombia, Venezuela, the Guianas, and Brazil north of the lower Amazon (Rio Branco; Rio Maecurú; Obidos; Caviana and Mexiana Islands).¹

Field Museum Collection.—4: Venezuela (Catatumbo, Zulua, 1; Culata, Merida, 1; Rio Chama, Merida, 1); Brazil (Bõa Vista, Amazonas, 1).

Conover Collection.—17: Colombia (Nechi, Antioquía, 3; El Tambo, Cauca, 4; Popayán, Cauca, 2); Venezuela (Rio Cogollo, Zulua, 2); Brazil (Obidos, Pará, 6).

****Belonopterus cayennensis lampronotus* (Wagler).² BRAZILIAN LAPWING.**

Charadrius lampronotus Wagler, Syst. Av., 1, fol. 5, Genus Charadrius, sp. 48, 1827—part, "mas. et fem. ptilosi aestiv.," Paraguay and Brazil (type, from southern Brazil, formerly in Munich Museum,³ examined by the senior author).

¹ Adults from Obidos and one from Mexiana Island are in every respect typical *cayennensis*, agreeing with skins from the Rio Branco, Guiana, and Venezuela. One out of four adults from the Caura River has the throat and the pectoral area connected by a narrow black stripe, thus pointing to *lampronotus*.

Additional material examined.—Colombia: "Bogotá," 1; Retiro, 1.—Venezuela: Altagracia, Rio Orinoco, 3; Caura Valley, 4.—Brazil: Obidos, 1; Mexiana Island, 1.—British Guiana: Quonga, 1; Annai, 3; savannas, 5.

² *Belonopterus cayennensis lampronotus* (Wagler) differs from the nominate race in shorter tarsus, more grayish sides of head and neck, and especially in having the black gular stripe connected with the black pectoral area by an uninterrupted broad band, while the black tail-band is on average narrower. Birds from Matto Grosso and the northern parts of Brazil frequently approach typical *cayennensis* in the color of the sides of the head, but this is at best an average difference. A couple of adults from Marajó Island are typical of the present form, while a single bird from Mexiana, like others from Caviana recorded by Brodkorb, is just as unequivocally *cayennensis*.

Additional material examined.—Brazil: Natal, Marajó, 2; Bahía, 3; Campos, Rio de Janeiro, 4; Ypanema, São Paulo, 4; Jaguarai, Paraná, 1; Cuyabá, Matto Grosso, 1.—Paraguay: Villa Rica, 1.—Uruguay: Santa Elena, Soriano, 1; Colonia, 1; Montevideo, 1; Paysandú, 1.—Argentina: Los Yngleses, Ajó, 13; Est. Espartillar, Buenos Aires, 1; Misiones, 2; Est. La Germania, Santa Fé, 2; San José, Formosa, 2; Lapango, Formosa, 1; Colonia Vedia, Rio de Oro, Chaco Austral, 1; Neuquén City, Neuquén, 1.

³ The type was in the Munich Museum, when the senior author was in charge of its bird collection, but has since been lost, as we are told by Laubmann (Wiss. Erg. Deuts. Gran Chaco Exp., Vögel, p. 61, note 1, 1930).

Vanellus cayennensis (not *Parra cayennensis* Gmelin) Wied, Beitr. Naturg. Bras., 4, (2), p. 754, 1832—southeastern Brazil (Bahía, etc.); Sclater and Salvin, Proc. Zool. Soc. Lond., 1868, p. 144—Conchitas, Buenos Aires; Reinhardt, Vidensk. Medd. Naturhist. Foren., 1870, p. 35—Lagõa Santa and Sete Lagõas, Minas Geraes; Pelzeln, Orn. Bras., 3, p. 296, 1870—Rio de Janeiro (Sapitiba), São Paulo (Ypanemá, Itararé, Irisanga), Paraná (Registro Velho, Jaguaraíba), and Matto Grosso (Cuyabá, Caiçara); Hudson, Proc. Zool. Soc. Lond., 1871, p. 6—Buenos Aires; Harting, l.c., 1874, p. 450—part, Brazil, Uruguay, and Buenos Aires; idem, l.c., p. 457—Uruguay (egg descr.); Berlepsch, Journ. Orn., 22, p. 253, 1874—Blumenau, Santa Catharina; Durnford, Ibis, 1876, p. 164—near Belgrano, Buenos Aires; idem, l.c., 1877, p. 196—Province of Buenos Aires; Gibson, l.c., 1880, p. 161—Cape San Antonio, Buenos Aires (breeding); Dalgleish, Proc. Roy. Phys. Soc. Edinb., 6, p. 253, 1881—Est. de la Tala, Uruguay (eggs descr.); White, Proc. Zool. Soc. Lond., 1882, p. 627—Rio Luján and Salto, Buenos Aires; Barrows, Auk, 1, p. 278, 1884—Concepción del Uruguay, Entre Ríos (breeding); Gibson, Ibis, 1885, p. 282—Paysandú, Uruguay; Berlepsch and Ihering, Zeits. Ges. Orn., 2, p. 181, 1885—Tequara, Rio Grande do Sul; Seebohm, Geog. Distr. Charad., p. 216, 1887—part, Bahía, Rio de Janeiro, Rio Grande, and Buenos Aires; Sclater and Hudson, Arg. Orn., 2, p. 165, 1889—Argentina (in part); Dalgleish, Proc. Roy. Phys. Soc. Edin., 10, p. 88, 1889—Est. Itaño, Paraguay; Holland, Ibis, 1890, p. 425—Est. Svensk. Vetensk. Akad. Handl., (3), 23, p. 70, 1945—Bolivia (Reyes and Bresta, El Beni) (disc. *Parra chilensis* Molina).

Belonopterus cayennensis lampronotus Hellmayr, Field Mus. Nat. Hist., Zool. Ser., 12, p. 491, 1929—Miritiba, Maranhão (crit.); Naumburg, Bull. Amer. Mus. N. H., 60, p. 76, 1930—Matto Grosso; Laubmann, Wiss. Erg. Deuts. Gran Chaco Exp., Vögel, pp. 59, 61, 1930—Formosa (San José, Lapango) and Santa Fé (Est. Germania) (range; char.); Pinto, Rev. Mus. Paul., 17, (2), p. 713, 1932—Sant'Anna do Parahyba and Aquidauana, Matto Grosso; Laubmann, Verh. Orn. Ges. Bay., 20, p. 268, 1934—Est. La Geraldina, Santa Fé; Stone and Roberts, Proc. Acad. Nat. Sci. Phila., 86, p. 376, 1934—Descalvados, Matto Grosso; Pinto, Rev. Mus. Paul., 19, p. 78, 1935—Rio Gongogy, Bahía.

Belonopterus cayennensis intermedius Sztolcman, Ann. Zool. Mus. Pol. Hist. Nat., 5, p. 203, Dec. 31, 1926—"Brazil" (type in Warsaw Museum).

Belonopterus chilensis (not *Parra chilensis* Molina) Sztolcman, Ann. Zool. Mus. Pol. Hist. Nat., 5, p. 119, 1926—Fazenda Durski and Invernadinha, Paraná.

Belonopterus cayennensis chilensis Budin, El Hornero, 4, p. 404, 1931—Maimará, Jujuy (breeding).

Range.—Tableland of Brazil north to the Island of Marajó and the south bank of the lower Amazon (Santarém; Rio Tocantins); Uruguay; Paraguay; eastern Bolivia; Argentina in the northwest, south at least to Tucumán and in the pampa region to northern Rio Negro (Valcheta).

Field Museum Collection.—16: Brazil (Cidade do Barra, Rio São Francisco, Bahia, 1; Conceicao, Matto Grosso, 1; Vaccaria, Matto Grosso, 6); Bolivia (Buena Vista, Santa Cruz, 2); Uruguay (San Vicente da Castillos, Rocha, 2; Garzon, Rocha, 1; Treinte-y-Tres, 1); Argentina (Buenos Aires, Buenos Aires, 2).

Conover Collection.—19: Brazil (District Monte Alegre, Pará, 2; Miritiba, Maranhão, 2; Vaccaria, Matto Grosso, 5); Paraguay (Orloff, Chaco, 1; 265 km. west of Puerto Casado, 2; Villa Rica, 1); Argentina (Concepción, Tucumán, 2;¹ Santa Ana, Misiones, 2; Cambaceres, Buenos Aires, 2).

****Belonopterus cayennensis occidentalis* (Harting).² CHILEAN LAPWING.**

Vanellus occidentalis Harting, Proc. Zool. Soc. Lond., 1874, p. 451—Chile, Patagonia, and (?) Falkland Islands (type, from Chile, in British Museum examined); Sclater and Salvin, l.c., 1878, p. 437—Elizabeth Island, Magellan Straits; Sharpe, l.c., 1881, p. 14—Peckett Harbour, Magellan Straits, and Talcaguano, Chile; Taczanowski, Orn. Pér., 3, p. 335, 1886—"côte Péruvienne"; Oustalet, Miss. Sci. Cap Horn, 6, p. B. 117, 1891—Isla de los Leones, Patagonia, and Elizabeth Island, Straits of Magellan.

¹ These two specimens agree in color with birds from southern Brazil but have the more extensively feathered tibia of *occidentalis*.

² *Belonopterus cayennensis occidentalis* (Harting): Resembles *B. c. lampronotus* by the presence of a distinct jugular band, which is frequently even broader and more compact; but has a shorter crest, clear gray top and sides of head, abnormally more extended black pectoral area, more extensively feathered tibia, and wider black-and-white terminal tail-bands; wings and tail longer; tarsus shorter.

Birds from southwestern Argentina (Mendoza, Chubut) are perfectly identical with a Chilean series. An adult male from La Picaza, western Neuquén (Oct. 28, 1907), is typical of the present form, while one from farther east (Neuquén City) unquestionably pertains to *lampronotus*.

Brodkorb sought to separate the birds from southern Patagonia on account of smaller size and shorter tarsus, but while admitting a tendency in that respect among the inhabitants of the southern extremity of South America we believe the difference too inconstant for the recognition of *B. c. fretensis*. It is rather suggestive that the author, without any comment, refers a specimen from Tierra

Parra cayennensis (not of Gmelin) Lesson, Voy. Coquille, Zool., 1, (1), p. 242, 1828—Penco, Chile.

Paul., 17, (2), p. 801, 1932—Alto Rio Paraná, São Paulo; Peters, Bds. World, 2, p. 241, 1934 (range); Stone and Roberts, Proc. Acad. Nat. Sci. Phila., 86, p. 37, 1934—Descalvados, Matto Grosso; Brodkorb, Occ. Pap. Mus.

Zool. Univ. Mich., 349, p. 6, 1937—Marajó, Brazil; Pinto, Rev. Mus. Paul., 22, p. 127, 1938—Amazonas (Rio Juruá), Maranhão (Miritiba), Goyáz (Pte. Ipé Arcado), and São Paulo (Iguapé, Franca, Itapura, Rio Paraná, Presidente Epitacio); Wetmore, Proc. U. S. Nat. Mus., 87, p. 192, 1939—Independencia and El Sombrero, Venezuela; Nicéforo, Caldasia, 3, p. 373, 1945—Colombia (Llanos del Meta; La Morelia, Caquetá); Gyldenstolpe, K. Svensk. Vetensk. Akad. Handl., (3), 22, p. 42, 1945—Brazil (Santo Antonio, Rio Juruá and various Amazonian localities); idem, l.c., (3), 23, p. 71, 1945—Bolivia (Victoria, El Desierto and La Laguna, El Beni).

Vanellus cayanus Schlegel, Mus. Pays-Bas, 29, Cursores, p. 62, 1865—Brazil (crit.); Seebohm, Geog. Distr. Charad., p. 229, pl. [10], 1887 (crit.).

Hoplopterus spinosus Goeldi, Ibis, 1903, p. 500—Rio Capim, Para.

Range.—Eastern Colombia, southern Venezuela (Orinoco basin) and the Guianas south through Amazonia to eastern Bolivia, northern Paraguay, northeastern Argentina (Misiones), and southern Brazil (Matto Grosso and São Paulo); also in western Ecuador (Babahoyo, Rio Daule).¹

Field Museum Collection.—12: Brazil (Conceicao, Rio Branco, Amazonas, 2; Serra Grande, Rio Branco, Amazonas, 1; Bõa Vista, Amazonas, 3; Deserto, Piauhy, 1; São Marcello, Bahía, 5).

Conover Collection.—11: Ecuador (Rio Bobonaza, 1); Brazil (Rio Maycuru, Monte Alegre, Pará, 2; Ibiapaba, Piauhy, 1; Philadelphia, Goyáz, 4; Cavalcanti, Goyáz, 1); Bolivia, Santa Cruz (Buena Vista, 1; Cerro del Amboro, 1).

Genus *PTILOSCELYS* Bonaparte

Ptiloscelys Bonaparte, Compt. Rend. Acad. Sci. Paris, 43, p. 419, 1856—type, by monotypy, *Charadrius resplendens* Tschudi.

Ptiloscelis Sharpe, Cat. Bds. Brit. Mus., 24, p. 137, 1896 (emendation).

**Ptiloscelys resplendens* (Tschudi). ANDEAN LAPWING.

Charadrius resplendens Tschudi, Arch. Naturg., 9, (1), p. 388, 1843—Andes of Peru (type in Neuchâtel Museum); idem, Unters. Faun. Peru., Orn., p. 295, 1846—puna zone of Peru and highlands of Ecuador (Riobamba, Quito, Ibarra).

Vanellus ptiloscelis Gray and Mitchell, Gen. Bds., 3, p. [541], pl. 145, 1847.

¹ The record of *Hoplopterus cayanus* from East Falkland Island (Abbott, Ibis, 1861, p. 155; Sclater, Proc. Zool. Soc. Lond., 1861, p. 46) is no doubt due to confusion with *Belonopterus cayennensis occidentalis* (cf. Wace, El Hornero, 2, p. 198, 1921). Its reported occurrence on the "Aloor River, Honduras" (cf. Moore, Proc. Zool. Soc. Lond., 27, p. 63, 1859) is likewise open to doubt. The specimen cannot be found (cf. Sharpe, Cat. Bds. Brit. Mus., 24, p. 136 [note *], 1896).

Vanellus resplendens Sclater, Proc. Zool. Soc. Lond., 26, p. 556, 1858—above Punín (near Riobamba), Ecuador; idem, l.c., 28, p. 82, 1860—vicinity of Quito, Ecuador; idem and Salvin, l.c., 1869, p. 156—Tinta, Dept. Cuzco, Peru; Taczanowski, l.c., 1874, p. 560—Junín and Maraynioc, Junín, Peru; Allen, Bull. Mus. Comp. Zool., 3, p. 356, 1876—Moho, Lake Titicaca; Sclater, Proc. Zool. Soc. Lond., 1886, p. 403—Sitani and Sacayá, Tarapacá, Chile; Taczanowski, Orn. Pér., 3, p. 336, 1886—Peruvian localities; Seebohm, Geog. Distr. Charad., p. 228, 1887 (crit.; range); Philippi, Orn. 4, p. 159, 1888—Cana, Antofagasta, Chile; Allen, Bull. Amer. Mus. N. H., 2, p. 108, 1889—La Paz, Bolivia; Sclater, Proc. Zool. Soc. Lond., 1891, p. 136—Tarapacá, Chile; Salvin, Nov. Zool., 2, p. 21, 1895—near Cajamarca, Peru; Reed, Anal. Univ. Chile, 93, p. 209, 1896—Tarapacá, Chile; Lane, Ibis, 1897, p. 303—Sayacá and Sitani, Tarapacá.

Ptiloscelis resplendens Sharpe, Cat. Bds. Brit. Mus., 24, pp. 137, 733, 1896—Ecuador ("Sarayacu"), Peru (Maraynioc, Tinta, Paucartambo), and Chile (Sitani, Sacayá); Salvadori, Boll. Mus. Zool. Torino, 12, No. 292, p. 35, 1897—Cara-huassi, Salta; idem and Festa, l.c., 15, No. 368, p. 43, 1900—Malchingui, Chaupi, Vallevecioso, and Aloag, Ecuador; Berlepsch and Stolzmann, Proc. Zool. Soc. Lond., 1902, (2), p. 51—Ingapirca and Maraynioc, Junín, Peru; Lillo, Anal. Mus. Nac. Buenos Aires, 8, p. 212, 1902—La Ciénaga, Tucumán; Lönnberg, Ibis, 1903, p. 446—Moreno, Puna de Jujuy; Bruch, Rev. Mus. La Plata, 11, p. 250, 1904—Santa Catalina, Jujuy; Baer, Orn. 12, p. 231, 1904—Lara, Tucumán; Ménégau, Bull. Soc. Phil. Paris, (10), 1, p. 219, 1909—Oruro (Huancani; vicinity of Pazña; "Tamarape" [=Pomarape]) and Potosi, Bolivia; Hartert and Venturi, Nov. Zool., 16, p. 250, 1909—Lagunas Grandes and Las Ciénagas, Tucumán; Dabbené, Anal. Mus. Nac. Buenos Aires, 18, p. 216, 1910 (range in Argentina); Ménégau, Rev. Franç. d'Orn., 1, p. 319, 1910—Huamachuco, Peru; idem, Miss. Serv. Géogr. Armée Mes. Arc Merid. Equat., 9, p. B. 9, 1911—Narihuña, Ecuador; Dabbené, Bol. Soc. Physis, 1, p. 258, 1913 (range in Argentina); Lönnberg and Rendahl, Ark. Zool., 14, No. 25, p. 23, 1922—Chaupicruz and Chillogalla (Antisana), Ecuador; Budin, El Hornero, 4, p. 404, 1931—Rio Humahuaca and Sierras de Zenta, Jujuy (breeding).

Ptiloscelys resplendens Chubb, Ibis, 1919, p. 262—Páramo near Cajamarca, Peru; Chapman, Bull. U. S. Nat. Mus., 117, p. 50, 1921—Lucma, Uribamba, Peru; idem, Bull. Amer. Mus. N. H., 55, p. 191, 1921—Antisana, Pichincha, Mount Chimborazo, and Bestión, Ecuador; Zimmer, Field Mus. Nat. Hist., Zool. Ser., 17, p. 254, 1930—Huánuco Viejo, Peru; Hellmayr, l.c., 19, p. 369, 1932—Antofagasta and Tarapacá, Chile; Peters, Bds. World, 2, p. 242, 1934 (range); Philippi, Bol. Mus. Nac. Santiago, 16, p. 52, 1938—Vegas de Chacalluta, Tacna, Chile; Morrison, Ibis, 1939, pp. 464, 646—Huancavelica and Lake Junín, Peru.

Range.—Puna and Temperate zones of Ecuador, Peru, and Bolivia to northern Chile (south to Antofagasta) and northwestern Argentina.

Field Museum Collection.—27: Ecuador (unspecified, 1; Paramo del Chimborazo, 2); Peru (Chachapoyas, Amazonas, 1; Leimebamba,

Amazonas, 2; Huánuco Viejo, Huánuco, 2; Junín, Junín, 2; Cailloma, Arequipa, 2); Bolivia (Huaqui, La Paz, 1; Aiquile, Cochabamba, 1; Tiraque, Cochabamba, 4; Colomi, Cochabamba, 8); Argentina (unspecified, 1).

Conover Collection.—23: Ecuador (Turubamba, 2; Romerillos, Pichincha, 1; Cerro Cotopaxi, 1; Sambiza, Pichincha, 1; Cerro Mojanda, Pichincha, 2); Peru (Huánuco Viejo, Huánuco, 2; Puno, Puno, 2; Chucuito, Puno, 1); Bolivia (Esperanza, Pacajes, La Paz, 2; Tiraque, Cochabamba, 2; Aiquile, Cochabamba, 1; Vacas, Cochabamba, 1); Argentina (Concepción, Tucumán, 4; Sierra de Trenta, Jujuy, 1).

Subfamily CHARADRIINAE. Plovers

Genus SQUATAROLA Cuvier

Squatarola Cuvier, Règ. Anim., 1, p. 467, "1817" (=Dec. 7, 1816)—type by tautonymy, *Tringa squatarola* Linnaeus.

**Squatarola squatarola* (Linnaeus). BLACK-BELLIED PLOVER.

Tringa squatarola Linnaeus, Syst. Nat., 10th ed., 1, p. 149, 1758—based on Faun. Svec., No. 155, Sweden.

Tringa helvetica Linnaeus, Syst. Nat., 12th ed., 1, p. 250, 1766—based on "Le Vanneau de Suisse" Brisson, Orn., 5, p. 106, pl. 10, fig. 1, Switzerland (type in Réaumur Collection).

Tringa varia Linnaeus, Syst. Nat., 12th ed., 1, p. 252, 1766—based on "Le Vanneau varié" Brisson, Orn., 5, p. 103, pl. 9, fig. 2, France (type in Réaumur Collection).

Charadrius hypomelus Pallas, Reisen Russ. Reich., 3, p. 699, 1776—"colit paludes borealis orae" (new name for *Tringa helvetica* Linnaeus).

Charadrius naevius Gmelin, Syst. Nat., 1, (2), p. 692, 1789—based on Beseke, Schrift. Berliner Naturf. Gesells., 7, p. 464, Courland.

Vanellus melanogaster Bechstein, Gemeinn. Naturg. Deutschl., 4, p. 356, 1809—new name for *Tringa helvetica* Linnaeus; Holboell, Naturhist. Tidsskr., 4, p. 406, 1843—Greenland (Nanortalik, Sept.; Amaralik, Aug.).

Charadrius hypomelanus Pallas, Zoogr. Rosso-Asiat., 2, p. 138, 1811—emendation of *C. hypomelus* Pallas.

Charadrius pardela Pallas, Zoogr. Rosso-Asiat., 2, p. 142, 1811—new name for *Tringa varia* Linnaeus.

Squatarola cinerea Fleming, Hist. Brit. Anim., p. 111, 1828—new name for *Tringa squatarola* Linnaeus and *Tringa helvetica* Linnaeus.

Squatarola helvetica australis Reichenbach, Nov. Syn. Av., No. 5, p. 3, 1851—based on *Squatarola helvetica* Gould, Bds. Australia, 6, pl. 12, Australia.

Squatarola megarhynchos Brehm, Vogelfang, p. 284, 1855—migrates from north-eastern to southwestern Europe and Egypt (type, from Menzaleh Lake,

Egypt, in Tring Collection now in the American Museum of Natural History, New York; cf. Hartert, Nov. Zool., 25, p. 53, 1918).

Squatarola helvetica a wilsoni Bonaparte,¹ Compt. Rend. Acad. Sci. Paris, 46, p. 416, 1856—based on *Vanellus helveticus* Wilson, Amer. Orn., Ord. ed., 7, p. 42, America.²

Squatarola rhynchomega Bonaparte, Compt. Rend. Acad. Sci. Paris, 46, p. 416, 1856—"Abyssinia" (type in Frankfurt Museum); Hartert, Kat. Vogels. Mus. Senckenb. Ges., p. 217, 1891—"Australia(?)" (crit.).³

Squatarola helvetica Pelzeln, Orn. Bras., 3, p. 296, 1870—Cajútuba, Pará, Brazil; Taczanowski, Proc. Zool. Soc. Lond., 1877, p. 330—Chimbote, Ancachs, Peru; idem, Orn. Pér., 3, p. 338, 1886—Chimbote; Sharpe, Cat. Bds. Brit. Mus., 24, pp. 182, 737, 1896 (monog.); Salvadori and Festa, Boll. Mus. Zool. Torino, 15, No. 368, p. 43, 1900—Santa Elena, Ecuador (Jan.); Salvin and Godman, Biol. Centr.-Amer., Aves, 3, p. 350, 1903—North America, Mexico (Mazatlán; Valley of Mexico; San Mateo, Tehuantepec; Mérida, Yucatan), Guatemala (Chiapam), and South America; Ihering, Rev. Mus. Paul., 6, p. 361, 1905—São Sebastião, São Paulo (Jan. 6); idem, Cat. Faun. Braz., 1, p. 47, 1907—same locality.

Charadrius megalorhynchus Reichenow, Journ. Orn., 25, p. 11, 1877—new name for *Squatarola rhynchomega* Bonaparte and *Squatarola megarhynchus* Brehm.

Charadrius squatarola Hartert, Ibis, 1893, p. 307—Aruba (June 24); Winge, Medd. Grøn., 21, p. 148, 1898—Greenland (various records); Dwight, Auk, 17, p. 383, 1900 (plumages); Hartert, Nov. Zool., 9, p. 307, 1902—Aruba; Reiser, Denks. Math.-Naturw. Kl. Akad. Wiss. Wien, 76, p. 94, 1910 (1926)—coast of Piahy, Brazil (Sept. 19); idem, l.c., p. 224, 1923 (1926)—same locality.

Squatarola squatarola Rothschild and Hartert, Nov. Zool., 6, p. 187, 1899—Albemarle and Charles Islands, Galápagos; Clark, Proc. Bost. Soc. N. H., 32, p. 248, 1905—Barbados (Sept. 22), Carriacou, and Grenada, Lesser Antilles; Berlepsch, Nov. Zool., 15, p. 305, 1908—Cayenne, French Guiana (Nov. 2); Cory, Field Mus. Nat. Hist., Orn. Ser., 1, p. 197, 1909—Aruba; Carriker, Ann. Carnegie Mus., 6, p. 416, 1910—mouth of Matina River (Nov. 14) and Lepanto (Mar. 16), Costa Rica; Ridgway, Bull. U. S. Nat. Mus., 50, (8), p. 72, 1919 (monog.; full bibliog.); Chubb, Ibis, 1919, p. 263—Callao, Peru (Jan. 10); Rowan, Condor, 25, p. 21, 1923—Alberta (migration); Chapman, Bull. Amer. Mus. N. H., 55, p. 192, 1926—coast of Manaví (Feb. 16), Chone (Dec. 14), Jambeli (Nov. 27; July 15, 20), and Santa Elena (Feb. 21), Ecuador; Conover, Auk, 43, p. 312, 1926—Hooper Bay, Alaska (common breeder; weights); Bent, Bull. U. S. Nat. Mus., 146, p. 154, 1929 (life hist.); Snyder, Auk, 47, p. 79, 1930 (sexual difference in breeding plumage); Swarth, Occ. Pap. Calif. Acad. Sci., 18,

¹ *Squatarola wilsoni* Lichtenstein (Nomencl. Av. Mus. Berol., p. 95, 1854) is a nomen nudum.

² Cf. Bonaparte, Journ. Acad. Nat. Sci. Phila., 5, p. 103, 1825.

³ The locality of the type appears to be in doubt. While Bonaparte, evidently in error, ascribes it to "Abyssinia," Hartert tells us that the label bears the note "Australia(?)."

p. 58, 1931—Galápagos Islands; Griscom, Bull. Amer. Mus. N. H., 64, p. 130, 1932—Champerico, Guatemala (Sept. 10); Peters, Condor, 36, p. 27, 1934 (crit.; meas.; nomencl.); idem, Bds. World, 2, p. 243, 1934 (range); Griscom, Bull. Mus. Comp. Zool., 78, p. 306, 1935—Panama (winter); Pinto, Rev. Mus. Paul., 22, p. 128, 1938—Bahía (Rio de Suape and Corupéba, Feb.) and São Paulo (São Sebastião, Jan.); Steullet and Deautier, Not. Mus. La Plata, 3, No. 7, p. 1, 1938—General Lavalle, Buenos Aires (Apr. 5); Zotta, El Hornero, 7, p. 46, 1938—General Lavalle, Buenos Aires; Low, Ibis, 1938, p. 154 (crit.; meas.); Dickey and van Rossem, Field Mus. Nat. Hist., Zool. Ser., 23, p. 170, 1938—Puerto del Triunfo (Dec. 30, 31) and Barra de Santiago (Apr. 4), El Salvador; Dementiev, Ibis, 1939, p. 352 (crit.; meas.); Bray, Auk, 60, p. 519, 1943—Baffin Island (nesting); Soper, l.c., 63, p. 227, 1946—northern Baffin Island (breeding).

Squatarola squatarola cynosurae Thayer and Bangs, Proc. New Engl. Zool. Cl., 5, p. 23, Apr. 9, 1914—Baillie Island, Mackenzie, Arctic America (type in the Museum of Comparative Zoology, Cambridge, Mass.); Brooks, Bull. Mus. Comp. Zool., 59, p. 377, 1915—Arctic coast of Alaska (breeding); Peters, l.c., 61, p. 404, 1917—Monte Cristi, Hispaniola; Wetmore, Sci. Surv. Porto Rico and Virgin Islands, 9, p. 356, 1927—Puerto Rico (transient); Bangs, Bull. Mus. Comp. Zool., 70, p. 176, 1930 (crit.); Wetmore and Swales, Bull. U. S. Nat. Mus., 155, p. 153, 1931—Hispaniola; Hellmayr, Field Mus. Nat. Hist., Zool. Ser., 19, p. 369, 1932—Caldera, Atacama, Chile (Dec. 2); Pinto, Rev. Mus. Paul., 19, p. 79, 1935—Corupéba (Feb. 5, 6) and Ilha Madre de Deus (Feb. 2), Bahía, Brazil; Philippi, Bol. Mus. Nac. Santiago, 16, p. 52, 1938—mouth of Rio Maipo, Santiago, Chile.

Squatarola squatarola squatarola Grinnell, Univ. Calif. Pub. Zool., 32, p. 96, 1928—Lower California (transient); Salomonsen, Medd. Grøn., 93, (6), p. 9, 1935—Carlshavn, northeastern Greenland (other Greenland records listed).

Range.—Breeds in North America from the Bering Sea coast (Hooper Bay) of Alaska north and east along the Arctic coast and islands to Baffin and Southampton Islands, also on the Arctic tundra of Europe and Asia; migrates south to winter quarters in Africa, Madagascar, India, Australia, southern United States, West Indies, and South America to the Galápagos Islands, Peru, Chile (Caldera, Atacama; mouth of the Rio Maipo, Santiago), and Brazil (Pará; Piahy; Bahía; São Sebastião, São Paulo); accidental in Greenland (various records) and Argentina (General Lavalle, Buenos Aires; April 5).¹

Field Museum Collection.—151: Alaska (Barrow, 4; Smith Bay, 2; Chipp River, 1; Nome, 4; St. Michaels, 1; Bethel, 1); Arctic Canada

¹ From the investigations of Peters (Condor, 36, pp. 27–29), Low (Ibis, 1938, pp. 154–158), and Dementiev (Ibis, 1939, p. 352), it results that subdivision of the Black-bellied Plover is impracticable, the measurements being too variable individually, while the alleged color differences prove to be non-existent.

(Franklin Bay, 1); Manitoba (Sandy Bay, 1); Quebec (Magdalen Islands, 22); Prince Edward Island (unspecified, 1); Nova Scotia (Barrington, 1); Massachusetts (unspecified, 1; North Truro, 2; Monomoy Island, 31); Connecticut, New Haven County (North Haven, 1; New Haven, 1; West Haven, 2); New York (North Hamlin, Monroe County, 1; Cayuga Lake, 2); Virginia (Cape Charles, 1); North Carolina, Dare County (Bodie Island, 8; Pea Island, 7); North Dakota (Stump Lake, Nelson County, 2; Rock Lake, Towner County, 2; Towner County, 2); Nebraska (Keith County, 1); Wisconsin (Beaver Dam, 1); Illinois (Waukegan, 1); Indiana (Miller, 2); Texas (Corpus Christi, 1; Port Lavaca, 1); California (San Francisco, 1; Monterey County, 1; Del Monte Forest, 1; Monterey, 1; Ventura County, 1; Redwood City, 1; Trinidad, 1; Eureka, 3; San Clemente Island, 3; Sunset Beach, 2; Pacific Beach, 3; San Diego County, 1; Palo Alto, 1; Hyperion, 2; Los Angeles County, 1; Goleta, 1; La Patera Point, 1; Santa Barbara, 1); Florida (Amelia Island, 2; Pilot Town, 1; Key West, 2); Mexico (Yucatan, 1); Costa Rica (Piedra de Blanca, 1; Point Jimenez, 1); Virgin Islands (St. Croix, 1; Virgin Gorda, 1); Lesser Antilles (Anegada, 1); Dutch West Indies (Aruba, 4); Chile (Atacama, 1).

Conover Collection.—30: Alaska (Hooper Bay, Bering Sea, 8; Kashunuk River, Bering Sea, 2); Alberta (Beaverhill Lake, Tofield, 3); Ontario (Rosspport, Thunder Bay, 1); Nebraska (Lincoln, 1); Illinois (Mud Lake, Cook County, 1); Indiana (Miller, 2); California (Point Magie, Ventura County, 5; Moss Landing, Monterey County, 1); Costa Rica (Punta Piedra, Guanacaste, 5); British Guiana (Buxton, Demerara, 1).

Genus **PLUVIALIS** Brisson

Pluvialis Brisson, Orn., 1, p. 46; 5, p. 42, 1760—type, by tautonymy, "*Pluvialis aurea*" Brisson=*Charadrius pluvialis* Linnaeus=*Charadrius apricarius* Linnaeus.

Pluvialis apricaria¹ **altifrons** (Brehm).² NORTHERN GOLDEN PLOVER.

¹ We fully concur with Witherby and Jourdain (Ibis, 1933, pp. 349-351) that *Charadrius apricarius* Linnaeus (Syst. Nat., 10th ed., 1, p. 150, 1758) refers to the southern form of the Golden Plover subsequently named *C. a. oreophilus* by Meinertzhagen (Bull. Brit. Orn. Cl., 42, p. 6, 1921). Linnaeus' account of No. 156 in the Fauna Svecica, the principal source of *C. apricarius*, was clearly based on the Oeland bird described at length s.n. "Alwargrim" in Olanska Resa, p. 72, 1741, and not on Rudbeck's picture, as claimed by Lönnberg (Ibis, 1931, p. 306).

² *Pluvialis apricaria altifrons* (Brehm) differs from the nominate race by having the under parts solidly black, not marbled with white.

Charadrius altifrons Brehm, Handb. Naturg. Vög. Deuts., p. 542, 1831—Färoes “and other northwestern islands, visiting Rügen in late summer” (type, from Färoe, July, 1828, in Tring Collection [cf. Hartert, Nov. Zool., 25, p. 52, 1918], now in the American Museum of Natural History, New York).

Charadrius apricarius (not of Linnaeus) Reinhardt, Vidensk. Medd. Naturhist. Foren., 1874, p. 181—Sakak, Greenland (one specimen in summer plumage); idem, l.c., 1881, p. 184—Nanortalik and Sakak, Greenland; Chamberlain, Auk, 6, p. 217, 1889—southern Greenland (ex Hagerup).

Charadrius pluvialis typicus (sic) Winge, Medd. Grøn., 21, pp. 148, 150, 1898—Greenland (various records; meas.).

Pluvialis apricarius Ridgway, Bull. U. S. Nat. Mus., 50, (8), p. 80, 1919 (in part; monog.; full bibliog.).

Pluvialis apricaria altifrons Bent, Bull. U. S. Nat. Mus., 146, p. 171, 1929—Greenland (life hist.).

Pluvialis apricaria apricaria Peters, Bds. World, 2, p. 244, 1934 (range).

Pluvialis apricarius apricarius Tcherniakofsky, Oiseau, Paris, 1939, p. 343—Scoresby Sound, Greenland.

Range.—Breeds in Iceland, the Färoes, northern Scandinavia (south to Jemtland, Sweden, and Trondhjem, Norway), and east through northern Europe and Asia to the Yenesei; winters chiefly in the countries bordering the Mediterranean Sea; casual in Greenland.

****Pluvialis dominica dominica* (P. L. S. Müller). AMERICAN GOLDEN PLOVER.**

Charadrius dominicus P. L. S. Müller, Natursyst., Suppl., p. 116, 1776—based on “Le Pluvier doré, de Saint-Domingue” Brisson, Orn., 5, p. 48, pl. 6, fig. 1, Saint Domingue=Hispaniola; Nelson, Nat. Hist. Coll. Alaska, 3, p. 123, 1887—upper Yukon, Point Barrow and Bering Sea coast, Alaska; Cory, Bds. W. Ind., p. 227, 1889—West Indies; Allen, Bull. Amer. Mus. N. H., 2, p. 109, 1889—lower Beni, Bolivia (August); Aplin, Ibis, 1894, p. 206—Uruguay (visitor); Sharpe, Cat. Bds. Brit. Mus., 24, pp. 195, 738, 1896 (in part; monog.; full bibliog.); Salvadori, Boll. Mus. Zool. Torino, 12, No. 292, p. 35, 1897—Aguaienda and San Francisco, Tarija, Bolivia (Nov.); Ihering, Rev. Mus. Paul., 3, p. 429, 1899—São Paulo, Brazil; Dwight, Auk, 17, p. 383, 1900 (plumages); Kerr, Ibis, 1901, p. 235—Paraguayan Chaco (Nov. 21); Lillo, Anal. Mus. Nac. Buenos Aires, 8, p. 212, 1902—Famaillá, Tucumán; Lönnberg, Ibis, 1903, p. 446—Moreno, Jujuy (Dec. 1); Salvin and Godman, Biol. Pluvialis dominica dominica Bailey, Condor, 28, p. 84, 1926—Alaska (disc. ranges); Bent, Bull. U. S. Nat. Mus., 146, p. 175, 1929 (life hist.); Urner, Auk, 50, p. 420, 1933 (calls); Peters, Bds. World, 2, p. 245, 1934 (range); Belcher and Smooker, Ibis, 1935, p. 287—Trinidad and Tobago; Pinto, Rev. Mus. Paul., 22, p. 128, 1938—São Paulo (Iguapé, Dec.; Itapura, Oct.; Ypiranga, Dec.; São Carlos), Rio Grande do Sul (Itaqui, Feb.), and Goyás (Jaraguá, Sept.; Inhúmas, Nov.); Morrison, Ibis, 1939, p. 464—Santa Inez, Huancavelica, Peru (Nov. 10); Porsild, Canad. Field Nat., 57, p. 27, 1943—Mackenzie Delta (prob. breeding); Conover, Auk, 62, p. 569, 1945—Alaska (breeding range; dist. chars.); Borrero, Caldasia, 3, (14), p. 413, 1945—Sabana de Bogotá, Colombia.

Pluvialis dominicus fulvus Conover, Auk, 43, p. 313, 1926—part, Alaska, Bering Sea (Askinuk Range, 1 adult, 2 young; Hooper Bay, 1 adult); Swarth, Pac. Coast Avifauna, 22, p. 27, 1934—Nunivak Island, part (4 adults, 1 immature, 2 young); Dixon, Bds., Mammals Mt. McKinley Nat. Park, p. 66, 1938 (breeding; specimens examined by junior author).

Range.—Breeds from the coast of western Alaska, including the closely adjacent islands in Bering Sea (Nelson and Nunivak Islands) and suitable localities in the interior (above timber line), south to the Alaska Peninsula, east along the Arctic coast to the Melville Peninsula, north to Melville and North Devon Islands and south to Churchill on the west side of Hudson Bay; migrates south through the interior (mostly birds of the year) and from Nova Scotia, New Brunswick, etc., over the Bermuda Islands and the West Indies to winter quarters in Chile (sparingly), Bolivia, Argentina (south to provinces of Mendoza and Buenos Aires), Uruguay, and southern Brazil; casual in Greenland (Jacobshavn, Godthaab, etc.); occasional in British Isles. In spring migrates north mostly through the interior of North America.¹

Field Museum Collection.—88: Alaska (Barrow, 7; Collinson Point, 1; Nome, 2); Arctic America (Franklin Bay, 1); Alberta (Beaverhill Lake, 1); Manitoba (Churchill, 1); Quebec (Magdalen

¹ *Additional material examined*.—Alaska: Barrow, 62; Wainwright, 50; Cape Lisburne, 2; Tigara, Point Hope, 3; Kotzebue Sound, 4; Port Clarence, 2; Nome, 2; Golovin Bay, 1; St. Michaels, 7; Nelson Island, 1; Nunivak Island, 7; Mount McKinley, 2; Rampart House, 1; Fairbanks, 1.

Islands, 1); North Dakota (Towner County, 19; Nelson County, 1); Iowa (Burlington, 1); Minnesota (Wilder, 1; Heron Lake, 1); Illinois (Chicago, 1); Indiana (Liverpool, 1); Massachusetts (Monomoy Island, 13); New Hampshire (Seabrook, 1); Connecticut (West Haven, 27); California (Eureka, 2; La Patera Point, 1); Colorado (New Castle, 1); Texas (Corpus Christi, 1); Colombia (Magdalena, 1); Bolivia (Cerro San Benito, Cochabamba, 1); Argentina (Caraguatay, Misiones, 1).

Conover Collection.—53: Alaska (Barrow, 7; Chipp River, Barrow, 11; Cape Simpson, Barrow, 2; Hooper Bay, Bering Sea, 1; Igiak Bay, Bering Sea, 3);¹ Yukon Territory (Marsh Lake, 1); Alberta (Tofield, 7); Manitoba (Churchill, 6); Kansas (Hamilton, 1); Massachusetts (East Orleans, 8); Colombia (Popayán, Cauca, 3); Brazil (Jaguariahyva, Parana, 1); Paraguay (Orloff, Chaco, 1); Bolivia (Vacas, Cochabamba, 1).

****Pluvialis dominica fulva* (Gmelin).² PACIFIC GOLDEN PLOVER.**

Charadrius fulvus Gmelin, Syst. Nat., 1, (2), p. 687, 1789—based on "Fulvous Plover" Latham, Gen. Syn. Bds., 3, (1), p. 211, 1785, Otaheite Island.

Charadrius taitensis Lesson, Man. d'Orn., 2, p. 321, 1828—substitute name for *Charadrius fulvus* Gmelin.

Charadrius xanthocheilus Wagler, Syst. Av., 1, fol. 5, *Charadrius*, sp. 36, 1827—based on *Charadrius fulvus* var. β . Gmelin, Syst. Nat., 1, (2), p. 687, 1789 (type in Museum Leverianum).

Charadrius glaucopus (Forster MS.) Wagler, Isis, 1829, col. 649—substitute name for *Charadrius fulvus* "Latham" (=Gmelin).

Charadrius virginianus Jardine and Selby, Illust. Orn., 2, (6), pl. 85, Aug., 1830—India, East Indian Islands and New Holland.

¹ Two half grown young and the male parent, wing 181 mm. Adult is partially in winter dress and neither it nor the young have any of the yellow wash on the under parts found in *fulva*.

² *Pluvialis dominica fulva* (Gmelin): In breeding plumage the only reliable character is its smaller size, wings of males running 162–177, females 160–176 mm., as against 171–192 and 174–195, respectively, in *P. d. dominica*. Immatures and winter adults have the dorsal surface yellower, more golden, less lemonish, and the under parts much yellower and lighter throughout, especially on the belly and vent, whereas *P. d. dominica* has the abdomen pale dusky brown like the ground color of the foreneck and chest. Downies of the Pacific form have the upper parts much more profusely spotted with yellow, and are more golden (less greenish) in tone. There is also a very distinct yellow wash covering the broad white collar on the hindneck, the sides of the face, neck and chest, all of which color is entirely lacking in the American race.

Additional material examined.—Alaska: Barrow, 4; Wainwright, 5; Kotzebue Sound, 1; Wales, 14; Port Clarence, 1; Kruzgamepa, 2; Port Townsend, 1; St. Lawrence Island, 3; Nome, 36; Port Safety, 2; St. Michaels, 22; Igiak Bay, 1; Hooper Bay, 1; Nelson Island, 2; Nunivak Island, 15; Nushagak, 1.

Charadrius pluvialis orientalis Temminck and Schlegel, in Siebold, Faun. Japon., Aves, (9), p. 104, pl. 62, 1849—Japan (type in Leyden Museum).¹

Charadrius dominicus fulvus Nelson, Nat. Hist. Coll. Alaska, 3, p. 125, 1887—Islands and coast of Bering Sea, Alaska (dist. chars. of immatures); Henshaw, Auk, 27, p. 245, 1910 (migration, Alaska to Hawaii); Haviland, Ibis, 1915, p. 716 (descr. downy); Brooks, Condor, 22, p. 31, 1920—Comax, Vancouver Island; Rowan, Brit. Bds., 20, p. 39, 1926—Tofield, Alberta; Hørring and Salomonsen, Medd. Grønl., 131, p. 29, 1941—Angmagssalik, eastern Greenland (immature, wing 163 mm.).

Charadrius dominicus (not of Müller) Sharpe, Cat. Bds. Brit. Mus., 24, pp. 195, 738, 1896 (in part; monog.; full bibliog.).

Pluvialis dominicus fulvus Ridgway, Bull. U. S. Nat. Mus., 50, (8), p. 88, 1919 (monog.; full bibliog.); Brooks, Condor, 23, p. 153, 1921—Masset, Queen Charlotte Islands; Conover, Auk, 43, p. 313, 1926—part, Hooper Bay (migration), Askinuk Range (male with eggs); Swarth, Pac. Coast Avifauna, 22, p. 27, 1934—Nunivak Island, part (7 adults, 8 immatures).

Pluvialis dominica fulva Bailey, Condor, 28, p. 84, 1926—Wainwright and Wales, Alaska; Bent, Bull. U. S. Nat. Mus., 146, p. 193, 1929 (life hist.); Peters, Bds. World, 2, p. 244, 1934 (range); van Rossem, Condor, 38, p. 217, 1936—Clallam Bay, Washington (Oct. 28, 1921); Grinnell, l.c., 38, p. 219, 1936—Bay Farm Island, Alameda County, California (Jan. 15, 1922); Brooks, l.c., 39, p. 176, 1937—Queen Charlotte Islands (list of Pacific coast and interior records); Miller, l.c., 46, p. 130, 1944—Humboldt County, California (plumages); Conover, Auk, 62, p. 570, 1945—Alaska (breeding range; dist. chars.).

Range.—Breeds in northern Siberia from the Yalmal Peninsula and the Yenesei River (overlapping the range of *P. a. apricaria*) east to western Alaska on the shores of (?) Kotzebue Sound and Bering Sea (overlapping the range of *P. d. dominica*); winters in India, southern China, Indo-Chinese countries, Malay Archipelago, Oceania, Australia, and the Hawaiian Islands; casual in British Columbia (Queen Charlotte and Vancouver Islands), Alberta (Tofield), Washington (Clallam Bay, Oct. 28, 1921) and California (Bay Farm Island, Jan. 15, 1922).

Field Museum Collection.—19: Alaska (St. Lawrence Island, 2; Nome, 4; St. Michaels, 10; Bethel, 3).

Conover Collection.—7: Alaska (Point Barrow, 1;² Nome, 2; Hooper Bay, Bering Sea, 3; Kashunuk River, Bering Sea, 1).

¹ Cf. Schlegel, Mus. Pays-Bas, No. 29, Cursores, p. 51, 1865 (spec. no. 5, of *Pluvialis fulvus*, Japan).

² An adult male with large brood patches, taken June 22 (wing 162 mm.).

Genus CHARADRIUS¹ Linnaeus²

Charadrius Linnaeus, Syst. Nat., 10th ed., 1, p. 150, 1758—type, by tautonymy, "*Charadrius* s. *hiaticula*" Aldrovandi=*Charadrius hiaticula* Linnaeus.

Aegialitis Boie, Isis, 1822, col. 558—type, by subs. desig. (Gray, Cat. Gen. Subgen. Bds., p. 111, 1855), *Charadrius hiaticula* Linnaeus.

Aegialites Boie, Isis, 1826, col. 978 (emendation).

Hiaticula "Moehring" G. R. Gray, List Gen. Bds., p. 65, 1840—type, by orig. desig., *Hiaticula annulata* G. R. Gray=*Charadrius hiaticula* Linnaeus.

Aegialeus Reichenbach, Av. Syst. Nat., p. xviii, "1852" (=1853)—type, by orig. desig., *Charadrius semipalmatus* "Aud." (=Bonaparte).

Oxyechus Reichenbach, Av. Syst. Nat., p. xviii, "1852" (=1853)—type, by orig. desig., *Charadrius vociferus* Linnaeus.

Ochthodromus Reichenbach, Av. Syst. Nat., p. xviii, "1852" (=1853)—type, by orig. desig., *Charadrius wilsonia* Ord.

Cirrepidesmus Bonaparte, Compt. Rend. Acad. Sci. Paris, 43, p. 417, 1856—type, by tautonymy, *Charadrius pyrrhothorax* "Temminck" Gould=*Charadrius cirrhepidesmos* Wagler=*Charadrius atrifrons* Wagler.

Leucopoliis Bonaparte, Compt. Rend. Acad. Sci. Paris, 43, p. 417, 1856—type, by tautonymy, *Charadrius niveifrons* Cuvier=*Charadrius leucopoliis* Wagler=*Charadrius marginatus* Vieillot.

Aegialophilus Gould, Handb. Bds. Austr., 2, p. 234, 1865—type, by orig. desig., *Ae. cantianus* of Europe, i.e. *Charadrius cantianus* Latham=*Charadrius alexandrinus* Linnaeus.

Pagolla Mathews, Bds. Austr., 3, p. 83, 1913—substitute name for *Ochthodromus* Bonaparte, on account of an earlier *Ochthedromus* Le Conte, 1848 (Col.).

Pernettyya Mathews, Bds. Austr., 3, p. 114, May 2, 1913—type, by orig. desig., *Charadrius falklandicus* Latham.

**Charadrius hiaticula hiaticula* Linnaeus. RINGED PLOVER.

Charadrius hiaticula Linnaeus, Syst. Nat., 10th ed., 1, p. 150, 1758—principally based on Faun. Svec., No. 159, Sweden; Reinhardt, Naturhist. Tidskr., 4, p. 406, 1843—Godthaab, Greenland (May); Walker, Ibis, 1860, p. 167—Port Kennedy, Greenland (June); Ridgway, Bull. U. S. Nat. Mus., 50,

¹ We are not sure that *Charadrius dubius curonicus* Gmelin deserves a place in the American fauna. As pointed out by Grinnell (Univ. Calif. Pub. Zool., 38, p. 318, 1932), the origin of the type specimen of *Aegialitis microrhynchus* (Amer. Nat., 8, No. 2, p. 109, Feb., 1874), alleged to have been taken at San Francisco, California, is altogether obscure and it appears more than doubtful that the bird was shot on American soil. Schalow's record (Journ. Orn., 39, p. 259, 1891) of "*C. alexandrinus*," which, according to Brandt's manuscript, was sent by Billing from Kodiak Island, Alaska, to Pallas, has been referred to the Little Ringed Plover, but in the absence of specimens it cannot be identified with any degree of certainty.

² *Charadrius flavirostris* Wied (Beitr. Naturg. Bras., 4, (2), p. 772, 1833), described from memory, is unidentifiable.

Charadrius hiaticula psammodyroma Salomonsen, Journ. Orn., 78, p. 71, 1930—Färoes, Iceland, Greenland, and Cumberland Sound (no type designated); Løppenthin, Medd. Grøn., 91, No. 6, p. 51, 1932—Greenland (meas.); Péters, Bds. World, 2, p. 247, 1934 (range).

Charadrius hiaticula septentrionalis Bird and Bird, Ibis, 1941, p. 141—Greenland (crit.; char.; meas.).

Range.—Breeds in the region about Cumberland Sound, Baffin Island, Greenland, Iceland, and the Färoes; also in Europe from the British Isles, Sweden, and the Baltic states south to the Mediterranean; accidental in Barbados (Chancery Lane, Sept. 10, 1888).¹

Field Museum Collection.—5: Greenland (Musk-ox Fjord, Hudson Land, 5).

Conover Collection.—1: Greenland (Godthaab, 1).

**Charadrius hiaticula semipalmatus* Bonaparte. SEMIPALMATED PLOVER.

Charadrius semipalmatus Bonaparte, Journ. Acad. Nat. Sci. Phila., 5, (1), p. 98, Aug., 1825—based on *Tringa hiaticula* (not *Charadrius hiaticula* Linnaeus) Ord, in Wilson's Amer. Orn., Ord repr., 7, p. 65, 1824, coast

¹ There is no evidence whatever that the Ringed Plover ever occurred in Chile (cf. Hellmayr, Field Mus. Nat. Hist., Zool. Ser., 19, p. 377, note, 1932). The specimens stated to have been collected by Kittlitz on the island of Sitka, Alaska (cf. Schallow, Journ. Orn., 39, p. 259, 1891), are more likely to be *C. h. tundræ* Lowe, but, if still extant, they should be critically examined before that form is admitted to the American fauna.

Birds from Cumberland Sound east to the Färoes were separated by Salomonsen on account of averagingly smaller size as *C. h. psammodyroma*, but this disputable race has recently been dropped by the author himself (in Jensen, Zool. Färoes, p. 71, 1935) as not worthy of recognition, a conclusion in which

of New Jersey (type in collection of I. R. Peale, now in Museum of Comparative Zoology, Cambridge, Mass.; cf. Faxon, *Bull. Mus. Comp. Zool.*, **59**, p. 133, 1915, and Bangs, l.c., **70**, p. 176, 1930); Schlegel, *Mus. Pays-Bas*, No. 29, *Cursores*, p. 30, 1865—Labrador and Brazil; Pelzeln, *Orn. Bras.*, **3**, p. 297, 1870—Rio de Janeiro (Sapitiba, Feb.; Restinga, March), Paraná (Paranaguá, Dec.), and Pará (Praia de Cajútuba, April 18), Brazil; Seebohm, *Geog. Distr. Charad.*, p. 123, 1887 (monog.); Ridgway, *Bull. U. S. Nat. Mus.*, **50**, (8), p. 116, 1919 (monog.; full bibliog.); Chubb, *Ibis*, 1919, p. 263—Trujillo, Peru (Sept., Dec.); Dabbene, *El Hornero*, **2**, p. 124, 1920—Argentina (Puerto Deseado, Santa Cruz; Moreno, Jujuy); Todd and Carriker, *Ann. Aegialitis hiaticula (not *Charadrius hiaticula* Linnaeus) Reiser, Denks. Math.-Naturw. Kl. Akad. Wiss. Wien, 76, p. 100, 1910 (1926)—Miritiba, Maranhão, Brazil; idem, l.c., p. 225, 1923 (1926)—Miritiba.²

Charadrius hiaticula tundrae (not *Aegialitis hiaticula tundrae* Lowe) Hellmayr, Field Mus. Nat. Hist., Zool. Ser., 12, p. 493, 1929—Miritiba (ex Reiser); Pinto, Rev. Mus. Paul., 22, p. 129, 1938—Miritiba (ex Reiser).²

Charadrius hiaticula semipalmatus Salomonsen, Journ. Orn., 78, p. 72, 1930 (crit.); Peters, Bds. World, 2, p. 247, 1934 (range); van Rossem, Bull. Mus. Comp. Zool., 77, p. 433, 1934—Guaymas, Sonora; Belcher and Smooker, Ibis, 1935, p. 288—Trinidad (winter visitor); Pinto, Rev. Mus. Paul., 22, p. 129, 1938—Bahía (Ilha Madre Deus) and São Paulo (Casquei-

¹ If Kumlien's observations are correct, *semipalmatus* would not appear to be conspecific with *hiaticula*.—B. C.

² This specimen, a molting female taken by the late F. Schwanda on October 11, 1907, was found by the senior author and Dr. Carmichael Low, on comparison with the material in the British Museum, to be a perfectly normal specimen of the Semipalmated Plover. In size (wing, 119) it agrees particularly well with a female from Chatham Island, Galápagos (Oct. 19, 1897; Brit. Mus. Reg. 99.9.1.575). Its feet are damaged, the webs between the toes having disappeared through moth-eating, and this no doubt accounts for Hartert's erroneous identification as *C. h. tundrae*.

rinho, Piassaguera); Dickey and van Rossem, *Field Mus. Nat. Hist., Zool. Ser.*, 23, p. 168, 1938—Lake Olomega, Puerto del Triunfo, and Barra de Santiago, El Salvador (Sept., Dec., April); Peters and Burleigh, *Auk*, 62, p. 564, 1945—Newfoundland (nesting); Soper, *l.c.*, 63, p. 226, 1946—Baffin Island (common breeder).

Range.—Breeds on the Arctic Coast of North America from Bering Sea to southern Baffin Island, south to the Queen Charlotte Islands, northern British Columbia, James Bay, north shore of the Gulf of St. Lawrence, New Brunswick, Nova Scotia and Newfoundland; winters from central California, the Gulf coast, and South Carolina to Chile (Coquimbo; near Puerto Montt), Bolivia (San Luis, Tarija), and Argentina (?Moreno, Jujuy; Quequén, Province of Buenos Aires; Puerto Deseado, Santa Cruz); Cocos Island and Galápagos Archipelago.

Field Museum Collection.—190: Alaska (Seward, 1; Bethel, 3); Yukon Territory (Yukon River, 2; Caribou Crossing, 1; Lake Marsh, 1); Saskatchewan (Maple Creek, 1); Ontario (Toronto, 1); Labrador (Port Manvers, 10; Indian Harbor, 9; Curlew Bay, 1; Bowdoin Harbor, 1); Nova Scotia (Barrington, 1; Seabright, 1; Clark's Harbor, 1); Quebec (Magdalen Islands, 15); North Dakota (Stump Lake, 5); Illinois (Libertyville, 1; Chicago, 2; Worth, 2); Indiana (Liverpool, 1; Miller, 1); Massachusetts (Monomoy Island, 39); Connecticut (New Haven County, 3; New Haven, 1; East Haven, 1; East Hartford, 3); New York (Shinnecock Bay, 1); Virginia (Busk Roc Beach, 1); North Carolina, Dare County (Pea Island, 9; Bodie Island, 7); South Carolina (Mount Pleasant, 4); California (Trinidad, 3; Carmel, 5; Monterey, 7; Moss Landing, 1; Westport, 2; Los Angeles County, 2); Texas (Corpus Christi, 2); Florida (Nassau County, 2; Amelia Island, 4; Banana River, 1; Anclote, 3); Bahama Islands (Eleuthera, 3; Great Inagua, 4; Abaco, 1; Andros, 2); Virgin Islands (St. Croix, 1); Lesser Antilles (Dominica, 1; Anegada, 1; Guadeloupe, 2); Dutch West Indies (Aruba, 5); Jamaica (Grand Cayman, 1); Mexico (La Paz, Lower California, 1); El Salvador (Puerto del Triunfo, 1); Costa Rica (Piedra de Blanca, 6); Venezuela (Colon, 1).

Conover Collection.—21: Alaska (Alaktak River, near Barrow, 1; Hooper Bay, Bering Sea, 4); Alberta (Beaverhill Lake, Tofield, 2); Indiana (Wolf Lake, 2); California (Moss Landing, Monterey County, 1); Florida (Banana Creek, 1); Costa Rica (Punta Piedra, Guanacaste, 5); Panama (Perme, Darien, 1); Ecuador (Isla Silva Sur, Province de los Rios, 2; Rio San Antonio, 2).

Phila., 80, p. 146, 1928—Etang Saumâtre, Haiti; Danforth, Auk, 46, pp. 231, 363, 1929—Etang Bois-Neuf, near St. Marc, Haiti (July 25); Bent, Bull. U. S. Nat. Mus., 146, p. 252, 1929—part, Florida (life hist.); Wetmore and Swales, l.c., 155, p. 146, 1931—Etang Saumâtre (March 9) and near St. Marc, Haiti.

Charadrius alexandrinus tenuirostris Peters, Bds. World, 2, p. 250, 1934—part, Florida, West Indies, Yucatan and northern Venezuela; Conover, Condor, 47, p. 212, 1945—Florida, West Indies, Yucatan (doubtful race).

Range.—Breeds in Florida, also sparingly in Cuba, Hispaniola, Puerto Rico, and St. Croix; winters in Yucatan (Celestin) and Venezuela (Margarita Island).¹

Field Museum Collection.—19: Florida (Santa Rosa Island, Santa Rosa County, 6; Mary Esther, 8; East Pass, 2); Bahama Islands (Great Inagua, 2); Mexico (Rio Lagartos, Yucatan, 1).

****Charadrius alexandrinus occidentalis* (Cabanis).² CHILEAN SNOWY PLOVER.**

Aegialitis occidentalis Cabanis, Journ. Orn., 20, p. 158, 1872—no locality stated (type, from near Santiago, Chile, in Berlin Museum examined);

its validity can be ascertained some specimens from Cuba in fresh breeding plumage must be obtained and compared with similar birds from California.

Additional material examined.—Florida: Mary Esther, 1; Big Pass, 2; Santa Rosa Island, 1; St. Andrew, 1.—Bahama Islands: Great Inagua, 1; Grand Turk Island, 1; Grand Caicos, 2; Crooked Island, 2; Fortuna Island, 2.—Haiti: Etang Bois Neuf, 1; Lake Assuei, 1.—Puerto Rico: Cabo Rojo Light, 5.—Virgin Islands: St. Croix, 1.

¹ Berlepsch's inclusion (Journ. Orn., 35, p. 134, 1884) of *Aegialitis nivosa* in the fauna of Paraguay is an obvious error.

² *Charadrius alexandrinus occidentalis* (Cabanis): Similar to *C. a. nivosus*, but wings on average longer; occiput and hindcrown more heavily washed with buffy;

idem, l.c., 32, p. vi, pl. 6, fig. 1, 1885 (figure of type); Sharpe, Cat. Bds. Brit. Mus., 24, p. 295, 1896—part, spec. h, i, Laraquete, "Tarapacá" (=Arauco), Chile (spec. examined); Lane, Ibis, 1897, p. 303—part, Laraquete, Arauco.

Hiaticula azarae (not *Charadrius azarai* Temminck) Darwin, Zool. Beagle, 3, Birds, p. 127, 1841—part, Valparaiso, Chile (spec. examined); Cassin, in Gilliss, U. S. Astr. Exp., 2, p. 195, 1855—Chile.

Charadrius collaris Des Murs, in Gay, Hist. Ffs. Pol. Chile, Zool., 1, p. 402, 1847—Chile (excl. of description).

Charadrius azarae Pelzeln, Reise Novara, Zool., 1, p. 116, 1865—Chile.

Charadrius cantianus (not of Latham) Schlegel, Mus. Pays-Bas, No. 29, Cursores, p. 31, 1865—part, spec. nos. 25, 26, Algarroba, Chile (July, 1863); Housse, Rev. Chil. Hist. Nat., 28, p. 51, 1923—Isla la Mocha, Chile.

Aegialites nivosus (not *Aegialitis nivosa* Cassin) Selater, Proc. Zool. Soc. Lond., 1867, pp. 331, 339—Chile (crit.); idem and Salvin, l.c., 1868, p. 176—Tambo Valley, Arequipa, Peru (spec. examined).

Aegialitis nivosa Taczanowski, Proc. Zool. Soc. Lond., 1874, p. 559—Chorillos, near Lima, Peru (crit.); Sharpe, l.c., 1881, p. 15—Coquimbo, Chile; Salvin, l.c., 1883, p. 428—Chile; Taczanowski, Orn. Pér., 3, p. 346, 1886—Chorillos, Peru; Sharpe, Cat. Bds. Brit. Mus., 24, pp. 292, 748, 1896—part, spec. n'-w', a"-c", Peru (Tambo Valley) and Chile (Valparaiso); Reed, Anal. Univ. Chile, 93, p. 209, 1896—Chile; Schalow, Zool. Jahrb., Suppl., 4, p. 665, 1898—Chile (Cavancha [Iquique], Tarapacá; Totoralillo, Coquimbo; and Calbuco [near Puerto Montt], Llanquihue) (spec. examined); Coker, Proc. U. S. Nat. Mus., 56, p. 497, 1919—Paracas Bay, Ica, Peru (June 27).

Charadrius nivosus Chubb, Ibis, 1919, p. 264—Lurin, Lima, Peru (July 29).

Charadrius alexandrinus occidentalis Neumann, Nov. Zool., 35, p. 215, 1929—Chile to Peru (crit.); Hellmayr, Field Mus. Nat. Hist., Zool. Ser., 19, p. 373, 1932—Chile (Caldera, Atacama; Papudo, Aconcagua) (crit.; meas.; range); Barros, Rev. Chil. Hist. Nat., 36, p. 163, 1932—Dunas de Llico, Chile (Dec., Jan., Feb.); Peters, Bds. World, 2, p. 250, 1934 (range); Bullock, Rev. Chil. Hist. Nat., 39, p. 245, pl. 15, 1935—Isla la Mocha, Arauco (breeding); Philippi, El Hornero, 6, p. 234, 1936—Erizera and north of Arica, Tacna, Chile; Bullock, Auk, 53, p. 170, 1936—Isla la Mocha, Chile (breeding habits); Morrison, Ibis, 1940, p. 255—

black post-frontal band generally wider; back darker grayish brown; non-breeding plumage resembling the nuptial dress. Wing, 104–111, rarely 100–103; tail, 46–53; bill, $14\frac{1}{2}$ –16.

The breeding range of the Chilean Snowy Plover has recently been shown by Morrison to extend to Llanquihue (Maullin, west of Puerto Montt) and Chiloé Island. We have also examined adults and downy young from the Isla la Mocha, Arauco.

Additional material examined.—Peru: Ancon, Lima, 1; Lurin, Lima, 1; Molendo, Arequipa, 1; Tambo Valley, Arequipa, 3.—Chile: Cavancha (Iquique), Tarapacá, 1; Totoralillo, Atacama, 1; Valparaiso, 2; near Santiago, 1 (the type); Laraquete, Arauco, 2; Isla la Mocha, Arauco, 3; Maullin, Llanquihue, 2; unspecified, 7.

Maullin, Llanquihue, Chile; Bullock, Rev. Chil. Hist. Nat., 41, p. 201, col. pl. 8, fig. 3, 1937 (egg).

Range.—Resident on the littoral of Peru and Chile from Lima (Ancon, Chorillos, Lurin) to Llanquihue (Maullin) and Chiloé Island.

Field Museum Collection.—1: Chile (Puerto Inglesia, Atacama, 1).

Conover Collection.—4: Chile (Caldera, Atacama, 1; Papudo, Aconcagua, 1; Llolleo, Santiago, 2).

***Charadrius falklandicus Latham. PATAGONIAN PLOVER.**

Charadrius falklandicus Latham, Ind. Orn., 2, p. 747, 1790—based on "Rusty-crowned Plover" Portlock, Voyage round the World, p. 36 (with plate), 1789—Port Egmont, Falkland Islands; Schlegel, Mus. Pays-Bas, No. 29, Cursores, p. 36, 1865—Falkland Islands and Chile (Algarrobo); Seebohm, Geog. Distr. Charad., p. 155, 1887 (monog.); Brooks, Bull. Mus. Comp. Zool., 61, p. 151, 1917—Port Stanley and Port Stephens, Falkland Islands (downy young descr.); Wace, El Hornero, 2, p. 198, 1921—Falkland Islands; Bennett, Ibis, 1926, p. 322—Falkland Islands; Wetmore, Bull. U. S. Nat. Mus., 133, p. 165, 1926—Buenos Aires (Rio de la Plata, near Berazategui; Lake Epiquén, near Carhué; near Guaminí), Neuquén (Zapala), Uruguay (between Carrasco and Montevideo; La Paloma), Chile (Concon, Valparaíso); idem, Univ. Calif. Pub. Zool., 24, p. 428, 1926—San Antonio Oeste, Nahuel Niyeu, and Bariloche, Rio Negro; Hellmayr, Field Mus. Nat. Hist., Zool. - Charadrius (Aegialitis) falklandicus* Oustalet, Miss. Sci. Cap Horn, 6, p. B. 114, 1891—Falkland Islands (French Bay); Straits of Magellan (Elisabeth Island), Patagonia (Arroyo Moreno; Puerto Deseado), and Brazil (Rio Grande [do Sul]).
- Pernettya falklandica* Oberholser, Trans. Wisc. Acad. Sci., 19, (1), p. 518, 1918 (crit.).
- Leucopoliis (Pernettya) falklandica* Tremoleras, El Hornero, 2, p. 13, 1920—Montevideo, Canelones, and Colonia, Uruguay.

Leucopoliis falklandicus Peters, Bull. Mus. Comp. Zool., 65, p. 296, 1923—San Antonio, Huanuluan, and Laguna de Neluan, Río Negro; Lowe, Ibis, 1931, p. 722.

Oegialitis (sic) *falklandica* Housse, Rev. Chil. Hist. Nat., 28, p. 51, 1924—Isla la Mocha, Arauco, Chile.

Range.—Breeds in southern South America from Isla la Mocha and Chiloé Island, Chile, in the west and from the Río Negro (rarely Cape San Antonio, Buenos Aires) in the east south to Tierra del Fuego; the Falkland Islands; migrates in winter to central and northern Chile, eastern Argentina (provinces of Buenos Aires and Entre Ríos), Uruguay, and extreme southern Brazil (Rio Grande do Sul).¹

Field Museum Collection.—1: Argentina (Rivadavia, Chubut, 1).

Conover Collection.—13: Chile (Llolleo, Santiago, 1; Cucao, Chiloé Island, 2; Casa Richards, Río Nirehuau, Aysen, 8; Skyring Water, Magallanes, 1); Argentina (Laguna Alsina, Buenos Aires, 1).

****Charadrius alticola* (Berlepsch and Stolzmann).² PUNA PLOVER.**

Aegialitis alticola Berlepsch and Stolzmann, Proc. Zool. Soc. Lond., 1902, (2), p. 51—Ingapirca, Dept. Junín, Peru (type in Branicki Museum, now in Warsaw Museum);³ iidem, Ornith., 13, p. 132, 1906—Puno, Peru; Dabbene, El Hornero, 1, p. 260, 1919—Lago Helado, Catamarca.

Aegialitis occidentalis (not of Cabanis) Sclater, Proc. Zool. Soc. Lond., 1886, p. 403—Sitani, Huasco, and Cueva Negra, Tarapacá, Chile; idem, l.c., 1891, p. 137—Sacayá, Tarapacá; Sharpe, Cat. Bds. Brit. Mus., 24, pp. 295, 748, 1896—part, descr. and spec. a-g, k, l, Sitani and Huasco, Tarapacá; Lane, Ibis, 1897, p. 303—part, Sacaya, Tarapacá.

¹ In addition to a good series from Chile, Argentina, and the Falkland Islands, we have examined an adult male and an immature female collected by H. von Ihering on May 21 and March 8, 1884, at Río Grande, Río Grande do Sul, both in the Berlepsch Collection, now in the Frankfurt Museum.

² *Charadrius alticola* (Berlepsch and Stolzmann): Nearest to *C. falklandicus* but much smaller, with shorter, weaker bill; upper parts much paler, more grayish brown with the rufescent tinge on pileum and hindneck light pinkish cinnamon to pinkish cinnamon instead of orange cinnamon; and the lower surface without the two broad black cross bands, so conspicuous in the southern species. Wing, 119-123, (female) 115-123; tail, 53-57, (female) 51-55; bill, 14½-16.

This species, in spite of a superficial resemblance, is quite distinct from *C. alexandrinus occidentalis* and may be readily separated by larger size; much longer and stronger, deep black (instead of light-colored) tarsi and toes; much more buffy or cinnamonaceous suffusion about the head; grayish-brown (instead of black) patch on the sides of the foreneck; and finally by the presence of a more or less distinct cinnamon or grayish brown pectoral band.

Additional material examined.—Peru: Santa Inez, Huancavelica, 2.—Bolivia: Oruro, 1; Challapata, 3.—Chile, Tarapacá: Huasco, 2; Cueva Negra, 1; Sitani, 2; Sacayá, 2; Cancosa, 1.

³ Not listed by Sztolcman and Domaniewski among the types of the Warsaw Museum (Ann. Zool. Mus. Pol. Hist. Nat., 6, pp. 95-194, 1927).

Charadrius occidentalis Seebohm, Geog. Distr. Charad., p. 174, 1887—Tarapacá (crit.); Chubb, Ibis, 1919, p. 264—Challapata, Oruro, Bolivia (spec. examined).

Charadrius alticola Hellmayr, Field Mus. Nat. Hist., Zool. Ser., 19, p. 372, 1932—Antofagasta (Ojo de San Pedro, twenty miles east of San Pedro) and Tarapacá (Huasco, Cueva Negra, Sitani, Cancosa, Sacaya), Chile (crit.; range; meas.); Peters, Bds. World, 2, p. 251, 1934 (range); Morrison, Ibis, 1939, pp. 464, 646—Santa Inez, Huancavelica, and Lake Junín, Peru.

Range.—Puna zone of southern Peru (Ingapirca, Junín; Santa Inez, Huancavelica; Puno), western Bolivia (Challapata, Oruro), northern Chile (Tarapacá and Antofagasta), and northwestern Argentina (Lago Helado, Catamarca).

Field Museum Collection.—6: Bolivia (Vacas, Cochabamba, 1; Esperanza, Pacajes, 1; Mount Sajama, Carangas, 1); Chile (Ojo de San Pedro, Antofagasta, 1; San Pedro, Antofagasta, 2).

Conover Collection.—8: Peru (Puno, Puno, 1); Bolivia (Laguna de Taxara, Tarija, 1; Esperanza, Pacajes, La Paz, 2); Chile (San Pedro, Antofagasta, 4).

****Charadrius collaris* Vieillot. AZARA'S COLLARED PLOVER.**

Charadrius collaris Vieillot, Nouv. Dict. Hist. Nat., nouv. éd., 27, p. 136, 1818—based on "Mbatuitui collar negro" Azara, No. 392, Paraguay; Schlegel, Mus. Pays-Bas, No. 29, Cursores, p. 37, 1865—Venezuela (Caracas), Bolivia, and Paraguay; Reinhardt, Vidensk. Medd. Naturhist. Foren., 1870, p. 34—Minas Geraes; Seebohm, Geog. Distr. Charad., p. 173, 1887 (monog.); Frenzel, Journ. Orn., 39, p. 126, 1891—Córdoba; Ridgway, Bull. U. S. Nat. Mus., 50, (8), p. 140, 1919 (monog.); Todd and Carriker, Ann. Carnegie Mus., 14, p. 185, 1922—Ciénaga, Don Diego, Punta Caiman, Gaira, and Fundación, Colombia; Serié and Smyth, El Hornero, 3, p. 41, 1923—Santa Elena, Entre Ríos; Giacomelli, l.c., p. 80, 1923—La Rioja; Chapman, Bull. Amer. Mus. N. H., 55, p. 193, 1926—Ecuador; Wetmore, Bull. U. S. Nat. Mus., 133, p. 164, 1926—Argentina (Santa Fé; Resistencia, Chaco; Lavalle, Buenos Aires, etc.) and Uruguay (various localities);¹ Friedmann, Bull. Mus. Comp. Goeldi, 8, p. 86, 1914—Quati-Puru, Rio Tapajóz (Goyana, Boim), Rio Purus (Cachoeira), Marajó (Dunas, São Natal), Mexiana, and Rio Jamundá (Faro), Brazil; Cherrie, Sci. Bull., Mus. Brookl. Inst., 2, p. 370, 1916—Orinoco region; Chapman, Bull. Amer. Mus. N. H., 36, p. 223, 1917—Cali, Cauca, and La Morelia,

Caquetá, Colombia; Sanzin, El Hornero, 1, p. 148, 1918—Sunlunla, Mendoza; Tremoleras, l.c., 2, p. 13, 1920—Montevideo, Canelones, and Maldonado, Uruguay; Pereyra, l.c., 3, p. 173, 1923—Zelaya, Buenos Aires; idem, l.c., 4, p. 28, 1927—San Rafael, Mendoza.

Aegialites nivosus? Salvin, Ibis, 1866, p. 196—Chiapám (crit.).

Aegialites collaris Sclater and Salvin, Proc. Zool. Soc. Lond., 1867, p. 591—Mexiana Island and Rio Tocantins, Brazil; idem, l.c., 1869, p. 252—Lake Valencia, Venezuela; idem, l.c., 1873, p. 186—Cosnipata, Peru; Hartert, Ibis, 1893, p. 335—Bonaire, Dutch West Indies.

Aegialitis gracilis Cabanis, Journ. Orn., 20, p. 158, 1872—Tehuantepec, Mexico (type in Berlin Museum); idem, l.c., 33, p. vi, pl. 6, figs. 3a, 3b, 1885.

Charadrius collaris collaris Hartert and Jackson, Ibis, 1915, p. 531 (crit.; range); Naumburg, Bull. Amer. Mus. N. H., 60, p. 77, 1930—Rio São Lourenço, Matto Grosso.

Charadrius collaris gracilis Hartert and Jackson, Ibis, 1915, p. 531 (crit.; range).

Range.—Tropical America from southern Mexico (Oaxaca, Guerrero, and Vera Cruz) through Guatemala (Chiapám, Ocos), Honduras (Chamelicon), Nicaragua (Momotombo, San Emilio, Tipitapa), Costa Rica, and Panama (Lion Hill) south to western Ecuador, Peru, Bolivia, and northern Argentina (south to Mendoza, Córdoba, and Buenos Aires);¹ islands of Grenada, Tobago, Trinidad, and Bonaire.²

Field Museum Collection.—23: Nicaragua (San Emilio, Rivas, 3); Venezuela (Catatumbo, Zulia, 1); Ecuador (Quevedo, Rio Palenque, 1); British Guiana (Rockstone, 3; Rupununi River, 1); Brazil (Bôa Vista, Amazonas, 3; Conceicao, Rio Branco, Amazonas, 1; Itacoatiara, Amazonas, 1; Arravia Island, Solimoes River, 1; São Luis, Maranhão, 1; Tres Lagoas, Matto Grosso, 1); Paraguay (Colonia Nueva Italia, 2); Bolivia (San Carlos, Santa Cruz, 1; Rio Surutú, Santa Cruz, 1; Cercado, Cochabamba, 1; Capinota, Cochabamba, 1).

Conover Collection.—19: Colombia (Ciénaga, Santa Marta, 1); Ecuador (Milagro, Guayas, 1; Isla Silva Sur, Province de los Rios, 2); British Guiana (Rockstone, Essequibo River, 3); Brazil (Caxiricatuba, Rio Tapajóz, Pará, 6; Ibiapaba, Piauí, 1); Bolivia, Santa Cruz (Buena Vista, 1; Rio Surutú, 1); Argentina (Rio, Tucumán, 3); Paraguay (80 km. east of Orloff, 3).

¹ Records from Chile are probably due to confusion with *C. alexandrinus occidentalis*.

² We cannot see our way clear of splitting Azara's Collared Plover into two races, as has been proposed by Hartert and Jackson. While birds from Amazonia, Central America, and Mexico are generally smaller, there are so many exceptions to this rule that subdivision would serve no practical purpose. Sixty-seven additional specimens examined.

***Charadrius vociferus vociferus Linnaeus. KILLDEER.**

Charadrius vociferus Linnaeus, Syst. Nat., 10th ed., 1, p. 150, 1758—based on "Chattering Plover" Catesby, Nat. Hist. Carolina, 1, p. 71, pl. 71, South Carolina; Schlegel, Mus. Pays-Bas, No. 29, Cursores, p. 23, 1865—Ohio, Wisconsin, Mexico, and Costa Rica (crit.); Seebohm, Geog. Distr. Charad., p. 120, 1887 (monog.; part, excl. of Peru).

Nat. Hist., Zool. Ser., 23, p. 170, 1938—Puerto del Triunfo (Jan. 14) and Lake Olomega (Feb. 3, Apr. 6), El Salvador; Sutton, Auk, 59, p. 304, 1942—Nain, Newfoundland Labrador; van Rossem, Occ. Pap. Mus. Zool. Louisiana State Univ., 21, p. 78, 1945—Sonora (resident).

Range.—Breeds from northern British Columbia, southern Mackenzie, Ontario, and southern Quebec south to southern Lower California, northern Mexico, the Gulf coast, and Florida; winters south to the Bahama Islands, West Indies, Colombia, and Ecuador; casual in Newfoundland; accidental in the British Isles and in Labrador.¹

Field Museum Collection.—164: British Columbia (Okanagan, 4); Alberta (Walsh, 1); Saskatchewan (Prince Albert, 1; Maple Creek, 1; Big Stick Lake, 1); Ontario (Doe Lake, 1); North Dakota (Towner County, 26; Stump Lake, Nelson County, 17; Cando, Towner County, 3); California (Moss Landing, 3; Monterey, 1; Hyperion, 2; Motordrome, Los Angeles County, 3; Thermal, 1; Corona, 1; Poway, 1; Witch Creek, 1; Rencan, 2; Los Baños, 1; Redlands, 3; La Patera Point, 3); New Mexico (Rincon, 1); Arizona (Calabasas, 2; Palmerlee, 2); Texas (Cameron County, 2; Corpus Christi, 3); Colorado (Fraser, 4; Troublesome, 1; New Castle, 1); Arkansas (Fayetteville, 1); Kansas (Lawrence, 1); Wisconsin (Beaver Dam, 10); Illinois (Worth, 1; Lake Zurich, 1); Massachusetts (Nantucket, 3; Essex, 3; Chatham, 3; Great Island, 1); Connecticut (West Haven, 4; East Haven, 1; New Haven, 2; Cheshire, 1; Stony Creek, 1; Bloomfield, 2; East Hartford, 2); New York (Cayuga Lake, 1); North Carolina (Pea Island, Dare County, 5); Georgia (McIntosh County, 1); Florida (Talbot Island, Duval County, 1; Eau Gallie, Brevard County, 2; Miami Beach, 3; Amelia Island, Nassau County, 2); Bahama Islands (interior of San Salvador, 3; Southwest Point, San Salvador, 2; Coban Bay, San Salvador, 2; Norman Key, 1); Jamaica (Port Antonio, 1); Virgin Islands (Virgin Gorda, 2); Lesser Antilles (Anegada Island, 2); Mexico (La Paz, Lower California, 1; Sabinas, Coahuila, 1; Chichen Itza, Yucatan, 1); Guatemala (Bobos, Izabal, 1); Honduras (Utila Island, 1); Costa Rica (Limón, Limón, 1).

Conover Collection.—22: California (Wilmington, 1; Goleta, 3; Moss Landing, 2); Utah (Brigham, 2); Illinois (Wheaton, 5; Waukegan, 1; Warrenville, Du Page County, 2; Grant Park, Chicago, 1); New York (Sennett, 1; Owasco Lake, 1); Florida (Tamiami Trail, 2; Miami Beach, 1).

****Charadrius vociferus ternominatus* Bangs and Kennard.²**

WEST INDIAN KILLDEER.

¹ The locality "Paraguay" attached to a specimen in the British Museum is probably erroneous.

² *Charadrius vociferus ternominatus* Bangs and Kennard: Similar to the nominate race, but differing by smaller size and grayer upper parts, with the rufescent

Charadrius torquatus (not of Pontoppidan, 1763) Linnaeus, Syst. Nat., 12th ed., 1, p. 255, 1766—based on "Le Pluvier à collier de S. Domingue" Brisson, Orn., 5, p. 70, pl. 6, fig. 2, Santo Domingo (type in Réaumur Collection).¹

Oxyechus vociferus (not *Charadrius vociferus* Linnaeus) Sharpe, Cat. Bds. Brit. Mus., 24, pp. 242, 742, 1896—part, spec. m³-p³, b⁴, Jamaica and Cuba (San Cristóbal).

Oxyechus vociferus torquatus Bangs and Zappey, Amer. Natur., 39, p. 195, 1905—Laguna Grande and Nueva Gerona, Isle of Pines (crit.).

Oxyechus vociferus rubidus (not *Charadrius rubidus* Gmelin, 1789) Riley, Proc. Biol. Soc. Wash., 22, p. 88, April 17, 1909—new name for *Charadrius torquatus* Linnaeus, preoccupied; Todd and Worthington, Ann. Carnegie Mus., 7, pp. 414, 449, 1911—Great Inagua (crit.); Todd, l.c., 10, p. 215, 1916—Santa Rosalia Lagoon, Hato, and Jacksonville, Isle of Pines (crit.); Wetmore, Bull. U. S. Dept. Agric., 326, p. 39, 1916—Puerto Rico (habits; food); Peters, Bull. Mus. Comp. Zool., 61, p. 404, 1917—Jaibón, Hispaniola; Ridgway, Bull. U. S. Nat. Mus., 50, (8), p. 103, 1919—Greater Antilles (monog.; full bibliog.); Wetmore, Sci. Surv. Porto Rico and Virgin Islands, 9, p. 354, 1927—Puerto Rico, Vieques, and St. Thomas (crit.; habits; bibliog.); idem and Swales, Bull. U. S. Nat. Mus., 155, p. 150, 1931—Hispaniola (monog.); Beatty, Journ. Agric. Univ. Puerto Rico, 25, p. 34, 1941—St. Croix, Virgin Islands (breeding); idem, Auk, 60, p. 110, 1943—St. Croix, Virgin Islands (nesting notes).

Charadrius vociferus ternominatus Bangs and Kennard, Handb. Jamaica, p. 684 (repr. p. 8), 1920—new name for *Oxyechus vociferus rubidus* Riley, preoccupied; Peters, Bds. World, 2, p. 252, 1934 (range).

Range.—Resident in the Bahamas, Greater Antilles (islands of Cuba, Isle of Pines, Jamaica, Hispaniola, Puerto Rico) and Virgin Islands (Vieques, St. Thomas, St. Croix).

Field Museum Collection.—39: Bahama Islands (Acklin Island, 1; Mariguana, 2; Eleuthera, 1; Great Inagua, 27); Dominican Republic (Maniel, Azua, 2; San Cristobal, 1; San Luis, 4); Puerto Rico (Laguna Cartagena, 1).

Conover Collection.—8: Virgin Islands (St. Thomas, 2; St. Croix, 6).

***Charadrius vociferus peruvianus (Chapman).² PERUVIAN KILLDEER.**

edgings to the feathers slightly more pronounced. Wing, 139–148, (female) 139–153.

Breeding Bahama birds agree with others from the Greater Antilles.

¹*Charadrius Iamaicensis* P. L. S. Müller (Vollst. Natursyst., Suppl., p. 117, 1776), based on "The larger Grey Snipe" Browne (Civil and Nat. Hist. Jamaica, p. 477; about the lagoons in St. George's, Jamaica), while probably referring to the Killdeer, is not identifiable with certainty.

²*Charadrius vociferus peruvianus* (Chapman): Agreeing in small size with *C. v. ternominatus*, but differing, in postnuptial plumage, in the greater extent of

Oxyechus vociferus peruvianus Chapman, Auk, 37, p. 106, 1920—Paletillas, near Payta, Piura, Peru (el. 1,550 ft.) (type in the American Museum of Natural History, New York); Hellmayr, Field Mus. Nat. Hist., Zool. Ser., 19, p. 378, 1932—Chile; Philippi, Bol. Mus. Nac. Santiago, 16, p. 53, 1938—Arica, Tacna, Chile (Aug. 10).

Aegialites vociferus (not *Charadrius vociferus* Linnaeus) Sclater and Salvin, Proc. Zool. Soc. Lond., 1868, pp. 176, 570—Tambo Valley, near Islay, Arequipa, Peru.

Aegialitis vocifera Taczanowski, Proc. Zool. Soc. Lond., 1879, p. 244—Pacasmayo, Peru (June); idem, Orn. Pér., 3, p. 342, 1886—Pacasmayo.

Oxyechus vociferus Sharpe, Cat. Bds. Brit. Mus., 24, pp. 242, 742, 1896—spec. u³, v³, c⁴, d⁴, Peru (Tambo Valley) and Chile.

Charadrius vociferus Chubb, Ibis, 1919, p. 263—Trujillo, Peru (Nov. 17).

Charadrius vociferus peruvianus Peters, Bds. World, 2, p. 253, 1934—Peru.

Range.—Resident on the littoral of the Pacific coast from Piura, Peru, to Tacna, Chile (Arica).¹

Conover Collection.—2: Peru (Parinas Valley, Talera, Piura, 2).

Charadrius mongolus mongolus Pallas. MONGOLIAN PLOVER.

Charadrius mongolus Pallas, Reise versch. Prov. Russ. Reichs., 3, p. 700, 1776—salt lakes toward the Mongolian border; Ridgway, Bull. U. S. Nat. Mus., 50, (8), p. 132, 1919 (monog.; full bibliog.); Bailey, Condor, 28, p. 85, 1926—Cape Prince of Wales, Alaska (June 11); Swarth, Pac. Coast Avifauna, No. 22, p. 27, 1934—Nunivak Island.

Charadrius mongolus mongolus Swarth, Proc. Calif. Acad. Sci., (4), 17, p. 248, 1928—Nunivak Island, Alaska (Aug. 14, Sept. 1); Bent, Bull. U. S. Nat. Mus., 146, p. 253, 1929 (life hist.); Friedmann, Condor, 36, p. 89, 1934—Goodnews Bay, Alaska (June 10); Peters, Bds. World, 2, p. 253, 1934 (range); Friedmann, Condor, 38, p. 173, 1936—Gambell, St. Lawrence Island (May, 1935), Goodnews Bay (June 10, 1933, breeding).

Range.—Breeds from eastern Siberia, Kamchatka, and the Commander Islands, south to Mongolia; occasional in Alaska (Cape Prince of Wales, June 11, 1922; Nunivak Island, Aug. 14 and Sept. 1, 1927; Goodnews Bay, June 10, 1933 [breeding]; St. Lawrence Island, May, 1935).²

the rusty margins of the upper parts, particularly of the lesser and median wing coverts.

¹ The breeding range possibly extends into Ecuador, since Salvadori and Festa (Boll. Mus. Zool. Torino, 15, No. 368, p. 43, 1900) record the capture of a specimen in June at Chaupi.

² As has been pointed out by Dixon (Auk, 35, p. 390, 1918), it is somewhat doubtful whether the birds recorded by Harting (Ibis, 1870, p. 389) from the Choris Peninsula, Alaska, were actually taken on the Alaskan side of Bering Sea. The Alaskan birds are most likely referable to *C. m. littoralis* Stegmann (Orn. Monatsber., 45, p. 25, 1937—Bering Island; type in Leningrad Museum), which is described as being darker, less grayish above, with the rufescent jugular band and the reddish color about the head of a deeper tone.

***Charadrius wilsonia beldingi** (Ridgway). BELDING'S PLOVER.

Pagolla wilsonia beldingi Ridgway, Bull. U. S. Nat. Mus., 50, (8), p. 112, 1919—La Paz, Lower California (type in U. S. National Museum); Chapman, Bull. Amer. Mus. N. H., 55, p. 193, 1926—Jambeli Island, Ecuador (July 22, Oct. 31); McLellan, Proc. Calif. Acad. Sci., (4), 16, p. 12, 1927—San Blas, Nayarit (Oct. 2); Bancroft, Condor, 29, p. 49 (in text), 1927—Scammons Lagoon, Lower California (breeding); Grinnell, Univ. Calif. Pub. Charadrius wilsonia beldingi Peters, Bds. World, 2, p. 254, 1934 (range); van Rossem, Bull. Mus. Comp. Zool., 77, p. 433, 1934—Guaymas, Sonora (Jan. 14); Griscom, l.c., 78, p. 306, 1935—Panama and Pearl Islands; van Rossem and Hachisuka, Trans. San Diego Soc. N. H., 8, p. 330, 1937—Agiobampa, Sonora; Dickey and van Rossem, Field Mus. Nat. Hist., Zool. Ser., 23, p. 169, 1938—Puerto del Triunfo (Jan. 5) and Barra de Santiago (Apr. 1, 2), El Salvador; van Rossem, Occ. Pap. Mus. Zool. Louisiana State Univ., 21, p. 79, 1945—Sonora (resident).

Range.—Locally resident on the Pacific coast from Lower California to northwestern Peru (Tumbes).

Field Museum Collection.—24: Mexico (La Paz, Lower California, 15; Coronado Islands, Lower California, 1); Costa Rica (Punta Piedra, Guanacaste, 8).

Conover Collection.—11: Mexico (La Paz, Lower California, 6); Costa Rica (Punta Piedra, Guanacaste, 5).

**Charadrius wilsonia wilsonia* Ord. WILSON'S PLOVER.

Charadrius wilsonia Ord, in Wilson's Amer. Orn., 9, p. 77, pl. 73, fig. 5, 1814—"shores of Cape Island," New Jersey (probable cotypes now in the Museum of Comparative Zoology, Cambridge, Mass.; cf. Faxon, Bull. Mus. Comp. Zool., 59, p. 133, 1915, and Bangs, l.c., 70, p. 176, 1930).

Charadrius crassirostris Spix, Av. Spec. Nov. Bras., 2, p. 77, pl. 94, 1825—Brazil (type in Munich Museum; cf. Hellmayr, Abhandl. Math.-phys. Kl. Bayr. Akad. Wiss., 22, p. 715, 1906 [crit.]); Cabanis, in Schomburgk, Reisen Brit. Guiana, 3, "1848," p. 750, 1849—coast of British Guiana; Burmeister, Syst. Uebers. Th. Bras., 3, p. 359, 1856—Brazil (ex Spix).

Charadrius wilsonii Wagler, Syst. Av., 1, fol. 4, Charadrius, sp. 26, 1827 (emendation).

Aegialites wilsonianus Salvin, Ibis, 1864, p. 387—Grassy Cay, off British Honduras (May; breeding).

Aegialites wilsonius March, Proc. Acad. Nat. Sci. Phila., 1864, p. 66—Jamaica (breeding).

Ochthodromus wilsonius Gundlach, in Poey, Repert. Fís.-Nat., Cuba, 1, p. 359, 1866—Cuba (resident); idem, Journ. Orn., 23, p. 333, 1875—Cuba (habits, eggs, and young descr.); idem, l.c., 26, p. 189, 1878—Caborojo and Arecibo, Puerto Rico.

Charadrius wilsonius Pelzeln, Orn. Bras., 3, p. 297, 1870—Praia do Cajutuba and Rio Muria, Pará, Brazil (spec. examined by senior author); Bangs, Bull. Mus. Comp. Zool., 60, p. 306, 1916—Cayman Islands (breeding).

Aegialitis wilsonius var. *rufinucha* Ridgway,¹ Amer. Natur., 8, No. 2, p. 109, Feb., 1874—Spanishtown, Jamaica (type in U. S. National Museum).

Aegialitis wilsonia Cory, Auk, 4, p. 228, 1887—West Indian localities and references (descr.); idem, Bds. W. Indies, p. 228, 1889 (descr.); idem, Cat. W. Ind. Birds, p. 95, 1892—Bahama Islands and Greater Antilles; Bonhote, Ibis, 1899, p. 518—New Providence, Bahama Islands (May 7, July 2; breeding); Bangs, Auk, 17, p. 285, 1900—Little Pimlico and Andros, Bahama Islands; Bonhote, Ibis, 1903, p. 300—Andros and Little Abaco, Bahama Islands.

Charadrius wilsoni Seebohm, Geog. Distr. Charad., p. 154, 1887 (monog.); Young, Ibis, 1928, p. 768—Blairmont, British Guiana (Oct. 25, Dec. 22).

Ochthodromus wilsoni Sharpe, Cat. Bds. Brit. Mus., 24, pp. 214, 739, 1894—part, spec. a-v', x'-d', n"-s², v², United States, Anegada Island, Yucatan, Honduras (Grassy Cay), French Guiana (Oyapoc River) and Brazil

¹ This race is not a valid one as the describer himself must have discovered, for he omitted it from his later work, *Birds of North and Middle America*. A comparison of forty-eight specimens from the West Indies with thirty-eight from North America shows that there is no constant difference in coloration between the two series.

Additional material examined.—Bahama Islands: Andros, 1; Green Turtle Cay, 1.—Cuba: Cabanas, 4; Mariel, 1.—Haiti: Gran Boucan, 1; Aquin, 2; Etang Saumâtre, 2.—Puerto Rico: Cabo Rojo Lighthouse, 1.—Lesser Antilles: Little Saba, 1.

- (Bahía and "Cumaná" [=Camamú]); Berlepsch, Nov. Zool., 15, p. 305, 1908—Qyapoc River, French Guiana.
- Ochthodromus wilsonia* Ihering, Cat. Faun. Braz., 1, p. 47, 1907—part, Bahia; Snethlage, Bol. Mus. Goeldi, 8, p. 85, 1914—Brazil (no specified locality)
- Eudromias wilsoni* Reiser, Denks. Math.-Naturw. Kl. Akad. Wiss. Wien, 76, p. 94, 1910—coast of Piahy, Brazil (Sept. 14, 15, 17).

- Pagolla wilsonia wilsonia* Todd, Ann. Carnegie Mus., 10, p. 216, 1916—Los Indios, Isle of Pines; Ridgway, Bull. U. S. Nat. Mus., 50, (8), p. 108, 1919—United States, Gulf coast of Mexico, Bahama Islands, West Indies (Jamaica, Cuba, Haiti, Puerto Rico, Virgin Islands, "Guadeloupe"),¹ Grassy Cay off Honduras and Brazil (full bibliog.); Wetmore, Sci. Surv. Porto Rico and Virgin Islands, 9, p. 352, 1927—Puerto Rico, Vieques, Culebra, St. Thomas, Virgin Gorda, and Anegada (crit.; habits); Bent, Bull. U. S. Nat. Mus., 146, p. 257, 1929 (life hist.; range in part); Hellmayr, Field Mus. Nat. Hist., Zool. Ser., 12, p. 492, 1929—Mangunça Island, Maranhão (March 8), and Amaração, Piahy (Sept. 14, 15, 17), Brazil (crit.); Tomkins, Auk, 61, p. 259, pl., 1944 (habits).
- Pagolla wilsonia rufinucha* Peters, Bull. Mus. Comp. Zool., 61, p. 405, 1917—Monte Christi and Gaspar Hernandez, Dominican Republic (crit.); Wetmore and Swales, Bull. U. S. Nat. Mus., 155, p. 148, 1931—Hispaniola (habits; crit.).
- "*Charadrius wilsoni*=*Ochthodromus wilsonia*" Reiser, Denks. Math.-Naturw. Kl. Akad. Wiss. Wien, 76, p. 224, 1923—Amaração, Piahy, Brazil.
- Charadrius wilsonia rufinucha* Peters, Bds. World, 2, p. 254, 1934 (range).
- Charadrius wilsonia wilsonia* Peters, Bds. World, 2, p. 254, 1934 (range); Belcher and Smoker, Ibis, 1935, p. 288—Trinidad (winter visitor); Pinto, Rev. Mus. Paul., 22, p. 131, 1938—Maranhão to Bahía, Brazil (winter); Dickey and van Rossem, Field Mus. Nat. Hist., Zool. Ser., 23, p. 169, 1938—Barra de Santiago, El Salvador (Apr. 2), and Punta Piedra, Pacific coast of Costa Rica (Feb.).
- Charadrius wilsonius rufinucha* Conover, Condor, 47, p. 212, 1945 (not valid race).

Range.—Breeds on the coast of the southeastern and southern United States from Virginia to Florida and west to Texas; also on the Bahama Islands, Greater Antilles, Virgin Islands, Anegada Island and cays off the coast of British Honduras; winters from the Gulf coast south along the Caribbean coast of Central America (also recorded from the Pacific coast of El Salvador and Costa Rica) and the Atlantic coast of South America to eastern Brazil (Cape

¹ The reported occurrence of *Charadrius wilsonius* on the island of Guadeloupe (cf. Lawrence, Proc. U. S. Nat. Mus., 1, p. 450, 1879—ex L'Herminier's manuscript) has yet to be confirmed. No representative of this group breeds there, but it is very probable that the Wilson Plover visits the island on its southward migration.

Orange; Praia de Cajútuba and Rio Muriá, Pará; Mangunça Island, Maranhão; Amaração, Piahy; Camamú, Bahia).¹

Field Museum Collection.—59: Virginia (Northampton County, 2); North Carolina, Dare County (Bodie Island, 2; Pea Island, 5); Florida (Amelia Island, Nassau County, 4; Banana River, Brevard County, 2); Bahama Islands (Great Inagua Island, 5; Andros Island, 4; Mariguana Island, 5; Aklin Island, 2; Great Bahama Island, 2; Eleuthera Island, 4); Virgin Islands (St. Croix, 1; Virgin Gorda, 2; Anegada Island, 5); Louisiana (Avery Island, Iberia County, 1); Texas (Corpus Christi, 5; Port Isabel, 1; Port O'Connor, Calhoun County, 2; Cameron County, 2); Mexico (Rio Lagartos, Yucatan, 1); Brazil (Mangunça Island, Maranhão, 2).

Conover Collection.—29: South Carolina (Caper's Island, Charleston County, 1); Florida (Nassau County, 2; Brevard County, 2); Virgin Islands (St. Croix, 16); Texas (Corpus Christi, 3; Port O'Connor, Calhoun County, 2; Cameron County, 1); Mexico (Matamoros, Tamaulipas, 2).

***Charadrius wilsonia cinnamominus (Ridgway).² CARIBBEAN PLOVER.**

Pagolla wilsonia cinnamomina Ridgway, Bull. U. S. Nat. Mus., 50, (8), pp. 108, 113, 1919—Sabanilla, Colombia (type in U. S. National Museum).

¹ Eight specimens taken in winter (between September and April) on the coast of Brazil agree well with the type of *C. crassirostris*, and, while matched by numerous individuals from the United States, look very different from *C. w. cinnamominus*, of the Dutch West Indies and Margarita Island, as has been pointed out by Hellmayr (Field Mus. Nat. Hist., Zool. Ser., 12, p. 492, 1929), the difference being particularly marked in the female sex. Five (out of six) Brazilian females have the jugular band entirely grayish brown and no rufescence whatsoever on sides of head, while the sixth individual shows a slight rusty tinge on both these parts, the series being thus exactly similar to females from the United States. In view of these facts, we cannot but maintain Hellmayr's contention that the birds occurring in winter time on the Brazilian coast are migrants from North America. A single unsexed adult from British Guiana likewise seems to be of the same form.

Additional material examined.—British Honduras: Grassy Cay, 2.—British Guiana: coast of Demerara, 1.—Brazil: Praia de Cajutuba, Pará, 1 (Feb.); Rio Muriá, Pará, 3; Amaração, Piahy, 5 (Sept. 14–17); Camamu, Bahia, 1 (Sept. 22); unspecified, 1 (type of *C. crassirostris*).

² *Charadrius wilsonia cinnamominus* (Ridgway): Similar to *C. w. wilsonia*, but adult male with the crown, cheeks, auriculars and jugular crescent richer rufous; female readily distinguished from the other races by having the jugular band bright rusty (saya brown to dull cinnamon) instead of grayish brown, and the pileum and sides of head more or less suffused with rusty. The Caribbean race, like the Chilean *C. alexandrinus occidentalis*, seems to lack a non-nuptial plumage. Immature birds are not certainly separable from the corresponding stage of Wilson's Plover.

Additional material examined.—Aruba, 2; Bonaire, 2; Seelet, Trinidad, 6; Mustique, Lesser Antilles, 2.

- Oreophilus ruficollis totanirostris* Lowe, *Bull. Brit. Orn. Cl.*, 42, p. 19, 1921—Chile (crit.).
- Oreopholus ruficollis ruficollis* Peters, *Bull. Mus. Comp. Zool.*, 65, p. 294, 1923—Rio Negro (Rio Colorado, San Antonio, Maquinchao); Wetmore, *Bull. U. S. Nat. Mus.*, 133, p. 167, 1926—near Zapala, Neuquén; idem, *Univ. Calif. Pub. Zool.*, 24, p. 428, 1926—Rio Negro (Arroyo Seco, Cabaza de Vaca, Arroyo Anecon Grande) and Santa Cruz (Rio Belgrano) (descr. young); Laubmann, *Wiss. Erg. Deuts. Gran Chaco Exp.*, Vögel, p. 58, 1930—Est. La Germania, Santa Fé.
- Oreopholus ruficollis* Hellmayr, *Field Mus. Nat. Hist.*, Zool. Ser., 19, p. 378, 1932—Chile to the Straits of Magellan (crit.; meas.); Peters, *Bds. World*, 2, p. 256, 1934 (range).

(?)*Oreophilus ruficollis pallidus* Carriker, Proc. Acad. Nat. Sci. Phila., 87, p. 343, Oct. 25, 1935—San José (near Pimentel), Dept. Lambayeque, Peru (type in collection of the Academy of Natural Sciences, Philadelphia).

Range.—Breeds in the Cordillera and high plateaus of southern South America from southern Peru (Puno), northern Chile and Bolivia south to the Straits of Magellan; in winter descending to the plains and migrating north to southern Ecuador (Puntilla de Santa Elena, province of Guayas), Peru, eastern Argentina (provinces of Buenos Aires and Santa Fé), and Uruguay; accidental on the Falkland Islands.¹

Field Museum Collection.—16: Bolivia (Vacas, Cochabamba, 4; Tiraque, 1; Esperanza, Pacajes, 2); Chile (Caldera, Atacama, 1; Pica, Tarapacá, 1; Cabrero, 1; Santiago, 1; Rio Ciaike, Magallanes, 2); Argentina (Pilcaniyeu, Rio Negro, 1; Paso Ibanez, Santa Cruz, 1; Rio Grande, Tierra del Fuego, 1).

Conover Collection.—24: Peru (Puno, Puno, 2); Bolivia (Esperanza, Pacajes, La Paz, 2; Tiraque, Cochabamba, 4); Chile (Caldera, Atacama, 1; Angol, Bio Bio, 4; Casa Richards, Rio Nirehuau, 3); Argentina (Sierra de Tafi, Tucumán, 1; Tunuyan, Mendoza, 1; La Plata, Buenos Aires, 1; Arroyo Verde, Chubut, 1; Rio Gallegos, Santa Cruz, 4).

Genus EUDROMIAS C. L. Brehm

Eudromias C. L. Brehm, Isis, 23, col. 987, 1830—type, by monotypy, *Charadrius morinellus* Linnaeus.

Morinellus (not *Morinella* Meyer and Wolf, 1810) Bonaparte, Compt. Rend. Acad. Sci. Paris, 43, p. 417, 1856—type, by tautonymy, *Charadrius morinellus* Linnaeus.

¹ As the senior author has pointed out in another connection (Field Mus. Nat. Hist., Zool. Ser., 19, p. 379, 1932), neither *O. r. totanirostris* nor *O. r. simonsi* can be maintained. Since then, Carriker has separated three (evidently migrating) individuals from San José (near Pimentel), Dept. Lambayeque, as *O. r. pallidus*. Aside from alleged color-characters, notably deeper rufous throat, which are utterly worthless, its chief distinctive feature is smaller size (wing, 145–151). The figures given by the describer are indeed smaller than in the majority of the fifty-odd specimens examined, though an adult male from the Rio Negro (Pilcaniyeu) with a wing of 153 mm. runs close to the measurements of "*pallidus*." However, what makes us even more strongly doubtful of its validity is the fact that an adult female from Lobos de Tierra Island, off Lambayeque, which should surely belong to *pallidus*, is nowise distinguishable either in color or size (wing, 170) from Argentine examples. Birds from Islay and Lurin are likewise typical of *ruficollis*.

Additional material examined (wing measurements in parenthesis).—Peru: Lobos de Tierra, Lambayeque, 1 (170); Lurin, Lima, 1 (173); Islay, Arequipa, 1 (173).—Bolivia: Uyuni, Potosí, 3 (163, 165, 175); Challapata, Oruro, 1 (177).—Chile: "Lalcalhuay," Tarapacá, 1 (167); Cordillera of Santiago, 1 (165); Cabrero,

Eudromias morinellus (Linnaeus). EUROPEAN DOTTEREL.

Charadrius morinellus Linnaeus, Syst. Nat., 10th ed., 1, p. 150, 1758—based chiefly on Faun. Svec., p. 58, Nos. 158, 160, Sweden.

Eudromias morinellus Stone, Proc. Acad. Nat. Sci. Phila., 1900, p. 22—King Island, Alaska (July 23); Ridgway, Bull. U. S. Nat. Mus., 50, (8), p. 95, 1919 (monog.; full bibliog.); Bent, l.c., 146, p. 150, 1929 (life hist.); A. M. Bailey, Condor, 32, p. 161, 1930—Cape Prince of Wales, Alaska (June 15 and 19, 1929); idem, l.c., 34, p. 47, 1932—Cape Prince of Wales, Alaska (June 6, 1931; third record); Friedmann, l.c., 34, p. 257, 1932—Gambell, St. Lawrence Island (May and June, 1931); Peters, Bds. World, 2, p. 257, 1934 (range); Brown, Murrelet, 15, p. 79, 1934—Washington (Westport); idem, Condor, 37, p. 82, 1935—Washington (Westport).

Range.—Breeds on the tundras, mountains, and plateaus of northern Europe and Asia, from Scotland, the lake district of England, Scandinavia, and Russia south to Germany, Austria (Styria, Carinthia), Rumania (Transylvania), the Urals, Ala-tau, Altai, Sayan Mountains, and probably to the mountains of Transbaikalia; winters in the countries bordering the Mediterranean, in Arabia and Persia; probably of more or less regular occurrence in Alaska (King Island, July 23, 1897; Cape Prince of Wales, June 15 and 19, 1929 and June 6, 1931), and on St. Lawrence Island (Gambell, May and June, 1931); accidental in Washington (Westport).

Genus **ZONIBYX** Reichenbach

Zonibyx Reichenbach, Av. Syst. Nat., p. xviii, "1852" (=1853)—type, by orig. desig. and monotypy, *Vanellus cinctus* Lesson=*Charadrius modestus* Lichtenstein.

***Zonibyx modestus** (Lichtenstein). FALKLAND ISLAND DOTTEREL.

Charadrius modestus Lichtenstein, Verz. Dubl. Zool. Mus. Berlin, p. 71, 1823—Montevideo, Uruguay (type in Berlin Museum); Wagler, Syst. Av., 1, fol. 5, *Charadrius*, sp. 44, 1827—"Brazil" (descr.); idem, Isis, 1829, col. 654 (plumage descr.); Seebohm, Geog. Distr. Charad., p. 105, 1887—Falkland Islands and Santa Lucia, La Plata (crit.).

Tringa urvillii Garnot, Ann. Sci. Nat., 7, p. 46, Jan., 1826—near Port Louis, Falkland Islands (type in Paris Museum); idem, Voy. Coquille, Zool., 1, (2), livr. 12, p. 541, July 4, 1829—Falkland Islands (nuptial plumage).

Vanellus cinctus Lesson, Voy. Coquille, Zool., 1, livr. 2, pl. 43, Jan. 17, 1827 (location of type unrecorded); idem, Man. d'Orn., 2, p. 309, June, 1828—

Concepción, 1 (164); Angol, Malleco, 1 (160).—Tierra del Fuego: Viamonte, 1 (160).—Argentina: Chubut, 1 (162); Valle del Lago Blanco, Chubut, 2 (165, 166); Río Negro, 2 (165, 167); Papin, Buenos Aires, 1 (170); Ajó, Buenos Aires, 10 (158–170); Barracas al Sud, Buenos Aires, 3 (160, 163, 166); Est. Espartillar, Buenos Aires, 1 (165); Mendoza, 3 (160, 165, 170).—Falkland Islands, 2 (163, 167).—Uruguay: Santa Lucia, 1 (165).

- Falkland Islands (nuptial plumage); idem, Voy. Coquille, Zool., 1, (2), livr. 16, p. 720, May 1, 1830—Falkland Islands (descr.).
- Charadrius nebulosus* Lesson, Man. d'Orn., 2, p. 315, June, 1828—"Brésil" (type in Paris Museum; descr. of non-nuptial plumage).
- Charadrius rubecola* King, Zool. Journ., 4, No. 13, p. 96, Apr. to July, 1828—Straits of Magellan (type apparently lost); Seebohm, Geog. Distr. Charad., pl. 1 (nuptial plumage), 1887.
- Squatarola rubecola* Jardine and Selby, Illust. Orn., Part 7, pl. 110, Dec., 1830—Straits of Magellan (fig. of type).
- Squatarola cincta* Gould, in Darwin, Zool. Beagle, 3, Birds, p. 126, 1841—Tierra del Fuego, Falkland Islands, and Chiloé Island; idem, Proc. Zool. Soc. Lond., 27, p. 95, 1859—Falkland Islands (egg descr.).
- Squatarola fusca* Gould, in Darwin, Zool. Beagle, 3, Birds, Part 15, p. 126, 1841—Maldonado, Uruguay (type now in British Museum;=non-nuptial plumage).
- Squatarola urvillii(ei)* Fraser, Proc. Zool. Soc. Lond., 11, p. 118, 1843—Chile; Des Murs, in Gay, Hist. Fís. Pol. Chile, Zool., 1, p. 401, 1847—Chile; Hartlaub, Naumannia, 3, p. 215, 1853—Valdivia, Chile; Philippi, Anal. Univ. Chile, 31, p. 271, 1868—coast of Chile.
- Vanellus modestus* Burmeister, Syst. Uebers. Th. Bras., 3, p. 362, 1856—"southern Brazil" and Montevideo south to Patagonia and Straits of Magellan; idem, Reise La Plata St., 2, p. 363, 1861—pampas, Rio Cuarto.
- Hiaticula fusca* Cassin, U. S. Expl. Exp., Zool., p. 328, 1858—Tierra del Fuego.
- Vanellus cinctus* Burmeister, Journ. Orn., 8, p. 260, 1860—Rio Cuarto, Córdoba (descr. of young).
- Eudromias urvillii* Sclater, Proc. Zool. Soc. Lond., 28, p. 386, 1860—Berkeley Sound, Falkland Islands; Abbott, Ibis, 1861, p. 155—East Falkland Island (breeding).
- Morinellus modestus* Schlegel, Mus. Pays-Bas, No. 29, Cursores, p. 48, 1865—Falkland Islands, Port Famine, and Santiago, Chile (crit.).
- Squatarola modesta* Pelzeln, Reise Novara, Zool., 1, Vögel, p. 115, 1865—Chile.
- Eudromias modesta* Sclater, Proc. Zool. Soc. Lond., 1867, pp. 331, 339—Chile; idem and Salvin, l.c., 1868, p. 144—Conchitas, Buenos Aires; iidem, Ibis, 1868, p. 188—Sandy Point and Gregory Bay, Straits of Magellan; iidem, l.c., 1870, p. 500—Sandy Point; Durnford, l.c., 1876, p. 164—Flores Island, Buenos Aires (May 30); idem, l.c., 1877, p. 197—Province of Buenos Aires (autumn and winter visitor); idem, l.c., 1878, p. 402—Chubut Valley (mid-April); Sclater and Salvin, Proc. Zool. Soc. Lond., 1878, p. 438—Gray Harbour, Tom Harbour, Puerto Bueno, Port "Fanuris" [=Famine], and Falkland Islands; Sharpe, l.c., 1881, p. 15—Tom Bay, Puerto del Morro, Port Henry and Cockle Cove, Straits of Magellan; Doering, in Roca, Inf. Ofic. Exp. Rio Negro, Zool., p. 56, 1881—Azul, Puan, and Choële-Choël, Pampa; Holmberg, Act. Acad. Nac. Cienc. Hudson, Arg. Orn., 2, p. 171, 1889—Argentina; Frenzel, Journ. Orn., 39, p. 126, 1891—Córdoba; Holland, Ibis, 1891, pp. 16, 19—Est. Esparillar, Buenos Aires (April 30); idem, l.c., 1892, p. 210—Est. Esparillar (Mar. to August); Aplin, l.c., 1894, p. 206—Uruguay (Mar. 29); Reed, Anal. Univ. Chile, 93, p. 209, 1896—Chile (winter visitor); Lane, Ibis, 1897, p. 303—near Arauco, Chile; Nicoll, l.c., 1904, p. 46—Port Gallant, Magallanes, Chile; Crawshaw, Birds Tierra del Fuego, p. 118, 1907—Cheena Creek Settlement; Bullock, Rev. Chil. Hist. Nat., 33, p. 202, 1929—Angol, Malleco, Chile.

Squatarola durvillei Leybold, Exc. Pamp. Arj., p. 20, 1873—Laguna de los Piuquenes, Santiago, Chile.

Charadrius modestus rubecola Seebohm, Geog. Distr. Charad., p. 106, 1887—Chile to Straits of Magellan (crit.).

Zonibyx modesta(us) Ridgway, Proc. U. S. Nat. Mus., 12, p. 137, 1889—Port Otway, Chile; Sharpe, Cat. Bds. Brit. Mus., 24, pp. 238, 742, 1896—Falkland Islands (Berkeley Sound), Tierra del Fuego, Straits of Magellan (Hermit Island, Port Famine, Gray Harbour, Puerto Bueno, Puerto del Morro, Cockle Cove, Tom Bay), Chubut, Chile (Valparaíso, "Tarapacá" [=Arauco]), Buenos Aires, Santa Lucia, and Maldonado; Salvadori, Ann. Mus. Civ. Stor. Nat. Genova, 40, p. 624, 1900—Penguin Rookery (Statens Island) and Punta Arenas; Ihering, Rev. Mus. Paul., 5, p. 287, 1902—Iguapé, São Paulo; idem, Cat. Faun. Braz., 1, p. 48, 1907—Iguapé, São Paulo; Hartert and Venturi, Nov. Zool., 16, p. 250, 1909—Barracas al Sud, Buenos Aires (Aug. 15, Sept. 27) and Ushuaia, Tierra del Fuego; Dabbene, Anal. Mus. Nac. Buenos Aires, 18, p. 217, 1910 (range in Argentina); Scott and Sharpe, Rep. Princet. Univ. Exped. Patagonia, 2, Orn., p. 286, 1910—near Mount Tigre, Cape Fairweather, and Arroyo Eke, Santa Cruz (descr.); Grant, Ibis, 1911, p. 465—Luiconia, Ajó, Buenos Aires; Brooks, Bull. Mus. Comp. Zool., 61, p. 150, 1917—Falkland Islands (descr. of downy young); Gibson, Ibis, 1920, p. 58—Cape San Antonio, Buenos Aires (winter visitor, April to Sept.); Tremoleras, El Hornero, 2, p. 13, 1920—Montevideo and Soriano, Uruguay; Wace, l.c., p. 198, 1921—Falkland Islands; Daguerre, l.c., p. 262, 1922—Rosas, Buenos Aires (Apr. 23); Pereyra, l.c., 3, p. 162, 1923—Zelaya, Buenos Aires (May, Aug.); Wilson, l.c., 3, p. 352, 1926—Venado Tuerto, Santa Fé (winter visitor); Wetmore, Univ. Calif. Pub. Zool., 24, p. 428, 1926—head of the Rio Gallegos, Santa Cruz (January); Bennett, Ibis, 1926, p. 322—Falkland Islands; Hellmayr, Field Mus. Nat. Hist., Zool. Ser., 19, p. 370, 1932—Chile (Caldera, Atacama, to the Guaitecas Islands); Marelli, El Hornero, 5, p. 195, 1933—Saldungaray, Buenos Aires; Reynolds, l.c., 5, p. 351, 1934—Tierra del Fuego; Peters, Bds. World, 2, p. 257, 1934 (range); Reynolds, Ibis, 1935, p. 86—Otaries Island, Jerdan Island, etc., Cape Horn; Pinto, Rev. Mus. Paul., 22, p. 131, 1938—Iguapé, São Paulo (May).

Charadrius (Eudromias) modestus Oustalet, Miss. Sci. Cap Horn, 6, p. B. 111, 1891—Bahía Orange, Tierra del Fuego, and Bouchier Bay, False Cape Horn.

Zonybyx modesta Schallow, Zool. Jahrb., Suppl., 4, p. 666, 1898—Ushuaia, Tierra del Fuego, and Port Stanley, Falkland Islands; Dabbene, Anal. Mus. Nac. Buenos Aires, 8, p. 375, 1902—Tierra del Fuego.

Range.—Breeds in extreme southern Patagonia, Tierra del Fuego, and on the Falkland Islands; winters in Chile (north to Atacama), Argentina (north to Córdoba, Santa Fé, and Entre Ríos), Uruguay, and extreme southern Brazil (one record each from Rio Grande do Sul and Iguapé, São Paulo).¹

Field Museum Collection.—5: Chile (Huanillo, Antofagasta, 1; Penco, 1; Rio Ciai, Magallanes, 2); Argentina (unspecified, 1).

Conover Collection.—16: Chile (Angol, Bio Bio, 4; Melinka, Guaitecas Islands, 1; Casa Richards, Rio Nirehuau, 2; Rio Ciai, Magallanes, 1); Argentina (Cambaceres, Buenos Aires, 6; Cape Peñas, Tierra del Fuego, 2).

Genus PLUVIANELLUS G. R. Gray

Pluvianellus G. R. Gray, Gen. Bds., 3, p. [549], Dec., 1846—type, by monotypy, *Pluvianellus socialis* G. R. Gray; Pucheran, in Hombron and Jacquinot, Voy. Pôle Sud, Zool., 3, p. 124, 1853—type, by orig. desig., *Pluvianellus sociabilis* Pucheran (generic characters).

**Pluvianellus socialis* G. R. Gray. MAGELLANIC PLOVER.

Pluvianellus socialis? "Hombron and Jacquinot" G. R. Gray, Gen. Bds., 3, p. [549], Dec., 1846—based on "*Pluvianelle sociable*" Hombron and Jacquinot, Voy. Pôle Sud, Atlas, Ois., pl. 30, fig. 1, Jan., 1845, no locality stated (type, from Straits of Magellan, in Paris Museum).

Pluvianellus sociabilis Pucheran, in Hombron and Jacquinot, Voy. Pôle Sud, Zool., 3, p. 125, 1853—"détroit de Magellan (type in Paris Museum); Sharpe, Cat. Bds. Brit. Mus., 24, p. 303, 1896—Patagonia; Crawshaw, Bds. Tierra del Fuego, p. 121, col. pl., 1907—Useless Bay Settlement (Sept. 16, Nov. 5; breeding); Sharpe and Scott, Rep. Princet. Univ. Exped. Patagonia, 2, Orn., p. 298, 1910—near Rio Coy, Santa Cruz (Sept. 30); Dabbene, Anal. Mus. Nac. Buenos Aires, 18, p. 217, 1910—Patagonia and Tierra del Fuego (Useless Bay); Stresemann, Orn. Monatsber., 33, p. 21, 1925—Punta Anegada, Straits of Magellan; Kinnear, Bull. Brit. Orn. Cl., 48, p. 52, 1927—Tierra del Fuego (adult and immature, Jan.).

Charadrius sociabilis Seebohm, Geog. Distr. Charad., p. 107, pl. 2, 1887—Tova Harbour (lat. 45° S.), Chubut; Oustalet, Miss. Sci. Cap Horn, 6, p. B. 288, 1891—Straits of Magellan (type) and Tova Harbour, Patagonia.

Pluvianellus socialis Peters, Bds. World, 2, p. 258, 1934 (range).

¹ We have not been able to make out any constant differences, either in coloration or in size, between birds from the Falkland Islands and others from the mainland.

Additional material examined.—Falkland Islands, 8.—Tierra del Fuego, 4.—Straits of Magellan, 8.—Argentina: Chubut, 3; Province of Buenos Aires, 5.—Chile: Valparaíso, 1; Arauco City, 2; Maquegua, Arauco, 1; Nige, Tolten Viejo, 1; Almagro, Cautin, 2.

Range.—Eastern Patagonia, from southern Chubut (Tova Harbour, lat. 45° S.) to Tierra del Fuego (Useless Bay).¹

Conover Collection.—2: Argentina (Rio Gallegos, 2).

Genus PHEGORNIS G. R. Gray²

Leptopus (not of Latreille, 1809) Fraser, Proc. Zool. Soc. Lond., 12, "1844," p. 157, pub. Feb., 1845—type, by monotypy, *Leptopus mitchellii* Fraser.

Leptodactylus (not of Fitzinger, 1826) Fraser, Proc. Zool. Soc. Lond., 12, "1844," p. 157, pub. Feb., 1845 (proposed in footnote as substitute for *Leptopus* Fraser).

Phegornis G. R. Gray, Gen. Bds., 3, p. [545], 1846—type, by orig. desig., *Leptopus mitchellii* Fraser.

Leptoscelis (not of Halliday, 1831) Des Murs, Icon. Orn., livr. 7, pl. 41, 1847—new name for *Leptopus* and *Leptodactylus* Fraser, preoccupied.

Leptosceles Sclater, Proc. Zool. Soc. Lond., 1867, p. 331—emendation of *Leptoscelis* Des Murs.

**Phegornis mitchellii* (Fraser). MITCHELL'S SANDPIPER.

Leptopus mitchellii Fraser, Proc. Zool. Soc. Lond., 12, "1844," p. 157, Feb., 1845—Chile, probably Andes of Colchagua (type now in collection of British Museum); idem, Zool. Typ., pl. 63, circa 1848—Andes of central Chile.

Phegornis mitchellii(i) Gray, Gen. Bds., 3, p. [545], pl. 145, fig. 1, 1846; Taczanowski, Proc. Zool. Soc. Lond., 1874, p. 561—Lake Junín, Peru; Sclater, l.c., 1886, p. 403—Sitani, Tarapacá, Chile; Taczanowski, Orn. Pér., 3, pl. 372, 1886—Lake Junín, Peru; Seebohm, Geog. Distr. Charad., p. 450, pl. 16, 1887—Chile (monog.); Reed, Anal. Univ. Chile, 93, p. 210, 1896—Chile; Sharpe, Cat. Bds. Brit. Mus., 24, p. 682, 1896—Chile and Peru (Junín); Arribáizaga, Anal. Mus. Nac. Buenos Aires, (3), 1, p. 154, 1902—Yaucha, Dept. San Carlos, Province of Mendoza; Berlepsch and Stolzmann, Ornith., 13, p. 132, 1906—Pujuni and Titiri, Puno, Peru; Neveu-Lemaire, Les Lacs des Hauts Plateaux Amér. Sud, p. 111, 1906—Lake Titicaca; Dabbene, Anal. Mus. Nac. Buenos Aires, 18, p. 221, 1910—"western Chubut" and Sierra de Mendoza, Argentina; idem, Bol. Soc. Physis, 1, p. 260, 1913 (range in Argentina); Reed, Av. Prov. Mendoza, p. 12, 1916—Mendoza and Chile ("Concepción"); Barros, Rev. Chil. Hist. Nat., 25, p. 172, 1921—Cordillera of Aconcagua, Chile; idem, l.c., 33, p. 357, 1929—Cordillera of Aconcagua; Hellmayr, Field Mus. Nat. Hist., Zool. Ser., 19, p. 392, 1932—Antofagasta (Silala) and Coquimbo (Baños del Toro), Chile (crit.); Peters, Bds. World, 2, p. 258, 1934 (range); Morrison, Ibis, 1939, p. 464—Talahuarra, Huancavelica, Peru (Oct., Nov.).

¹ Additional material examined.—Patagonia: Straits of Magellan, 1 (the type); Tova Harbour, Chubut, 1; unspecified, 1.—Tierra del Fuego: Useless Bay Settlement, 1.

² About the systematic position, cf. Lowe, Ibis, 1931, p. 722.

Leptoscelis mitchellii Des Murs, Icon. Orn., livr. 7, pl. 41, 1847—"California"; idem, in Gay, Hist. Fís. Pol. Chile, Zool., 1, p. 404, 1847—Chile (ex Fraser); Philippi, Reise Wüste Atacama, p. 163, 1860—Rio Frio, Antofagasta, and Cordillera of Santiago, Chile; Pelzeln, Reise Novara, Zool., 1, Vögel, p. 117, 1865—Cordillera of Santiago; Philippi, Anal. Univ. Chile, 31, p. 272, 1868—Cordilleras of central provinces north to the desert of Atacama; idem, Orn., 4, p. 159, 1888—Rio Frio, Antofagasta.

Leptosceles mitchelli Sclater, Proc. Zool. Soc. Lond., 1867, pp. 331, 339—Chile.

Range.—Puna zone of southern Peru (Lake Junín; Talahuarrá, Huancavelica; Puno), western Bolivia (Lake Titicaca; Silala, Potosí), and northern Chile south to Colchagua; also recorded from western Argentina (Yaucha, Province of Mendoza; Aconquija, Province of Tucumán).

Field Museum Collection.—4: Bolivia (Silala, Potosí, 3); Chile (Banos del Toro, Coquimbo, 1).

Conover Collection.—2: Chile (Banos del Toro, Coquimbo, 2).

Family SCOLOPACIDAE. Woodcocks, Snipes, Sandpipers, etc.

Subfamily TRINGINAE. Curlews, Godwits, Yellowlegs, etc.

Genus BARTRAMIA Lesson¹

Euligia Gundlach, Journ. Orn., 10, p. 86, 1862—emendation of *Euligia* Nuttall.

**Bartramia longicauda* (Bechstein). UPLAND PLOVER.

Tringa longicauda Bechstein, Kurze Uebers. Vögel, 2, p. 453, pl. 42, 1812—North America.

Tringa bartramia Wilson, Amer. Orn., 7, p. 63, pl. 59, fig. 2, 1813—Schuylkill River, Pennsylvania (type evidently lost).

¹ About anatomy and affinities, cf. Lowe, Ibis, 1931, pp. 759-761.

- Totanus variegatus* Vieillot, Nouv. Dict. Hist. Nat., nouv. éd., 6, p. 397, 1816—"dans l'Amérique septentrionale et aux îles Antilles" (no type specified); idem and Oudart, Gal. Ois., 2, p. 107, pl. 239, circa 1825—same localities.
- Totanus campestris* Vieillot,¹ Nouv. Dict. Hist. Nat., nouv. éd., 6, p. 400, 1816—based on "Chorlito ribetes blancos acanelados" Azara, No. 398, Paraguay.
- Bartramia laticauda* Lesson, Traité d'Orn., livr. 7, p. 553, April, 1831—new name for *Tringa longicauda* Bechstein.
- Actitis bartrami* Naumann, Naturg. Vög. Deuts., 8, p. 43, pl. 196, 1836—emendation of *Tringa bartramia* Wilson.
- Actiturus bartramius* Sclater and Salvin, Ibis, 1859, p. 230—Dueñas, Guatemala; Sclater, Proc. Zool. Soc. Lond., 28, p. 253, 1860—Vera Cruz, Mexico; Lawrence, Ann. Lyc. Nat. Hist. N. Y., 7, p. 334, 1862—Lion Hill, Panama; Salvin, Ibis, 1864, p. 385—Turneff Island, British Honduras; Sclater and Salvin, Proc. Zool. Soc. Lond., 1866, p. 567—eastern Peru; iidem, l.c., 1867, p. 979—Pebas, Peru; iidem, l.c., 1868, p. 169—Caracas, Venezuela; iidem, l.c., 1869, p. 598—Cosnipata, Peru; iidem, l.c., 1870, p. 783—south of Mérida, Venezuela; Reinhardt, Vidensk. Medd. Naturhist. Foren., 1870, p. 38—Andrequecé, Minas Geraes, Brazil (Oct. 26); Sclater and Salvin, Proc. Zool. Soc. Lond., 1873, p. 309—Nauta, Chamicuros, and Pebas, Peru; Taczanowski, l.c., 1874, p. 560—Chorillos, Lima, Peru; Hudson, l.c., 1876, p. 104—Buenos Aires; Durnford, Ibis, 1877, p. 199—Buenos Aires (Dec. to April); Cabanis, Journ. Orn., 26, p. 199, 1878—Sierra of Córdoba; Barrows, Auk, 1, p. 315, 1884—Concepción del Uruguay, Entre Ríos (Nov. to April); Taczanowski, Orn. Pér., 3, p. 371, 1886—Peruvian localities; Withington, Ibis, 1888, p. 472—Lomas de Zamora, Buenos Aires (fall); Sclater and Hudson, Arg. Orn., 2, p. 189, 1889—Argentina (habits); Holland, Ibis, 1890, p. 425—Est. Espartillar, Buenos Aires; idem, l.c., 1892, p. 212—Est. Espartillar (Oct. to Mar.); Aplin, l.c., 1894, p. 209—Santa Elena (Jan. to Mar.) and Porongos (Nov.), Uruguay; Kerr, l.c., 1901, p. 236—Paraguayan Chaco (Nov. 27); Philippi, Anal. Mus. Nac. Chile, 15, p. 65, 1902—Cordillera of Santiago, Chile.
- Totanus bartramia* Burmeister, Journ. Orn., 8, p. 260, 1860—Mendoza; idem, Reise La Plata St., 2, p. 503, 1861—Rio Tunuyán, Mendoza.
- Actitis bartramius* Schlegel, Mus. Pays-Bas, No. 27, Scolopaces, p. 78, 1864—Ohio and Wisconsin (crit.).
- Tringoides bartramius(a)* Léotaud, Ois. Trinidad, p. 463, 1866—Trinidad; Pelzel, Orn. Bras., 3, p. 310, 1870—São Paulo (Mattodentro, Sept., Nov.; Irisanga, Dec.), Matto Grosso (Barra do Jauru, Oct.; Engenho do Cap Gama, Sept.; Villa Bella, Oct.), and Amazonia (Marabitanas, Rio Negro, Mar.).
- Actiturus longicaudatus* Berlepsch, Journ. Orn., 22, p. 260, 1874—Blumenau, Santa Catharina, Brazil; Gundlach, l.c., 29, p. 401, 1881—Puerto Rico.

¹*Totanus melanopygius* Vieillot (Nouv. Dict. Hist. Nat., nouv. éd., 6, p. 401, 1816—"au centre des États-Unis, dans les mois d'octobre et de novembre, et à la Louisiane pendant toute l'année"), sometimes quoted in synonymy, can hardly refer to the Upland Plover.

- Actiturus longicaudus* Gundlach, Journ. Orn., 23, p. 326, 1875—Cuba (Aug. to May); Salvin, Ibis, 1889, p. 379—Ruatan Island, Honduras.
- Actiturus longicauda* Sclater and Salvin, Proc. Zool. Soc. Lond., 1879, p. 547—Medellin, Antioquia, Colombia; Doering, in Roca, Inf. Ofic. Exp. Rio Negro, Zool., 1, p. 57, 1881—southern parts of Pampa; Holmberg, Act. Acad. Nac. Cienc. Córdoba, 5, p. 87, 1884—Tandil, Buenos Aires.
- Bartramia longicauda* Cory, Auk, 4, p. 319, 1887—West Indies (descr.); Zeledon, Anal. Mus. Nac. Costa Rica, 1, p. 129, 1887—Alajuela, Costa Rica; Cory, Bds. W. Ind., p. 240, 1889—Cuba, Jamaica, and Grenada; Allen, Bull. Amer. Mus. N. H., 2, p. 109, 1889—"Lake Titicaca (Aug.)"; Berlepsch, Journ. Orn., 37, p. 101, 1889—Tonantins, Rio Solimões, Brazil (May 7); Cherrie, Auk, 7, p. 332, 1890—San José, Costa Rica (Sept. 25 to Nov. 25); idem, l.c., 9, p. 329, 1892—San José, Costa Rica; Cory, l.c., p. 48, 1892—Maraguana, Bahama Islands; idem, Cat. W. Ind. Bds., p. 94, 1892—West Indian localities; Berlepsch and Stolzmann, Proc. Zool. Soc. Lond., 1892, p. 395—Magdalena Vieja and Lima, Peru (March); Allen, Bull. Amer. Mus. N. H., 5, p. 150, 1893—Chapada, Matto Grosso; Richmond, Proc. U. S. Nat. Mus., 16, p. 526, 1893—Rio Escondido, Nicaragua (Nov. 26); Sharpe, Cat. Bds. Brit. Mus., 24, pp. 509, 765, 1896 (monog.); Ihering, Rev. Mus. Paul., 3, p. 435, 1899—São Paulo; Allen, Bull. Amer. Mus. N. H., 13, p. 125, 1900—Ciénaga, Magdalena, Colombia (Sept. 15); idem, Auk, 17, p. 364, 1900—same locality; Bangs, l.c., 18, p. 358, 1901—Divalá, Chiriquí, Panama; Lillo, Anal. Mus. Nac. Buenos Aires, 8, p. 213, 1902—Rio Salí, Tucumán; Salvin and Godman, Biol. Centr.-Amer., Aves, 3, p. 380, 1903—Mexico (Valley of Mexico; Guanajuato; Zacatecas; Chapala, Jalisco; Cacoprieto and Tapanatepec, Oaxaca; Orizaba, Las Vegas, and Jalapa, Vera Cruz; Pinal, Puebla), British Honduras (Turneff Island), Guatemala (Dueñas, Sakiuk), Honduras (Ruatan Island), Nicaragua (Rio Escondido), Costa Rica, and Panama; Lönnberg, Ibis, 1903, p. 460—Tatarenda, Tarija, Bolivia (April); Clark, Proc. Bost. Soc. N. H., 32, p. 254, 1905—Barbados (Aug. to March), Grenada, and Carriacou (Sept., Oct.), Lesser Antilles; Berlepsch and Stolzmann, Ornith., 13, p. 125, 1906—Huaynapata, Marcapata, Peru (Sept., Oct.); Hellmayr, Nov. Zool., 13, p. 54, 1906—Seelet, Trinidad (April); Ihering, Cat. Faun. Braz., 1, p. 52, 1907—São Paulo (Ypiranga, Iguapé, Itapura) and Venezuela (Mérida); Berlepsch, Nov. Zool., 15, p. 307, 1908—Cayenne, French Guiana (Oct. 27); Hartert and Venturi, l.c., 16, p. 251, 1909—Wilde (Dec. 30) and Barracas al Sud (Dec. 26), Buenos Aires; Hellmayr, l.c., 17, p. 425, 1910—Allianca, Rio Madeira, Brazil (Nov. 9); Carrier, Ann. Carnegie Mus., 6, p. 420, 1910—San José (Sept. 15, 18) and Guácimo (Oct. 13), Costa Rica; Dabbene, Anal. Mus. Nac. Buenos Aires, 18, p. 219, 1910 (range in Argentina); Reiser, Denks. Math.-Naturw. Kl. Akad. Wiss. Wien, 76, p. 95, 1910—Joazeiro, Bahía (Mar. 20); Sneath, Bol. Mus. Goeldi, 8, p. 90, 1914—Baião, Rio Tocantins, Brazil; Stone, Proc. Acad. Nat. Sci. Phila., 1918, p. 245—Gatún, Panama (Oct. 12); Bangs and Penard, Bull. Mus. Comp. Zool., 62, p. 44, 1918—vicinity of Paramaribo, Surinam (April); Ridgway, Bull. U. S. Nat. Mus., 50, (8), p. 379, 1919 (monog.; full bibliog.); Tremoleras, El Hornero, 2, p. 14, 1920—Montevideo and Colonia, Uruguay; Dabbene, l.c., p. 119, 1920 (winter range in Argentina and neighboring countries); Daguerre, l.c.,

p. 263, 1922—Rosas, Buenos Aires (Jan. 18); Todd and Carriker, Ann. Carnegie Mus., 14, p. 181, 1922—Ciénaga, Colombia; Lönnberg and Rendahl, Ark. Zool., 14, No. 25, p. 24, 1922—Chaupicruz, near La Carolina (Mar. 20), and Carapungo (Aug. 10), Ecuador; Giacomelli, El Hornero, 3, p. 80, 1923—La Rioja (Feb., March); Pereyra, l.c., p. 163, 1923—Zelaya, Buenos Aires (Nov.); Dabbene, l.c., p. 197, 1923—Deception Island, South Shetlands (Feb. 8); Wilson, l.c., p. 352, 1926—Venado Tuerto, Santa Fé; Chapman, Bull. Mus., 133, p. 146, 1926—Paraguay (Puerto Pinasco, Sept. 29; Villa Concepción, Oct. 3), Uruguay (below Rocha, Jan. 23; Lazcano, Feb. 7), Entre Ríos (Concordia, Feb. 22), and Buenos Aires; idem, Tech. Bull. U. S. Dept. Agric., 26, p. 13, 1927—same localities; idem, Sci. Surv. Porto Rico and Virgin Islands, 9, p. 362, 1927—Puerto Rico (Santa Isabel, Sept. 13); Bent, Bull. U. S. Nat. Mus., 146, p. 55, 1929 (life hist.); Laubmann, Wiss. Erg. Deuts. Gran Chaco Exp., Vögel, p. 53, 1930—Tacaaglé, Formosa (Nov. 24); Darlington, Bull. Mus. Comp. Zool., 71, p. 375, 1931—Sevillano, Magdalena, Colombia (Oct. 20); Hellmayr, Field Mus. Nat. Hist., Zool. Ser., 19, p. 397, 1932—Santiago, Chile; Griscom, Bull. Amer. Mus. N. H., 64, p. 135, 1932—Guatemala; Ticehurst, Bull. Brit. Orn. Cl., 53, p. 204, 1933 (downy young descr.); Peters, Bds. World, 2, p. 259, 1934 (range); Belcher and Smooker, Ibis, 1935, p. 289—Trinidad and Tobago; Griscom, Bull. Mus. Comp. Zool., 78, p. 307, 1935—Panama; Pinto, Rev. Mus. Paul., 22, p. 132, 1938—Bahía (Joazeiro), São Paulo (Iguapé, Ypiranga, Itapura), and Venezuela (Mérida); Bennett, Ibis, 1938, p. 764—Falkland Islands; Dixon, Bds. Mammals, Mt. McKinley Nat. Park, p. 74, 1938 (nesting); Gabrielson, Auk, 61, p. 123, 1944—Mt. McKinley Nat. Park; Gyldenstolpe, K. Svensk. Vetensk. Akad. Handl., (3), 23, p. 71, 1945—Bolivia, El Beni (Cachuela Esperanza, Sept.; Victoria, Oct.).

Range.—Breeds from northwestern Alaska, southern Mackenzie, southern Ontario, Quebec, and central Maine south to Oregon, Utah, Colorado, southern Oklahoma, Missouri, southern Indiana, and northern Virginia; winters in southern Brazil, Uruguay, and Argentina south to the Rio Negro; casual in Chile (Santiago); occasional in Bermuda Islands, and western Europe; accidental in the Falkland and the South Shetland Islands (Deception Island, Feb. 9, 1923).

Field Museum Collection.—82: Alberta (Walsh, 2); Saskatchewan (Maple Creek, 3; Prince Albert, 1); North Dakota (Towner County, 19; Rock Lake, Towner County, 2; Peoples Lake, Towner County, 1; Cando, Towner County, 1; St. John, Towner County, 1; Stump Lake, Nelson County, 10; Belcourt, Rolette County, 1; Rolla, Rolette County, 1; Taller's Bay, Ramsey County, 1; Cannonball, Slope County, 1; Brinsmade, Benson County, 2); Colorado (Fort Lyon, Bent County, 1); Iowa (Iowa City, 1); Wisconsin (Beaver

Dam, 4); Illinois (Mud Lake, Cook County, 1; Joliet, Will County, 2); Massachusetts (Monomoy Island, 1; Cohasset, 1; Ashfield, 1; unspecified, 1); Connecticut (New Haven County, 1); New York (Southampton, 1); Pennsylvania (unspecified, 1); Texas (Corpus Christi, 8; Brownsville, 5; Travis County, 1); Bahama Islands (Mariguana, 1); Venezuela, Merida (Culata, 4; Conejos, 1).

Conover Collection.—15: Yukon Territory (head of Big Salmon River, 1); Illinois (Calumet, 2; Warrenville, Du Page County, 5); Georgia (Montezuma, Macon County, 1); Colombia (Popayán, Cauca, 1); Ecuador (Rio Blanco, Esmeraldas, 1; Sara Yaco, Rio Bobonaza, 1; Macas, Santiago-Zamora, 1); Brazil (Vaccaria, Matto Grosso, 2).

Genus NUMENIUS Brisson

Numenius Brisson, Orn., 1, p. 48, 5, p. 311, 1760—type, by tautonymy, "*Numenius*" Brisson=*Scolopax torquata* Linnaeus.

Phaeopus Cuvier, Règ. Anim., 1, "1817," p. 485, publ. Dec. 7, 1816—type, by tautonymy, *Scolopax phaeopus* Linnaeus.

Neomenius Billberg, Syn. Faun. Scand., 1, (2), tab. A and p. 159, 1828—emendation of *Numenius* Brisson.

Cracticornis Gray, List Gen. Subgen. Bds., 2nd ed., p. 88, 1841—type, by orig. desig., *Scolopax torquata* Linnaeus.

Mesoscolopax Sharpe, Cat. Bds. Brit. Mus., 24, p. 371, 1896—type, by monotypy, *Numenius minutus* Gould.

**Numenius borealis* (J. R. Forster). ESKIMO CURLEW.

Scolopax borealis J. R. Forster, Phil. Trans., 62, pp. 411, 431, 1772—Fort Albany, Keewatin, Hudson Bay (type formerly in collection of Royal Society of London).

Tringa campestris Vieillot, Nouv. Dict. Hist. Nat., nouv. éd., 34, p. 454, 1819—based on "Chorlito campesino" Azara, No. 397, Paraguay (September).

Numenius brevirostris Lichtenstein, Verz. Doubl. Zool. Mus. Berlin, p. 75, Sept., 1823—Montevideo, Uruguay (type in Berlin Museum); Temminck, Nouv. Rec. Pl. Col., livr. 64, pl. 381, Dec. 21, 1825—Brazil and Paraguay; Darwin, Zool. Beagle, 3, Birds, p. 129, 1841—Buenos Aires; Sclater, Proc. Zool. Soc. Lond., 28, p. 387, 1860—Falkland Islands; Abbott, Ibis, 1861, p. 156—Falkland Islands (one record); Pelzeln, Orn. Bras., 3, p. 308, 1870—São Paulo (Lagôa do Campo Largo, near Ypanemá, Sept., Oct., Nov.), Matto Grosso (Xavier, Oct. 7), and Amazonas (south bank of Amazon River between mouth of Rio Madeira and mouth of Rio Negro, Sept. 4), Brazil.

Numenius borealis Salvin, Ibis, 1861, p. 356—San Gerónimo, Guatemala (April); Schlegel, Mus. Pays-Bas, No. 27, p. 101, 1864 (crit.); Léotaud, Ois. Trinidad, p. 444, 1866—Trinidad (one male; Sept.); Sclater, Proc. Zool. Soc. Lond., 1867, pp. 333, 339—Chile (crit.); Newton, I.c., 1871,

p. 56, pl. 4, fig. 1 (egg)—Arctic coast east of Anderson River, Mackenzie; Durnford, *Ibis*, 1878, p. 404—Chubut Valley, Patagonia (Oct. 8–10); Gundlach, *Journ. Orn.*, 26, pp. 161, 188, 1878—Puerto Rico; idem, *Anal. Soc. Esp. Hist. Nat.*, 7, p. 367, 1878—near San Juan, Puerto Rico (one spec.); Reinhardt, *Vidensk. Medd. Naturhist. Foren.*, 1881, p. 185—Greenland (Julianehaab, Nanortalik, Ikamiut); Reid, *Bull. U. S. Nat. Mus.*, 25, p. 241, 1884—Bermuda Islands; Barrows, *Auk*, 1, p. 316, 1884—Concepción del Uruguay, Entre Ríos (Sept. 9 to middle October), and pampas between Azúl and Bahía Blanca, Buenos Aires (Feb.); Turner, *Contr. Nat. Hist. Alaska*, 2, p. 149, 1886—sixty miles west of Nunivak Island, Bering Sea; Nelson, *Nat. Hist. Coll. Alaska*, 3, p. 121, 1887—Alaskan coast of Bering Sea (migr.); Seeböhm, *Geog. Distr. Charad.*, p. 333, 1887 (crit.); Wells, *Proc. U. S. Nat. Mus.*, 9, p. 629, 1887—Grenada; Feilden, *Ibis*, 1889, p. 498—Barbados (end of Aug. and Sept.); Sharpe, *Cat. Bds. Brit. Mus.*, 24, pp. 368, 755, 1896 (monog.); Winge, *Medd. Grønland*, 21, p. 159, 1898—Greenland (several records); Philippi, *Anal. Mus. Nac. Chile*, 15, p. 62, 1902—Chile (crit.); Clark, *Proc. Bost. Soc. N. H.*, 32, p. 255, 1905—Barbados (ex Feilden) and Harvey Vale, Carriacou (Sept. 5, 1904); Barbour, *Auk*, 23, p. 459, 1906—Lat. 49° 06' N., Long. 27° 28' W. (May 26, 1906); Thayer, l.c., 26, p. 77, 1909—Newburyport, Massachusetts (Aug., 1908); Knight, l.c., 27, p. 79, 1910—Hog Island, Hancock, Maine (Sept., 1909); Scott and Sharpe, *Rep. Princet. Univ. Exped. Patagonia*, 2, *Orn.*, p. 300, 1910 (descr.; range); Dabbene, *Anal. Mus. Nac. Hist. Nat.*, 18, p. 218, 1910 (range in Argentina); Lamb, *Auk*, 30, p. 581, 1913—East Orleans, Massachusetts, Sept. 5, 1913 (in Conover collection); Swenk, *Smiths. Inst. Ann. Rep. for 1915*, pp. 325–340, pl. 1, 1916 (hist.; former distr.; migr.); Gibson, *Ibis*, 1920, p. 71—Linconia (Feb. 13, 1899; April 8, 1901) and near Palenque (Apr. 16, 1901), Ajó, Buenos Aires; Wetmore, *Tech. Bull. U. S. Dept. Agric.*, 26, p. 15, 1927 (account of former wintering grounds in Argentina and Chile); Albert, *Auk*, 45, p. 95, 1928—Horicon Marsh, Wisconsin (1903); Bent, *Bull. U. S. Nat. Mus.*, 146, p. 125, 1929 (life hist.; range; migr.); Naumburg, *Bull. Amer. Mus. N. H.*, 60, p. 78, 1930—Matto Grosso; Griscom, l.c., 64, p. 132, 1932—San Gerónimo, Guatemala; Hellmayr, *Field Mus. Nat. Hist., Zool. Ser.*, 19, p. 398, 1932—Chile (Arica, Tacna, Chiloé Island); Peters, *Bds. World*, 2, p. 260, 1934 (range); Belcher and Smooker, *Ibis*, 1935, p. 289—Trinidad (ex Léotaud) and Tobago (ex Kirk); Pinto, *Rev. Mus. Paul.*, 22, p. 132, 1938 (range); Philippi, *Bol. Mus. Nac. Chile*, 16, p. 54, 1938—Playa de Chacalluta, Tacna (Sept., 1851).

Numenius microrhynchus Philippi and Landbeck, *Arch. Naturg.*, 32, (1), p. 129, 1866—Chiloé Island (Oct., 1858) and "Arica" (=Playa de Chacalluta), Tacna, Chile (cotypes in Museo Nacional, Santiago; cf. Gigoux and Looser, *Bol. Mus. Nac. Santiago*, 13, p. 24, 1930); Philippi, *Anal. Univ. Chile*, 31, p. 275, 1868—Chiloé and "Peru" (=Arica).

Mesoscolopax borealis Ridgway, *Bull. U. S. Nat. Mus.*, 50, (8), p. 412, 1919 (monog.; full bibliog.); Tremoleras, *El Hornero*, 2, p. 13, 1920—Montevideo and Colonia, Uruguay; Dabbene, l.c., p. 125, 1920 (range in Argentina); idem, l.c., 3, p. 284, 1924—Rosas, Province of Buenos Aires (Sept. 7, 1924); idem, l.c., 3, p. 420, 1926—Rosas, Province of Buenos Aires (Jan. 11,

1926); Bradlee and Mowbray, Proc. Bost. Soc. N. H., 39, p. 322, 1931—Bermuda Islands.

Phaeopus borealis Wetmore, Sci. Surv. Porto Rico and Virgin Islands, 9, p. 360, 1927—Puerto Rico (ex Gundlach); idem, Auk, 56, p. 475, 1939—Lavalley, Buenos Aires (Feb. 16–28, 1937; Jan. 17, 1939); Cottam and Knappen, l.c., 56, p. 154, 1939 (food); Scott, l.c., 57, p. 566, 1940 (corrected list of records).

Range.—Bred formerly on the barren grounds of Arctic America, from Norton Sound, Alaska, to northern Mackenzie (valley of Anderson River, Point Lake); wintered in southern Brazil (states of São Paulo and Matto Grosso), Paraguay, Uruguay, Chile, and Argentina (Entre Ríos, Buenos Aires, Chubut); accidental in Guatemala (San Gerónimo), on the Falkland Islands (one record), and in Greenland.¹ The southward migration was through the eastern United States and the West Indies (Bermuda Islands; Puerto Rico; Barbados; Carriacou; Grenada; Tobago; Trinidad), returning northward across the Gulf of Mexico and up the Mississippi Valley. Now exceedingly rare.²

Field Museum Collection.—10: Quebec (Magdalen Islands, 1); Massachusetts (Monomoy Island, 5; Cape Cod, Barnstable County, 1; Great Island, Hyannis, 2); Kansas (Emporia, 1).

Conover Collection.—5: Massachusetts (Cape Cod, 1; East Orleans, Barnstable County, 1); Colorado (Smith's Lake, Denver, 1); unspecified, 2.

Numenius phaeopus phaeopus (Linnaeus). WHIMBREL.

Scolopax phaeopus Linnaeus, Syst. Nat., 10th ed., 1, p. 146, 1758—based principally on Faun. Svec., No. 140, Sweden.

Numenius islandicus C. L. Brehm, Handb. Vög. Deuts., p. 610, 1831—Iceland (type in Tring Collection, now in the American Museum of Natural History, New York; cf. Hartert, Nov. Zool., 25, p. 56, 1918).

Numenius phaeopus Winge, Medd. Grøn., 21, p. 159, 1898—Greenland (various records); Brewster, Auk, 26, p. 190, 1909—south of Sable Island,

¹ Salvin's record (Proc. Zool. Soc. Lond., 1883, p. 429) from Charles Island, Galápagos, refers to *N. phaeopus hudsonicus* (cf. Rothschild and Hartert, Nov. Zool., 6, p. 189, 1899).

² The last specimen was shot on January 11, 1926, at Rosas, Buenos Aires, but others were seen by E. R. Runnacles at Lavalley, in the same province, in February, 1937, as well as on January 17, 1939 (fide Wetmore, Auk, 56, p. 475, 1939).

³ *Numenius melanorhynchus* Bonaparte (Compt. Rend. Acad. Sci. Paris, 43, pp. 597, 1021, 1856), from Greenland and Iceland, is a nomen nudum without nomenclatorial standing.

Nova Scotia (May 23, 1906); Miller, l.c., 32, p. 226, 1915—Great South Bay, Long Island (Sept. 4, 1912).

Phaeopus phaeopus phaeopus Ridgway, Bull. U. S. Nat. Mus., 50, (8), p. 397, 1919 (monog.; full bibliog.).

Numenius phaeopus phaeopus Bent, Bull. U. S. Nat. Mus., 146, p. 136, 1929 (life hist.); Peters, Bds. World, 2, p. 260, 1934 (range in part).

Numenius phaeopus islandicus Salomonsen, Vidensk. Medd. Naturhist. Foren., 90, pp. 365, 366, 1931—Iceland and Greenland (crit.; meas.).¹

Range.—Breeds in Iceland, the Färoes, Orkney and Shetland Islands, northern Scandinavia, and northern (European and Asiatic) Russia; frequent on migration in Greenland; accidental on Sable Island, south of Nova Scotia (May 25, 1906), and Long Island, New York (Sept. 4, 1912); winters in Africa, Madagascar, and India.

***Numenius phaeopus variegatus* (Scopoli).² EASTERN WHIMBREL.**

Tantalus variegatus Scopoli, Del. Flor. et Faun. Ins., fasc. 2, p. 92, 1796—based on "Courly tacheté de l'isle de Luçon" Sonnerat, Voy. Nouv. Guinée, p. 85, pl. 48, Luzon, Philippine Islands.

Scolopax luzoniensis Gmelin, Syst. Nat., 1, (2), p. 656, 1789—same basis.

Numenius atricapillus Vieillot, Nouv. Dict. Hist. Nat., nouv. éd., 8, p. 303, 1817—new name for *Numenius luzoniensis* Latham=*Scolopax luzoniensis* Gmelin.

Numenius phaeopus variegatus Peters, Bds. World, 2, p. 261, 1934 (range); Bailey, Auk, 56, p. 333, 1939—Point Barrow, Alaska (June 10, 1938).

Range.—Breeds in eastern Siberia west to the Lena River; winters from eastern China throughout the Indo-Australian Archipelago to New Guinea, the Solomon Islands, Australia, Tasmania, New Caledonia, and the Caroline, Marianna, and Pelew Islands. Accidental in Alaska (Point Barrow, June 10, 1938).

****Numenius phaeopus hudsonicus* Latham. HUDSONIAN CURLEW.**

Numenius hudsonicus Latham, Ind. Orn., 2, p. 712, 1790—based on "Eskimaux Curlew": Tennant, Arct. Zool., 2, No. 364, pl. 19, Hudson Bay; Darwin, Zool. Beagle, 3, Birds, p. 129, 1841—Chiloé Island, Chile; Fraser, Proc. Zool. Soc. Lond., 11, p. 117, 1843—shores of Chile; Des Murs, in Gay,

¹ Breeding specimens from Iceland and migratory birds from Greenland are on average larger (wing of males, 240–260, against 231–250 in Scandinavia), but there is much overlapping in measurements, and the slight difference, considering the size of the bird, seems altogether too insignificant to justify the separation of *N. p. islandicus*, inasmuch as Färoes specimens completely bridge the gap.

² *Numenius phaeopus variegatus* (Scopoli) differs from the nominate race by having the feathers of lower back and rump broadly spotted with brown, while the foreneck, breast, flanks, and under wing coverts are generally more coarsely marked.

Hist. Fís. Pol. Chile, Zool., 1, p. 419, 1847—Chile; Boeck, Naumannia, 1855, p. 510—Chile ("Arend" [=Ancud], Chiloé Island; Calbuco and "Reloncaoi" [=Reloncaví], Llanquihue); Cassin, in Gilliss, U. Nat. Hist., Zool. Ser., 23, p. 172, 1938—Puerto del Triunfo, El Salvador (Dec. 31, Jan. 12); Philippi, Bol. Mus. Nac. Chile, 16, p. 54, 1938—Arica and Playa de Chacalluta, Tacna, Chile (Sept.).
- Numenius hudsonius* Vieillot, Nouv. Dict. Hist. Nat., nouv. éd., 8, p. 304, 1817 (emendation of *Numenius hudsonicus* Latham); Pelzeln, Reise Novara, Zool., 1, pp. 128, 163, 1865—Chiloé Island, Chile; Gundlach, Journ. Orn., 26, p. 187, 1878—near Mayagüez, Puerto Rico; idem, Anal. Soc. Esp. Hist. Nat., 7, p. 367, 1878—Punta Arenas, near Mayagüez, Puerto Rico.
- Numenius rufus* Vieillot and Oudart, Gal. Ois., 2, p. 118, pl. 245, circa 1825—part, descr. of spec. in collection of P. L. Vieillot.¹
- Numenius rufiventris* Vigors, Zool. Journ., 4, No. 15, p. 356, 1829—western shores of North America (type lost); idem, Zool. Voy. Blossom, p. 28, 1839—no locality given.
- Numenius brasiliensis* Wied, Beitr. Naturg. Bras., 3, (2), p. 708, 1833—eastern Brazil (type now in the American Museum of Natural History, New York; cf. Allen, Bull. Amer. Mus. N. H., 2, p. 272, 1889).
- Numenius intermedius* Nuttall, Man. Orn. U. S. and Canada, Water Birds, p. 100, 1834—North America.
- Numenius phaeopus* (not *Scolopax phaeopus* Linnaeus) Cabanis, in Schomburgk, Reisen Brit. Guiana, 3, "1848," p. 757, 1849—mouth of the Waini River; Pelzeln, Orn. Bras., 3, p. 308, 1870—Praia de Cajutuba, Pará, Brazil (March).
- Numenius phaeopus* var. *hudsonica* Pelzeln, Ibis, 1873, p. 121—Cayenne (crit.).
- Numenius borealis* Snyder, Auk, 30, p. 269, 1913—Fox Lake, Dodge County, Wisconsin, Sept. 10, 1912 (= *N. hudsonicus*; cf. Scott, l.c., 57, p. 566, 1940).
- Phaeopus hudsonicus* Ridgway, Bull. U. S. Nat. Mus., 50, (8), p. 402, 1919 (monog.; full bibliog.); Dabbene, El Hornero, 2, p. 124, 1921—Chile

¹ It is extremely doubtful whether, as claimed by Sharpe (Cat. Bds. Brit. Mus., 24, p. 366, 1896), spec. c, Hudson's Bay, from the Riocour collection, in the British Museum, is the type. The individual described and figured by Vieillot is evidently the one brought back by himself from New York (cf. Nouv. Dict. Hist. Nat., nouv. éd., 8, p. 307, 1817, in text of *N. melanopus*). Latham's description quoted by Vieillot refers to *N. americanus*.

and Tierra del Fuego (Cape San Sebastian, Feb. 5, 1896); Wetmore, Bull. U. S. Nat. Mus., 133, p. 146, 1926—Concon, Valparaiso, Chile (April 25); idem, Sci. Surv. Porto Rico and Virgin Islands, 9, p. 360, 1927—Puerto Rico and Anegada (transient); Grinnell, Univ. Calif. Pub. Zool., 32, p. 96, 1928—Lower California (transient); Wetmore and Swales, Bull. U. S. Nat. Mus., 155, p. 157, 1931—Hispaniola (transient); Taverner and Sutton, Ann. Carnegie Mus., 23, p. 36, pl. 1, 1934—Churchill, Manitoba (nesting; col. pl. of adult and young); Dixon, Bds. and Mammals, Mt. McKinley Nat. Park, p. 72, 1938 (nesting); Taverner, Wilson Bull., 54, p. 1, 1942 (breeding range and migration routes); Forsild, Canad. Field Nat., 57, p. 28, 1943—Caribou Hills and Richards Island, Mackenzie Delta (nesting).

Numenius phaeopus hudsonicus Peters, Bds. World, 2, p. 261, 1934 (range); Pinto, Rev. Mus. Paul., 22, p. 132, 1938—Maranhão (Primeira Cruz; Oct.) and Bahia (Ilha Madre de Deus, Corupéba); Hope and Shortt, Auk, 61, p. 573, 1944—west coast of James Bay (migr.).

Numenius (Phaeopus) hudsonicus Griscom, Bull. Mus. Comp. Zool., 78, p. 306, 1935—Panama (winter).

Range.—Breeds on the Arctic coast of North America, from Norton Sound to the Anderson River, in Mt. McKinley National Park and locally to Fort Churchill; winters from southern California, south on the Pacific coast of America to Chiloé Island, Chile, and on the east coast from British Guiana to Bahia, Brazil, and also on the Galápagos Islands; accidental in Tierra del Fuego (Cape San Sebastian, Feb. 5, 1896), on the Pribilof Islands, Bermuda Islands, and in Greenland.

Field Museum Collection.—87: Alaska (Nome, 2; St. Michaels, 1; Yukon Delta, 2; Hairise, 2; Teller, 1); British Columbia (Graham Island, 1); Washington (Jefferson County, 1); California (Moss Landing, 3; Monterey, 3; Rincon, 2; Sunset Beach, 2; Redwood City, 5; Hyperion, 6; Point Firman, 1; Pacific Beach, 1); Manitoba (Churchill, 1); Quebec (Magdalen Islands, 13); Maine (Rock Pond, Hancock County, 1); Connecticut, New Haven County (West Haven, 1; unspecified, 1); New Hampshire (Seabrook, 1); Massachusetts (Monomoy Island, 6; Chatham, 1); North Carolina, Dare County (Pea Island, 5; Bodie Island, 2); Georgia (Chatham County, 2); Mexico (La Paz, Lower California, 1; Matamoros, Tamaulipas, 3); Costa Rica (Piedra de Blanca, Guanacaste, 3); Dominica (unspecified, 1); Virgin Islands (St. Croix, 2); Lesser Antilles (Anegada, 1); Venezuela (Nueva Esparta, Margarita Island, 3; Los Aves Island, Colon, 1); British Guiana (Buxton, 2); Peru (Tambo Valley, Arequipa, 1); Chile (Caldera, Atacama, 1; Chiloé, Chiloé Island, 1).

Conover Collection.—31: Alaska (Hooper Bay, Bering Sea, 2; Barrow, 1; Alaktak River near Barrow, 2); Alberta (Beaverhill

Lake, 1); Manitoba (Churchill, 9); California (Anaheim Landing, 1; Rincon, 5; Playa del Rey, 2); Costa Rica (Punta Piedra, Guana-
caste, 3); Panama (Perme, Darien, 1); Chile, Chiloé Island (Quellon,
3; Rio Inio, 1).

****Numenius tahitiensis* (Gmelin). BRISTLE-THIGHED CURLEW.**

Scolopax tahitiensis Gmelin, Syst. Nat., 1, (2), p. 656, 1789—based on
"Otaheite Curlew" Latham, Gen. Syn. Bds., 3, (1), p. 122, Tahiti, Society
Islands (cf. Stejneger, Proc. U. S. Nat. Mus., 10, p. 83, 1887; crit.).¹

Numenius tahitensis Vieillot, Nouv. Dict. Hist. Nat., nouv. éd., 8, p. 308,
1817 (emendation).

Numenius femoralis Peale, U. S. Expl. Exp., 8, p. 233, 1848—Vincennes
Island, Paumotu Islands (type in United States National Museum);
Cassin, l.c., p. 316, pl. 37, 1858—Vincennes Island.

Numenius tibialis Layard and Layard, Ibis, (6), 4, p. 533, July, 1882—lapsus
for *N. femoralis* Peale.

Numenius tahitiensis Nelson, Nat. Hist. Coll. Alaska, 3, p. 121, pl. 9, 1887—
St. Michaels, Alaska (descr.; second American record); Seebohm, Geog.
Distr. Charad., p. 332, 1887 (crit.); Sharpe, Cat. Bds. Brit. Mus., 24,
p. 367, 1896 (monog.); Hanna, Auk, 37, p. 253, 1920—St. George Island,
Pribilofs; Bailey, Condor, 28, p. 84, 1926—Cape Mountain and Lopp
Lagoon, Alaska; Conover, Auk, 43, p. 311, 1926—Hooper Bay (May 22,
July 6, July 31, Aug. 4 [common]; migr.; voice; weights), Nome (Aug. 21;
plumage of young of the year); Bent, Bull. U. S. Nat. Mus., 146, p. 140,
1929 (habits; range); Peters, Bds. World, 2, p. 261, 1934 (range).

Phaeopus tahitiensis Ridgway, Bull. U. S. Nat. Mus., 50, (8), p. 407, 1919
(monog.; full bibliog.); Townsend and Wetmore, Bull. Mus. Comp. Zool.,
63, p. 179, 1919—Paumotu, Gilbert, and Marshall Islands (crit.); Swarth,
Pac. Coast Avifauna, 22, p. 28, 1934—Nunivak Island (migrant Aug. 15
and 20); Gabrielson, Auk, 61, p. 123, 1944—Kvichak River, Alaska Penin-
sula.

Range.—Only known to breed on some barren ridges about 25
miles north of Mountain Village on the lower Yukon River, Alaska,
at an elevation of approximately 1,000 feet.² Found around Nome
and the tundra back of Hooper Bay, Alaska, during fall migration.
Winters on islands in the Pacific Ocean from Lisiansky and the
Hawaiian Islands south to the Marshall, Gilbert, Phoenix, and
Society Islands.

Conover Collection.—14: Alaska (Hooper Bay, Bering Sea, 12;
Cape Nome, Norton Sound, 2).

¹ As pointed out by Stejneger, Latham's description is rather ambiguous.

² This information has been furnished by Professor Arthur A. Allen, the
leader of the expedition which discovered the long sought nesting grounds of the
Bristle-thighed Curlew. He has been kind enough to allow us to include it in
this volume.

Numenius arquata arquata (Linnaeus). EUROPEAN CURLEW.

Scolopax arquata Linnaeus, Syst. Nat., 10th ed., 1, p. 145, 1758—chiefly based on Faun. Svec., No. 139, Sweden.

Numenius arquatus Marshall and Dutcher, Auk, 9, pp. 390, 392, 1892—Long Island (1853); Helms and Schigler, Schiøler, Dansk. Orn. Foren. Tidssk., 11, pp. 173, 174, 1917—Angmagsalik (Aug. 23, 1913) and Nanortalik (Nov. 16, 1915), Greenland; Ridgway, Bull. U. S. Nat. Mus., 50, (8), p. 386, 1919 (monog.; full bibliog.).

Numenius arquata arquata Bent, Bull. U. S. Nat. Mus., 146, p. 109, 1929 (life hist.); Peters, Bds. World, 2, p. 262, 1934 (range).

Range.—Breeds in the British Isles, Scandinavia, Brittany, Holland, Belgium, coasts of the Baltic Sea, Poland, and northern Russia, south to Switzerland, Austria, and the mouth of the Danube; accidental in Greenland (Angmagsalik, Aug. 23, 1913; Nanortalik, Nov. 16, 1915) and (?) on Long Island, New York; winters chiefly in the Mediterranean countries, Africa, Madagascar, India, and Ceylon.

***Numenius americanus** Bechstein.¹ LONG-BILLED CURLEW.

Numenius americanus Bechstein, Kurze Uebers. Vögel, 2, p. 432, 1812—New York and Hudson Bay; Grinnell, Univ. Calif. Pub. Zool., 32, p. 95, 1928—Lower California; Bent, Bull. U. S. Nat. Mus., 146, p. 97, 1929 (life hist.; range; migr.); Wolfe, Condor, 33, p. 56, 1931—Utah (breeding habits); Griscom, Bull. Amer. Mus. N. H., 64, p. 132, 1932—Guatemala.

Numenius longirostra Wilson, Amer. Orn., 8, p. 23, pl. 64, fig. 4, 1814—New Jersey (type lost).

Numenius melanopus Vieillot, Nouv. Dict. Hist. Nat., nouv. éd., 8, p. 306, 1817—part, mainly based on *Numenius arquata* var. B, Latham, Ind. Orn., 2, p. 710, 1790, and *Scolopax arquata* var. B, Gmelin, Syst. Nat., 1, (2), p. 556, Hudson Bay (breeding) to New York (on migr.).²

Numenius longirostris Bonaparte, Journ. Acad. Nat. Sci. Phila., 5, No. 1, p. 74, 1825 (emendation of *N. longirostra* Wilson); March, Proc. Acad. Nat. Sci. Phila., 1864, p. 68—Jamaica (breeding?); Salvin, Ibis, 1866, p. 197—Chiapám and Dueñas, Guatemala; Gundlach, in Poey, Repert. Fis.-Nat. Cuba, 1, p. 352, 1866—Cuba; idem, Journ. Orn., 23, p. 320, 1875—Cuba (Cardénas, Río Canto); Ferrari-Perez, Proc. U. S. Nat. Mus., 9, p. 179, 1886—Laguna de Baltazar, Puebla (Sept.); Seebohm, Geog. Distr. Charad., p. 327, 1887 (crit.); Cory, Cat. W. Ind. Bds., p. 94, 1892—Cuba, Jamaica, and "St. Vincent" (ex Ober); Sharpe, Cat. Bds. Brit. Mus.,

¹ Subdivision of the Long-billed Curlew is impracticable. While more northern specimens tend to smaller size and shorter bill, there is so much overlapping in measurements that even of breeding birds only a certain percentage can be distinguished, whereas the identification of migratory or wintering individuals is almost impossible.

² The bird in the author's collection, whose divergencies are incidentally explained, evidently belonged to *N. p. hudsonicus*.

24, pp. 352, 753, 1896 (monog.); Salvin and Godman, Biol. Centr.-Amer., Aves, 3, p. 364, 1903—Mexico (numerous localities) and Guatemala (Dueñas, Chiapám); Clark, Proc. Bost. Soc. N. H., 32, p. 301, 1905 (occurrence in St. Vincent denied); Miller, Bull. Amer. Mus. N. H., 22, p. 162, 1906—Rancho Santuario, Durango (Feb. 22).

Numenius (sic) *occidentalis* Woodhouse, Proc. Acad. Nat. Sci. Phila., 6, p. 194, 1852—Rio Grande, near Albuquerque, New Mexico (Aug. 20, 1851) (type destroyed, formerly in United States National Museum).

Numenius americanus parvus Bishop, Auk, 27, p. 59, Jan., 1910—Crane Lake, Saskatchewan (type in collection of L. B. Bishop, now in Field Museum, examined); Phillips, l.c., 28, p. 75, 1911—Matamoros, Tamaulipas (Jan.); Bishop, Condor, 40, p. 226, 1938 (nomencl.; crit.).

Numenius americanus americanus Phillips, Auk, 28, p. 74, 1911—Matamoros, Tamaulipas (Feb.); Oberholser, l.c., 35, p. 188, 1918 (char.; range); Ridgway, Bull. U. S. Nat. Mus., 50, (8), p. 390, 1919 (monog.; full bibliog.); Peters, Bds. World, 2, p. 263, 1934 (range); van Rossem, Occ. Pap. Mus. Zool. Louisiana State Univ., 21, p. 80, 1945—Sonora (winter visitor).

Numenius americanus occidentalis Oberholser, Auk, 35, p. 191, 1918 (char.; range); Ridgway, Bull. U. S. Nat. Mus., 50, (8), p. 394, 1919 (monog.; full bibliog.); Grinnell, Condor, 23, p. 21, 1921 (race not valid); Peters, Bds. World, 2, p. 262, 1934 (range).

Range.—Breeds from eastern British Columbia to Manitoba and south to Nevada, Utah, Wyoming, and South Dakota, formerly east to Wisconsin and Illinois; winters from the southwestern United States to Guatemala; accidental in Newfoundland, Cuba, and Jamaica.¹

Field Museum Collection.—73: British Columbia (Okanagan, 3); Alberta (Walsh, 2); Saskatchewan (Maple Creek, 4); California (Humboldt County, 1; Orange County, 1; Monterey County, 9; Los Angeles County, 2; Santa Barbara County, 1); Arizona (Santa Cruz County, 3); Idaho (Teton County, 1); Utah (Salt Lake County, 4; Bear River, 4); New Mexico (Colfax County, 1); Wyoming (Crook County, 2); Colorado (Denver Mills, 1); Texas (Cameron County, 20; Clay County, 1; Port Lavaca, 1; Nueces County, 7; Aransas County, 4); Mexico (La Paz, Lower California, 1).

Conover Collection.—20: California (Ventura County, 2; Orange County, 3); Utah (Brigham, 11); Texas (Willacy County, 4).

Genus LIMOSA Brisson²

¹ The reported occurrence of the Long-billed Curlew in the Lesser Antilles, on St. Vincent and Guadeloupe (cf. Lawrence, Proc. U. S. Nat. Mus., 1, pp. 197, 451, 1879) has never been confirmed, and Kirk's record from Tobago (cf. Belcher and Smucker, Ibis, 1934, p. 289) is perhaps also questionable.

² There is no justification for subdividing the genus, as has been set forth by Townsend and Wetmore (Bull. Mus. Comp. Zool., 63, pp. 181–182, 1919). The admission of the Black-tailed Godwit, *Limosa l. limosa* (Linnaeus), to the

Limosa Brisson, Orn., 1, p. 48, 5, p. 261, 1760—type, by tautonymy, "*Limosa*" Brisson=*Scolopax limosa* Linnaeus.

Fedoa (not of Leach, 1816) Stephens, in Shaw, Gen. Zool., 12, (1), p. 70, 1824—type, by tautonymy, *Fedoa americana* Stephens=*Scolopax fedoa* Linnaeus.

Vetola Mathews, Bds. Australia, 3, (2), p. 191, May 2, 1913—type, by orig. desig., *Scolopax lapponica* Linnaeus.

**Limosa haemastica* (Linnaeus).¹ HUDSONIAN GODWIT.

Scolopax haemastica Linnaeus, Syst. Nat., 10th ed., 1, p. 147, 1758—based on "Red-breasted Godwit" Edwards, Nat. Hist. Birds, 3, p. 138, pl. 138, Hudson Bay.

Scolopax hudsonica Latham, Ind. Orn., 2, p. 720, 1790—based on "Hudsonian Godwit" Latham, Gen. Syn. Birds, Suppl., 1, p. 246, and Pennant, Arct. Zool., Suppl., p. 68, 1787, Hudson Straits.

Limosa hudsonica(us) Darwin, Zool. Beagle, 3, Birds, p. 129, 1841—Chiloé Island, Chile, and Falkland Islands; Fraser, Proc. Zool. Soc. Lond., 11, p. 118, 1843—Chile; Des Murs, in Gay, Hist. Fis. Pol. Chile, Zool., 1, p. 420, 1847—coast of Valparaíso, Chile; Gould, Proc. Zool. Soc. Lond., 27, p. 96, 1859—Falkland Islands; Sclater, l.c., 28, p. 387, 1860—Falkland Islands; Abbott, Ibis, 1861, p. 156—Mare Harbour, Port Louis, East Falkland (May 20); Schlegel, Mus. Pays-Bas, 27, p. 22, 1864—East Falkland (Abbott) and Mexico (crit.); Pelzeln, Reise Novara, Zool., 1, Vögel, pp. 128, 163, 1865—Chiloé Island, Chile; Gundlach, in Poeys, Repert. Fis.-Nat. Cuba, 1, p. 353, 1866—Cuba (one spec.); Léotaud, Ois. Trinidad, p. 448, 1866—Trinidad; Sclater, Proc. Zool. Soc. Lond., 1867, pp. 332, 339—Chile; Philippi, Anal. Univ. Chile, 31, p. 275, 1868—coast of Chile (abundant at Vichuquen, Curicó); Sclater and Salvin, Proc. Zool. Soc. Lond., 1869, p. 252—Lake Valencia, Carabobo, Venezuela;

North American fauna appears to rest on very slender evidence. It was first listed as *Scolopax iadrecka* by Fabricius (Faun. Groenl., p. 107, 1780), who states that he had seen one specimen from Greenland. However, his diagnosis is copied word for word from O. F. Müller (Zool. Dan. Prodr., p. 23, 1776)—who based his *Scolopax Jadrecka* mainly on "*Jadrecka*" Olafsen and Povelsen, Reise Island, p. 896, pl. 48, 1772, from Iceland—and it appears, therefore, that the author was not too well acquainted with the bird. The second record is by Holböll (Naturhist. Tidsskr., 4, p. 409, 1843), who claims to have received a specimen of *Limosa melanura* shot on the Kok Islands near Godthaab. The bird cannot be found in the Copenhagen Museum (cf. Reinhardt, Ibis, 1861, p. 11). Winge (Medd. Grøn., 21, p. 160, 1898) suggests the record might be due to confusion with *L. haemastica*, of which Holböll sent several specimens, including one from Godthaab, to Copenhagen (cf. also Bent, Bull. U. S. Nat. Mus., 142, p. 304, 1927).

¹ *Scolopax alba* Linnaeus (Syst. Nat., 12th ed., 1, p. 247, 1766—based on "White Godwit from Hudson's Bay" Edwards, Nat. Hist. Birds, 3, p. 139, pl. 139, posterior fig.; Hudson's Bay) and *Scolopax candida* Linnaeus (Syst. Nat., 12th ed., 1, p. 247, 1766—based on "The White Redshank or Poole-Snipe" Edwards, Nat. Hist. Birds, 3, p. 139, pl. 139, anterior fig.; Hudson's Bay), doubtfully quoted in the synonymy of the Hudsonian Godwit, do not seem to be identifiable with certainty. Richardson (in Swainson and Richardson, Faun. Bor.-Amer., 2, p. 398, note, Feb., 1832) provided Edwards' "White Godwit from Hudson's Bay" with the name *Limosa edwardsii*, which is a synonym of *Scolopax alba* Linnaeus.

iidem, Ibis, 1870, p. 500—Ancud, Chiloé; Pelzeln, Orn. Bras., 3, p. 308, 1870—Caicara, Engenho do Gama, and Cidade de Matto Grosso, Matto Grosso, Brazil (Sept., Oct., Nov.); Sclater and Salvin, Proc. Zool. Soc. Lond., 1873, p. 456 (winter range); Gundlach, Journ. Orn., 23, p. 320, 1875—Cuba (one specimen); Durnford, Ibis, 1877, pp. 43, 200—Chubut Valley, Patagonia (Nov. 13) and Buenos Aires (Apr. to Sept.); Lawrence, Proc. U. S. Nat. Mus., 1, p. 450, 1879—Guadeloupe (ex L'Herminier MS.); Doering, in Roca, Inf. Ofic. Exp. Rio Negro, Zool., 1, p. 57, 1881—Azul, Buenos Aires; White, Proc. Zool. Soc. Lond., 1883, p. 42—La Plata (Nov.); Seeböhm, Geog. Distr. Charad., p. 392, 1887 (crit.); Macfarlane, Ibis, 1887, p. 204—Bay of San Nicolas, Ica, Peru (Nov. 9); Reed, Anal. Univ. Chile, 93, p. 210, 1896—coast of Chile; Sharpe, Cat. Bds. Brit. Mus., 24, pp. 388, 756, 1896—North America, Venezuela (Lake Valencia; Oct.), and Argentina (La Plata, Nov. 10; Chuput, Nov. 13; Port Desire, Mar.); Schalow, Zool. Jahrb., Suppl., 4, p. 659, 1898—Calbuco, Llanquihue, Chile; Ihering, Rev. Mus. Paul., 3, p. 432, 1899—São Paulo; Crawshaw, Bds. Tierra del Fuego, p. 130, 1907—Useless Bay; Berlepsch, Nov. Zool., 15, pp. 306, 322, 1908 (no record from French Guiana); Scott and Sharpe, Rep. Princet. Univ. Exped. Patagonia, 2, Orn., p. 304, 1910—Patagonia (habits); Grant, Ibis, 1911, p. 470—Los Yngleses, Ajó (Nov. 1) and Cape San Antonio, Buenos Aires (Dec. 20); Housse, Rev. Chil. Hist. Nat., 28, p. 52, 1924—Isla la Mocha, Arauco, Chile; Wetmore, Auk, 48, p. 596, 1931—Rio Yoque del Norte, Dominican Republic.

Limosa australis G. R. Gray, List Bds. Brit. Mus., Part 3, p. 95, 1844—San Salvador Bay, East Falkland Island (nomen nudum).

Limosa haemastica Baird, Brewer, and Ridgway, Water Bds. N. Amer., 1, p. 260, 1884 (monog.); Nelson, Nat. Hist. Coll. Alaska, 3, p. 117, 1887—Nulato and Yukon mouth (ex Dall), Alaska; Feilden, Ibis, 1889, p. 495—Barbados (Oct., transient); Sclater and Hudson, Arg. Orn., 2, p. 191, 1889—Argentina (habits); Holland, Ibis, 1892, p. 212—Est. Espartillar, Buenos Aires (July, Aug.); Clark, Proc. Bost. Soc. N. H., 32, p. 253, 1905—Barbados (transient); Ihering, Cat. Faun. Braz., 1, p. 50, 1907—Iguapé, São Paulo; Dabbene, Anal. Mus. Nac. Buenos Aires, 18, p. 218, 1910—Buenos Aires, Chubut, and Tierra del Fuego (Useless Bay); Bertoni, Faun. Parag., p. 38, 1914—Alto Paraná, Paraguay; Gibson, Ibis, 1920, p. 70—Cape San Antonio, Buenos Aires; Tremoleras, El Hornero, 2, p. 13, 1920—Uruguay (Montevideo, Canelones); Dabbene, l.c., p. 122, 1920 (winter range in Argentina and adjacent countries); Wace, l.c., p. 198, 1921—Falkland Islands; Bennett, Ibis, 1926, p. 323—Falkland Islands; Wetmore, Bull. U. S. Nat. Mus., 133, p. 159, 1926—Rio Ajó, below Lavalle (Nov. 13–15) and Laguna del Monte, near Guaminí (Mar. 3–12), Buenos Aires; Dabbene, El Hornero, 3, p. 420, 1926—Dolores, Buenos Aires (June, July); Pereyra, l.c., 4, p. 24, 1927—Maipu, Buenos Aires (June); Bent, Bull. U. S. Nat. Mus., 142, p. 295, 1927 (life hist.); Wetmore, Tech. Bull. U. S. Dept. Agric., 26, p. 11, 1927—Guaminí, Buenos Aires (March 3–8); Naumburg, Bull. Amer. Mus. N. H., 60, p. 79, 1930—Matto Grosso; Hellmayr, Field Mus. Nat. Hist., Zool. Ser., 19, p. 397, 1932—Chile (winter); Peters, Bds. World, 2, p. 263, 1934 (range); Belcher and Smooker, Ibis, 1935, p. 290—Trinidad; Brooks, Auk, 53, p. 80, 1936—Atlin, British Columbia (first record) and New Zealand; Pinto, Rev. Mus. Paul., 22,

p. 133, 1938—São Paulo (range); Hope and Shortt, *Auk*, 61, p. 575, 1944—west coast of James Bay (July 20–25; migration route to Gulf of St. Lawrence).

Vetula haemastica Ridgway, *Bull. U. S. Nat. Mus.*, 50, (8), p. 191, 1919 (monog.; full bibliog.).

Range.—Breeds on the Barren Grounds of arctic North America from northeastern Alaska east to Southampton Island and the west shore of Hudson Bay (Churchill); winters in Chile, Argentina, Paraguay, Uruguay, and southern Brazil (in states of São Paulo, Matto Grosso, and Rio Grande do Sul); accidental in the Bermuda Islands, the West Indies (Dominican Republic, Cuba, Dominica, ?Guadeloupe, Barbados), Trinidad, Venezuela (Lake Valencia), the Falkland Islands, and New Zealand.

Field Museum Collection.—20: Manitoba (Churchill, 2); Labrador (Mullon Bay, 1); Nova Scotia (Sambro, 1; Halifax, 1); Quebec (Magdalen Islands, 2); Massachusetts (Cape Cod, 1); Nebraska (unspecified, 1); Minnesota (unspecified, 1); North Dakota (Towner County, 3; Graham Island, Ramsey County, 1; Northwood, Grand Forks County, 2; Rock Lake, Towner County, 1; Cando, Towner County, 1); Kansas (Burlington, 1); Texas (Brownsville, 1).

Conover Collection.—13: Alberta (Beaverhill Lake, 4); Massachusetts (East Orleans, 5; Chatham, 1; Eastham, 1; Sea View, 2).

****Limosa lapponica novaezealandiae* G. R. Gray. PACIFIC GODWIT.**

Limosa lapponica var. *novae zealandiae* G. R. Gray, *Zool. Voy. Erebus and Terror*, 1, Birds, p. 13, 1846—New Zealand (type in British Museum).

Limosa foxii Peale, *U. S. Expl. Exp.*, 8, p. 231, 1848—Rose Island, Samoan group (type in United States National Museum).

Limosa uropygialis Gould, *Proc. Zool. Soc. Lond.*, 16, p. 38, pub. Nov. 14, 1848—Australia=New South Wales (type now in the Academy of Natural Sciences, Philadelphia; cf. Stone, *Austr. Av. Rec.*, 1, p. 141, 1913).

Limosa baueri (Natterer MS.)¹ Pelzeln, *Sitzungsber. Math.-Naturw. Kl. Akad. Wiss. Wien*, 41, No. 15, p. 326, June, 1860—Norfolk Island (type in Vienna Museum; cf. Pelzeln and Lorenz, *Ann. Naturhist. Hofmus. Wien*, 3, p. 55, 1888).

¹ First published by Naumann (*Naturng. Vög. Deuts.*, 8, p. 429 [in text], 1836), who, in speaking of *L. meyeri* Leister (= *L. lapponica lapponica* (Linnaeus)), says (trans.): "Near relatives are *Limosa adspersa* (of the Berlin Museum) from Mexico, and *Limosa baueri* (of the Vienna Museum), from New Holland, both of which, though having likewise a narrowly-barred tail, may be distinguished by considerably larger size and longer legs." Thus, two subspecies, belonging to two different specific units, are covered by the diagnosis, and the names proposed in this form can hardly be regarded as anything but nomina nuda. *L. baueri* was not properly characterized until 1860, when Pelzeln explained its supposed

Limosa rufa var. *uropygialis* Ridgway, Amer. Nat., 8, p. 110, 1874—Alaska (crit.).

Limosa lapponica baueri Stejneger, Bull. U. S. Nat. Mus., 29, p. 122, 1885—Bering Island (nomencl.); Turner, Contr. Nat. Hist. Alaska, 2, p. 148, 1886—St. Michaels (breeding), Aleutian Islands (migr.); Nelson, Nat. Hist. Coll. Alaska, 3, p. 115, 1887—Unalaska (migr.), St. Michaels (nesting; plumage var.); Bailey, Condor, 28, p. 36, 1926—Wales, Alaska (nesting); Conover, Auk, 43, p. 310, 1926—Hooper Bay, Alaska (nesting habits; plumage var.; weights); Bent, Bull. U. S. Nat. Mus., 142, p. 289, 1927 (life hist.); Swarth, Pac. Coast Avifauna, 22, p. 34, 1934—Nunivak Island (not breeding); Peters, Bds. World, 2, p. 264, 1934 (range); Munro, Condor, 37, p. 178, 1935—Colebrook, Fraser Valley, British Columbia; Partenko (sic), Auk, 53, p. 195, 1936 (dist. chars.; range).

Limosa rufa uropygialis Seeböhm, Geog. Distr. Charad., p. 387, 1887 (crit.).

Limosa lapponica subsp. *a. Limosa novae zealandiae* Sharpe, Cat. Bds. Brit. Mus., 24, pp. 377, 755, 1896 (monog.).

Vetola lapponica baueri Ridgway, Bull. U. S. Nat. Mus., 50, (8), p. 187, 1919 (monog.; full bibliog.).

Range.—Breeds in northeastern Asia and northwestern North America from the Taimyr Peninsula¹ east to the Colville Delta, south to Kamchatka and Unalaska Island; winters in New Guinea, Australia, and New Zealand.²

Field Museum Collection.—35: Alaska (Barrow, 3; Nome, 18; St. Michaels, 10; Nuluk, 1; Unalaska, 1; Meade River, 1; unspecified, 1).

Conover Collection.—17: Alaska (Hooper Bay, Bering Sea, 9; Cape Romanzoff, Bering Sea, 4; Igiak Bay, Bering Sea, 2; Point Barrow, 2).

***Limosa lapponica lapponica* (Linnaeus). BAR-TAILED GODWIT.**

Scolopax lapponica Linnaeus, Syst. Nat., ed. 10, 1, p. 147, 1758—Lapland.

Limosa lapponica lapponica Bent, Bull. U. S. Nat. Mus., 142, p. 295, 1927—Cape Cod, Massachusetts (Sept. 16, 1907); Peters, Bds. World, 2, p. 264,

characters in comparison to *L. uropygialis*. We do not know why Mathews (Nov. Zool., 18, p. 220, 1912) suggested Victoria as type locality, since it clearly results from Pelzeln's account that the type (and only specimen) has been collected by Bauer on Norfolk Island. As *Limosa brevipes* Gray and *Limosa australasiana* G. R. Gray (List Bds. Brit. Mus., Part 3, pp. 95, 96, 1844) are both nomina nuda, *novae-zealandiae* Gray becomes the valid term for the Pacific Godwit.

¹Portenko (Auk, 53, p. 195, 1936) restricts the range of the present form called by him *L. l. baueri* to the coasts of Bering Sea, and separates the population from the Lena Delta to the Anadyr region as *L. l. menzbieri* (type from the Indigirsa delta).

²About the alleged occurrence of the Pacific Godwit in Lower California, cf. Grinnell, Univ. Calif. Pub. Zool., 32, p. 239, 1928.

1934 (range); idem and Hagar, Auk, 54, p. 537, 1937—Eastham, Cape Cod, Massachusetts, July 16, 1937 (account of Sept. 16, 1907, specimen, also).

Range.—Breeds in northern Europe and Asia east probably to the Taimyr Peninsula. Winters from Africa to northwestern India. Two records from Massachusetts.

****Limosa fedoa* (Linnaeus). MARBLED GODWIT.**

Scolopax fedoa Linnaeus, Syst. Nat., 10th ed., 1, p. 146, 1758—based on "The Greater American Godwit" Edwards, Nat. Hist. Birds, 3, p. 137, pl. 137, Hudson's Bay.

Scolopax marmorata Latham, Ind. Orn., 2, p. 720, 1790—based on "Marbled Godwit" Latham, Gen. Syn. Birds, Suppl., 1, p. 245, and Pennant, Arct. Zool., Suppl., p. 68, Hudson Straits.

Fedoa americana Stephens, in Shaw, Gen. Zool., 12, (1), p. 71, 1824—new name for *Scolopax fedoa* Linnaeus.

Limosa adspersa Reichenbach, Vollst. Naturg. Sumpfvögel, pl. 76, fig. 573, circa 1846—Mexico (type in Berlin Museum).¹

Limosa fedoa Moore, Proc. Zool. Soc. Lond., 27, p. 64, 1859—Belize, British Honduras; Sclater and Salvin, Ibis, 1859, p. 230—Belize and Guatemala; Salvin, l.c., 1865, p. 190—Chiapám, Guatemala; Gundlach, in Poey, Repert. Fís.-Nat. Cuba, 1, p. 353, 1866—Cuba; Léotaud, Ois. Trinidad, p. 447, 1866—Trinidad (Aug. to Oct.); Lawrence, Ann. Lyc. Nat. Hist. N. Y., 9, p. 210, 1869—Mérida, Yucatan; Sclater and Salvin, Proc. Zool. Soc. Lond., 1873, p. 456—coasts of Honduras and Guatemala; Lawrence, Mem. Bost. Soc. N. H., 2, p. 308, 1874—Mazatlán, Sinaloa; Gundlach, Journ. Orn., 23, p. 320, 1875—Cardénas, Cuba; Lawrence, Bull. U. S. Totanus fuscocapillus Vieillot, Nouv. Dict. Hist. Nat., nouv. éd., 6, p. 400, 1816—based on "Chorlito pardo mayor" Azara, No. 399, Paraguay.

Totanus flavipes Wied, Beitr. Naturg. Bras., 4, (2), p. 727, 1833—eastern Brazil; Darwin, Zool. Beagle, 3, Birds, p. 129, 1841—Montevideo, Uruguay; Tschudi, Arch. Naturg., 10, (1), p. 312, 1844—Peru; Jardine, Ann. Mag. Nat. Hist., 20, p. 375, 1847—Tobago (July to Nov.); Cabanis, in Schomburgk, Reisen Brit. Guiana, 3, "1848," p. 757, 1849—coast region; Burmeister, Syst. Uebers. Th. Bras., 3, p. 369, 1856—Nova Friburgo, Rio de Janeiro; Möschler, Journ. Orn., 4, p. 335, 1856—Greenland; Burmeister, l.c., 8, p. 261, 1860—Mendoza and Paraná; idem, Reise La Plata St., 2, p. 503, 1861—same localities; Schlegel, Mus. Pays-Bas, livr. 6, Scolopaces, p. 69, 1864—United States, Costa Rica, Haiti, Surinam, and Brazil (crit.); Pelzeln, Reise Novara, Zool., 1, Vögel, p. 131, 1865—Chile; Léotaud, Ois. Trinidad, p. 452, 1866—Trinidad; Philippi, Anal. Univ. Chile, 31, p. 275, 1868—Chile; Pelzeln, Orn. Bras., 3, p. 309, 1870—São Paulo (Ypanemá, Feb., Sept., Oct.; Irisanga, Feb.), Matto Grosso (Caçara, Sept., Oct.; Engenho do Gama, Sept.), Amazonas (Barra, Sept.), and Pará (Cajutuba); Reinhardt, Vidensk. Medd. Naturhist. Foren.,

¹ *Tringa totanus robusta* (Schjølter) differs from the nominate race by somewhat longer wings, as well as stouter bill and feet. Besides, in nuptial plumage the upper parts are darker, more brownish, while chest and sides are more heavily spotted. Wing, 160–170, rarely 157; bill, 36½–43 (Schjølter, l.c.).

² There can be hardly any doubt that the two specimens shot in Angmagsalik Fjord, which unfortunately have not been preserved, belonged to the Icelandic race.

1870, p. 37—Lagõa Santa, Minas Geraes (Apr. 16); Taczanowski, Proc. Zool. Soc. Lond., 1874, p. 560—Chorillos (Lima) and Lake Junín, Peru; Holmberg, Act. Acad. Nac. Cienc. Carnegie Mus., 14, p. 183, 1922—Rio Hacha, La Goajira, Colombia (May 4); Peters, Bull. Mus. Comp. Zool., 65, p. 297, 1923—Huanuluan, Rio Negro (Oct.).

Tringa melanoleuca Rowan, Brit. Birds, 23, p. 13, pl. 4, 1929 (habits; chicks); idem, l.c., 24, p. 90, 1930 (nesting); Peters, Bds. World, 2, p. 266, 1934 (range); Belcher and Smooker, Ibis, 1935, p. 290—Trinidad (winter); Griscom, Bull. Mus. Comp. Zool., 78, p. 307, 1935—Panama (winter);

Pinto, *Rev. Mus. Paul.*, 22, p. 134, 1938—Bahía (Corupéba, Ilha Madre Deus), São Paulo (Iguapé, São Sebastião, Rio Paraná), Rio Grande do Sul (Itaquy), and Matto Grosso (Rio Paraná); Dickey and van Rossem, *Field Mus. Nat. Hist., Zool. Ser.*, 28, p. 174, 1938—Olomega Lake, El Salvador (Sept. 9); Morrison, *Ibis*, 1939, p. 647—Lake Junín, Peru (wintering); Hørring and Salomonsen, *Medd. Grøn.*, 131, No. 5, p. 34, 1941—Greenland.

Range.—Breeds from Cook Inlet, Alaska, east through Mackenzie to Labrador and Newfoundland, south to southern British Columbia, central Alberta, southern Manitoba, Mingan Islands, and Anticosti Island; winters from California, the Gulf states, and South Carolina over the West Indies, Mexico, Central and South America to Tierra del Fuego.

Field Museum Collection.—165: Alaska (Nome, 1; Tocatna Forks, 2; Bethel, 2); British Columbia (Masset, Graham Island, 2; Okanagan, 4; Sumas, 4); Labrador (Battle Harbor, 5; Anatolak Bay, 2; Jack Lane's Bay, 3); Quebec (Magdalen Islands, 9); Nova Scotia (Seal Island, 1); North Dakota (Towner County, 3; Rock Lake, Towner County, 1; Sweetwater Lake, Ramsey County, 1); Maine (Lincoln, Penobscot County, 1); Massachusetts (Monomoy Island, 21; Duxbury, 1; Chatham, 1; Ipswich, 1); Rhode Island (Narragansett, 1); Connecticut (New Haven County, 8; West Haven, 14; North Haven, 1; Stamford, 1); New York (North Hamlin, Monroe County, 2); Indiana (Bluffton, 1); Texas (Corpus Christi, 4; Tivoli, Refugio County, 2); New Mexico (Mimbres, Grant County, 2); Arizona (Phoenix, 2); California (Westport, Mendocino County, 2; Nigger Slough, Los Angeles County, 1; Carmel River mouth, Monterey County, 1; Moss Landing, Monterey County, 1; Red Bluff, Tehama County, 2); Mexico (La Paz, Lower California, 1); North Carolina, Dare County (Pea Island, 20; Bodie Island, 9); South Carolina (Mount Pleasant, 1); Florida (Nassau County, 2; Jupiter, Palm Beach County, 1; Amelie Island, Nassau County, 4); Bahama Islands (Great Inagua, 1; Andros, 2); Virgin Islands (St. Croix, 1); Lesser Antilles (Antigua, 1; Anegada, 2); Dutch West Indies (Bonaire, 1; Aruba, 3); Colombia (unspecified, 1); Peru (Puno, Puno, 1); Bolivia, Cochabamba (Vacas, 2; Yungas, El Palmar, 2).

Conover Collection.—32: Alaska (Hooper Bay, Bering Sea, 2); Alberta (Fawcett, 6); Wisconsin (Big Muskego Lake, 2); Nebraska (Brownlee, Cherry County, 1); Illinois (Wheaton, 5); Michigan (Ann Arbor, 2); California (Yermo, San Bernardino County, 4; Anaheim Landing, Orange County, 1); Mexico, Lower California (San José del Cabo, 1; La Paz, 3); British Guiana (Buxton, 2);

Bolivia (Cerro San Benito, Cochabamba, 1); Chile, Chiloé Island (Quellon, 1; Rio Inio, 1).

***Tringa nebularia* (Gunnerus). GREENSHANK.**

Scolopax nebularia Gunnerus, in Leem, Beskr. Finm. Lapper, p. 251, 1767—District of Trondhjem, Norway (cf. Stejneger, Proc. U. S. Nat. Mus., 5, p. 37, 1882).

Glottis floridanus Bonaparte, Geog. Comp. List, p. 51, 1838—based on *Totanus glottis* Audubon, Orn. Biog., 3, p. 483, pl. 269, 1835, Sand Key, near Cape Sable, Florida; Baird, Rep. Expl. Surv. R. R. Pac., 9, p. 730, 1858 (crit. note on type in United States National Museum).

Glottis nebularia Ridgway, Bull. U. S. Nat. Mus., 50, (8), p. 323, 1919 (monog.; full bibliog.); Bent, l.c., 142, p. 309, 1927 (life hist.).

Tringa nebularia Peters, Bds. World, 2, p. 266, 1934 (range).

Range.—Breeds in northern Europe and Asia from Scotland to Kamchatka; winters in the Mediterranean countries, Africa, India, southern China, Japan, Philippines, and Sunda Islands east to Australia and New Zealand; accidental in Florida (Sand Key, near Cape Sable).¹

***Tringa ocropus* Linnaeus. GREEN SANDPIPER.**

Tringa ocropus Linnaeus, Syst. Nat., 10th ed., 1, p. 149, 1758—based principally on Faun. Svec., No. 146, Sweden; Ridgway, Bull. U. S. Nat. Mus., 50, (8), p. 353, 1919 (monog.; full bibliog.); Bent, l.c., 146, p. 16, 1929 (life hist.); Peters, Bds. World, 2, p. 267, 1934 (range).

Totanus ochropus Seeböhm, Geog. Distr. Charad., p. 368, 1887 (crit.).

Helodromas ochropus Sharpe, Cat. Bds. Brit. Mus., 24, p. 437, 1896 (monog.); Coues, Auk, 14, p. 210, 1897 (record of British Museum specimens from North America).

Range.—Breeds in northern Europe and Asia and winters from the British Isles and the Mediterranean region south to Africa, southern Asia and the Philippines; alleged to have occurred as an accidental visitor to northeastern North America (Hudson Bay; Halifax, Nova Scotia).²

¹ The claim of the Greenshank to a place in the American fauna rests exclusively on Audubon's taking of three specimens on Sand Key, near Cape Sable, Florida. Schlegel (Mus. Pays-Bas, livr. 6, Scolopaces, p. 63, 1864) lists under *Totanus glottis* a male (in nearly complete summer garb!) from near Buenos Aires, another (in change of plumage) from the mouth of the Río de la Plata, and a third (in winter dress) from "Chile." In neither of these countries—in fact nowhere in South America—has the Greenshank ever been met with since, and until corroborative evidence is forthcoming, these records must be regarded as highly questionable.

² Both records being highly unsatisfactory, it is very questionable whether the species deserves a place in the American fauna.

****Tringa solitaria solitaria* Wilson.¹ SOLITARY SANDPIPER.**

Tringa solitaria Wilson, Amer. Orn., 7, p. 53, pl. 58, fig. 3, 1813—Pennsylvania (Pocono Mountain), Kentucky, and New York (type lost); Chubb, Ibis, 1919, p. 265—Cochabamba, Bolivia (Apr. 19); Tremoleras, El Hornero, 2, p. 14, 1920—San José, Uruguay; Dabbene, l.c., p. 114, 1920 (winter range in Argentina and neighboring countries); Osgood and Conover, Field Mus. Nat. Hist., Zool. Ser., 12, p. 42, 1922—Altagracia, Zulia (Feb.), and Culata Mountains, Mérida (Mar.), Venezuela; Brooks, Condor, 29, p. 112, 1927—part (dist. chars.); Wetmore, Tech. Bull. U. S. Dept. Agric., 26, p. 12, 1927—part, Paraguay, Uruguay, Argentina (wintering dates); Stone, Proc. Acad. Nat. Sci. Phila., 80, p. 152, 1928—Rio Guamá (Apr. 15) and Pará (Apr. 20), Brazil; Young, Ibis, 1928, p. 770—Blairmont, British Guiana (transient and winter); Swarth, Condor, 37, p. 199, 1935—part (crit.).

Svensk. Vetensk. Akad. Handl., (3), 22, p. 43, 1945—João Pessoa, Rio Juruá, Brazil; idem, l.c., 23, p. 72, 1945—Victoria, El Beni, Bolivia (Oct.).

Tringa solitarius Street, Auk, 40, p. 577, 1923—Alberta (nesting habits); Swarth, Univ. Calif. Pub. Zool., 30, p. 70, 1926 (crit.).

Range.—Breeds from northern British Columbia, northern Alberta (Wood Buffalo National Park), central Saskatchewan, central Manitoba (Ilford), northern Ontario (Moosonee) and Labrador (Flower's Bay near Hopedale) south probably to about 50° N. lat. Migrates through the United States (mostly east of the Rocky Mountains), the West Indies and Central America to southern South America (Bolivia, Paraguay, and northern Argentina); accidental in Greenland (Godthaab, Aug. 1, 1878).

Field Museum Collection.—122: British Columbia (Okanagan, 12); Saskatchewan (Maple Creek, 5); North Dakota (Nelson County, 8; Towner County, 4); Iowa (Burlington, 1); Missouri (Koshkonong, 1); Wisconsin (Beaver Dam, 6; Fox Lake, 1); Illinois (Libertyville, 1; Diamond Lake, 1; Worth, 2; Chicago, 2; Joliet, 3; Grand Chain, 1); Ohio (Circleville, 1); Labrador (Bowdoin Harbor, 1); Quebec (Magdalen Islands, 1); Maine (Lincoln, 2); Massachusetts (Monomoy Island, 1); New Hampshire (Ossipee, 1); Connecticut (East Hartford, 4; New Haven County, 15; Grove Beach, 1); New York (Suffolk County, 3; Kings County, 1); Pennsylvania (Tioga, 1); North Carolina (Bodie Island, Dare County, 2); South Carolina

(Mount Pleasant, 1); Georgia (Chatham County, 1); Florida (Brevard County, 1); Dominican Republic (San Luis, 2); Jamaica (Surrey, 1); Virgin Islands (St. Croix, 1); Lesser Antilles (Guadeloupe Island, 1; Dominica, 3); Dutch West Indies (Curaçao, 1); Mexico (Yucatan, 1); Costa Rica (Guanacaste, 2; Limón, 1); Panama (Chiriquí, 2); Venezuela (Maracaibo, 1; Catatumbo, 5; Encontrados, Zulia, 1; Culata, Merida, 2; Marañay, Aragua, 1); Ecuador (Banos, 1); Dutch Guiana (Paramaribo, 1); Brazil (Bôa Vista, Amazonas, 2; Quemadas, Bahía, 1; São Paulo, 1; Urucum de Corumba, Matto Grosso, 1; Chapada, Matto Grosso, 1; Vaccaria, Matto Grosso, 1); Bolivia (Arque, Cochabamba, 1; El Palmar, Cochabamba, 1; Buena Vista, Santa Cruz, 1).

Conover Collection.—18: Illinois (Libertyville, 1; Wheaton, 1; Clark County, 1; Warrenville, 1); Massachusetts (East Orleans, 1); New York (Suffolk County, 2); South Carolina (Mount Pleasant, 1); Panama (Perme, Darien, 1); Colombia, Cauca (Popayán, 1; Coconuco, 1; El Tambo, 1); Brazil (Boim, Rio Tapajoz, 1; Cavalcante, Goyaz, 1; São Paulo, 1); Bolivia (Buena Vista, Santa Cruz, 1); Paraguay (Villa Rica, 1; Orloff, Chaco, 1).

****Tringa solitaria cinnamomea* (Brewster).¹ NORTHERN SOLITARY SANDPIPER.**

Totanus solitarius cinnamomeus Brewster, Auk, 7, p. 377, October, 1890—San José del Cabo, Lower California (type in collection of W. Brewster, now in Museum of Comparative Zoology, Cambridge, Mass.; cf. Bangs, Bull. Mus. Comp. Zool., 70, p. 177, 1930).

Helodromas solitarius Sharpe, Cat. Bds. Brit. Mus., 24, p. 444, 1896—part, specimens a-c; (?) Rothschild and Hartert, Nov. Zool., 6, p. 188, 1899—Chatham Island, Galapagos (Oct. 12).

Helodromas cinnamomeus Sharpe, Cat. Bds. Brit. Mus., 24, p. 760, 1896 (descr.).

¹ *Tringa solitaria cinnamomea* (Brewster) in fresh unfaded adult plumage differs from the nominate race by having the ground color of the upper parts lighter, more grayish, as against a more dusky olive; by usually having the loreal region covered with fine dusky specklings instead of being crossed by a well-defined dusky streak; and by larger size. Wings of males 128–139, of females 137–148, as against 123–132.5 and 127–140 mm., respectively, in *T. s. solitaria*. This form generally (about 85 per cent) has the inner webs of the outermost primaries mottled with white but this character is found also in about 10 per cent of the specimens of the typical race.

In immature plumage *cinnamomea* has the ground color of the upper parts more of an Olive Brown rather than a dark Hair Brown, but the most distinctive feature is the coloration of the spotting of the dorsal surface, which is buffy in this form and grayish white in *T. s. solitaria*.

Additional material examined.—Alaska: Circle, 7; north fork Kuskokwim River, 1; Chitna River Glacier, 3; Nulato, 2; Bethel, 1; Yakutat, 1; Charlie Creek, Yukon River, 5.—Northwest Territory: Finnie River, 1; Mackenzie Delta, 4; Fort

Helodromas solitarius cinnamomeus Brewster, Bull. Mus. Comp. Zool., 41, p. 67, 1902—San José del Cabo (Aug. 25 to Sept. 2).

Tringa solitaria cinnamomea Ridgway, Bull. U. S. Nat. Mus., 50, (8), p. 363, 1919 (monog.; full bibliog.); Chapman, Bull. Amer. Mus. N. H., 55, p. 197, 1926—Guayaquil (Mar. 26), Loja (Oct. 14), Alamor (Aug. 30), Cebollal (Sept. 23), and Carolina Marshes, Quito (Aug. 10), Ecuador; Wetmore, Bull. U. S. Nat. Mus., 133, p. 148, 1926—Paraguay (west of Puerto Pinasco), Uruguay, and Argentina (Formosa, Aug. 23; Entre Ríos; Buenos Aires; and General Rocha, Rio Negro); Grinnell, Univ. Calif. Pub. Zool., 32, p. 93, 1928—Lower California (transient); Bent, Bull. U. S. Nat. Mus., 146, p. 13, 1929 (life hist.); Laubmann, Wiss. Erg. Deuts. Gran Chaco Exp., Vögel, p. 55, 1930—Formosa (Lapango, Sept. 16) and Bolivia (San José, Santa Cruz, Sept. 8, 9); Peters, Bds. World, 2, p. 267, 1934 (range); Pinto, Rev. Mus. Paul., 22, p. 135, 1938—São Paulo (Crystaes, March; Itapura, Sept.); Dickey and van Rossem, Field Mus. Nat. Hist., Zool. Ser., 23, p. 173, 1938—Lake Olomega (Sept. 5, April 8) and San Salvador (April 25), El Salvador; Taverner, Condor, 42, p. 215, 1940 (dist. chars.; nesting range); Conover, Auk, p. 541, 1944 (dist. chars.; plumages; range); Gyldenstolpe, K. Svensk. Vetensk. Akad. Handl., (3), 22, p. 43, 1945—Santo Antonio, Rio Juruá, Brazil.

Tringa solitaria (not of Wilson) Brooks, Condor, 29, p. 112, 1927—part (dist. chars.); Taverner and Sutton, Ann. Carnegie Mus., 23, p. 38, 1934—Churchill, Manitoba (probably breeding; *cinnamomea* a valid but northern rather than western race); Swarth, Condor, 37, p. 199, 1935—part, Atlin, British Columbia (crit.; *cinnamomea* not valid race).

Range.—Breeds in Alaska and Canada from the limit of trees south to about 60° N. lat. and from Bering Sea to the west coast of Hudson Bay (Churchill). Migrates through the United States, mostly west of the Mississippi, and Central America to Bolivia, Paraguay and south-central Argentina (Rio Negro). Rare on the Pacific coast of North America north of southern California and probably also in eastern South America. (?) Casual on the Galápagos Islands (Chatham Island).

Field Museum Collection.—48: Alaska (Tocatna Forks, 3; Bethel, 4); Yukon Territory (Yukon River, 1); British Columbia (Okanagan, 8; Rollings Lake, 3); Saskatchewan (Maple Creek, 5); North Dakota (Towner County, 3); Wisconsin (Meridean, 1); Illinois (Grand Chain, 1); Massachusetts (Somerville, 1); California (Los Angeles County, 1); Arizona (Tucson, 2); Colorado (Fort Lyon, 2; Troublesome, 1); Texas (Cameron County, 1); El Salvador (San Salvador, 1); Costa Rica (Volcan Turrialba, 1; Miravalles, 1; Limón, 1); Ecuador

Simpson, 1; Fort Providence, 1.—Yukon Territory: Whitehorse, 2; 60 mile Creek, 1.—British Columbia: Atlin, 14; Shuswap, 3; Cariboo, 1; Okanagan, 1.—Alberta: Lac la Nonne, 6; Henry House, 1; Edmonton, 1.—Manitoba: Churchill, 6; Gypsumville, 1.

(Paramba, 1; Banos, 2); Peru (Yurimaguas, Loreto, 1); Bolivia (Cercado, Santa Cruz, 3).

Conover Collection.—11: California (Yermo, 1); Peru (Pucallpa, Rio Ucayali, 1); Bolivia (Buena Vista, Santa Cruz, 1); Paraguay (265 km. west of Puerto Casado, 1; Orloff, Chaco, 4; Horqueta, 2); Argentina (Rio Sali, Tucumán, 1).

Tringa glareola Linnaeus. WOOD SANDPIPER.

Tringa glareola Linnaeus, Syst. Nat., 10th ed., 1, p. 149, 1758—based on Faun. Svec., No. 152, Sweden; Peters, Bds. World, 2, p. 267, 1934 (range).

Totanus glareola Littlejohn, Condor, 6, p. 138, 1904—Sanak Island, Alaska (May 27, 1894).

Rhyacophilus glareola Hanna, Auk, 33, p. 401, 1916—St. George Island, Pribilof group, Alaska (May 19, 1914); Ridgway, Bull. U. S. Nat. Mus., 50, (8), p. 347, 1919 (monog.; full bibliog.); Preble and McAtee, N. Amer. Fauna, 46, p. 75, 1923—St. George, Pribilof Islands; Bent, Bull. U. S. Nat. Mus., 146, p. 22, 1929 (life hist.).

Range.—Breeds in northern Europe and Asia from Norway, Belgium, and northern Germany to Kamchatka and the Kurile Islands; winters in Africa, India, southeastern Asia, and Australia; accidental in Alaska (Sanak Island, Aleutian chain, May 27, 1894; St. George Island, Pribilof group (May 19, 1914).

Genus **ACTITIS** Illiger

Actitis Illiger, Prodr. Syst. Mamm. Av., p. 262, 1811—type, by subs. desig. (Stejneger, Bull. U. S. Nat. Mus., 29, p. 131, 1885),¹ *Tringa hypoleucos* Linnaeus.

Tringoides Bonaparte, Ann. Lyc. Nat. Hist. N. Y., 2, No. 2, p. 326, Feb. 5, 1828—type, by subs. desig. (Richmond, Proc. U. S. Nat. Mus., 53, p. 627, 1917), *Tringa macularia* "Wilson" (=Linnaeus).

Guinetta G. R. Gray, List Gen. Birds, p. 68, 1840—type, by orig. desig., *Tringa hypoleucos* Linnaeus.

Tryngodes Heine, in Heine and Reichenow, Nomencl. Mus. Hein. Orn., p. 327, 1890—emendation of *Tringoides* Bonaparte.

***Actitis macularia** (Linnaeus).² SPOTTED SANDPIPER.

Tringa macularia Linnaeus, Syst. Nat., 12th ed., 1, p. 249, 1766—based on "Spotted Sandpiper" Edwards, Glean. Nat. Hist., 2, p. 139, pl. 277,

¹ We are not certain that Stejneger's designation is a valid one, as it was determined by elimination.

² *Actitis macularia* (Linnaeus) is probably conspecific with *A. hypoleucos* of the Palaearctic region, the juvenile and winter plumages of the two birds being strikingly similar.

lower figure; near Philadelphia, Pennsylvania; Hørring and Salomonsen, Medd. Grønl., 131, No. 5, p. 34, 1941—Greenland (Godthaab, Sept. 27; Nanortalik, April 18).

Zool.*, 78, p. 307, 1935—Panama (winter); Belcher and Smooker, *Ibis*, 1935, p. 290—Trinidad and Tobago (winter); Mousley, *Auk*, 54, p. 445, pls. 27, 28, 1937 (nesting habits); Pinto, *Rev. Mus. Paul.*, 22, p. 135, 1938—Bahía (Rio Aratuhype), São Paulo (Iguapé,

Piassaguera, Raiz da Serra, Ilha dos Alcatrazes), and Rio Grande do Sul (Porto Alegre); Dickey and van Rossem, *Field Mus. Nat. Hist., Zool. Ser.*, 23, p. 172, 1938—El Salvador (many localities); Philippi, *Bol. Mus. Nac. Santiago*, 16, p. 57, 1938—Chacalluta, Tacna, Chile (Aug. 10, 1851); Porsild, *Canad. Field Nat.*, 57, p. 28, 1943—Mackenzie delta (breeding); Stevenson, *Auk*, 61, p. 247, 1944 (does not breed south of central Tennessee and western North Carolina); van Rossem, *Occ. Pap. Mus. Zool. Louisiana State Univ.*, 21, p. 82, 1945—Sonora (wintering).

Tringites macularius Scater and Salvin, *Proc. Zool. Soc. Lond.*, 1873, p. 309—Chamicuros, Peru.

"*Actitis notata* Ill. (wiedi, Bp.)" ¹ Bonaparte, *Compt. Rend. Acad. Sci. Paris*, 43, No. 2, p. 597, 1856; idem, *Bull. Soc. Linn. Normandie*, 2, p. 40, 1857—Cayenne, French Guiana.

Range.—Breeds throughout North America from limit of trees in northwestern Alaska, northern Mackenzie and Manitoba, the Ungava Peninsula, and Newfoundland, south to southern California, southern New Mexico, southern Texas, Tennessee and North Carolina; winters from southern British Columbia, Louisiana, and South Carolina throughout Mexico and the West Indies to southern Peru, Bolivia, southern Brazil, and occasionally to Argentina (Concepción, Tucumán, Mar. 4, 1918; Rio Ajó below Lavallo and Zelaya, Buenos Aires) and Chile (Chacalluta, Tacna, Aug. 10, 1851).

Field Museum Collection.—207: Alaska (Bethel, 2); Yukon Territory (Yukon River, 11); British Columbia (Okanagan, 2); Alberta (Walsh, 1); Saskatchewan (Maple Creek, 1); Labrador (Bowdoin Harbor, 1); Quebec (Magdalen Islands, 5); Oregon (Salem, 2); Idaho (Priest Lake, 1); Montana (Custer County, 1); North Dakota (Stump Lake, Nelson County, 15; Carpenter Lake, Rolette County, 1; Sweetwater Lake, Ramsey County, 1; Rocklake, Towner County, 1; Cannonball River, Sioux County, 1; Towner County, 3); Colorado (New Castle, 2; Fort Lyon, Bent County, 4); Texas (Travis County, 2); New Mexico (Reserve, 2); Arizona (Calabasas, Santa Cruz County, 1; Tucson, 3); California (McCloud, Siskiyou County, 1; Rincon, Ventura County, 1; Point Fermin, Los Angeles County, 4; San Pedro, 1; Whistle Point, Los Angeles County, 1; Clifton, Los Angeles County, 2; San Diego County, 1; Coronado Beach, 1; Pacific Beach, San Diego County, 2); Massachusetts (Monomoy Island, 4); Connecticut (New Haven County, 12; East Hartford, 2; New Haven, 2; West Haven, 1; North Haven, 2; Hamden, 2;

¹ This is a pure nomen nudum, as it stands. Bonaparte, in parentheses, quotes as synonym "*macularia* Wied," but, as far as we are aware, Wied's description of *Totanus macularius* did not appear until a few years later (*Journ. Orn.*, 7, p. 90, 1859). In the report on Desplanches' Cayenne collection, published in 1857, even the reference to Wied is omitted.

Stamford, 2); New York (Bedford, Westchester County, 1; Rochester, 2; Shelter Island, Suffolk County, 1); Illinois (Chicago, 1; Wolf Lake, Cook County, 2; Lake Forest, 2; Libertyville, 3); Wisconsin (Neenah, 2; Beaver Dam, 10); North Carolina, Dare County (Bodie Island, 8; Pea Island, 1); South Carolina (Mount Pleasant, 2; Beaufort County, 1); Georgia (Roswell, 1); Florida (West Jupiter, Palm Beach County, 4; Amelie Island, Nassau County, 2; Merritt's Island, Brevard County, 3); Bahama Islands (Acklin, 1; Andros, 1; Great Bahama, 1; Old Providence, 4; St. Andrews, 1); Hispaniola (San Cristobal, Dominican Republic, 2; Catarey, Dominican Republic, 1; Santo Domingo, Dominican Republic, 1; Jacmel, Haiti, 3); Puerto Rico (unspecified, 1; Mayaguez, 1; Mona Island, 2); Jamaica (Priestman's River, 1; Cayman Brac, 1; Grand Cayman, 4); Virgin Islands (St. Croix, 1; Tortola, 1); Lesser Antilles (St. Christopher, 2; Guadeloupe, 1; Dominica, 5); Dutch West Indies (Aruba, 1); Mexico (Chihuahua, Chihuahua, 1; Sabinas, Coahuila, 1; Tampico, 1; Apatzingan, Michoacán, 1); El Salvador (Laguna Olomega, San Miguel, 1; San Salvador, 1); Guatemala (Lake Atitlan, Solola, 2; Salama, Baja Vera Paz, 1; Bobos, Izabal, 1); Costa Rica (Buenos Aires, Puntarenas, 1); Venezuela (Paramo Conejos, Merida, 1; Encontrados, Zulia, 2; Puerto Cabello, Carabobo, 1; Colon, Tachira, 1); British Guiana (Rockstone, 1); Brazil (Tury-assú, Maranhão, 1); Ecuador (La Carolina, 1); Bolivia (Capinota, Cochabamba, 1; Buena Vista, Santa Cruz, 1).

Conover Collection.—32: British Columbia (Stuie, Bella Coola area, 2); Manitoba (Churchill, 2); Oregon (Salem, 1); Utah (Brigham, 1); California (Myers, Eldorado County, 2; Ocean Beach, San Diego County, 1); Wisconsin (Milwaukee River, 1); Illinois (Waukegan, 1; Chicago, 1); New York (Cayuga Lake, 1); Mexico (San José del Cabo, Lower California, 1); Panama (Perme, Darien, 1); Colombia (Cuturu, Antioquia, 1; El Tambo, Cauca, 1; Rio Timbio, Cauca, 1; Ricaurte, Narino, 1); Ecuador (Milagro, Guayas, 1; Valle de Rojas, 5; Isla Silva Sur, Province de los Rios, 4); Peru (Puerto Bermudez, Junín, 1); Brazil (Santarem, Pará, 3).

Genus CATOPTROPHORUS Bonaparte

Catoptrophorus Bonaparte, Ann. Lyc. Nat. Hist. N. Y., 2, No. 2, p. 323, Feb. 5, 1828—type, by monotypy, *Totanus semipalmatus* Temminck = *Scolopax semipalmatus* Gmelin.

Hodites Kaup, Skizz. Entw.-Gesch. Nat. Syst. Europ. Thierw., p. 155, 1829—type, by orig. desig. and monotypy, *Scolopax semipalmata* Gmelin.

Catoptrophorus semipalmatus semipalmatus (Gmelin).*EASTERN WILLET.**

Scolopax semipalmata Gmelin, Syst. Nat., 1, (2), p. 659, 1789—based on "Semipalmated Snipe" Pennant, Arct. Zool., 2, p. 469, pl. 20, fig. 2, New York.¹

Catoptrophorus (sic) *semipalmatus* Jardine, Ann. Mag. Nat. Hist., 20, p. 375, 1847—Tobago (October).

Catoptrophorus semipalmatus Cabanis, in Schomburgk, Reisen Brit. Guiana, 3, "1848," p. 758, 1849—coast of British Guiana; Riley, Auk, 22, p. 353, 1905—Andros, Rum Cay, and Long Island, Bahama Islands (breeding); Bangs, l.c., 24, p. 291, 1907—Puntarenas, Costa Rica (Aug. 13, 1906); Cory, Field Mus. Nat. Hist., Orn. Ser., 1, p. 237, 1909—Margarita Island, Venezuela (March 12); Carriker, Ann. Carnegie Mus., 6, p. 418, 1910—Puntarenas, Costa Rica (ex Bangs); Bradlee and Eaton, Proc. Bost. Soc. N. H., 39, p. 221, 1931—Bermuda Islands (visitor).

Totanus semipalmatus Léotaud, Ois. Trinidad, p. 456, 1866—Trinidad; Seebohm, Geog. Distr. Charad., p. 358, 1887 (crit.).

Symphemia semipalmata Pelzeln, Orn. Bras., 3, p. 309, 1870—Praia de Cajútuba, Pará, Brazil (March); Gundlach, Journ. Orn., 23, p. 322, 1875—Cuba (June, July); idem, l.c., 26, p. 188, 1878—Puerto Rico (Boquerón, San Juan Bay); Cory, Auk, 7, p. 374, 1890—Anegada Island; idem, l.c., 8, p. 47, 1891—Antigua (April to July); Sharpe, Cat. Bds. Brit. Mus., 24, pp. 405, 757, 1896 (in part); Salvin and Godman, Biol. Centr.-Amer., Aves, 3, p. 371, 1903 (in part); Clark, Proc. Bost. Soc. N. H., 32, p. 254, 1905—St. Vincent (Oct.), Barbados, Carriacou, and Grenada (visitor); Hellmayr, Nov. Zool., 13, p. 54, 1906—Seelet, Trinidad (April); Lowe, Ibis, 1907, p. 553—Margarita Island, Venezuela (March 24); Ihering, Cat. Faun. Braz., 1, p. 51, 1907—"Matto Grosso," errore (=Cajútuba, Pará).

Catoptrophorus semipalmatus semipalmatus Ridgway, Bull. U. S. Nat. Mus., 50, (8), p. 315, 1919 (monog.; full bibliog.); Wetmore, Sci. Surv. Porto Rico and Virgin Islands, 9, p. 366, 1927—Puerto Rico (crit.); Bent, Bull. U. S. Nat. Mus., 146, p. 27, 1929 (life hist.); Naumburg, Bull. Amer. Mus. N. H., 60, p. 79, 1930—"Matto Grosso (Rio Guaporé)," errore (=Cajútuba, Pará); Wetmore and Swales, Bull. U. S. Nat. Mus., 155, p. 160, 1931—Hispaniola; Peters, Bds. World, 2, p. 270, 1934 (range); Belcher and Smooker, Ibis, 1935, p. 291—Trinidad and Tobago (visitor); Pinto, Rev. Mus. Paul., 22, p. 136, 1938—Cajútuba, Pará (ex Pelzeln); Dickey and van Rossem, Field Mus. Nat. Hist., Zool. Ser., 23, p. 175, 1938—Puerto del Triunfo, El Salvador (Dec. 31, Jan. 1); Beatty, Auk, 60, p. 110, 1943—St. Croix, Virgin Islands (nesting).

Catoptrophorus semipalmatus longicaudis Danforth, Journ. Dept. Agric. Porto Rico, 10, p. 76, 1926—Boquerón, Puerto Rico (type in collection of Cornell University, Ithaca).

¹*Totanus crassirostris* Vieillot (Nouv. Dict. Hist. Nat., nouv. éd., 6, p. 406, 1816—Louisiana) has been quoted as a possible synonym, but there are various discrepancies in the description. No type appears to exist.

Range.—Breeds in Nova Scotia, on the Atlantic and Gulf coasts of the United States from New Jersey to Texas, and in the Bahama and Virgin (St. Croix) Islands, and Antigua,¹ possibly also in Cuba, Puerto Rico, and Hispaniola; winters from the Gulf states south through the West Indies and the Caribbean coast of Mexico and Central America (rarely on the Pacific side) to Trinidad, Guiana, and northeastern Brazil (Cajútuba, Pará).²

Field Museum Collection.—47: Nova Scotia (Seal Island, 1); Massachusetts (Monomoy Island, 1); Virginia (Northampton County, 2; Cobb's Island, 1); North Carolina, Dare County (Bodie Island, 2; Pea Island, 1); Florida (Indian River, Brevard County, 1; Nassau County, 4; Amelie Island, Nassau County, 5; Anclote, Pasco County, 1; Canaveral, Brevard County, 1; Merritt's Island, Brevard County, 2); Texas (Port Isabel, 2; Seadrift, Calhoun County, 1; Brownsville, 1; Port O'Connor, Calhoun County, 1); Bahama Islands (Northwest Point, Great Inagua, 3; Northeast Point, Great Inagua, 3; Mathew Town, Great Inagua, 2; Salt Pans, Great Inagua, 1; Betsey Bay, Mariguana, 1; Middle Point, Mariguana, 1; Piriton Well, Mariguana, 1; Caicos Island, 1); Virgin Islands (St. Croix, 1); Lesser Antilles (Anegada Island, 2); Costa Rica (Piedra de Blanca, Guanacaste, 2; Oso Peninsula, 1); Venezuelá (Margarita Island, 1).

Conover Collection.—17: South Carolina (Mount Pleasant, Charleston County, 2; Copahee Sound, 1); Florida (Nassau County, 3); Virgin Islands (St. Croix, 6); Costa Rica (Punta Piedra, Guanacaste, 4); Ecuador (Isla Silva Sur, Province de los Rios, 1).

****Catoptrophorus semipalmatus inornatus* (Brewster).³**

WESTERN WILLET.

Symphemia semipalmata inornata Brewster, Auk, 4, No. 2, p. 145, April, 1887—Larimer County, Colorado (cotypes now in Museum of Comparative Zoology, Cambridge, Mass.; cf. Bangs, Bull. Mus. Comp. Zool., 70, p. 177, 1930).

¹ In files of U. S. Fish and Wildlife Service, a record by H. McDonald of nest and four eggs, May 26, 1943.

² The locality, "Rio Guaporé, Matto Grosso," is due to confusion with Natterer's (only Brazilian) record from Cajútuba, coast of Pará, while "Bolivia," quoted by Ridgway, is most certainly erroneous.

³ *Catoptrophorus semipalmatus inornatus* (Brewster) differs from the nominate race by larger size (wing of males 201–209, of females 212–220, against 180–195 and 192–200, respectively), slenderer and longer bill, and by having the upper parts paler, more ashy gray, and much less heavily spotted with dusky, while the lower neck, chest, and flanks have the dusky barring narrower as well as lighter in tone.

Symphemia semipalmata (not *Scolopax semipalmata* Gmelin) Cassin, Proc. Acad. Nat. Sci. Phila., 1860, p. 195—Cartagena, Colombia; Taczanowski, Proc. Zool. Soc. Lond., 1877, p. 748—Santa Lucia, Tumbes, Peru (Nov. 27, Dec. 13); Sharpe, Cat. Bds. Brit. Mus., 24, p. 405, 1896—part, Mexico (Tres Marias Islands and San Blas, Tepic; Presidio, Sinaloa; "Tehuantepec" [=San Mateo], Oaxaca) and Guatemala (Chiapám and San José); Salvadori and Festa, Boll. Mus. Zool. Torino, 15, No. 368, p. 44, 1900—Bay of Santa Elena, Ecuador (Jan.); Salvin and Godman, Biol. Centr.-Amer., Aves, 3, p. 371, 1903 (in part); Gifford, Proc. Calif. Acad. Sci., (4), 2, p. 55, 1913—Albemarle (Villemil, Nov. 1, Sept. 3) and Abingdon (Sept. 21), Galápagos Islands.

*Totanus semipalmatus speculiferus*¹ Seebohm, Geog. Distr. Charad., p. 359, 1887 (crit.).

Catoptrophorus semipalmatus inornatus Ridgway, Bull. U. S. Nat. Mus., 50, (8), p. 319, 1919 (monog.; full bibliog.); Chapman, Bull. Amer. Mus. N. H., 55, p. 195, 1926—Tembleque, Ecuador (July 18; crit.); Grinnell, Univ. Calif. Pub. Zool., 32, p. 94, 1928—Lower California; Bent, Bull. U. S. Nat. Mus., 146, p. 36, 1929 (life hist.); Wolfe, Condor, 33, p. 54, 1931—Utah (breeding habits); Swarth, Occ. Pap. Calif. Acad. Sci., 18, p. 60, 1931—Abingdon and Albemarle Islands, Galápagos; Peters, Bull. Mus. Comp. Zool., 71, p. 303, 1931—Cricamola, Almirante, Panama (Sept. 19); Darlington, l.c., p. 375, 1931—near Donjaca, Santa Marta, Colombia (Sept. 15); Griscom, Bull. Amer. Mus. N. H., 64, p. 133, 1932—Champerico, Guatemala (Sept. 10); Peters, Bds. World, 2, p. 269, 1934 (range); van Rossem, Bull. Mus. Comp. Zool., 77, p. 433, 1934—Guaymas, Sonora (Jan. 19); Griscom, l.c., 78, p. 307, 1935—Panama; Dickey and van Rossem, Field Mus. Nat. Hist., Zool. Ser., 23, p. 175, 1938—Puerto del Triunfo (Dec. 31) and Barra de Santiago (Apr. 2), El Salvador; van Rossem, Occ. Pap. Mus. Zool. Louisiana State Univ., 21, p. 83, 1945—Sonora (wintering).

Range.—Breeds from central Oregon, south-central Alberta, Saskatchewan, and southern Manitoba south to northeastern California, Colorado, Nebraska, and northern Iowa; winters on the Pacific coast of America from California to northwestern Peru (Tumbes), the Galápagos Archipelago, and on the Gulf and Caribbean coasts to northern Colombia (Cartagena, Donjaca). In autumn migration occurs on the Atlantic coast of the United States.

¹ Sclater (Ibis, 1862, p. 199, note) suggested that *Totanus speculiferus* Cuvier (Rég. Anim., nouv. éd., 1, p. 531, footnote, 1829—no locality; Lesson, Traité d'Orn., p. 552, 1831—"l'Amérique septentrionale") may turn out to be an earlier name for the Western Willet. Pucheran (Rev. Mag. Zool., (2), 3, p. 369, 1851) gave a full description of the type in the Paris Museum, and his measurements (bill, 66; tarsus, 75 mm.) point to its identity with *inornatus*.

However, Professor J. Berlioz has kindly compared the type of *Totanus speculiferus* Cuvier with a specimen of *Catoptrophorus s. semipalmatus* and a specimen of *C. s. inornatus*, both in winter plumage. He states: "The coloration of plumage in our type seems quite as dark as in *semipalmatus*, with heavy shaft streaks and freckling. Briefly, as concerns coloration, the type looks more like *semipalmatus*, but the proportions and particularly the long and slender bill are those of *inornatus*." A change in nomenclature, therefore, appears to be inadvisable.

Field Museum Collection.—116: Alberta (Walsh, 2); Saskatchewan (Maple Creek, 7; Hay Creek, 1; Quill Lake, 1; Lake Johnston, 2); Ontario (Pule Point, 1); North Dakota (Stump Lake, Nelson County, 13; Towner County, 18; Rocklake, Towner County, 1); Colorado (Larimer, Huerfano County, 1; Fort Lyon, Bent County, 1); Utah (Salt Lake City, 1); Indiana (Miller, Lake County, 1); California (Westport, Mendocino County, 3; Redwood, San Mateo County, 6; Moss Landing, Monterey County, 3; Carmel, Monterey County, 2; Sunset Beach, Orange County, 1; Palo Alto, Santa Clara County, 1; Eureka, Humboldt County, 1; Pacific Beach, San Diego County, 1; San Diego, 2; The Rincon, Ventura County, 5; Playa del Rey, Los Angeles County, 1); Texas (Rockport, Aransas County, 1; Brownsville, 2; Seadrift, Calhoun County, 2; Port Lavaca, Calhoun County, 2; Padre Island, 1); Massachusetts (Monomoy Island, 4); Connecticut (West Haven, 1); North Carolina, Dare County (Pea Island, 15; Bodie Island, 2; Cape Hatteras, 2); Georgia (Chatham County, 1); Florida (Talbot Island, Duval County, 1; Palm Beach, 1; Anclote, Pasco County, 1); Costa Rica (Piedra de Blanca, Guanacaste, 2); Guatemala (San José, 2).

Conover Collection.—35: Alberta (Tofield, 5); Idaho (Montpelier, Lake County, 1); North Dakota (Devil's Lake, Ramsey County, 2); Utah (Brigham, 15); California (Anaheim Landing, Orange County, 6); Massachusetts (Chatham, 1); New Hampshire (Seabrook, 1); South Carolina (Copahee Sound, 2); Costa Rica (Punta Piedra, Guanacaste, 1); British Guiana (Buxton, Demerara, 1).

Genus *HETEROSCELUS* Baird

Heteroscelus Baird, Rep. Expl. Surv. R. R. Pac., 9, pp. 728, 734, 1858—type, by monotypy, *Totanus brevipes* Vieillot.

Heteractitis Stejneger, Auk, 1, p. 236, July, 1884—new name for *Heteroscelus* Baird, believed to be preoccupied by *Heteroscelis* Latreille, 1825.

Heteroscelus brevipes (Vieillot). POLYNESIAN TATTLER.

Totanus brevipes Vieillot, Nouv. Dict. Hist. Nat., nouv. éd., 6, p. 410, 1818—"pays inconnu" (type, from Timor, in the Paris Museum; cf. Pucheran, Rev. Mag. Zool., (2), 3, p. 571, 1851).

Heteractitis brevipes Stejneger, Bull. U. S. Nat. Mus., 29, p. 137, 1885—Bering Island (crit.); Townsend and Wetmore, Bull. Mus. Comp. Zool., 63, p. 180, 1919 (no intergradation with *H. incanus*); Hanna, Condor, 22, p. 174, 1920—Kitovi Rookery, St. Paul Island (Sept. 17, 1919).

Totanus incanus brevipes Seebohm, Geog. Distr. Charad., p. 361, 1887 (crit.).

Heteroscelus brevipes Hanna, Auk, 37, p. 250, 1920—St. Paul Island, Pribilofs (Oct. 4, 1911; Sept. 2, 1917); Bent, Bull. U. S. Nat. Mus., 146, p. 48, 1929 (life hist.); Friedmann, Condor, 35, p. 78, 1933—St. Lawrence Island (July, 1932); Peters, Bds. World, 2, p. 270, 1934 (range).

Tringa incana brevipes Hartert, Nov. Zool., 27, p. 139, 1920—Bering Island (crit.).

Heteroscelus incanus brevipes Preble and McAtee, N. Amer. Fauna, 46, p. 76, 1923—St. Paul Island, Pribilof Islands.

Heteractitis incanus brevipes Belopolski, Journ. Orn., 81, p. 425, 1933—Anadyr Bay, Siberia (Aug.).

Range.—Breeds probably in the alpine zone of northeastern Asia (northern Baikal Range, Werchojansk Range, and mountains of interior Kamchatka); winters in the Philippines, Caroline Islands, Malay Archipelago, and Celebes to New Guinea and Australia; accidental in the Pribilof Islands (St. Paul Island [Oct. 4, 1911; Sept. 2, 1917; Sept. 17, 1919]) and on St. Lawrence Island (July, 1932).

***Heteroscelus incanus (Gmelin). WANDERING TATTLER.**

Scolopax incana Gmelin, Syst. Nat., 1, (2), p. 658, 1789—based on "Ash-coloured Snipe" Latham, Gen. Syn. Bds., 3, (2), p. 154, Eimeo (= Moorea), Society Group, and Palmerston Islands, Pacific Ocean.

Totanus fuliginosus Gould, in Darwin, Zool. Beagle, 3, Birds, Part 15, p. 130, March, 1841—Galápagos Archipelago (Oct.; type now in British Museum).

Scolopax pacifica Forster, Descr. Anim. It. Mar. Austr., (ed. Lichtenstein), p. 174, 1844—Tongatabu, Tonga Islands.

Totanus oceanicus Lesson, Suppl. Oeuvr. Buffon, éd. Levêque, 20, (Descr. Mamm. Ois.), p. 244, 1847—Oualan Island, Caroline Islands (type in Paris Museum).

Totanus polynesiæ Peale, U. S. Expl. Exp., 8, p. 237, 1848—Fiji Islands and Paumotu group, Pacific Ocean (type, from Fiji Islands, in United States National Museum; cf. Stejneger, Bull. U. S. Nat. Mus., 29, pp. 135, 136, 1885).

Heteroscelus incanus Salvin, Proc. Zool. Soc. Lond., 1883, p. 429—Acapulco, Mexico (March); Ridgway, Bull. U. S. Nat. Mus., 50, (8), p. 367, 1919 (monog.; full bibliog.); Murie, Auk, 41, p. 231, pls. 17, 18, 1924—Savage River, Alaskan Range, Alaska (nest, eggs, and downy young descr.); Chapman, Bull. Amer. Mus. N. H., 55, p. 197, 1926—Santa Elena (Dec. 19, Feb. 16, 21) and La Plata Island (Feb. 11), Ecuador; Grinnell, Univ. Calif. Pub. Zool., 32, p. 94, 1928—Lower California (wintering); Bent, Bull. U. S. Nat. Mus., 146, p. 41, 1929 (life hist.); Swarth, Occ. Pap. Calif. Acad. Sci., 18, p. 61, 1931—Galápagos, Cocos, and Clipperton Islands; Dixon, Condor, 35, p. 173, 1933—Alaska (nesting habits); Ticehurst, Bull. Brit. Orn. Cl., 53, pp. 203, 206, 1933 (downy young descr.); Peters, Bds. World, 2, p. 270, 1934 (range); Dixon, Bds. Mammals Mt. McKinley Nat. Park, p. 76, 1938 (nesting habits).

Heteractitis incanus Stejneger, Bull. U. S. Nat. Mus., 29, p. 132, 1885—Bering Island (crit., meas., range, etc.); Sharpe, Cat. Bds. Brit. Mus., 24, pp. 453, 761, 1896 (monog.); Salvin and Godman, Biol. Centr.-Amer., Aves, 3, p. 377, 1903—Acapulco, Mexico; Osgood, Auk, 24, p. 340, 1907—upper MacMillan River, Yukon Territory (immature taken, probably breeds).

Totanus incanus Seebohm, Geog. Dist. Charad., p. 360, 1887 (crit.).

Tringa incana incana Hartert, Nov. Zool., 27, p. 139, 1920—Bering Island (May 29 to June 12).

Heteroscelus incanus incanus Preble and McAtee, N. Amer. Fauna, 46, p. 75, 1923—Pribilof Islands.

Range.—Breeds from south-central Alaska to east-central Yukon Territory and south to Prince William Sound; winters on Pacific coast and islands of America from southern California to Ecuador and the Galápagos, also in Hawaiian Islands, Polynesia, Micronesia, New Hebrides, and New Caledonia, and occasionally to New Guinea, Australia, and New Zealand.

Field Museum Collection.—57: Alaska (St. George Island, 1; King Island, 2; Nome, 1; St. Michaels, 1; Bethel, 1; Unalaska, 3; Kodiak Island, 1; Skagway, 1); British Columbia (Graham Island, Queen Charlotte Islands, 2; Quatsino, 1); Washington (Clallam Bay, 1); California (Point Fermin, Los Angeles County, 7; Laguna Beach, Orange County, 1; Arch Beach, Orange County, 1); Trinidad Bay, Humboldt County, 2; Point Reyes, Marin County, 1; Bolinas, Marin County, 1; Castle Rock, Del Norte County, 1; Del Monte Forest, Monterey County, 11; Carmel Bay, 2; Monterey, 1; Westport, Mendocino County, 6; San Clemente Island, 6); Galápagos Islands (Narborough Island, 1; Cocos Island, 1).

Conover Collection.—18: Alaska (Cape Nome, 1; Topkok, Norton Sound, 2); California (Redondo, Los Angeles County, 2; Santa Monica, 7; Point Fermin, Los Angeles County, 2; Balboa, Orange County, 1; Port Harford, 1; San Nicholas Island, 1; San Clemente Island, 1).

Subfamily ARENARIINAE. Turnstones and Surf Birds

Genus APHRIZA Audubon¹

Aphriza Audubon, Orn. Biog., 5, p. 249, 1839—type, by monotypy, *Aphriza townsendi* Audubon=*Tringa virgata* Gmelin.

¹For anatomical characters and affinity, cf. Lowe, Ibis, 1937, pp. 748-750.

**Aphriza virgata* (Gmelin). SURF BIRD.

Tringa virgata Gmelin, Syst. Nat., 1, (2), p. 674, 1789—based on "Streaked Sandpiper" Latham, Gen. Syn. Bds., 3, (1), p. 180, "Sandwich Sound"—Prince William Sound, Alaska (summer plumage).

Tringa borealis Gmelin, Syst. Nat., 1, (2), p. 674, 1789—based on "Boreal Sandpiper" Latham, Gen. Syn. Bds., 3, (1), p. 181, King George Bay (winter plumage); Housse, Rev. Chil. Hist. Nat., 28, p. 51, 1924—Isla la Mocha, Chile.

Tringa townsendi Audubon, Orn. Biog., 5, p. 249, 1839—Cape Disappointment, Washington (type now in Vassar College Museum, Poughkeepsie; cf. Orton, Amer. Natur., 4, p. 716, 1871).

Charadrius Winterfeldti Tschudi, Arch. Naturg., 9, (1), p. 388, 1843—"in Oceani Magni littoribus"—coast of Peru (type now in Liverpool Museum; cf. Forbes and Robinson, Bull. Liverpool Mus., 2, p. 66, 1899);¹ idem, Unters. Faun. Peru., Orn., p. 295, pl. 34, 1846—coast of Peru (=winter plumage).

Aphriza townsendii Fraser, Proc. Zool. Soc. Lond., 12, p. 157, 1844—Chile.

Streptilas borealis Des Murs, in Gay, Hist. Fís. Pol. Chile, Zool., 1, p. 408, 1847—coast of Chile; Philippi, Reise Wüste Atacama, p. 163, 1860—Paposo, Antofagasta, Chile; idem, Anal. Univ. Chile, 31, p. 273, 1868—from Valdivia, Chile, to Peru; idem, Ornith., 4, p. 159, 1888—Paposo, Chile.

Aphriza virgata Gray, Gen. Bds., 3, pl. 147 (winter plumage), 1847; Selater, Proc. Zool. Soc. Lond., 1867, pp. 331, 339—Chile; Sharpe, I.c., 1881, p. 15—Van Islands, Trinidad Channel, Territory of Magallanes, Chile (Feb. 15); Taczanowski, Orn. Pér., 3, p. 348, 1886—coast of Peru; Nelson, Nat. Hist. Coll. Alaska, 3, p. 127, 1887—St. Michaels (migr.); Reed, Anal. Univ. Chile, 93, p. 210, 1896—Chile; Sharpe, Cat. Bds. Brit. Mus., 24, p. 208, 1896—Alaska (St. Michaels), Vancouver Island, Orcas Island, Chile, and Van Islands; Hartert, Nov. Zool., 9, p. 605, 1902—seashore near Vacqueria, Province of Esmeraldas, Ecuador (Sept. 16); Salvin and Godman, Biol. Centr.-Amer., Aves, 3, p. 353, 1903 (monog.); Dabbene, Anal. Mus. Nac. Buenos Aires, 18, p. 216, 1910—"Straits of Magellan"; Ridgway, Bull. U. S. Nat. Mus., 50, (8), p. 58, 1919 (monog.; full bibliog.); Townsend, Bull. Amer. Mus. N. H., 48, p. 12, 1923—Lower California (Abrejos Point, San Josef Island) and Sonora (Tiburón Island); Murie, Auk, 41, pp. 235-237, 1924—Forty Mile River and Savage River, Alaskan Range, Alaska, July (nesting habits); Swarth, Univ. Calif. Pub. Zool., 30, p. 73, 1926—Carcross, Yukon (May 27); Conover, Auk, 43, p. 314, 1926—Point Dall, Alaska (May 18); Dixon, Condor, 29, pp. 3-16, col. pl., 1927—Mount McKinley district, Alaskan Range (breeding habits; nest; eggs;

¹ This specimen is doubtless the type, as claimed by Forbes and Robinson. Mr. Jean J. Baer, of the Neuchâtel Museum, in fact, informs us that the species is not (and never was) represented in Tschudi's collection in that Museum.—C. E. H.

Friedmann and Deignan (Zoologica, N.Y., 27, (2), p. 49, 1942) claim that the type of *Charadrius Winterfeldti* (sic) Tschudi is in the United States National Museum, having been received by it in the year 1866 in a shipment from the Neuchâtel Museum. This specimen and the one in the Liverpool Museum are undoubtedly cotypes.

food); Grinnell, Univ. Calif. Pub. Zool., 32, p. 98, 1928—Lower California; Bent, Bull. U. S. Nat. Mus., 146, p. 269, 1929 (life hist.); Hellmayr, Field Mus. Nat. Hist., Zool. Ser., 19, p. 380, 1932—Chile (winter); Griscom, Bull. Amer. Mus. N. H., 64, p. 129, 1932—Champerico, Guatemala (Sept. 10); Peters, Bds. World, 2, p. 271, 1934 (range); Friedmann, Condor, 36, p. 89, 1934—Goodnews Bay, Alaska (Aug. 12); Bullock, Rev. Chil. Hist. Nat., 39, p. 247, 1935—Isla la Mocha, Chile; Dixon, Bds. Mammals, Mt. McKinley Nat. Park, p. 67, 1938 (nesting habits); van Rossem, Occ. Pap. Mus. Zool. Louisiana State Univ., 21, p. 83, 1945—Sonora (Tiburón Island, April; Punta Penascosa, Jan.).

Strepsilas virgata Schlegel, Mus. Pays-Bas, No. 29, Cursores, p. 45, 1865—Algarroba, Chile (crit.).

Strepsilas virgatus Seeböhm, Geog. Distr. Charad., p. 412, 1887 (monog.).

Range.—Breeds on mountains in south-central Alaska (Mount McKinley district, Alaskan Range, and doubtless other adjoining ranges to the Yukon border); winters along the Pacific coast of America south to Chile (Paposo, Antofagasta; Isla la Mocha, Arauco; Valdivia; Van Islands, Trinidad Channel, Territory of Magallanes).

Field Museum Collection.—28: Alaska (Sea Otter Harbor, Dall Island, 6; Wrangell, 1); British Columbia (Barclay Sound, Vancouver Island, 3); Washington (Jefferson County, 2; Gray's Harbor, Westport, 1); Oregon (Netarts, Tillamook County, 3; Yaquina Bay, Lincoln County, 1); California (Del Monte Forest, Monterey County, 6; Carmel Highlands, Monterey County, 1; North Island, San Diego County, 1; Pacific Beach, San Diego County, 1; San Diego Harbor, San Diego County, 1; Hyperion, Los Angeles County, 1).

Conover Collection.—15: Alaska (Craig, Prince of Wales Island, 3; Sea Otter Harbor, Dall Island, 2; Wrangell, 2); Washington (Jefferson County, 4); Oregon (Netarts, Tillamook County, 4).

Genus ARENARIA Brisson

Arenaria Brisson, Orn., 1, p. 48, 5, p. 132, 1760—type, by tautonymy, "*Arenaria*" Brisson=*Tringa interpres* Linnaeus.

Morinella Meyer, in Meyer and Wolf, Taschenb. Deuts. Vögelk., 2, p. 383, 1810—type, by monotypy, *Morinella collaris* Wolf=*Tringa interpres* Linnaeus.

Strepsilas Illiger, Prodr. Syst. Mamm. Av., p. 263, 1811—new name for *Arenaria* Brisson.

Cinclus "Moehring" (not of Borkhausen, 1797, nor of Bechstein, 1802) Gray, List Gen. Subgen. Bds., 2d ed., p. 85, 1841—type, by orig. desig., *Tringa morinella* Linnaeus.

****Arenaria interpres interpres* (Linnaeus). TURNSTONE.**

Tringa interpres Linnaeus, Syst. Nat., 10th ed., 1, p. 148, 1758—in part, based chiefly on It. Gotl. 217 and Faun. Svec., No. 154, restricted type locality, Gotland, Sweden.¹

Morinella collaris Wolf, in Meyer and Wolf, Taschenb. Deuts. Vögelk., 2, p. 383 (footnote), 1810—new name for *Tringa interpres* Linnaeus.

Charadrius Cinclus Pallas, Zoogr. Rosso-Asiat., 2, p. 148, 1811—Siberia to Kamchatka (in part, as far as based on *Tringa interpres* Linnaeus).

Tringa oahuensis Bloxham, in Byron's Voy. Blonde, p. 251, 1826—Oahu, Hawaiian Islands (location of type unknown, probably once in the British Museum).

Streptilas collaris Holboell, Naturhist. Tidskr., 4, p. 407, 1843—South and North Greenland (May to Sept.).

Arenaria interpres Sharpe, Cat. Bds. Brit. Mus., 24, pp. 92, 728, 1896—part, Old World and Greenland; Løppenthin, Medd. Grønl., 91, No. 6, p. 54, 1934—Greenland (crit.; meas.).

Streptilas interpres Winge, Medd. Grønl., 21, p. 155, 1898—Greenland; Manniche, l.c., 45, No. 1, p. 127, 1910—Greenland (breeding habits).

Arenaria morinella (not *Tringa morinella* Linnaeus) Palmer, Fur Seals and Fur Seal Islands, North Pacific Ocean, Part 3 (Avifauna Pribilof Islands), pp. 412–418, 1899 (crit.; descr.).

Arenaria interpres interpres Ridgway, Bull. U. S. Nat. Mus., 50, (8), p. 45, 1919—part, except northwestern Alaska and Pacific coast of America (monog.; full bibliog.); Bent, l.c., 146, pp. 278, 293, 1929—part, except North American mainland (life hist.); Peters, Bds. World, 2, p. 271, 1934—part, except North and South America and Galápagos Islands; Bird and Bird, Ibis, 1941, p. 143—Greenland (crit.); Leach, Brit. Bds., 38, (19), p. 376, 1945 (specimen taken at Proven, northwestern Greenland, May 30, 1945, was banded at Antrim, Ireland, Jan. 1, 1942).

Range.—Breeds on the coasts of Greenland, Iceland, northern Europe and Asia; migrates through the St. Lawrence, Pribilof and Aleutian Islands; winters from southern Europe, India, Japan and the Hawaiian Islands to South Africa, Madagascar, Australia and New Zealand.²

Field Museum Collection.—7: Alaska (Dutch Harbor, 1; Unalaska, 1; St. Paul Island, 2); Greenland (Holsteinborg, west coast, 1; Musk-ox Fjord, Hudson Land, 2).

¹ The quotation, "Edwards, Nat. Hist. Bds., 3, p. 141, pl. 141," refers to *A. i. morinella*.

² After examining several hundred specimens of Turnstones we are unable to recognize *A. i. oahuensis* of northern Siberia and Alaska (cf. Mathews, Bds. Australia, 3, pp. 5, 10, 1913).

Additional material examined.—Greenland: east coast, 1.—Bering Sea: St. George Island, 1; Hall Island, 1; Unalaska, 1.

***Arenaria interpres morinella** (Linnaeus).¹ RUDDY TURNSTONE.

Tringa Morinella Linnaeus, Syst. Nat., 12th ed., 1, p. 249, 1766—based on "Turnstone or Sea-Dotterel" Catesby, Nat. Hist. Carolina, 1, p. 72, pl. 72, coast of Georgia.

Tringa hudsonica P. L. S. Müller, Natursyst., Suppl., p. 114, 1776—based on "The Turnstone from Hudson's Bay" Edwards, Nat. Hist. Birds, 3, p. 141, pl. 141, Hudson's Bay.

Strepsilas interpres (not *Tringa interpres* Linnaeus) Darwin, Zool. Beagle, 3, Birds, p. 132, 1841—Iquique (Tarapacá), Chile, and Galápagos Islands; Frazer, Proc. Zool. Soc. Lond., 11, p. 118, 1843—Chile; Des Murs, in Gay, Hist. Fis. Pol. Chile, Zool., 1, p. 407, 1847—Chile; Jardine, Ann. Mag. Nat. Hist., 20, p. 375, 1847—Tobago (Jan.); Gosse, Bds. Jamaica, p. 333, 1847—Jamaica; Cabanis, in Schomburgk, Reisen Brit. Guiana, 3, p. 751, 1849—coast region; Philippi, Reise Wüste Atacama, p. 163, 1860—Paposo, Antofagasta, Chile; Salvin, Ibis, 1865, p. 191—Chiapám, Guatemala; Pelzeln, Reise Novara, Zool., 1, Vögel, p. 117, 1865—Chile; Sclater, Proc. Zool. Soc. Lond., 1867, p. 339—Chile; Philippi, Anal. Univ. Chile, 31, p. 273, 1868—coast of Chile; Pelzeln, Orn. Bras., 3, p. 297, 1870—Sapitiba (near Piehy), Rio de Janeiro (Feb.), Cajutuba, Pará (Feb., Mar., Apr.), and Pará (Nov.), Brazil; Sclater and Salvin, Proc. Zool. Soc. Lond., 1870, p. 323—Galápagos Islands; Taczanowski, l.c., 1874, p. 560—Chorilllas, Lima, Peru; Lawrence, Mem. Bost. Soc. N. H., 2, p. 308, 1874—Rio Zacatula, Colima, Mexico; Gundlach, Journ. Orn., 23, p. 331, 1875—Cuba (Sept. and winter); Lawrence, Bull. U. S. Nat. Mus., 4, p. 46, 1876—San Mateo, Oaxaca, Mexico; Gundlach, Journ. Orn., 26, p. 188, 1878—Puerto Rico (Mayaguëz, Cabo Rojo, Quebradillas, Vega Baja); Sharpe, Proc. Zool. Soc. Lond., 1881, p. 15—Talcaguano, Chile; Salvin, l.c., 1883, p. 429—Paracas Bay, Peru (Oct.); Taczanowski, Orn. Per., 3, p. 349, 1886—part, Peru (Chorillos); Philippi, Orn., 4, p. 159, 1888—Paposo, Chile; Hartert, Ibis, 1893, p. 307—Aruba Island (July 2); Reed, Anal. Univ. Chile, 93, p. 209, 1896—Chile; Schalow, Zool. Jahrb., Suppl., 4, p. 664, 1898—Isla de los Pajaros, Coquimbo, Chile (Oct.); Bonhote, Ibis, 1903, p. 301—Andros, Little Abaco, and Green Cay, Bahama Islands (crit.); Housse, Rev. Chil. Hist. Nat., 28, p. 51, 1924—Isla la Mocha, Arauco, Chile; Gigoux, l.c., p. 67, 1924—Caldera, Atacama, Chile.

Strepsilas collaris (not *Morinella collaris* Wolf) Tschudi, Unters. Faun. Peru., Orn., p. 297, 1846—"on both sides of the Cordillera," Peru (crit.); Burmeister, Syst. Uebers. Th. Bras., 3, p. 364, 1856—Santa Catharina, Brazil.

Cinclus interpres Léotaud, Ois. Trinidad, p. 399, 1866—Trinidad.

Arenaria interpres Zeledon, Anal. Mus. Nac. Costa Rica, 1, p. 129, 1887—Las Trojas, Costa Rica; Cory, Auk, 4, p. 231, 1887—West Indies (descr.); idem, Bds. W. Ind., p. 231, 1889; idem, Cat. W. Ind. Bds., p. 95, 1892—

¹ *Arenaria interpres morinella* (Linnaeus) in breeding plumage can be distinguished from the nominate race by having the dorsal surface much redder. In winter it is indistinguishable except for its average smaller size.

Additional material examined.—Alaska: Barrow, 6; Wainwright, 2; Cape Lisbourne, 1; Coal Land, 1; Wales, 2; Nulato, 1; Kotlik, 1; Carbon Creek, 1; Port Clarence, 1.

West Indies; Berlepsch and Stolzmann, Proc. Zool. Soc. Lond., 1892, p. 395—Ancon, Peru (Jan. 21); Cherrie, Anal. Inst. Fís.-Geog. Mus. Nac. Costa Rica, 4, p. 55, 1893—Punta Mala, Delta del Río Dagua, Costa Rica; Sharpe, Cat. Bds. Brit. Mus., 24, pp. 92, 728, 1896—part, North and South American mainland, West Indies and Galápagos Islands; Salvadori and Festa, Boll. Mus. Zool. Torino, 15, No. 368, p. 42, 1900—Puntilla de Santa Elena and Bahía de Ballenita, Ecuador (Jan.); Salvin and Godman, Biol. Centr.-Amer., Aves, 3, p. 345, 1903—Mexico (Río Zacatula, Colima; San Mateo and Santa Maria del Mar, Oaxaca; Tonalá, Chiapas; Mugeres and Cozumel Islands, Yucatan), Guatemala (Chiapam), British Honduras (Curlew Cay; Saw-pit Cay; Turneffe Island), Antilles, Costa Rica (Las Trojas), Veraguas, etc.; Clark, Proc. Bost. Soc. N. H., 32, p. 250, 1905—Lesser Antilles; Hellmayr, Nov. Zool., 13, p. 53, 1906—Seelet, Trinidad (April); Berlepsch, l.c., 15, p. 304, 1908—Cayenne, French Guiana; Lowe, Ibis, 1909, p. 314—Testigo Grande; Carriker, Ann. Carnegie Mus., 6, p. 415, 1910—Costa Rica (rare visitant on Pacific coast); Reiser, Denks. Math.-Naturw. Kl. Akad. Wiss. Wien, 76, p. 95, 1910—[Amaracão], coast of Piauí, Brazil (Sept. 14, 15); Sneath, Bol. Mus. Goeldi, 8, p. 82, 1914—Guimaraes, Maranhão, Brazil; Chubb, Ibis, 1919, p. 261—Puna Island, Ecuador (Nov. 10) and Chancay, Lima, Peru (Dec. 30).

Arenaria morinella Brewster, Bull. Mus. Comp. Zool., 41, p. 74, 1902—Carmen Island (March 12) and San José del Cabo (Aug. 31 to Oct. 21), Lower California.

Morinella interpres Ihering, Cat. Faun. Braz., 1, p. 45, 1907 (range); Lima, Rev. Mus. Paul., 12, (2), p. 96, 1920—Ilhéos, Bahia.

Arenaria interpres morinella Cory, Field Mus. Nat. Hist., Orn. Ser., 1, pp. 197, 214, 230, 1909—Aruba, Islas de Aves, and Testigo Grande; Ridgway, Bull. U. S. Nat. Mus., 50, (8), p. 51, 1919 (monog.; full bibliog.); Reiser, Denks. Math.-Naturw. Kl. Akad. Wiss. Wien, 76, p. 228, 1923—coast of Piauí, Brazil; Chapman, Bull. Amer. Mus. N. H., 55, p. 190, 1926—coast of Manavi, Santa Elena (Dec. 17, Feb. 25), and Jambeli (Nov. 1), Ecuador; Conover, Auk, 43, p. 314, 1926—Point Dall, Bering Sea, Alaska (nesting; descr. pullus); Wetmore, Sci. Surv. Porto Rico and Virgin Islands, 9, p. 357, 1927—Puerto Rico, St. Croix, Culebra, and Culebrita; Grinnell, Univ. Calif. Pub. Zool., 32, p. 99, 1928—Lower California; Bent, Bull. U. S. Nat. Mus., 146, pp. 278, 294, 1929 (life hist.; range, except Greenland); Hellmayr, Field Mus. Nat. Hist., Zool. Ser., 12, p. 490, 1929—near Amaracão, Piauí; Wetmore and Swales, Bull. U. S. Nat. Mus., 155, p. 154, 1931—Hispaniola (winter visitant); Darlington, Bull. Mus. Comp. Zool., 71, p. 377, 1931—Donjaca, Santa Marta, Colombia (Sept. 15); Hellmayr, Field Mus. Nat. Hist., Zool. Ser., 19, p. 380, 1932—Caldera, Atacama (Mar. 26), and Papudo, Aconcagua (Dec. 1), Chile; Peters, Bds. World, 2, p. 272, 1934 (range, in part); Belcher and Smooker, Ibis, 1935, p. 291—Trinidad and Tobago; Griscom, Bull. Mus. Comp. Zool., 78, p. 306, 1935—Veraguas and Canal Zone, Panama; Bullock, Rev. Chil. Hist. Nat., 39, p. 247, 1935—Isla la Mocha; Pinto, Rev. Mus. Paul., 19, p. 77, 1935—Ilha de Madre de Deus (Feb.), Corupéba (Feb.), Cahype (Feb.), and Ilheos (Apr.), Bahia; Philippi, El Hornero, 6, p. 235,

1936—Rocas de la Erizera, Tacna, Chile (June 24); Pinto, Rev. Mus. Paul., 22, p. 136, 1938—Ilheos, Ilha Madrà de Deus, and Cahype, Bahía; Philippi, Bol. Mus. Nac. Santiago, 16, p. 55, 1938—Playa de Chacalluta, Tacna, Chile (Sept.); Dickey and van Rossem, Field Mus. Nat. Hist., Zool. Ser., 23, p. 171, 1938—Puerto del Triunfo, El Salvador (Dec. 31, Jan. 5, 6), and Punta Piedra, Costa Rica; Conover, Condor, 47, p. 213, 1945 (dist. chars.; ranges on both coasts of the Americas); Soper, Auk, 63, p. 227, 1946—Baffin Island (nesting).

Arenaria interpres interpres Ridgway, Bull. U. S. Nat. Mus., 50, (8), p. 45, 1919—part, northwestern Alaska and Pacific coast of America; Bent, l.c., 146, p. 293, 1929—part, Alaska; Swarth, Occ. Pap. Calif. Acad. Sci., 18, p. 59, 1931—Galápagos Islands and Cocos Island; Peters, Bds. World, 2, p. 271, 1934—part, North and South America and the Galápagos Islands.

Arenaria interpres subsp. Griscom, Bull. Mus. Comp. Zool., 64, p. 129, 1932—Champerico, Guatemala.

Range.—Breeds on the Arctic coasts and islands of North America from Point Barrow to Baffin Island, south to Bristol Bay, Bering Sea and Southampton Island; winters in the southern United States, the West Indies, Galápagos Islands and both coasts of South America south to Chile (Isla la Mocha, Arauco) and southern Brazil (Santa Catherina). Found in the interior of the United States during migration.¹

Field Museum Collection.—182: Alaska (Barrow, 6; Nome, 4; St. Michaels, 1; Teller, 1; Morzhovoi Bay, 1); British Columbia (Queen Charlotte Islands, 2); Saskatchewan (Lake Johnson, 1); Quebec (Magdalen Islands, 20); Nova Scotia (Clark's Harbor, 3); Washington (Westport, 2); North Dakota (Towner County, 2; Rocklake, 1; Devil's Lake, 1; Lake Irwin, 2); Wisconsin (Beaver Dam, 1); Illinois (Chicago Heights, 2); Massachusetts (Monomoy Island, 28; Chatham, 1); Connecticut (West Haven, 2; New Haven County, 1; Stamford, 1; Norwalk, 1); New York (Miller Place, 1; Suffolk County, 2; Auburn, 1; Cayuga Lake, 3); North Carolina, Dare County (Pea Island, 18; Bodie Island, 1); Georgia (St. Simons Island, 2); Florida (Eau Gallie, 3; Canaveral, 1; Amelie Island, 4; Nassau County, 2; Anclote, 1; Grove City, 2); Louisiana (Buras, 2); Texas (Aransas Pass, 1); California (Moss Landing, 1; Del Monte Forest, 1; mouth of Carmel River, 4; Carmel Lagoon, 1; Carmel, 2; Humboldt Bay, 1; Pacific Beach, 1); Bahama Islands (Great Inagua, 3; Mariguana, 1; Eleuthera, 3; Great Bahama, 1; Cay Sal Bank, 1;

¹ Wace (El Hornero, 2, p. 198, 1921) lists *A. i. morinella* as a "rare visitant" among the birds of the Falkland Islands. We cannot find any definite record from this region in literature, and as the Ruddy Turnstone has not even been taken in Argentina, we hesitate to accept this statement. Bennett (Ibis, 1926, pp. 306-333) does not mention this species at all.

Abaco, 1); Virgin Islands (St. Croix, 1; Anegada, 3); Jamaica (Grand Cayman, 6; Cayman Brac, 2); Lesser Antilles (Tobago, 1); Dutch West Indies (Aruba, 7); Venezuela (Los Aves Island, Colon, 1); Surinam (Seashon, 1); Costa Rica (Punta Piedra, Guanacaste, 4; Point Jimenez, Peninsula del Oro, 2); Ecuador (Vaqueria, 2); Chile (Caldera, Atacama, 3).

Conover Collection.—44: Alaska (Barrow, 8; Hooper Bay, Bering Sea, 12; False Pass, 1); North Dakota (Stump Lake, Nelson County, 4); Illinois (Chicago, 3); Texas (Seadrift, 1); California (Point Magie, 1; Portuguese Bend, 1; Eureka, 1); Virgin Islands (St. Croix, 5); Costa Rica (Punta Piedra, Guanacaste, 5); Ecuador (Vaqueria, 1); Chile (Papudo, Aconcagua, 1).

****Arenaria melanocephala* (Vigors). BLACK TURNSTONE.**

Streptilas melanocephalus Vigors, Zool. Journ., 4, No. 15, p. 356, Jan., 1829—western shores of North America¹ (type originally in collection of Zoological Society of London, present whereabouts unknown; cf. Grinnell, Univ. Calif. Pub. Zool., 38, p. 292, 1932); idem, Zool. Voy. "Blossom," Birds, p. 29, 1839—no locality indicated; Seebohm, Geog. Distr. Charad., p. 411, 1887 (crit.).

Arenaria melanocephala Turner, Contr. Nat. Hist. Alaska, 2, p. 150, 1886—St. Michaels and mouth of Kuskokwim River; Nelson, Nat. Hist. Coll. Alaska, 3, p. 129, 1887—St. Michaels (breeding); Sharpe, Cat. Bds. Brit. Mus., 24, pp. 103, 729, 1896 (monog.); Ridgway, Bull. U. S. Nat. Mus., 50, (8), p. 55, 1919 (monog.; full bibliog.); Conover, Auk, 43, p. 315, pl. 7, 1926—Point Dall, Alaska (common breeder; pl. and descr. of chick); Bailey, Condor, 28, p. 86, 1926—St. Michaels and Wales (breeding), Alaska; Bent, Bull. U. S. Nat. Mus., 146, p. 298, 1929 (life hist.); Grinnell, Univ. Calif. Pub. Zool., 32, p. 99, 1932—Lower California; Peters, Bds. World, 2, p. 272, 1934 (range); van Rossem, Occ. Pap. Mus. Zool. Louisiana State Univ., 21, p. 84, 1945—Sonora (winter).

Range.—Breeds on the western seacoast of Alaska from Cape Prince of Wales to Bristol Bay (?Cook Inlet); winters from southeastern Alaska to southern Lower California; casual at Point Barrow, Alaska, and in northeastern Siberia (Wrangel Island; Chaun Bay).²

Field Museum Collection.—99: Alaska (St. Michaels, 8; Kelp Bay, 1; Kotlik, 1; Kuskokwim River, 3; Bethel, 1); British Columbia (Comox, 2; Quatsino, 6); Washington (Jefferson County, 2); Oregon (Newport, Lincoln County, 2); California (White Point, Los Angeles

¹ Monterey, California, suggested as type locality by Grinnell (Univ. Calif. Pub. Zool., 38, p. 292, 1932).

² The record from "India" is open to doubt (cf. Hartert, Vög. Pal. Fauna, 2, p. 1569, 1920).

County, 9; San Clemente Island, 9; Santa Cruz Island, 2; Monterey County, 1; Del Monte Forest, Monterey County, 13; Carmel, Monterey County, 7; Carmel Bay, Monterey County, 15; Monterey, Monterey County, 6; Westport, Mendocino County, 4; La Patera Point, Santa Barbara County, 1; St. Nicholas Island, Santa Barbara County, 1; Trinidad, Humboldt County, 3; Farallon Islands, 1); Mexico (Coronados Island, Lower California, 1).

Conover Collection.—17: Alaska (Hooper Bay, Bering Sea, 7); Washington (Clallam Bay, 1); Oregon (Netarts, Tillamook County, 2); California (Anaheim Landing, Orange County, 1; Pismo, San Luis Obispo County, 5; Eureka, Humboldt County, 1).

Subfamily SCLOPACINAE. Snipes and Woodcocks

Genus LIMNODROMUS Wied

Macrorhamphus (not of G. Fischer, 1813) F. Forster, Syn. Cat. Brit. Bds., p. 22, 1817—type, by monotypy, *Scolopax grisea* Gmelin.

Limnodromus "Wagler" Wied, Beitr. Naturg. Bras., 4, (2), p. 716, 1833—type, by monotypy, *Scolopax noveboracensis* Gmelin=*S. grisea* Gmelin.

Longirostris S. D. W., Analyst, 4, No. 15, p. 119, April 1, 1836—new name for *Macrorhamphus* "Leach."

Macroramphus Bonaparte, Geog. Comp. List, p. 52, 1838—emendation of *Macrorhamphus* Forster.

Limnodromus Bonaparte, Iconog. Fauna Ital., 1, fasc. 25, text of *Gallinago brehmi* (p. 2), 1839—emendation of *Limnodromus* Wied.

**Limnodromus scolopaceus* (Say).¹ LONG-BILLED DOWITCHER.

Limosa scolopacea Say, in Long's Exped. Rocky Mts., 1, p. 170, 1823—Engineer Cantonment, near Boyer Creek, near Council Bluffs, Iowa (type lost).²

Scolopax longirostris Bell, Ann. Lyc. Nat. Hist. N. Y., 5, p. 3, 1852—Long Island, New York (type in collection of Geo. N. Lawrence; cf. Lawrence, l.c., p. 5, 1852).

¹*Limnodromus scolopaceus* (Say), in breeding plumage, differs from *L. g. hendersoni* by much darker dorsal coloration, the buff edging and barring of the feathers being much narrower as well as more reddish, especially on scapulars and tertials; darker tail with the light bars narrower and the dark ones wider; and by the heavier spotting (in the form of bars rather than dots) below being confined to throat and upper breast, while the flanks are more strongly barred. In winter plumage distinguishable by darker tail and in the female sex by longer bill. In immature plumage *L. scolopaceus* is always recognizable by the very sparse light markings on the longer (or outer) tertials, which markings are very narrow and confined to the edges of the feathers.

²Orr (Condor, 42, pp. 62–63, 1940) has clearly shown that Say's account on the basis of the bill-length ($2\frac{3}{4}$ in.=70 mm.) must refer to the Long-billed Dowitcher, as this measurement is greater than the maximum for the *griseus* complex.

Macroramphus scolopaceus Lawrence, Ann. Lyc. Nat. Hist. N. Y., 5, p. 4, pl. 1, 1852—Long Island (crit.; figs. of male and female); Sclater and Salvin, Proc. Zool. Soc. Lond., 1873, p. 455—Guatemala (crit.).

Macrorhamphus griseus (not *Scolopax grisea* Gmelin) Salvin, Ibis, 1865, p. 191—lagoon of Chiapám, Guatemala; (?) Taczanowski, Proc. Zool. Soc. Lond., 1877, p. 748—Santa Lucia, Tumbes, Peru (Oct. 28, Nov. 22); (?) Sclater and Salvin, l.c., 1879, p. 547—Medellin, Colombia; (?) Salvadori and Festa, Boll. Mus. Zool. Torino, 15, No. 368, p. 44, 1900—Cañar, Ecuador (October).

Macrorhamphus scolopaceus Turner, Contr. Nat. Hist. Alaska, 2, p. 146, 1886—St. Michaels and Yukon Delta (breeding), Kuskokwim River; Nelson, Nat. Hist. Coll. Alaska, 3, p. 100, 1887—Norton Sound and Yukon mouth (nesting; descr.; comparison with *griseus*).

Macrorhamphus griseus scolopaceus Howe, Auk, 18, p. 161, 1901 (dist. chars.).

Limnodromus griseus scolopaceus Ridgway, Bull. U. S. Nat. Mus., 50, (8), p. 201, 1919—part (monog.; full bibliog.); Bailey, Condor, 27, p. 236, 1925—Wales (nesting), Cape Simpson and Cape Blossom, Alaska; Conover, Auk, 43, p. 305, 1926—Hooper Bay, Alaska (nesting habits; weights); (?) Chapman, Bull. Amer. Mus. N. H., 55, p. 194, 1926—Vacqueria (Aug. 3, 31; Sept. 4) and Tembleque (July 18), Ecuador (crit.); Bent, Bull. U. S. Nat. Mus., 142, p. 115, 1927—part (life hist.); Grinnell, Univ. Calif. Pub. Zool., 32, p. 90, 1928—Lower California (transient); Griscom, Bull. Amer. Mus. N. H., 64, p. 133, 1932—Guatemala; Hurley, Murrelet, 13, p. 17, 1932—Bristol Bay, Alaska (nesting); Peters, Bds. World, 2, p. 272, 1934 (range); Griscom, Bull. Amer. Mus. N. H., 78, p. 307, 1935—Agua Dulce, Panama; Brooks, Ibis, 1939, p. 452, pl. 8, fig. 3—Point Barrow, Alaska (downy young descr.); Swenk, Nebraska Bd. Review, 8, p. 63, 1940—Nebraska (status; tax. hist.); Orr, Condor, 42, p. 61, 1940 (dist. chars.; tax. disc.; abundance in California); Zotta, El Hornero, 8, p. 171, 1942—Santo Domingo, Buenos Aires (first Argentine record).

Limnodromus scolopaceus Rowan, Auk, 49, pp. 21, 25, pls. 2, 3, 1932 (char.; distr.); Conover, l.c., 58, p. 377, 1941 (char.; range); van Rossem, Occ. Pap. Mus. Zool. Louisiana State Univ., 21, p. 84, 1945—Sonora (wintering and transient in fresh water).

Limnodromus griseus fasciatus Brodkorb, Proc. Biol. Soc. Wash., 46, p. 124, 1933—Hooper Bay, Bering Sea, Alaska (type in collection of H. B. Conover in Field Museum, examined).

Range.—Breeds in northwestern North America from Franklin Bay, Mackenzie, west to Point Barrow and south to Bristol Bay, Alaska; in migration commonest on the Pacific coast and in the western part of the continent, but occurring throughout the interior and sparingly even on the Atlantic coast; supposed to winter as far south as northwestern Peru (Santa Lucia, Tumbes), Cuba, and Jamaica;¹ one record for Argentina (Santo Domingo, Buenos Aires, Oct. 25).

¹ The winter range remains to be ascertained by critical study of material from the West Indies and Pacific South America.

Field Museum Collection.—51: Alaska (Barrow, 13; St. Michaels, 2; Nome, 2; Resurrection Bay, 1; Collinson Point, 2); British Columbia (Sumac Lake, 1); Saskatchewan (Maple Creek, 3; Lake Johnson, 5); California (Nigger Slough, Los Angeles County, 10; Motordrome, Los Angeles County, 1); Colorado (Barr Lake, Adams County, 1); Kansas (Burlington, 1); Texas (Brownsville, 2; Seadrift, 2; Rockport, 2; Tivoli, 2); North Carolina (Pea Island, 1).

Conover Collection.—31: Alaska (Barrow, 6; Point Tangent, Barrow, 2; Chipp River, Barrow, 3; Hooper Bay, Bering Sea, 9); Alberta (Beaverhill Lake, Tofield, 6; Camrose, 1); Saskatchewan (Liberty, 1); Illinois (Swan Lake, Henry, 1); California (Buena Vista Lake, Kern County, 1); Mexico (San José del Cabo, Lower California, 1).

****Limnodromus griseus hendersoni* Rowan.¹ INLAND DOWITCHER.**

Limnodromus griseus hendersoni Rowan, Auk, 49, p. 22, pls. 2, 3, Jan., 1932—type, from Devil's Lake, Alberta, in National Museum of Canada, Ottawa, (W. Rowan, in litt.); Bunyard, Bull. Brit. Orn. Cl., 53, p. 90, 1933—Alberta (eggs descr.); Low, l.c., p. 165, 1933 (crit.; char.); Brooks, Murrelet, 15, p. 23, 1934—Pacific coast (most common form); Swenk, Nebraska Bd. Review, 8, p. 63, 1940—Nebraska (status; tax.); Conover, Auk, 58, p. 379, 1941 (chars.; range).

Macrorhamphus griseus Howe, Auk, 18, p. 158, map, 1901—part, west Hudson Bay.

(?) *Macrorhamphus griseus scolopaceus* Howe, Auk, 18, p. 272, 1901—Button Bay, near Fort Churchill, Hudson Bay (immature, July).

Limnodromus griseus griseus (not *Scolopax grisea* Latham) Ridgway, Bull. U. S. Nat. Mus., 50, (8), p. 197, 1919 (in part); Bent, l.c., 142, p. 106, 1927 (range in part); Peters, Bds. World, 2, p. 272, 1934 (range in part); Orr, Condor, 42, p. 61, 1940 (dist. chars.; crit.).

Range.—Breeds in the interior of North America in central and northern Alberta from Lake Athabasca south to about lat. 53° N., and at Fort Churchill, Manitoba; on migration in British Columbia,

¹*Limnodromus griseus hendersoni* Rowan, in breeding plumage, may be separated from *L. scolopaceus* by much lighter upper parts and by the dark spots on the ventral surface being rounded, very sparse, and widely scattered, not concentrated on the chest. In females the culmen has a *maximum* length of 66 mm. as against a minimum of 68 in *scolopaceus*. The principal difference in comparison to *L. g. griseus* is found in the coloration and spotting of the under parts, the entire ventral side being salmon color, with perhaps a little white in the center of the abdomen, and the spotting being rounded, sparse or even evanescent, and scattered all over the surface, while the barring on the sides and flanks is less pronounced. In typical *griseus* the lower breast, belly, and flanks are white or only lightly tinted with salmon.

California, all the prairie provinces and states, Illinois, and the Carolinas; winters from the southeastern states to Costa Rica.¹

Field Museum Collection.—78: Manitoba (Fort Churchill, 1); California (Moss Landing, Monterey County, 7; mouth of Carmel River, Monterey County, 1; Carmel, Monterey County, 9; San Diego County, 4; Pacific Beach, San Diego County, 2; Trinidad, Humboldt County, 7; Eureka, Humboldt County, 2; Santa Barbara, Santa Barbara County, 1; Alamitos Bay, Los Angeles County, 1; Motordrome, Los Angeles County, 2); North Dakota (Stump Lake, Nelson County, 10; Mauvis Bay, Benson County, 2; Towner County, 2; Cando, Towner County, 2; Rocklake, Towner County, 1); Illinois (Hyde Lake, Cook County, 4); Texas (Corpus Christi, 2; Rockport, 1); North Carolina (Pea Island, Dare County, 8); South Carolina (Mount Pleasant, 1; Charleston, 1); Florida (Banana River, Brevard County, 1); Costa Rica (Piedra de Blanca, Guanacaste, 5); El Salvador (Puerto del Triunfo, Usulután, 1).

Conover Collection.—55: British Columbia (Comox, Vancouver Island, 2); Alberta (Fawcett, 9; Edmonton, 2; Beaverhill Lake, Tofield, 3; Camrose, 5); Manitoba (Churchill, 9); California (Point Magie, Ventura County, 2; Goleta, Santa Barbara County, 3; Anaheim Landing, Orange County, 1; San Diego Bay, 6; Playa del Rey, Los Angeles County, 2); Illinois (Hyde Lake, Cook County, 5); South Carolina (Copahee Sound, 1); Costa Rica (Punta Piedra, Guanacaste, 5).

****Limnodromus griseus griseus* (Gmelin). EASTERN DOWITCHER.**

Scolopax grisea Gmelin, Syst. Nat., 1, (2), p. 658, 1789—based on "Brown Snipe" Pennant, Arct. Zool., 2, p. 464, coast of New York.

Scolopax noveboracensis Gmelin, Syst. Nat., 1, (2), p. 658, 1789—based on "Red-breasted Snipe" Pennant, Arct. Zool., 2, p. 464, coast of New York (=nuptial plumage).

Scolopax nutans Gmelin, Syst. Nat., 1, (2), p. 659, 1789—based on "Nodding Snipe" Pennant, Arct. Zool., 2, p. 465, Chateaux Bay, coast of Labrador (=young).

Totanus ferrugineicollis Vieillot, Nouv. Dict. Hist. Nat., nouv. éd., 6, p. 401, 1816—new name for *Scolopax noveboracensis* "Lath." (=Gmelin).

Scolopax paykullii Nilsson, Orn. Svec., 2, p. 106, pl. 11, 1821—Lapland (type in Stockholm Museum; cf. Gyldenstolpe, Ark. Zool., 19, A, No. 1, p. 101, 1927; =young).

¹ The winter range cannot be indicated at present with any degree of certainty.

Macroramphus punctatus Lesson, *Traité d'Orn.*, p. 556, 1831—new name for *Scolopax grisea* Gmelin and *S. noveboracensis* Gmelin.

Limnodromus noveboracensis Wied, *Beitr. Naturg. Bras.*, 4, (2), p. 717, 1833—mouth of Rio Peruhype, near Villa Viçosa (lat. 18° S.), Bahía, Brazil.

Macrorhamphus griseus Cabanis, in Schomburgk, *Reisen Brit. Guiana*, 3, "1848," p. 758, 1849—coast region; Reinhardt, *Ibis*, 1861, p. 11—Fiskenaeset, Greenland (one specimen); Léotaud, *Ois. Trinidad*, p. 482, 1866—Trinidad (Aug. to Oct.); Pelzeln, *Orn. Bras.*, 3, p. 313, 1870—Praia de Cajútuba, Pará, Brazil (April); Sclater and Salvin, *Proc. Zool. Soc. Lond.*, 1873, p. 455—Panama and Pará (Cajútuba); Turner, *Proc. U. S. Nat. Mus.*, 8, p. 246, 1885—Fort Chima and Davis Inlet, Ungava; Cory, *Bds. W. Ind.*, p. 233, 1889—New Providence, Bahama Islands, and Jamaica; Sharpe, *Cat. Bds. Brit. Mus.*, 24, pp. 394, 757, 1896—part, eastern North America, Bermuda Islands, Pará (Cajútuba), Bahía, British Guiana, etc.; (?) Winge, *Medd. Grøn.*, 21, p. 160, 1898—Fiskenaes, Greenland; Howe, *Auk*, 18, p. 158, map, 1901—part, east of Hudson Bay; Clark, *Proc. Bost. Soc. N. H.*, 32, p. 250, 1905—Barbados (ex Feilden) and Grenada (ex British Museum); Ihering, *Cat. Faun. Braz.*, 1, p. 50, 1907—Pará and Bahía; Carriker, *Ann. Carnegie Mus.*, 6, p. 418, 1910—Alajuela, Costa Rica; Snethlage, *Bol. Mus. Goeldi*, 8, p. 88, 1914—Marajó (Pacoval, Magoary), Brazil.

Limnodromus griseus griseus Ridgway, *Bull. U. S. Nat. Mus.*, 50, (8), p. 197, 1919 (monog., full bibliog., in part); Bent, *l.c.*, 142, p. 106, 1927 (life hist.; range in part); Hellmayr, *Field Mus. Nat. Hist.*, *Zool. Ser.*, 12, p. 493, 1929—Mangunça Island, Maranhão, Brazil (March); Bradlee, *Proc. Bost. Soc. N. H.*, 39, p. 317, 1931—Bermuda Islands (autumn visitor); Griscom, *Bull. Mus. Comp. Zool.*, 72, p. 322, 1932—Permé, Panama; Rowan, *Auk*, 49, pp. 23, 26, pls. 2, 3, 1932 (char.; disc.; range); Peters, *Bds. World*, 2, p. 272, 1934 (range in part); Belcher and Smooker, *Ibis*, 1935, p. 291—Trinidad and Tobago (winter visitor); Griscom, *Bull. Mus. Comp. Zool.*, 78, p. 307, 1935—Canal Zone and Permé, Panama; Pinto, *Rev. Mus. Paul.*, 22, p. 137, 1938—Pará to Bahía; Dickey and van Rossem, *Field Mus. Nat. Hist.*, *Zool. Ser.*, 23, p. 177, 1938—Puerto del Triunfo, El Salvador (Dec. 31, Jan. 16); Swenk, *Nebraska Bd. Review*, 8, p. 63, 1940—Nebraska (status; tax.); Conover, *Auk*, 58, p. 380, 1941 (char.; range).

Range.—Breeding grounds unknown¹ (nests probably east of Hudson's Bay in the interior of Ungava and the Labrador Peninsula); on migration chiefly in the Atlantic states, but also occurring in Ontario (Toronto) and California; winters in the West Indies and south through Central America, the Guianas, and eastern Brazil as far south as Bahía; (?) accidental in Greenland (Fiskenaes).

¹ There has recently been discovered in the collections of the United States National Museum, an adult specimen of *Limnodromus griseus*, taken at Fort Chimo, Quebec, on June 10, 1883. The specimen is in breeding dress and is said to be typical of the eastern race (cf. J. W. Aldrich, *Auk*, 65, p. 285, 1948).

Field Museum Collection.—97: Nova Scotia (Barrington, 2; Shelburne, 1); Massachusetts (Monomoy Island, 6; Chatham, 1; Great Island, 2); Connecticut (Grove Beach, 2; Guilford, 1; Madison, 1); North Carolina (New Inlet, Dare County, 6; Bodie Island, Dare County, 15; Pea Island, 32; Cape Hatteras, 2); South Carolina (Copahee Sound, Charleston County, 2; Sullavan's Island, Beaufort County, 1; Dewees Island, Charleston County, 2; Mount Pleasant, 6); Georgia (Chatham County, 1); Florida (Amelie Island, 2); California (Motordrome, Los Angeles County, 5); Bahama Islands (Great Inagua, 2; Andros Island, 1); Virgin Islands (St. Croix, 2); Brazil (Mangunça Island, Maranhão, 2).

Conover Collection.—19: Massachusetts (East Orleans, Barnstable County, 10); New York (Cayuga Lake, 1); South Carolina (Copahee Sound, 3); Florida (Amelie Island, 2); Virgin Islands (St. Croix, 2); Colombia (Pizarro, Choco, 1).

Genus CAPELLA Frenzel

Capella Frenzel, *Beschr. Vögel und Eyer* Wittenb., p. 58, 1801—type, by monotypy, *Scolopax coelestis* Frenzel=*Scolopax gallinago* Linnaeus.

Gallinago Koch, *Syst. Baier. Zool.*, p. 312, 1816—type, by tautonymy, *Gallinago media* Koch=*Scolopax gallinago* Linnaeus.

Telmatias Boie, *Isis*, 1826, col. 980—type, by virtual monotypy, *Scolopax gallinago* Linnaeus.

Xylocota Bonaparte, *Icon. Fauna Ital.*, fasc. 25, sig. 127, p. [2], 1839—type, by orig. desig., *Scolopax paludosa* Gmelin=*Scolopax undulata* Boddaert.

Homoptilura G. R. Gray, *List Gen. Bds.*, p. 78, 1840—type, by orig. desig., *Scolopax undulata* Boddaert.

Macrodura Mathews, *Bds. Australia*, 3, (3), p. 294 (in text), Aug. 18, 1913—type, by orig. desig., *Gallinago nobilis* Sclater.

Odurella Mathews, *Bds. Australia*, 3, (3), p. 294 (in text), Aug. 18, 1913—type, by orig. desig., *Scolopax braziliensis* Swainson=*Scolopax paraguaiae* Vieillot.

Capella media (Latham). GREAT SNIPE.

Scolopax media Latham, *Gen. Syn. Bds.*, Suppl., 1, p. 292, 1787—based on "Great Snipe" Latham, *Gen. Syn. Bds.*, 3, (1), p. 133, Lancashire, England.

Scolopax major Gmelin, *Syst. Nat.*, 1, (2), p. 661, 1789—based on Latham (*Gen. Syn. Bds.*, 3, p. 133), Frisch (*Vorst. Vög. Deuts.*, pl. 228), etc., England, Germany, and northern Siberia.

Scolopax leucurus Swainson, in Swainson and Richardson, *Fauna Bor.-Amer.*, 2, "1831," p. 501, Feb., 1832—Hudson Bay (type now in British Museum).

Gallinago major Sharpe, *Cat. Bds. Brit. Mus.*, 24, p. 626, 1896 (monog.); Coues, *Auk*, 14, p. 209, 1897—Hudson Bay (ex Sharpe).

Gallinago media Ridgway, Bull. U. S. Nat. Mus., 50, (8), p. 161, 1919 (monog.; full bibliog.).

Capella media A. Meinertzhagen, Ibis, 1926, p. 490 (monog.); Bent, Bull. U. S. Nat. Mus., 142, p. 98, 1927 (life hist.); Peters, Bds. World, 2, p. 275, 1934 (range).

Range.—Breeds in northern Europe and northern Asia from northern Norway, southern Finland, the White Sea and the lower Yenesei south to Denmark, East Prussia, Poland, Bessarabia, the Kirghiz Steppes, and the Altai; winters in Africa; accidental in Canada (Hudson Bay).¹

Capella gallinago faeroeensis (C. L. Brehm).² FAROE SNIPE.

Telmatias Faeroeensis C. L. Brehm, Handb. Naturg. Vög. Deuts., p. 617, 1831—Färoe Islands (type in Tring Collection [cf. Hartert, Nov. Zool., 25, p. 57, 1918], now in the American Museum of Natural History, New York).

Gallinago media (not *Scolopax media* Latham) Reinhardt, Vidensk. Medd. Naturhist. Foren., 1853, p. 83—Greenland; idem, Ibis, 1861, p. 11—Greenland.

(?) *Gallinago russata* Gould, Bds. Great Britain, 4, text to pl. 79, 1863—Dartmoor, England (type in British Museum; cf. A. Meinertzhagen, Ibis, 1926, p. 490).

Gallinago scolopacina Bonap. *typica* Winge, Medd. Grøn., 21, p. 175, 1898—Greenland (Nanortalik, Sept. 6, 1840; Fiskenaes, Oct., 1845); Helms, Dansk. Orn. Foren. Tidsskr., 11, p. 173, 1917—Angmagssalik, East Greenland (April 30, May 15).

Gallinago gallinago (not *Scolopax gallinago* Linnaeus) Ridgway, Bull. U. S. Nat. Mus., 50, (8), p. 165, 1919—part, Iceland, Faroes, Greenland, and Bermudas.

Capella gallinago faeroeensis A. Meinertzhagen, Ibis, 1926, p. 489 (crit.; range); Peters, Bds. World, 2, p. 276, 1934 (range); Hørring and Salomonsen, Medd. Grøn., 131, No. 5, p. 42, 1941—Angmagssalik, eastern Greenland.

Capella gallinago gallinago Bent, Bull. U. S. Nat. Mus., 142, p. 78, 1927 (life hist.); (?) Hørring and Salomonsen, Medd. Grøn., 131, No. 5, p. 43, 1941—Angmagssalik, eastern Greenland.

¹ The claim of the Great Snipe to a place in the American fauna rests on a specimen, the type of *S. leucurus*, obtained from the Hudson's Bay Company in Canada many years ago and now in the collection of the British Museum.

² *Capella gallinago faeroeensis* (C. L. Brehm) differs from *C. g. gallinago* (Linnaeus), of Europe and Asia, by more reddish coloration; the black portions on back, scapulars, and tertials being more profusely speckled with brighter tawny; the lateral edges to the scapulars narrower and more deeply ochraceous; the foreneck and breast darker, more rufescent; the dusky stripes on lower throat evanescent.

There seems little doubt that the specimens taken in Greenland and Bermuda are referable to *C. g. faeroeensis* rather than to *C. g. gallinago*.

Range.—Breeds in Iceland and the Färoes; occasional in autumn and winter in the British Isles; casual in Greenland; (?)accidental in Bermuda Islands (Dec. 24 and 29, 1847).¹

**Capella gallinago delicata* (Ord). WILSON'S SNIPE.²

Scolopax delicata Ord, in reprint, Wilson, Amer. Orn., 9, p. cexviii, 1825—Pennsylvania.

Scolopax Wilsonii Temminck, Nouv. Rec. Pl. Col., livr. 68, text to pl. 403, p. [2], note, Sept. 16, 1826—based on *Scolopax gallinago* Wilson, Amer. Orn., 6, p. 18, pl. 47, fig. 1, Pennsylvania; Jardine, Ann. Mag. Nat. Hist., 20, p. 375, 1847—Tobago (Oct. to Jan.).

Scolopax trachydactyla Wagler, Isis, 1831, col. 521—Mexico (type in Munich Museum examined).³

Scolopax fasciolata Wagler, Isis, 1831, col. 522 (in text)—Mexico (type no longer extant).⁴

Scolopax drummondii Swainson, in Swainson and Richardson, Faun. Bor.-Amer., 2, p. 400, Feb., 1832—Rocky Mountains and Fur Countries (location of type unknown).

Scolopax douglasii Swainson, in Swainson and Richardson, Faun. Bor.-Amer., 2, p. 400 (note), Feb., 1832—Columbia River (type in collection of W. Swainson, now in University Museum, Cambridge, Engl.).

Scolopax americanus Hadfield, Zoologist, 21, p. 8446, 1863—new name for *Scolopax wilsonii* Temminck.

Gallinago wilsoni(i) Schlegel, Mus. Pays-Bas, livr. 5, Scolopaces, p. 6, 1864—Labrador, Philadelphia, Wisconsin, Costa Rica, and Mexico (crit.);

¹ The inclusion of one of the European races in the fauna of the Bermudas (cf. *Gallinago media* Reid, Bull. U. S. Nat. Mus., 25, p. 233, 1884, and *Capella gallinago* Bradlee and Mowbray, Proc. Bost. Soc. N. H., 39, p. 316, 1931) rests on the taking by Wedderburn of two specimens in Pembroke Marsh on Dec. 24 and 29, 1847, respectively. Both were said to possess fourteen tail-feathers, but Hurdis (Rough Notes and Memoranda Nat. Hist. Bermudas, pp. 55-56, 1897), who examined one of Wedderburn's specimens, found it had only eleven! From this meagre information it seems impossible to allocate the record with any degree of finality.

² Wilson's Snipe, though generally recognizable without difficulty by more heavily barred axillaries, transverse rather than longitudinal pectoral markings, shorter bill, narrower outer rectrices, and sixteen instead of fourteen tail-feathers, is so closely approached by certain European individuals, as pointed out by Seebohm (Geog. Distr. Charad., p. 487) and Hartert (Vög. Palae. Fauna, 2, p. 1660, 1921), that its conspecific relationship to *C. gallinago* can hardly be questioned.

³ The type, an unsexed adult (wing, 131; tail, 65; bill, 63 $\frac{3}{4}$), agrees very well with specimens from the United States.

⁴ The specimen, which formed the basis for the tentatively proposed name *S. fasciolata* and which, according to Wagler, was in poor condition, no longer exists in the Munich Collection. It was stated to differ from the type of *S. trachydactyla* by longer wings, a brown tip to the white exterior margin of the outermost primary, blacker upper back, and slenderer, longer claws. These divergencies are of little consequence in Wilson's Snipe, the only species of Snipe occurring in Mexico, and were probably of an individual nature.

- Léotaud, Ois. Trinidad, p. 484, 1866—Trinidad; Sclater and Salvin, Proc. Zool. Soc. Lond., 1879, p. 547—Medellin, Colombia; Reinhardt, Vidensk. Medd. Naturhist. Foren., 1881, p. 186—Niakornat, Greenland (spring, 1877); Reid, Bull. U. S. Nat. Mus., 25, p. 232, 1884—Bermuda Islands.

- Capella gallinago delicata* Bent, Bull. U. S. Nat. Mus., 142, p. 81, 1927 (life hist.); Peters, Bull. Mus. Comp. Zool., 69, p. 132, 1929—Corn Islands, Caribbean Sea; Darlington, l.c., 71, p. 376, 1931—Sevillano (Oct. 20), Rio Frio (Nov.), and Ciénaga (Nov., Feb., March), Magdalena, Colombia;

Wolfe, Condor, 33, p. 52, 1931—Utah (nesting habits); (?)Hørring and Salomonsen, Medd. Grøn., 131, No. 5, p. 40, 1941—Greenland.

Range.—Breeds from western Alaska, northern Yukon, northern Mackenzie, northern Manitoba, Ungava, and Newfoundland south to southern California, northern Nevada, southern Colorado, northern Iowa, northern Indiana, Ontario, and northwestern Pennsylvania; winters from the southern parts of its breeding range south through Central America and the West Indies to Colombia, Venezuela (in the states of Tachira, Mérida, and Zulia), and rarely to Tobago, Trinidad, and the Guianas;¹ accidental in Greenland (Niakornat), the Bermudas, and the Island of Hawaii (Naalehu, Kau).

Field Museum Collection.—165: Alaska (St. Michaels, 2; Bethel, 1; Bluff City, 1; Yukon River, 2; Tocatna Falls, 1); British Columbia (Graham Island, 1; Okanagan, 1); Oregon (Salem, 1); Montana (Bozeman, 2); Idaho (Couer d'Alene, 1); North Dakota (Rolette County, 1; Stump Lake, 1; Towner County, 4); Iowa (Burlington, 1); Wisconsin (Beaver Dam, 13; Delavan, 1); Illinois (Worth, 3); Indiana (Liverpool, 1); Oklahoma (Dodge, 1); Colorado (Cochetopa, 1; Fort Lyon, 3); Texas (Brownsville, 3); New Mexico (Reserve, 1); Arizona (Tucson, 1); California (Monterey County, 1; Thermal, 1; Corona, 1; Paradise, 1; Sisson, 1; Motordrome, Los Angeles County, 1; Witch Creek, 2); Ontario (Saint Clair Junction, 1); Quebec (Magdalen Islands, 3); Maine (Lincoln, 2); Connecticut (East Hartford, 9; North Haven, 3; Woodbridge, 2; New Haven, 1; New Haven County, 16; Hamden, 29); New York (Cayuga Lake, 3; Suffolk County, 1); North Carolina, Dare County (Bodie Island, 9; Pea Island, 8); Georgia (Roswell, 1); Florida (Anclote, 1; Amelie Island, 4; Tallahassee, 1; Santa Rosa Island, 1; West Jupiter, 1; Wilson, 1; Jupiter, 1); Bahama Islands (Andros, 1; Great Inagua, 1); Virgin Islands (Saint Croix, 1); Lesser Antilles (Martinique, 1); Mexico (Tampico, 1); Guatemala (Santa Elena, 1); Costa Rica (Limón, 1); Venezuela (Tachira, Colon, 1; Encontrados, Zulia, 2; Valle, 1).

Conover Collection.—28: Alaska (Igiak Bay, Bering Sea, 1); Yukon Territory (Marsh Lake, 2); California (Yermo, 1); Utah (Brigham, 6); Nebraska (Wood Lake, Cherry County, 2); Illinois

¹ Records of Wilson's Snipe from Brazil are due to misidentification. The specimens in the British Museum from Rio Negro, Bahia, and Rio de Janeiro all prove to be unequivocally *paraguaiæ*, whereas the bird secured by Kappler on the Maroni River, Surinam, is just as decidedly *delicata*. Wilson's Snipe must, therefore, be struck from the list of Brazilian birds.

(Wheaton, 5; Hyde Lake, Cook County, 2; Homewood, 1); Mexico (San José del Cabo, Lower California, 3); Colombia (Popayán, Cauca, 3); Venezuela (Rio Cogollo, Perija, 2).

****Capella paraguaiae*¹ *paraguaiae* (Vieillot). PARAGUAYAN SNIPE.**

Scolopax paraguaiae Vieillot, Nouv. Dict. Hist. Nat., nouv. éd., 3, p. 356, 1816—based on "Becasina No 1," Azara, No. 387, Paraguay.

Scolopax frenata (Illiger, MS.) Lichtenstein, Verz. Doubl. Berliner Mus., p. 75, 1823—based on "Becassime" (sic) Azara, No. 387; Wied, Beitr. Naturg. Svensk. Vetensk. Akad. Handl., (3), 23, p. 72, 1945—Bolivia, El Beni (El Consuelo; Bresta).

Capella brasiliensis Chapman, Bull. Amer. Mus. N. H., 63, p. 63, 1931—Arabupu, Roraima, Venezuela.

Range.—Island of Trinidad and South America (east of the Andes) from Colombia (Villavicencio), Venezuela, and the Guianas through Peru (two records San Martín, Moyobamba, and La Merced, Chanchamayo, Dept. Junín), Bolivia, Brazil, and Paraguay to Uruguay and the plains of eastern Argentina south to Córdoba and Buenos Aires.¹

¹ Birds from Guiana, Venezuela, and various parts of Brazil agree perfectly with a topotypical series from Paraguay. Two breeding specimens from Uruguay (Soriano) as well as single individuals from Santa Fé and Entre Ríos are likewise similar. It is also the present form which, according to Dabbene (in litt.), breeds in the province of Buenos Aires. The length of the bill varies considerably, irrespective of locality. Forty-nine additional specimens examined.

Field Museum Collection.—26: Colombia (Villavicencio, Meta, 1); Venezuela (Maracay, Aragua, 1); British Guiana (Buxton, 8); Dutch Guiana (Paramaribo, 2); Brazil (Bõa Vista, Rio Branco, 1; Sierra da Lua, Rio Branco, 1; Itacoatiara, Amazonas, 1; São Bento, Maranhão, 2; São Marcello, Rio Preto, Bahía, 4); Peru (Moyobamba, San Martín, 1); Uruguay (Polanco, Minas, 1; Rio Cebollati, Minas, 1; San Vicente, Rocha, 1; Arazati, San José, 1).

Conover Collection.—43: British Guiana (Buxton, Demerara, 3); Brazil (Itacoatiara, Rio Amazonas, 8; Pinhel, Rio Tapajoz, 1; Labrea, Rio Purus, 2; Buenos Aires, Rio Acara, 1; near Cavalcanti, Goyáz, 4); Bolivia (Buena Vista, Santa Cruz, 5); Paraguay (30 km. west of Puerto Casado, 1; Hòrqueta, 6; Villa Rica, 12).

****Capella paraguaiae magellanica* (King).¹ MAGELLANIC SNIPE.**

Scolopax magellanicus King, Zool. Journ., 4, No. 13, p. 93, July, 1828—Straits of Magellan (type evidently lost).

Scolopax (Telmatias) paraguaiae (not of Vieillot) Darwin, Zool. Beagle, 3, Birds, p. 131, 1841—part, Valparaíso, Chile.

Scolopax (Telmetias) magellanicus Darwin, Zool. Beagle, 3, Birds, p. 131, 1841—Maldonado (Uruguay) and East Falkland (crit.).

Scolopax paraguaiae Fraser, Proc. Zool. Soc. Lond., 11, p. 118, 1843—Chile; Yarrell, l.c., 15, p. 54, 1847—Chile (egg descr.); Cassin, in Gilliss, U. S. Astr. Exp., 2, p. 194, 1855—Chile.

Scolopax frenata (not of Lichtenstein) Tschudi, Peru, Reiseskizzen, 1, p. 35, 1846—Valparaíso, Chile; Burmeister, Journ. Orn., 8, p. 261, 1860—part, Mendoza.

Gallinago magellanica Des Murs, in Gay, Hist. Fís. Pol. Chile, Zool., 1, p. 427, 1847 (ex King); Sclater, Proc. Zool. Soc. Lond., 28, p. 387, 1860—Berkeley Sound, Falkland Islands; Abbott, Ibis, 1861, p. 156—East Falkland Islands (breeding).

*Gallinago paraguaiae*² Des Murs, in Gay, Hist. Fís. Pol. Chile, Zool., 1, p. 426, 1847—Chile; Boeck, Naumannia, 1855, p. 510—Valdivia, Chile; Germain, Proc. Bost. Soc. N. H., 7, p. 313, 1860—Santiago (breeding habits); Schlegel, Mus. Pays-Bas, livr. 6, No. 27, Scolopaces, p. 11, 1864—Chile, Arique (Valdivia), Santiago, and East Falkland (crit.); Sclater, Proc. Zool. Soc. Lond., 1867, pp. 332, 339—Chile; Philippi, Anal.

¹ *Capella paraguaiae magellanica* (King) differs from the nominate race in less blackish dorsal surface caused by the greater amount of buff markings; more deeply buff foreneck and chest, with less prominent blackish spotting; deeper rufous tail; and narrower outermost rectrix.

We are unable to discover any constant difference between specimens from the Straits of Magellan (*magellanica*) and those from Chile (*chilensis*), dimensions as well as the proportion of the tertials being extremely variable within the same locality.

² Various spelled *paraguaiae*, *paraguayae*, *paraguiae*, *paraguia*, and (lapse) *parguiae*.

Univ. Chile, 31, p. 277, 1868—Chile; Sclater and Salvin, Ibis, 1868, p. 189—Sandy Point, Straits of Magellan; *idem*, Proc. Zool. Soc. Lond., 1868, p. 144—Conchitas, Buenos Aires (crit.); Reed, Anal. Gallinago paraguayae magellanica Deichler, Journ. Orn., 45, p. 154, 1897; Schalow, Zool. Jahrb., Suppl., 4, p. 661, 1898—Seño Almirantazgo, Tierra del Fuego, and Ushuwaia, Beagle Channel.

Gallinago paraguayae chilensis Deichler, Journ. Orn., 45, p. 154, 1897; Schalow, Zool. Jahrb., Suppl., 4, p. 661, 1898—La Serena, Coquimbo, and Punta Arenas, Straits of Magellan.

Capella paraguayae Paessler, Journ. Orn., 70, p. 445, 1922—Coronel, Chile (habits); Peters, Bull. Mus. Comp. Zool., 65, p. 297, 1923—Huanuluan, Rio Negro (breeding); Wetmore, Bull. U. S. Nat. Mus., 133, p. 161, 1926—Buenos Aires (Berazategui, etc.), Neuquén (Zapala), and Mendoza (Tunuyán) (crit.); idem, Univ. Calif. Pub. Zool., 24, p. 428, 1926—Paja Alta, Rio Negro, and Lago Fetalaufquen, Chubut; Bennett, Ibis, 1926, p. 324—Falkland Islands.

Capella paraguayae paraguayae A. Meinertzhagen, Ibis, 1926, p. 506 (monog.); Reynolds, l.c., 1932, p. 38—Snipe and Woodcock Islands, Beagle Channel.

Capella paraguayae magellanica Hellmayr, Field Mus. Nat. Hist., Zool. Ser., 19, p. 387, 1932—Atacama to Straits of Magellan (crit.); Peters, Bds. World, 2, p. 277, 1934 (range); Reynolds, El Hornero, 5, p. 352, 1934—Isla de los Conejos, Tierra del Fuego; Castellanos, l.c., 6, p. 30, 1935—Isla de Año Nuevo, Cape Horn region; Reynolds, Ibis, 1935, p. 89—Guffern Island, Cape Horn region; Bullock, Rev. Chil. Hist. Nat., 39, p. 247, pl. 16, 1935—Isla la Mocha (nesting); idem, l.c., 41, p. 202, col. pl. 8, fig. 2 (egg), 1937.

Range.—Breeds in southern South America from Chile (most northerly recorded locality Copiapó, Atacama, but northern limit of breeding area undetermined) and southern Argentina (Gobernación del Rio Negro) south to Tierra del Fuego and the Falkland Islands; some migrating in winter north to Mendoza, province of Buenos Aires, and Uruguay.¹

Field Museum Collection.—6: Chile (Curacautín, Cautín, 1; Gualletue Lake, Cautín, 2; Quellon, Chiloé Island, 2; Melinka, Ascension Island, 1).

Conover Collection.—24: Chile (Ramadilla, Atacama, 1; Lautaro, Cautín, 5; Santiago, Santiago, 1; Angol, Bio Bio, 1; Quellon, Chiloé Island, 3; Cucão, Chiloé Island, 4; Casa Richards, Rio Nirehuau, 4; Rio Ciaiike, Magallanes, 2); Argentina (Tunuyán, Mendoza, 2; Cambacerés, Buenos Aires, 1).

¹ Unequivocal winter specimens of the Magellanic Snipe have been examined by us from Uruguay (Montevideo, April; Maldonado, July), Buenos Aires (Cambacerés, June; Est. Espartillar, Apr., July; Lomas de Zamora, May; Los Yngleses, Ajó, May), and Mendoza (Tunuyán, June).

Fifty-two specimens examined.

***Capella paraguaiae andina** (Taczanowski).¹ ANDEAN SNIPE.

Gallinago andina Taczanowski, Proc. Zool. Soc. Lond., 1874, p. 561—Lake Junín, Peru (type in Warsaw Museum; cf. Sztolcman and Domaniewski, Ann. Zool. Mus. Pol. Hist. Nat., 6, p. 103, 1927); Sclater and Salvin, Proc. Zool. Soc. Lond., 1876, pp. 17, 19—Tinta, Cuzco, Peru (crit.); Taczanowski, l.c., 1880, p. 213—Cutervo, Peru; idem, Orn. Pér., 3, p. 375, 1886—Peru (Lake Junín, Cutervo, Tinta); Salvin, Nov. Zool., 2, p. 22, 1895—near Cajamarca (alt. 10,000 ft.), Peru; Berlepsch and Stolzmann, Proc. Zool. Soc. Lond., 1902, (2), p. 53—Ingapirca, Junín, Peru; Chubb, Ibis, 1919, p. 268—south of Huamachuco, Peru.

Scolopax frenata (not of Lichtenstein; 1823) Tschudi, Arch. Naturg., 10, (1), p. 312, 1844—Peru; idem, Unters. Faun. Peru., Orn., p. 299, 1846—sierra and puna regions.

Gallinago frenata Sclater and Salvin, Proc. Zool. Soc. Lond., 1869, p. 156—Tungasuca (near Tinta), Cuzco, Peru; Sharpe, Cat. Bds. Brit. Mus., 24, p. 646, 1896—part, spec. a', Sacaya, Tarapacá (spec. examined).

Scolopax frenata andina Seebohm, Ibis, 1886, p. 138 (crit.); idem, Geog. Distr. Charad., p. 497, 1887—Peru (crit.).

Gallinago paraguaiae (not *Scolopax paraguaiae* Vieillot) Sclater, Proc. Zool. Soc. Lond., 1891, p. 137—Sacaya, Tarapacá, Chile; Lane, Ibis, 1897, p. 309—part, Sacaya.

[*Gallinago frenata*] subsp. a. *Gallinago andina* Sharpe, Cat. Bds. Brit. Mus., 24, p. 648, 1896—Peru (Junín, Tungasuca).

Gallinago braziliensis andina Chapman, Bull. U. S. Nat. Mus., 117, p. 50; 1921—La Raya and Ttica-Ttica, Peru.

Capella paraguaiae paraguaiae A. Meinertzhagen, Ibis, 1926, p. 506—part, Sacaya, Chile.

Capella paraguaiae andina A. Meinertzhagen, Ibis, 1926, p. 508—Peru (crit.); Zimmer, Field Mus. Nat. Hist., Zool. Ser., 17, p. 255, 1930—mountains near Huánuco, Peru; Hellmayr, l.c., 19, p. 390, 1932—Sacaya, Tarapacá, Chile (crit.); Peters, Bds. World, 2, p. 277, 1934 (range); Zotta, El Hornero, 6, p. 289, 1936—Lago Colorado, Catamarca (alt. 3,400 m.), Argentina; Morrison, Ibis, 1939, pp. 465, 647—Huancavelica and Lake Junín, Peru.

Capella paraguaiae Budin, El Hornero, 4, p. 404, 1931—Rio Humahuaca and Maimará, Sierra del Zenta, Jujuy.

Range.—Puna zones of Peru, extreme northern Chile (Tarapacá), Bolivia, and western Argentina (Sierra del Zenta, Jujuy; Lago Colorado, Catamarca).

Field Museum Collection.—6: Peru (Leimebamba, Amazonas, 1; Junín, Junín, 2); Bolivia (Colomi, Cochabamba, 3).

¹ *Capella paraguaiae andina* (Taczanowski): Similar to *C. p. magellanica*, but with decidedly shorter wings and tarsi, and shorter as well as slenderer bill. Wing, 115–117, (female) 116–121; tarsus, 25–28; bill, 48–56, (female) 53–61. Two birds from Tarapacá (Sacaya) are exactly like the Peruvian series.

Additional material examined.—Peru: near Cajamarca, 1; eight miles south of Huamachuco, 1; Lake Junín, 1; Maraynioc, 1; Huancavelica, 8; Tungasuca, 1.—Chile: Sacaya, Tarapacá, 2.

Conover Collection.—10: Peru (Huánuco Mountains, 2; Puno, Puno, 1; Sorapa, Rio Ilave, Puno, 1; Huacullani, Puno, 1); Bolivia (Colomi, Cochabamba, 1; Tiraque, Cochabamba, 1; Cerro Juna, Cochabamba, 2; Laguna de Taxara, Tarija, 1).

****Capella paraguaiae innotata* Hellmayr.¹ ANTOFAGASTA SNIPE.**

Capella paraguaiae innotata Hellmayr, Field Mus. Nat. Hist., Zool. Ser., 19, p. 389, June 13, 1932—Rio Loa, Antofagasta, Chile (type in Field Museum of Natural History); Peters, Bds. World, 2, p. 277, 1934 (range).

Gallinago paraguaiae (not *Scolopax paraguaiae* Vieillot) Philippi, Reise Wüste Atacama, p. 164, 1860—Tilopozo, Salar de Atacama, Antofagasta; idem, Ornith., 4, p. 160, 1888—Tilopozo.

Range.—Puna zone of Antofagasta (Rio Loa, Tilopozo), northern Chile.

Field Museum Collection.—1: Chile (Rio Loa, Antofagasta, 1).

Conover Collection.—1: Chile (Rio Loa, Antofagasta, 1).

****Capella nobilis* (Sclater). NOBLE SNIPE.**

Gallinago nobilis Sclater, Proc. Zool. Soc. Lond., 24, p. 31, June 16, 1856—Bogotá, Colombia (type in British Museum); Schlegel, Mus. Pays-Bas, livr. 6, p. 9, 1864—Bogotá (crit.); Sclater and Salvin, Exot. Orn., p. 196, pl. 98, 1869—Bogotá (monog.); Pelzeln, Ibis, 1875, p. 332—"Spanish Guiana"—Bogotá (spec. examined); Sclater and Salvin, Proc. Zool. Soc. Lond., 1879, p. 547—Retiro, Antioquia, Colombia (eggs descr.); Berlepsch and Taczanowski, l.c., 1884, p. 313—Yoyacsi (9,000 ft.), Ecuador; Sharpe, Cat. Bds. Brit. Mus., 24, p. 648, 1896—Colombia (Retiro, Bogotá) and Ecuador (Maraviña); Salvadori and Festa, Boll. Mus. Zool. Torino, 15, No. 368, p. 45, 1900—Páramos of Cañar, El Troje, and Chaupi, Ecuador; Rhoads, Auk, 29, p. 143, 1912—Páramo of Pichincha, Ecuador; Chapman, Bull. Amer. Mus. N. H., 36, p. 225, 1917—Santa Isabel (12,700 ft.), Valle de las Pappas, and Chipaque (10,000 ft.), Colombia; Lönnberg and Rendahl, Ark. Zool., 14, No. 25, p. 25, 1922—Tumbaco, north side of Guamini Road to Papallacta, Pichincha, and Cotopaxi, Ecuador; Osgood and Conover, Field Mus. Nat. Hist., Zool. Ser., 12, p. 43, 1922—Páramo de Tamá, Venezuela; Chapman, Bull. Amer. Mus. N. H., 55, p. 200, 1926—Hacienda Garzón, Cumbaya, El Paso (near Nabon), and Yanacocha, Ecuador.

¹*Capella paraguaiae innotata* Hellmayr: Similar to *C. p. andina* in proportions, but distinguished by nearly plain white (not broadly black-barred) under wing coverts and by having all of the primaries (not only the two outermost) exteriorly and apically edged with hoary white. Wing, (males) 118; bill, 53, 58.

By the almost unmarked under wing coverts, the two specimens from Rio Loa may readily be told from any in a series of twenty *andina*, whereas the white markings on the primaries are found to the same extent only in a bird from Tungasuca, Peru.

"*Gallinago nobilis (granadensis* Bp. Mus. Brit.)" Bonaparte, Compt. Rend. Acad. Sci. Paris, 43, p. 579, 1856.

Scolopax nobilis Seebohm, Ibis, 1886, p. 133 (crit.); idem, Geog. Distr. Charad., p. 498, 1887 (crit.).

Capella nobilis A. Meinertzhagen, Ibis, 1926, p. 503 (monog.); Berlioz, Bull. Mus. Hist. Nat. Paris, (2), 4, p. 621, 1932—Las Palmas, Azuay, Ecuador; Peters, Bds. World, 2, p. 277, 1934 (range).

Range.—Páramo zone of western Venezuela; the central and eastern Andes of Colombia and the Temperate zone of Ecuador.

Field Museum Collection.—6: Venezuela (Tachíra, Páramo de Tamá, 4); Colombia (unspecified, 2).

Conover Collection.—13: Colombia (El Tambo, Cauca, 6); Ecuador (Leon, Cerro Cotopaxi, 2; Santiago, Volcan Sangay, Province of Zamora, 5).

***Capella undulata undulata* (Boddaert). GUIANAN GIANT SNIPE.**

Scolopax undulata Boddaert, Tabl. Pl. Enl., p. 54, 1783—based on "Bécasse des Savanes, de Cayenne" Daubenton, Pl. Enl., pl. 895; Seebohm, Ibis, 1886, p. 131 (crit.); idem, Geog. Distr. Charad., p. 492, 1887—Guiana (crit.).

Scolopax paludosa Gmelin, Syst. Nat., 1, (2), p. 661, 1789—based on "Bécasse des Savanes" Daubenton, Pl. Enl., pl. 895, and Buffon, Hist. Nat. Ois., 7, p. 481, Cayenne; Cabanis, in Schomburgk, Reisen Brit. Guiana, 3, "1848," p. 758, 1849—marshy places near the coast.

Xylocota paludosa Bonaparte, Compt. Rend. Acad. Sci. Paris, 43, p. 579, 1856.

Gallinago paludosa Schlegel, Mus. Pays-Bas, livr. 6, p. 8, 1864—part, Cayenne (crit.).

Gallinago undulata Selater and Salvin, Exot. Orn., p. 196, 1869—Guiana; Salvin, Ibis, 1886, p. 179—Merumé Mountains and Roraima (3,500 ft.), British Guiana; Sharpe, Cat. Bds. Brit. Mus., 24, p. 659, 1896—same localities; Berlepsch, Nov. Zool., 15, p. 308, 1908—Cayenne.

Scolopax gigantea (not of Temminck) Pelzeln, Orn. Bras., 3, p. 312, 1870—part, upper Rio Branco, Brazil.¹

Homoptilura undulata undulata A. Meinertzhagen, Ibis, 1926, p. 511—French and British Guiana (crit.).

Homoptilura undulata Young, Ibis, 1928, p. 772—Blairmont, British Guiana.

Capella undulata Chapman, Bull. Amer. Mus. N. H., 63, p. 63, 1931—Arabupu and Paulo, Roraima, Venezuela.

Capella undulata undulata Peters, Bds. World, 2, p. 277, 1934 (range); Phelps, Bol. Soc. Venez. Cien. Nat., No. 36, p. 91, 1938—Mount Roraima, Venezuela.

¹ There is hardly any doubt that the Giant Snipe, whose nightly call-note was heard by Natterer when staying at the Forte do São Joaquin on the upper Rio Branco, pertained to the Guianan, and *not* to the South Brazilian form.

Range.—French and British Guiana and the adjacent parts of Brazil (upper Rio Branco) and Venezuela (Roraima).

****Capella undulata gigantea* (Temminck).¹ BRAZILIAN GIANT SNIPE.**

Scolopax gigantea (Natterer MS.) Temminck, Nouv. Rec. Pl. Col., livr. 68, pl. 403, Sept. 16, 1826—Brazil=State of São Paulo (type in Leyden Museum); Burmeister, Syst. Uebers. Th. Bras., 3, p. 376, 1856—Congonhas, Minas Geraes; Pelzeln, Orn. Bras., 3, p. 312, 1870—part, São Paulo (Itararé, Ypanemá, Murungaba), Paraná (Jaguaraíba), and Goyáz (Nos Puritis), Brazil.

"*Xylocola gigantea*, Natt. (*lacunosa* Licht.)" Bonaparte, Compt. Rend. Acad. Sci. Paris, 43, p. 579, 1856.

Gallinago gigantea Schlegel, Mus. Pays-Bas, livr. 6, p. 8, 1864—Brazil (crit.); Sclater and Salvin, Exot. Orn., p. 196, 1869—Brazil; Reinhardt, Vidensk. Medd. Naturhist. Foren., 1870, p. 39—Congonhas de Sabará, Minas Geraes (ex Burmeister); Boucard and Berlepsch, The Humming Bird, 2, p. 41, 1892—"Porto Real, Rio de Janeiro"; Allen, Bull. Amer. Mus. N. H., 5, p. 149, 1893—Chapada, Matto Grosso; Sharpe, Cat. Bds. Brit. Mus., 24, p. 658, 1896—Goyáz (Puritis), Paraguay (Villa Rica), and Buenos Aires; Ihering, Ann. Est. Rio Grande do Sul, 16, p. 151, 1899—Pedras Brancas; idem, Rev. Mus. Paul., 3, p. 440, 1899—São Paulo; idem, Cat. Faun. Braz., 1, p. 56, 1907—São Paulo (São Paulo, Penha, São Caetano) and Rio Grande do Sul (Porto Alegre); Dabbene, Anal. Mus. Nac. Buenos Aires, 18, p. 221, 1910—Chaco and Buenos Aires, Argentina; Chrostowski, Compt. Rend. Soc. Sci. Varsovie, 5, pp. 462, 492, 1912—Vera Guarany, Paraná.

Scolopax undulata gigantea Seebohm, Ibis, 1886, p. 131 (crit.); idem, Geog. Distr. Charad., p. 493, 1887—Brazil and Buenos Aires (crit.).

Homoptilura undulata gigantea A. Meinertzhagen, Ibis, 1926, p. 512 (monog.).

Capella gigantea Naumburg, Bull. Amer. Mus. N. H., 60, p. 82, 1930—Matto Grosso, Brazil.

Capella undulata gigantea Peters, Bds. World, 2, p. 277, 1934 (range); Pinto, Rev. Mus. Paul., 22, p. 139, 1938—São Paulo (Penha, Avaré, São Caetano) and Rio Grande do Sul (Porto Alegre).

Range.—Southern Brazil, from Minas Geraes (Congonhas), Goyáz (Nos Puritis), and Matto Grosso (Chapada) south to Rio Grande do Sul, and Paraguay (Villa Rica); allegedly also in parts of Argentina (Chaco and Buenos Aires).²

¹ *Capella undulata gigantea* (Temminck) differs from the nominate race by longer wings (170–180, against 155–165), longer, heavier bill (125–145, against 108–115), wider rufous edges to scapulars and interscapulars, and broader bars on under parts, with, however, the center of breast and abdomen unbarred.

Six additional specimens from southern Brazil (São Paulo, Paraná), one from Paraguay (Villa Rica) and one from "Buenos Aires" examined.

² The occurrence in Argentina is perhaps somewhat doubtful. No authentic example appears to exist in collections, and Venturi, who recorded it from the

Conover Collection.—4: Paraguay (Itape, 1; Molinasque, 1; Rio Tebicuary, 1; Horqueta, 1).

Genus CHUBBIA Mathews¹

Chubbia Mathews, Bds. Australia, 3, (3), p. 291 (in text), Aug. 18, 1913—type, by orig. desig., "*G. stricklandi* Gray"=*Scolopax stricklandii* G. R. Gray.

Homoscolopax Mathews, Bds. Australia, 3, (3), p. 291 (in text), Aug. 18, 1913—type, by orig. desig., *Gallinago imperialis* Sclater [and Salvin].

Chubbia imperialis (Sclater and Salvin).² IMPERIAL SNIPE.

Gallinago imperialis Sclater and Salvin, Proc. Zool. Soc. Lond., 1869, p. 419—Bogotá, Colombia (type in Salvin-Godman Collection, now in British Museum examined); iidem, Exot. Orn., p. 193, pl. 97, 1869—Bogotá (fig. of type); Sharpe, Cat. Bds. Brit. Mus., 24, p. 664, 1896—Bogotá.

Scolopax imperialis Seebohm, Ibis, 1886, p. 130 (crit.); idem, Geog. Distr. Charad., p. 491, 1887—Bogotá (crit.).

Homoscolopax imperialis A. Meinertzhagen, Ibis, 1926, p. 514—Bogotá (monog.).

Chubbia imperialis Peters, Bds. World, 2, p. 277, 1934 (range).

Range.—Colombia (known only from the unique type, a native Bogotá skin).

**Chubbia jamesoni* (Bonaparte). JAMESON'S SNIPE.

Xylocota jamesoni "Jard. et Bp." Bonaparte, Compt. Rend. Acad. Sci. Paris, 41, No. 17, p. 660, October, 1855—High Andes of Quito, Ecuador (cotypes originally in collection of Sir William Jardine, now in British Museum [ex Seebohm collection] and Liverpool Museum [ex Tristram collection] respectively);³ idem, l.c., 43, p. 579, 1856.

Gallinago sp. Sclater, Proc. Zool. Soc. Lond., 28, p. 82, 1860—Panza, Chimbo-razo, Ecuador.

Chaco as well as from Buenos Aires, evidently did not preserve any specimen. The origin of the bird in the British Museum, said to have been collected together with eggs by Mr. L. Hardy du Dréssent near Buenos Aires, is not established beyond doubt. It is certainly singular that this striking bird has never been obtained again in the well-explored region around the Argentine capital.

¹ Genus *Chubbia* Mathews: Like *Scolopax* in having the tarsus posteriorly covered with small hexagonal scales, but bill longer, tarsus much stouter, and tail composed of fourteen feathers.

² This remarkable bird is still known only from the type. Its differences from *C. jamesoni* have been well explained by Mrs. Meinertzhagen. We do not see any valid ground for its generic separation.

³ Cf. Seebohm (Geog. Distr. Charad., p. 490 [note], 1887) and Tristram (Cat. Coll. Tristram, p. 11, 1889).

Gallinago jamesoni Sclater and Salvin, Exot. Orn., p. 196, 1869—Ecuador; *idem*, Proc. Zool. Soc. Lond., 1879, p. 641—Cillutincara, Dept. La Paz, Bolivia; Taczanowski and Berlepsch, l.c., 1885, p. 112—Chimborazo, Ecuador; *idem*, Orn. Pér., 3, p. 376, 1886 (Peruvian localities); Sharpe, Cat. Bds. Brit. Mus., 24, p. 661, 1896—Colombia (Sierra Nevada), Ecuador (Andes of Quito, Panza), and Bolivia (Cillutincara); Salvadori and Festa, Boll. Mus. Zool. Torino, 15, No. 368, p. 45, 1900—Paredones and Mount Mirador (Huaca), Ecuador; Goodfellow, Ibis, 1902, p. 231—Lloa (11,500 ft.), Ecuador; Berlepsch and Stolzmann, Proc. Zool. Soc. Lond., 1902, (2), p. 53—Maraynioc (Pariayacu) and Maláo, Dept. Junín, Peru; Ménégau, Miss. Serv. Géogr. Armée Mes. Arc. Equat., 9, p. B. 9, 1911—Páramo of Pichincha; Chapman, Bull. Amer. Mus. N. H., 36, p. 225, 1917—Santa Isabel, Colombia; Chubb, Ibis, 1919, p. 268—Gualabamba (Chimborazo), Pichincha, and Corazón, Ecuador; Lönnberg and Rendahl, Ark. Zool., 14, No. 25, p. 25, 1922—Pichincha; Chapman, Bull. Amer. Mus. N. H., 55, p. 200, 1926—Mount Pichincha, Corazon, Mount Chimborazo, and Bestión, Ecuador.

Scolopax jamesoni Seeböhm, Ibis, 1886, p. 130 (crit.); *idem*, Geog. Distr. Charad., p. 489, 1887 (crit.).

Capella jamesoni Todd and Carriker, Ann. Carnegie Mus., 14, p. 184, 1922—Taquina, Santa Marta, Colombia; Darlington, Bull. Mus. Comp. Zool., 71, p. 376, 1931—Sierra Nevada of Santa Marta, Colombia.

Chubbia jamesoni A. Meinertzhagen, Ibis, 1926, p. 515—Colombia (Sierra Nevada), Venezuela, Ecuador to Bolivia (monog.; plumages); Peters, Bds. World, 2, p. 278, 1934 (range).

Chubbia jamesoni chapmani Moore, Proc. Biol. Soc. Wash., 50, p. 151, Sept. 10, 1937—Santa Isabel, Quindío Andes, Colombia (type in the American Museum of Natural History, New York).¹

Range.—Páramo zone of western Venezuela (Sierra of Mérida), Colombia (Santa Marta Mountains and central Andes), Ecuador, Peru, and Bolivia (Dept. La Paz).²

Field Museum Collection.—2: Ecuador (Llanganate, Tunguragua, 1; unspecified, 1).

¹ The variation in size seems too erratic to justify the segregation of *C. j. chapmani*, though birds from the central Andes of Colombia have, on average, longer bills, as may be gathered from the subjoined figures. No constant color-differences exist between specimens from so widely separated localities as northern Colombia (Sierra Nevada of Santa Marta) and Venezuela (Mérida) on one side and Bolivia on the other. Males: Sierra Nevada of Santa Marta, Colombia, 87; Cordillera of Mérida, Venezuela, 84; Ecuador (fourteen), 72–86; northern Peru (two), 77, 78; Maraynioc, Junín, Peru, 90½. Females: Santa Isabel, Colombia (three), 91–95½; Cordillera of Mérida, Venezuela, 85; Ecuador (six), 79–85; Malao, Junín, Peru, 91½; Bolivia (two), 88, 93.

² The large snipe observed (but not collected) by Lane at Huasco and Sacaya, Tarapacá, northern Chile, which he erroneously referred to the Patagonian *C. stricklandi* (Ibis, 1897, p. 310), might have been *C. jamesoni* or else an unknown species.

Conover Collection.—20: Venezuela (Paramo Frias, Merida, 2); Colombia (Nevada de Tolimo, 3); Ecuador (Pichincha, 3; Paramo del Pichincha, 9; Bosques Pichincha, 1; Cerro Guamani, 1); Bolivia (Cerro San Benito, Cochabamba, 1).

***Chubbia stricklandii** (G. R. Gray). STRICKLAND'S SNIPE.

Scolopax stricklandii G. R. Gray,¹ Zool. Voy. Erebus and Terror, 1, Birds, Part 8, pl. 23, April, 1845²—no locality stated (type, from Hermit Island, Cape Horn, in British Museum; cf. Sharpe, l.c., Part 22, p. 37, 1875); Seebohm, Ibis, 1886, p. 130 (crit.); idem, Geog. Distr. Charad., p. 488, 1887—Cape Horn to Chile (crit.).

Gallinago stricklandii(i) Des Murs, in Gay, Hist. Ffs. Pol. Chile, Zool., 1, p. 427, 1847—"Straits of Magellan and Tierra del Fuego" (ex Gray); Schlegel, Mus. Pays-Bas, livr. 6, p. 18, 1864 (crit.); Philippi, Anal. Univ. Chile, 31, p. 277, 1868—Straits of Magellan, Chiloé, and Valdivia, Chile; Sclater and Salvin, Exot. Orn., p. 196, 1869—Hermit Island, Tierra del Fuego (Ant. Exp.), Orange Bay (ex Peale), Straits of Magellan, and Valdivia (ex Philippi); Sharpe, Proc. Zool. Soc. Lond., 1881, p. 15—Swallow Bay, Straits of Magellan; Oustalet, Miss. Sci. Cap Horn, 6, p. B. 293, 1891—Hermit Island and Swallow Bay (ex Sharpe); Sharpe, Cat. Bds. Brit. Mus., 24, p. 660, 1896—Tierra del Fuego, Hermit Island (Martin's Cove), and Straits of Magellan (Swallow Bay, Puerto Bueno, Isthmus Bay); Salvadori, Ann. Mus. Civ. Stor. Nat. Genova, 40, p. 625, 1900—Punta Arenas, Straits of Magellan; Dabbene, Anal. Mus. Nac. Buenos Aires, 8, p. 377, 1902—Tierra del Fuego; idem, l.c., 18, p. 221, 1910—Tierra del Fuego; Scott and Sharpe, Rep. Princet. Univ. Exped. Patagonia, 2, Orn., p. 339, 1910 (descr.).

Scolopax meridionalis Peale, U. S. Expl. Exp., 8, p. 229, 1848—Orange Bay, Tierra del Fuego (type in United States National Museum); Cassin, l.c., 2nd ed., 8, p. 310, pl. 35, fig. 1, 1858—same locality.

Scolopax spectabilis Hartlaub, Naumannia, 3, p. 216, 1853—Hualves, Valdivia, Chile (type not preserved).

Xylocota stricklandi Bonaparte, Compt. Rend. Acad. Sci. Paris, 43, p. 579, 1856.

Gallinago paludosa (not *Scolopax paludosa* Gmelin) Sclater, Proc. Zool. Soc. Lond., 1867, pp. 332, 339—Chile.

Gallinago nobilis (not of Sclater) Oustalet, Miss. Sci. Cap Horn, 6, p. B. 126, 1891—Orange Bay and Wollaston Bay, Tierra del Fuego; Dabbene, Anal. Mus. Nac. Buenos Aires, 8, p. 376, 1902—Orange Bay (ex Oustalet); idem, l.c., 18, p. 221, 1910—Tierra del Fuego (ex Oustalet).

Gallinazo (sic) *stricklandi* Reed, Anal. Univ. Chile, 93, p. 210, 1896—Chile ("rare in the central provinces").

¹*Gallinago stricklandii* Gray (List Spec. Bds. Brit. Mus., 3, p. 112, 1844) is a nomen nudum.

² Cf. Mathews, Ibis, 1930, pp. 120–121; 1938, p. 760.

Gallinago gigantea (not *Scolopax gigantea* Temminck) Wace, El Hornero, 2, p. 199, 1921—Falkland Islands.

Capella stricklandi Bennett, Ibis, 1926, p. 324—Falkland Islands; Hellmayr, Field Mus. Nat. Hist., Zool. Ser., 19, p. 387, 1932—Ascension Island, Guaitecas Islands, Chile (range); Reynolds, Ibis, 1935, p. 87—Guffern, Freycinet, Deceit, Herschel, Jordan, and Barnevelt Islands, Cape Horn (eggs descr.).

Chubbia stricklandii A. Meinertzhagen, Ibis, 1926, p. 512 (monog.); Peters, Bds. World, 2, p. 278, 1934 (range).

Range.—Southern Chile from Valdivia¹ to Tierra del Fuego and the Cape Horn region; Falkland Islands.²

Field Museum Collection.—1: Chile (Melinka, Ascension Island, Guaitecas Islands, 1).

Genus SCOLOPAX Linnaeus

Scolopax Linnaeus, Syst. Nat., 10th ed., 1, p. 145, 1758—type, by tautonymy, *Scolopax rusticola* Linnaeus.

Rusticola (not of Houttuyn, 1770) Vieillot, Nouv. Dict. Hist. Nat., nouv. éd., 3, p. 348, 1816—new name for *Scolopax* "Latham" (=Linnaeus).

Rusticola "Gesner" Vieillot, Nouv. Dict. Hist. Nat., nouv. éd., 24, p. 124, 1818—new name for *Scolopax* Linnaeus.

Scolopax rusticola rusticola Linnaeus. EUROPEAN WOODCOCK.

Scolopax Rusticola Linnaeus, Syst. Nat., 10th ed., 1, p. 146, 1758—principally based on Faun. Svec., No. 141, Sweden; Ridgway, Bull. U. S. Nat. Mus., 50, (8), p. 150, 1919 (monog.; full bibliog.); Bent, l.c., 142, p. 54, 1927 (life hist.).

Rusticola vulgaris Vieillot, Nouv. Dict. Hist. Nat., nouv. éd., 3, p. 348, 1816—new name for *Scolopax rusticola* "Latham" (=Linnaeus).

Rusticola europaea Lesson, Traité d'Orn., p. 555, 1831—new name for *Scolopax rusticola* "Gmelin" (=Linnaeus).

Scolopax rusticula Sharpe, Cat. Bds. Brit. Mus., 24, p. 671, 1896 (monog.).

Scolopax rusticola rusticola Peters, Bds. World, 2, p. 278, 1934 (range).

Range.—Breeds in Europe and Asia south to the Pyrenees, Alps, northern Balkans, Himalayas, Ussuri, and Japan; winters in the southern part of its breeding range, the Mediterranean region, Egypt,

¹ Whether the specimens picked up by H. Berkeley James in the market at Valparaiso really came from the vicinity of that city is extremely doubtful. No authentic record exists for the actual taking of this snipe in the central provinces of Chile, although it is ascribed to that section by Edwyn Reed with the caption "rare."

² *Additional material examined*.—Tierra del Fuego: Orange Bay, 1; unspecified, 1.—Straits of Magellan: Swallow Bay, 1; Puerto Bueno, 1; Punta Arenas, 1.—Hermit Island, 1 (the type).

India, Ceylon, southern China, and Japan; occasional in eastern North America (Newfoundland; Chambly, Quebec; Chester and Northampton counties, Pennsylvania; Shrewsbury, New Jersey; Loudoun County, Virginia).

Genus PHILOHELA G. R. Gray

Microptera (not of Gravenhorst, 1802) Nuttall, Man. Bds. U. S. and Canada, Water Birds, p. 192, 1832—type, by orig. desig., *Rusticola minor*=*Scolopax minor* Gmelin.

Rusticola (not of Vieillot, 1816) Bonaparte, Geog. Comp. List, p. 52, 1838—type, by monotypy, *Scolopax minor* Gmelin.

Philohela G. R. Gray, List Gen. Bds., 2nd ed., p. 90, 1841—type, by orig. desig., *Scolopax minor* Gmelin.

**Philohela minor* (Gmelin). AMERICAN WOODCOCK.

Scolopax minor Gmelin, Syst. Nat., 1, (2), p. 661, 1789—based on "Little Woodcock" Pennant, Arct. Zool., 2, p. 463, pl. 19, and Latham, Gen. Syn. Bds., 3, (1), p. 131, New York (ex Pennant) accepted as type locality; Seeböhm, Geog. Distr. Charad., p. 504, 1887 (crit.).

Microptera americana Audubon, Syn. Bds. N. Amer., p. 250, 1839—new name for *Scolopax minor* Gmelin.

Philohela minor Reid, Bull. U. S. Nat. Mus., 25, p. 232, 1884—near Hamilton, Bermuda (Oct., 1842); Sharpe, Cat. Bds. Brit. Mus., 24, p. 679, 1896 (monog.); Ridgway, Bull. U. S. Nat. Mus., 50, (8), p. 155, 1919 (monog.; full bibliog.); Bradlee and Mowbray, Proc. Bost. Soc. N. H., 39, p. 316, 1931—Bermuda Islands (near Hamilton, Oct., 1842; near Old Ferry, St. George); Peters, Bds. World, 2, p. 279, 1934 (range); Pettingill, Mem. Bost. Soc. N. H., 9, No. 2, pp. 173–392, pls. 12–21, 1936 (monog.; life hist.); Studholme and Norris, Auk, 59, p. 229, 1942—central Pennsylvania (breeding populations).

*Rubicola*¹ *minor* Bent, Bull. U. S. Nat. Mus., 142, p. 61, 1927 (life hist.).

Range.—Breeds (chiefly east of the 100th meridian) in southern Canada and the United States from southern Manitoba, northern Michigan, southern Ontario and Quebec, New Brunswick, and Nova Scotia south to eastern Texas (Sonolake), southern Louisiana, and northern Florida; winters from southern Missouri, the Ohio Valley, and southern New Jersey to the Gulf coast and Florida; casual in the Bermuda Islands (Hamilton; Old Ferry, St. George).²

¹ *Rubicola* "Vieill." Jameson (in Jameson's ed. Wilson's Amer. Orn., 3, p. 98, 1831) seems to be a misprint for *Rusticola* Vieillot.

² The reported occurrence in Jamaica (cf. *Rusticola minor* Gosse, Bds. Jamaica, p. 354, 1847; *Philohela minor* March, Proc. Acad. Nat. Sci. Phila., 1864, p. 68) is too indefinite to be accepted without substantiation by specimens.

Field Museum Collection.—60: Nova Scotia (Stony Hill, King's County, 1); Connecticut (New Haven County, 19; New Haven, 4; Woodbridge, 4; North Haven, 2; Orange, 2; Hamden, 1; Newtown, 1; Stamford, 1; Watertown, 1; unspecified, 2); New York (Shelter Island, Suffolk County, 1); North Carolina (Raleigh, Wake County, 1); Georgia (Alpharetta, 2; Roswell, 2); Wisconsin (Beaver Dam, 1); Ohio (Columbus, 1); Illinois (Chicago, 2; Worth, Cook County, 1; Hyde Park, Cook County, 1; Momence, 2; Deerfield, 1; Lake Forest, 1; unspecified, 2); Indiana (Smith, La Porte County, 1); Iowa (Decorah, Winneshiek County, 1); Arkansas (Stuttgart, 2).

Conover Collection.—11: New Brunswick (Scotch Lake, 1); Illinois (Tessville, Cook County, 2; Chicago, 2; Ravinia, Lake County, 4); Mississippi (Macon, Noxubee County, 2).

Genus LYMNOCRYPTES Kaup

Limnocyptes Kaup, Skizz. Entw.-Gesch. Nat. Syst. Europ. Thierw., p. 118, 1829—type, by monotypy, *Scolopax gallinula* Linnaeus=*Scolopax minima* Brünnich.

Limnocyptes minima (Brünnich). JACK SNIPE.

Scolopax minima Brünnich, Orn. Bor., p. 49, 1764—Christiansö, Denmark (quotes also "La Petite Beccasine" Brisson, Orn., 5, p. 303, pl. 26, fig. 2, France).

Scolopax gallinula Linnaeus, Syst. Nat., 12th ed., 1, p. 244, 1766—based on "Gallinago minima" Bellon, Willoughby, etc., "La Petite Bécassine" Brisson, etc., Europe.

Limnocyptes gallinula Sharpe, Cat. Bds. Brit. Mus., 24, p. 665, 1896 (monog.); Hanna, Condor, 22, p. 173, 1920—St. Paul Island, Pribilof Islands, Alaska (April, 1919).

Limnocyptes minimus Bent, Bull. U. S. Nat. Mus., 142, p. 101, 1927—St. Paul, Pribilof Islands (habits; range); Austin, Auk, 46, p. 209, 1929—Jack Lane's Bay, Labrador; McLean, Condor, 41, p. 164, 1939—Marysville Buttes, Butte County, California.

Limnocyptes minima Peters, Bds. World, 2, p. 279, 1934 (range).

Range.—Breeds in northern Europe and Asia from Norway east to the Kolyma Delta, south to Denmark, East Prussia, the Baltic States, central Russia, and Siberia; winters in western Europe, the Mediterranean region, Egypt, and southern Asia; accidental in Alaska (St. Paul, Pribilof Islands, April, 1919), California (Butte County) and Labrador (Jack Lane's Bay).

Subfamily EROLIINAE. Sandpipers

Genus CALIDRIS Merrem

Calidris Anonymous=Merrem,¹ Allg. Lit. Zeitung, 2, No. 168, col. 542, June 8, 1804—type, by tautonymy, *Tringa calidris* Gmelin=*Tringa canutus* Linnaeus.

Canutus Brehm, Handb. Naturg. Vög. Deuts., p. 653, 1831—type, by tautonymy, *Tringa canutus* Linnaeus.

Anteliotringa Mathews, Bds. Australia, 3, (3), p. 274, Aug. 18, 1913—type, by orig. desig., *Totanus tenuirostris* Horsfield.

Canus Riley, Proc. U. S. Nat. Mus., 54, p. 613, Oct., 1918 (lapsus for *Canutus* Brehm).

**Calidris canutus rufus* (Wilson).² AMERICAN KNOT.

Tringa rufa Wilson,³ Amer. Orn., 7, p. 43, pl. 57, fig. 5, 1813—Middle Atlantic States=New Jersey (type evidently lost).

Tringa cinerea (not of Brünnich) Wied, Beitr. Naturg. Bras., 4, (2), p. 735, 1833—sea coast of eastern Brazil.

Tringa canutus(a) (not of Linnaeus) Cabanis, in Schomburgk, Reisen Brit. Guiana, 3, "1848," p. 758, 1849—coast of British Guiana; Burmeister, Syst. Uebers. Th. Bras., 3, p. 373, 1856—sea shore of Brazil; Léotaud, Ois. Trinidad, p. 468, 1866—Trinidad (Aug. to Oct.); Seebohm, Geog. Distr. Charad., p. 422, 1887—part, America; Cory, Auk, 4, p. 365, 1887—West Indian references and localities; idem, Bds. W. Ind., p. 236, 1889—West Indies; Sharpe, Cat. Bds. Brit. Mus., 24, p. 593, 1896—part, North America (except Alaska), and Barbados; Schalow, Zool. Jahrb., Suppl., 4, p. 660, 1898—Cabo Espiritu Santo, Tierra del Fuego (Feb.); Ihering, Ann. Est. Rio Grando do Sul, 16, p. 150, 1899—Rio Grande do Sul, Brazil (descr.); idem, Rev. Mus. Paul., 5, p. 288, 1902—Iguapé, São Paulo; Clark, Proc. Bost. Soc. N. H., 32, p. 251, 1905—Barbados (Dec. 7, 17, 27, 1886; Sept. 6, 1888); Ihering, Cat. Faun. Braz., 1, p. 55, 1907—

¹ Cf. Schnurre, Orn. Monatsber., 39, pp. 65–68, 1931.

² *Calidris canutus rufus* (Wilson) differs from the nominate race by paler rusty under parts and somewhat lighter dorsal surface, the pale edgings to the feathers being broader as well as more whitish. Brazilian winter birds are likewise more heavily mottled with white above than European specimens, as are immatures from eastern North America.

Riley (Proc. U. S. Nat. Mus., 54, p. 613, 1918) refers Alaskan specimens as well as a single male from Fort Simpson, Mackenzie (May 13), to the doubtfully separable *C. c. rogersi* Mathews (Birds Australia, 3, (3), pp. 270, 273, pl. 163, Aug. 18, 1913—"Siberia [breeding], migrating to Australia in winter"), for which an earlier name may exist in *Tringa lomatina* "Lichtenstein" Bonaparte (Compt. Rend. Acad. Sci. Paris, 43, No. 12, p. 596, 1856—no locality; type, from Bengal, in Berlin Museum; cf. Lichtenstein, Nomencl. Mus. Berol., p. 92, 1854), characterized as differing from *T. canutus* Linnaeus by "rostrum longiore," an indication which takes it out of the class of nomina nuda.

³ *Tringa australis* Gmelin (Syst. Nat., 1, (2), p. 679, 1789—based on "Southern Sandpiper" Latham, Gen. Syn. Bds., 3, (1), p. 187; Cayenne), while possibly an earlier name, is not identifiable with certainty.

Iguapé, São Paulo; Berlepsch, Nov. Zool., 15, p. 308, 1908—Surinam; Hartert and Venturi, l.c., 16, p. 251, 1909—Barracas al Sud, Buenos Aires (Nov. 1, 1901); Dabbene, Anal. Mus. Nac. Buenos Aires, 18, p. 220, 1910—Tierra del Fuego (Cabo Espiritu Santo) and province of Buenos Aires; Grant, Ibis, 1911, p. 468—Cape San Antonio, Buenos Aires (Dec. 19, 1908).

Tringa canuti Reiser, Denks. Math.-Naturw. Kl. Akad. Wiss. Wien, 76, p. 94, 1910—coast of Piauhhy, Brazil (Sept. 19, 1903).

Canutus canutus rufus Mathews, Bds. Australia, 3, (3), p. 273 (in text), 1913—America (crit.); Oberholser, Auk, 34, p. 200, 1917 (crit.); Grinnell, Univ. Calif. Pub. Zool., 32, p. 90, 1928—Lower California (near La Paz, Sept. 19, 24, 1923; near San Felipe, Apr. 2, 1926); Hellmayr, Field Mus. Nat. Hist., Zool. Ser., 12, p. 494, 1929—near Amaração, Piauhhy (Sept.); Zotta, El Hornero, 7, p. 48, 1938—San Clemente, Ajo, Argentina.

Canutus canutus Ridgway, Bull. U. S. Nat. Mus., 50, (8), p. 231, 1919—part, North America (except Alaska and Pacific coast) and South America (monog.; full bibliog.).

Calidris canutus Dabbene, El Hornero, 2, p. 120, 1920—winter range in province of Buenos Aires, Argentina (Barracas al Sud, Nov. 1, 8; Cape San Antonio, Dec. 19; Pereyra, Feb. 22) and Tierra del Fuego (Cabo Espiritu Santo, Feb.).

Tringa canuti rufa Reiser, Denks. Math.-Naturw. Kl. Akad. Wiss. Wien, 76, p. 227, 1923—Piauhhy (crit.).

Calidris canutus rufus Wetmore, Bull. U. S. Nat. Mus., 133, p. 157, 1926—south of Cape San Antonio, Buenos Aires (Nov. 7); Bent, l.c., 142, p. 131, 1927—part, except Alaska, Pacific coast of North America and Greenland (life hist.); Bradlee, Proc. Bost. Soc. N. H., 39, p. 317, 1931—Bermuda Islands (Sept., 1911); Peters, Bds. World, 2, p. 280, 1934—part; Belcher and Smooker, Ibis, 1935, p. 292—Trinidad; Pinto, Rev. Mus. Paul., 22, p. 148, 1938—Iguapé, São Paulo (Nov.); Conover, Condor, 45, p. 229, 1943 (dist. chars.; range).

Range.—Breeds from northern Ellesmere Land south to south-eastern Victoria Island and Melville Peninsula; migrates along the Atlantic coast of America and more sparingly throughout the interior (in the West Indies recorded only from Jamaica, Barbados, and Trinidad) to South America, where it has been found wintering at various scattered localities on the coasts of (?)Peru (Santa Lucia, Tumbes, Oct. 31), (?)Chile (Arica, Tacna, Sept. 21), Brazil (Amaração, Piauhhy, Sept. 19; Iguapé, São Paulo, Nov.; Rio Grande do Sul), Argentina (province of Buenos Aires, Feb., Nov., Dec.), and Tierra del Fuego (Cape Espiritu Santo, Feb.).

Field Museum Collection.—76: Canada (Magdalen Islands, Quebec, 7; Toronto, Ontario, 2; Lake Johnson, Saskatchewan, 7); Massachusetts (Monomoy Island, 19; unspecified, 1); Connecticut (West Haven, 1); North Carolina, Dare County (Bodie Island, 11;

Pea Island, 19); Georgia (McIntosh County, 1); Florida (Canaveral, Brevard County, 2; Grove City, De Soto County, 1); North Dakota (Graham Island, Ramsey County, 1); Texas (San Patricio County, 1; Nueces County, 3).

Conover Collection.—22: Canada (Victoria Land, 5; Beaverhill Lake, Alberta, 4); Illinois (Waukegan, 1); Indiana (Miller, 4; Wolf Lake, 2); New York (Cayuga, 2; Cayuga Lake, 1); South Carolina (Dewee's Island, Charleston County, 1; Mount Pleasant, Charleston County, 1); Mexico (La Paz, Lower California, 1).¹

****Calidris canutus canutus* (Linnaeus). EUROPEAN KNOT.**

Tringa Canutus Linnaeus, Syst. Nat., ed. 10, 1, p. 149, 1758—Europe, restricted type locality Sweden.

Tringa canutus(a) Reinhardt, Ibis, 1861, p. 11—Greenland; (?) Taczanowski, Proc. Zool. Soc. Lond., 1877, p. 748—Santa Lucia, Tumbes, Peru (Oct. 31); Sharpe, Cat. Bds. Brit. Mus., 24, p. 593, 1896—part, Greenland and Alaska; Winge, Medd. Grønl., 21, p. 167, 1898—Greenland; Manniche, l.c., 45, No. 1, p. 130, 1910—Stormkap, northeastern Greenland (breeding habits).

Tringa islandica (not of Linnaeus) Holboell, Naturhist. Tidskr., 4, p. 407, 1843—Greenland.

Canutus canutus Ridgway, Bull. U. S. Nat. Mus., 50, (8), p. 231, 1919—part, Alaska, west coast North America and Greenland (full bibliog.); (?) Chapman, Bull. Amer. Mus. N. H., 55, p. 199, 1926—Santa Lucia, Peru.

Calidris canutus rufus Bent, Bull. U. S. Nat. Mus., 142, p. 131, 1927—part, Alaska, west coast of North America and Greenland; Peters, Bds. World, 2, p. 280, 1934—part, Greenland and Pacific coast of North America; (?) Philippi, Rev. Chil. Hist. Nat., 40, p. 104, 1937—Chile; (?) idem, Bol. Mus. Nac. Santiago, 16, p. 55, 1938—Playa de Arica, Tacna, Chile (Sept. 21).

Calidris canutus Løppenthin, Medd. Grønl., 91, No. 6, p. 57, 1932—Greenland (crit.); Pederson, l.c., 100, No. 11, p. 19, 1934—northeastern Greenland (breeding); Congreve, Ibis, 1935, p. 435—Roseneath Bay, eastern Greenland (nesting).

Canutus canutus canutus Bird and Congreve, Bull. Brit. Ool. Assoc., 5, p. 86, 1938—Greenland (eggs described).

Calidris canutus canutus Bird, Ibis, 1941, p. 145—northeastern Greenland; Conover, Condor, 45, p. 228, 1943 (dist. chars.; range).

Range.—Breeds in Greenland (Spitzbergen and across Arctic Europe and Siberia) to Point Barrow, Alaska. Migrates down the Pacific coast of North America and probably also the west coast of South America (and through Europe and Asia).

¹ This specimen, an immature in fresh plumage, is typical of *rufus*, suggesting that both races may winter on the Pacific coast of Central and South America.

Field Museum Collection.—11: Alaska (Barrow, 4;¹ St. Michaels, 2); California (Humboldt Bay, 1; Trinidad, Humboldt County, 1; Pacific Beach, San Diego County, 2; Moss Landing, Monterey County, 1).

Conover Collection.—4: Alaska (Golovin Bay, Norton Sound, 2; Hooper Bay, Bering Sea, 1); California (Anaheim Landing, Orange County, 1).

***Calidris tenuirostris* (Horsfield). ASIATIC KNOT.**

Totanus tenuirostris Horsfield, Trans. Linn. Soc. Lond., 13, (1), p. 192, 1821—Java (type in British Museum; cf. Mathews, *Birds Australia*, 3, p. 277, 1913, and Hartert, *Vög. Palae. Fauna*, 2, p. 1588, 1920).

Schoeniclus magnus Gould, Proc. Zool. Soc. Lond., 16, p. 39, Nov. 14, 1848—Australia (type in British Museum).

Tringa crassirostris Temminck and Schlegel, in Siebold, *Fauna Japon.*, Aves, Part 9, p. 107, pl. 64, 1849—Japan (cotypes in Leyden Museum; cf. Schlegel, *Mus. Pays-Bas*, livr. 6, *Scolopacidae*, p. 28, 1864); Sharpe, *Cat. Bds. Brit. Mus.*, 24, p. 600, 1896 (monog.).

Calidris tenuirostris Bailey, *Condor*, 26, p. 195, 1924—Cape Prince of Wales, Alaska (May 28, 1922); idem, *l.c.*, 27, p. 236, 1925 (same record); Bent, *Bull. U. S. Nat. Mus.*, 142, p. 145, 1927 (ex Bailey); Portenko, *Arctica* (Leningrad), 1, p. 75, col. pl., 1933—Anadyrland (breeding range; habits); Peters, *Bds. World*, 2, p. 280, 1934 (range).

Range.—Breeds in the alpine zone of northeastern Siberia; winters in India, the Malay Archipelago, Moluccas, and Australia; accidental in Alaska (Cape Prince of Wales, May 28, 1922).

Genus CROCETHIA Billberg

Arenaria (not of Brisson, 1760) Bechstein, *Orn. Taschenb.*, 2, p. 462a, 1803—type, by monotypy, *Arenaria vulgaris* Bechstein=*Tringa arenaria* Linnaeus.

Calidris (not of Merrem, 1804) Illiger, *Prodr. Syst. Mam. Av.*, p. 249, 1811—type, by tautonymy and monotypy, *Charadrius calidris* Linnaeus=*Tryngra alba* Pallas.

Crocethia Billberg, *Syn. Faunae Scand.*, 1, (2), p. 132, tab. A, 1828—new name for *Calidris* Illiger.

****Crocethia alba* (Pallas). SANDERLING.**

Tryngra (alba) Pallas, in Vroeg's *Cat. Rais. d'Ois.*, Adumbr., p. 7, 1764—coast of North Sea.

¹ The Bishop Collection in Field Museum contains a downy young knot taken at Barrow, Alaska, on July 17, 1936.

Additional specimens examined.—Alaska: St. Michaels, 7; Wainwright, 1; Port Safety, 2; Sitka, 1.—Washington, Long Beach, 1.—Greenland: Parker Snow Bay, 4; unspecified, 4.

Tringa arenaria Linnaeus, Syst. Nat., 12th ed., 1, p. 251, 1766—based on "Arenaria" Willoughby (Orn., p. 225), "La Petite Maubèche grise" Brisson (Orn., 5, p. 236, pl. 20, fig. 2), etc., Europe; Des Murs, in Gay, Hist. Fís. Pol. Chile, Zool., 1, p. 425, 1847—Chile; Philippi, Anal. Univ. Chile, 31, p. 276, 1868—Chile.

Tringa calidris Linnaeus, Syst. Nat., 12th ed., 1, p. 255, 1766—based on "La Petite Maubèche grise" Brisson, Orn., 5, p. 236, pl. 20, fig. 2, sea coast (type in Mauduyt Collection).

Charadrius rubidus Gmelin, Syst. Nat., 1, (2), p. 688, 1789—based on "Ruddy Plover" Pennant, Arct. Zool., 2, p. 486, and Latham, Gen. Syn. Bds., 3, (1), p. 195, Hudson's Bay.

Arenaria vulgaris Bechstein, Orn. Taschenb., 2, p. 462a, 1803—new name for *Tringa arenaria* Linnaeus.

(?)*Totanus nigellus* Vieillot, Nouv. Dict. Hist. Nat., nouv. éd., 6, p. 409, 1816—based on "Chorlito pies roxos" Azara, No. 402, Paraguay.

Calidris americana Brehm, Handb. Naturg. Vög. Deuts., p. 675, 1831—North America to Brazil (type, from Brazil, in Tring Collection [cf. Hartert, Nov. Zool., 25, p. 54, 1918], now in the American Museum of Natural History, New York).

Calidris arenaria Wied, Beitr. Naturg. Bras., 4, (2), p. 750, 1833—sea shore of eastern Brazil; Holboell, Naturhist. Tidskr., 4, p. 406, 1843—Disco and Nanortalik, Greenland; Fraser, Proc. Zool. Soc. Lond., 12, p. 157, 1844—Chile; Cabanis, in Schomburgk, Reisen Brit. Guiana, 3, "1848," p. 758, 1849—sand banks of the Waini River; Burmeister, Syst. Uebers. Th. Surv. Porto Rico and Virgin Islands, 9, p. 374, 1927—Puerto Rico, St. Croix, and Anegada (rare transient); Bent, Bull. U. S. Nat. Mus., 142, p. 265, 1927 (life hist.); Wetmore and Swales, l.c., 155, p. 167, 1931—Hispaniola (transient); Bradlee, Mowbray and Eaton, Proc. Bost. Soc. N. H., 39, p. 319, 1931—Bermuda Islands (autumn transient); Swarth, Occ. Pap. Calif. Acad. Sci., 18, p. 60, 1931—Galápagos (winter); Hellmayr, Field Mus. Nat. Hist.,

¹ "*Tringa leucophaea*" Anonymous (in Vroeg's Cat. Rais. d'Ois., p. 32, 1764—northern coast of Holland) is not binomial. Cf. Stone, Auk, 29, pp. 205–208, 1912.

Zool. Ser., 19, p. 395, 1932—Chile (Caldera, Atacama, Apr. 11–18; Papudo, Aconcagua, Dec. 8; Cucao, Chiloé Island, Dec. 25); Griscom, Bull. Amer. Mus. N. H., 64, p. 135, 1932—Ocos, Guatemala (Sept., Oct.); Løppenthin, Medd. Grøn., 91, No. 6, p. 62, 1932—Greenland (meas.; breeding habits); Pedersen, l.c., 100, No. 11, p. 20, 1934—northeastern Greenland (breeding habits); Peters, Bds. World, 2, p. 281, 1934 (range); Belcher and Smoker, Ibis, 1935, p. 292—Trinidad and Tobago (winter); Bullock, Rev. Chil. Hist. Nat., 39, p. 247, 1935—Isla la Mocha, Chile; Philippi, El Hornero, 6, p. 235, 1936—Playa de Arica, Tacna, Chile (July); Pinto, Rev. Mus. Paul., 22, p. 140, 1938—Rio de Janeiro (Atafona, Nov.) and São Paulo (São Sebastião, Nov.; Rio Paraná, Nov.; Ypiranga, Dec.); Philippi, Bol. Mus. Nac. Santiago, 16, p. 56, 1938—Arica, Tacna, Chile (Apr., June); Dickey and van Rossem, Field Mus. Nat. Hist., Zool. Ser., 23, p. 178, 1938—Puerto del Triunfo (Jan. 14) and Barra de Santiago (Apr. 4), El Salvador; Hamilton, Ibis, 1939, p. 139—Falkland Islands; Bird and Bird, l.c., 1941, p. 148, pl. 3 (nest and eggs)—Greenland.

Range.—Breeds in Arctic islands north of North America, Southampton Island, and northern Greenland, also along the Arctic coast of Siberia to Spitsbergen; in the western hemisphere winters from California, the Gulf coast, and Virginia south to southern Chile (Chiloé Island) and southern Argentina (Tambo Point, Chubut). Falkland Islands.

Field Museum Collection.—214: Alaska (Barrow, 4; St. Michaels, 1); Arctic America (Franklin Bay, Mackenzie, 1); Saskatchewan (Maple Creek, 3; Lake Johnson, 1; Quill Lake, 1); Manitoba (Sandy Bay, 1); Quebec (Magdalen Islands, 4); Nova Scotia (Barrington, 2); North Dakota (Stump Lake, Nelson County, 5; Rocklake, Towner County, 1); Illinois (Lake Forest, 1; Waukegan, 4; Chicago, 1); Indiana (Miller, Lake County, 4); Michigan (Harbert, Berrien County, 1; Mears, Oceana County, 1); New York (Cayuga Lake, 1; Fair Haven, Cayuga County, 1); Mississippi (Ocean Springs, Jackson County, 1); Texas (Corpus Christi, 3; Port Lavaca, Calhoun County, 2; Cameron County, 1); Massachusetts (Monomoy Island, 45; Chatham, 4; Cohasset, 1; Martha's Vineyard, 1); New Hampshire (Seabrook, 1); Connecticut (New Haven County, 1; West Haven, 2; Branford, 1; Fairfield Beach, Fairfield County, 1); California (Sunset Beach, Orange County, 17; Hyperion, Los Angeles County, 7; Redondo Beach, Los Angeles County, 3; Laguna de la Merced, San Mateo County, 1; Westport, Mendocino County, 1; San Francisco, 1; Pacific Grove, Monterey County, 6; Moss Landing, Monterey County, 5; Carmel, Monterey County, 2; Del Monte Forest, Monterey County, 1; La Patera Point, Santa Barbara County, 1; The Rincon, Ventura County, 2; Pacific Beach, San Diego County, 4; San Diego, 1); North Carolina, Dare County (Pea Island, 29;

Bodie Island, 4); Florida (southern part, 1; Mary Esther, Okaloosa County, 3; East Pass, Okaloosa County, 1; Amelie Island, Nassau County, 5; Eau Gallie, Brevard County, 1); Bahama Islands (Acklin Island, 1; Andros Island, 6); Lesser Antilles (Anegada, 1; St. Christopher, 1); Dutch West Indies (Aruba, 1); Chile (Puerto Ingles, Atacama, 2; Caldera, Atacama, 2; Penco, 2).

Conover Collection.—29: British Columbia (Masset, Queen Charlotte Islands, 2); Alberta (Beaverhill Lake, Tofield, 1); North Dakota (Stump Lake, Nelson County, 1); Massachusetts (East Orleans, Barnstable County, 3); New York (Cayuga, 1; Cayuga Lake, 1); Illinois (Beach, Lake County, 1); Indiana (Miller, Lake County, 7); Florida (Amelie Island, Nassau County, 2; Nassau County, 1); California (Anaheim Landing, Orange County, 4; Sunset Beach, Orange County, 1; Moss Landing, Monterey County, 1; Carpenteria, Ventura County, 1); Mexico (Todos Santos, Lower California, 1); Chile (Papudo, Aconcagua, 1).

Genus EREUNETES Illiger¹

Ereunetes Illiger, Prodr. Syst. Mam. Av., p. 262, 1811—type, by monotypy, *Ereunetes petrificatus* Illiger=*Tringa pusilla* Linnaeus.

Symphemia Rafinesque, Journ. Physique, 88, p. 418, June, 1819—type, by orig. desig., *Tringa semipalmata* Wilson=*T. pusilla* Linnaeus (cf. Richmond, Proc. Biol. Soc. Wash., 18, p. 75, 1905).

Hemipalama Bonaparte, Journ. Acad. Nat. Sci. Phila., 5, p. 87, 1825—type, by orig. desig., *Tringa semipalmata* Wilson=*T. pusilla* Linnaeus.

Heteropoda Nuttall, Man. Orn. U. S. and Canada, Water Birds, p. 135, 1834—type, by orig. desig., *Tringa semipalmata* Wilson=*T. pusilla* Linnaeus.

**Ereunetes pusillus* (Linnaeus). SEMIPALMATED SANDPIPER.

Tringa pusilla Linnaeus, Syst. Nat., 12th ed., 1, p. 252, 1766—based on "La Petite Alouette-de-mer de S. Domingue" Brisson, Orn., 5, p. 222, pl. 25, fig. 2, Santo Domingo (type in Réaumur Collection).

Ereunetes petrificatus Illiger, Prodr. Syst. Mam. Av., p. 262, 1811—Bahia, Brazil (type in Berlin Museum) (cf. Cabanis, Journ. Orn., 4, p. 421 [in text], 1856); Selater and Salvin, Proc. Zool. Soc. Lond., 1867, p. 592—Mexiana, Brazil; Allen, Bull. Essex Inst., 8, p. 83, 1876—Marajó, Brazil (Aug.); Salvin, Proc. Zool. Soc. Lond., 1883, p. 429—Paracas Bay, Peru (Oct.).²

Tringa semipalmata Wilson, Amer. Orn., 7, p. 131, pl. 63, fig. 4, 1813—Lake Champlain, New York, and coast of New Jersey (type lost).

¹ For osteological characters and affinities, cf. Lowe, Ibis, 1915, pp. 609–616.

² Dr. G. C. Low writes that these specimens are certainly *pusillus*, the bill measuring 19 mm. in the male, 19.5 mm. in the female.

- Tringa brevirostris* Spix, Av. Spec. Nov. Bras., 2, p. 76, pl. 92 (not 93, as quoted), 1825—no locality stated (type lost; cf. Hellmayr, Abhandl. Math.-phys. Kl. Bayr. Akad. Wiss., 22, p. 715, 1906).
- Pelidna Brissonii* Lesson, Man. d'Orn., 2, p. 277, 1828—new name for *Tringa pusilla* Linnaeus.
- Ereunetes semipalmatus* Cabanis, in Schomburgk, Reisen Brit. Guiana, 3, "1848," p. 758, 1849—sand banks along the coast; Cabanis and Gundlach, Journ. Orn., 4, p. 419, 1856—Cuba (descr.; Sept. to April); Pelzeln, Orn. Bras., 3, p. 312, 1870—Praia de Cajútuba, Pará, Brazil (Mar., April).
- Hemipalama minor* (Gundlach MS.) Lembeye, Aves Isla Cuba, p. 97, 1850—Cuba (type in Gundlach Collection); Gundlach, Journ. Orn., 4, p. 420 (in text), 1856—Cuba (crit.).
- Ereunetes pusillus* Coues, Proc. Acad. Nat. Sci. Phila., 1861, p. 233 (crit., nomencl.); Ridgway, Proc. U. S. Nat. Mus., 7, p. 177, 1884—Sabanilla, Colombia; Seebohm, Geog. Distr. Charad., p. 402, 1887—Cayenne, Bahia, and Patagonia, "Unevo Gulf (lat. 43° south)"=Bahía Nueva, Chubut (crit.); Chapman, Bull. Amer. Mus. N. H., 6, p. 77, 1894—Moruga, Trinidad; Sharpe, Cat. Bds. Brit. Mus., 24, pp. 514, 766, 1896—part, North and Central America, Cayenne (spec. e⁴, f⁴, f⁵), Brazil (Bahia), and Patagonia; Allen, Bull. Amer. Mus. N. H., 13, p. 126, 1900—Ciénaga, Colombia; Salvin and Godman, Biol. Centr.-Amer., Aves, 3, p. 382, 1903—part, Guatemala (Dueñas, San José) and Panama; Riley, Smiths. Misc. Coll., 47, p. 280, 1904—Barbuda (Sept. 22); Clark, Proc. Bost. Soc. N. H., 32, p. 252, 1905—Barbados, St. Vincent, and Grenada (mid-July to Nov.); Bangs, Proc. Biol. Soc. Wash., 19, p. 102, 1906—San José, Costa Rica (Sept. 15); Berlepsch, Nov. Zool., 15, p. 307, 1908—Cayenne, French Guiana (Oct. 19); Cory, Field Mus. Nat. Hist., Orn. Ser., 1, pp. 197, 237, 1909—Aruba and Margarita Island; Reiser, Denks. Math.-Naturw. Kl. Akad. Wiss. Wien, 76, p. 95, 1910—Amaração, Piauí, Brazil (Sept. 16, 19); Carriker, Ann. Carnegie Mus., 6, p. 421, 1910—Coronado de Térraba, Costa Rica (July 3); Dabbene, Anal. Mus. Nac. Buenos Aires, 18, p. 219, 1910—Patagonia; Swarth, Univ. Calif. Pub. Zool., 7, p. 52, 1911—Thomas Bay, southeast Alaska (Aug. 19; crit.); Murphy, Auk, 29, p. 238, 1912 (albino); Snethlage, Bol. Mus. Goeldi, 8, p. 91, 1914—Marajó (Ilha dos Machados, Santa Anna), Brazil; Brooks, Bull. Mus. Comp. Zool., 59, p. 380, 1915—between Collinson Point and Herschel Island, and Hula-hula River, Arctic coast, Alaska (breeding; descr. of nest); Hersey, Smiths. Misc. Coll., 66, No. 2, p. 24, 1916—Imaruk Basin, Alaska (July 28); Stone, Proc. Acad. Nat. Sci. Phila., 1918, p. 245—Toro Point, Panama (Sept. 4); Ridgway, Bull. U. S. Nat. Carnegie Mus., 14, p. 184, 1922—Buritaca and Rio Hacha, Santa Marta, Colombia; Osgood and Conover, Field Mus. Nat. Hist., Zool. Ser., 12, p. 42, 1922—Lagunillas, Mérida, Venezuela (May 10); (?) Housse, Rev. Chil. Hist. Nat., 28, p. 51, 1924—Isla la Mocha, Arauco, Chile; Bailey, Condor, 28, p. 34, 1926—Wainwright and Lopp Lagoon (nesting), Alaska; Chapman, Bull. Amer. Mus. N. H., 55, p. 198, 1926—Esmeraldas (Oct. 23) and Chone (Dec. 14), Ecuador (crit.); Conover, Auk, 43, p. 308,

1926—Point Dall, Alaska (nesting with *E. mauri*; courtship and young different); Bent, Bull. U. S. Nat. Mus., 142, p. 244, 1927 (life hist.); Wetmore, Sci. Surv. Porto Rico and Virgin Islands, 9, p. 372, 1927—Mona, Puerto Rico, St. Croix, St. Thomas, and Anegada (migratory transient); idem, Tech. Bull. U. S. Dept. Agric., 26, p. 10, 1927—Puerto Pinasco, Paraguay; idem and Swales, Bull. U. S. Nat. Mus., 155, p. 165, 1931—Hispaniola (migrant); Bradlee, Mowbray, and Eaton, Proc. Bost. Soc. N. H., 39, p. 318, 1931—Bermuda Islands (late July to October); (?) Hellmayr, Field Mus. Nat. Hist., Zool. Ser., 19, p. 51, 1932—Isla la Mocha, Chile (ex Housse); Huber, Proc. Acad. Nat. Sci. Phila., 84, p. 209, 1932—Prinzapolka, Nicaragua (May 7); Peters, Bds. World, 2, p. 281, 1934 (range); Belcher and Smooker, Ibis, 1935, p. 292—Trinidad and Tobago (winter); Griscom, Bull. Mus. Comp. Zool., 78, p. 308, 1935—Panama (winter); Pinto, Rev. Mus. Paul., 22, p. 141, 1938 (range in Brazil); Dickey and van Rossem, Field Mus. Nat. Hist., Zool. Ser., 23, p. 177, 1938—Puerto del Triunfo, El Salvador (Dec. 21—Jan. 6); Philippi, Bol. Mus. Nac. Santiago, 16, p. 56, 1938—Vegas de Chacalluta, Tacna, Chile (Sept. 21); Porsild, Canad. Field Nat., 57, p. 29, 1943—Mackenzie Delta (breeding); Bray, Auk, 60, p. 525, 1943—Southampton Island (nesting); Soper, l.c., 63, p. 231, 1946—Baffin Island (nesting).

Heteropoda semipalmata Léotaud, Ois. Trinidad, p. 477, 1866—Trinidad.

Ereunetes pusillus pusillus Hellmayr, Nov. Zool., 13, p. 54, 1906—Seelet (April) and Caroni Swamp (March), Trinidad.

Erolia pusilla Ticehurst, Bull. Brit. Orn. Cl., 53, p. 206, 1933 (downy young descr.).

Range.—Breeds from extreme northeastern Siberia (Plover Bay) across Arctic North America to southwestern Baffinland, south to Point Dall, Alaska, Hudson Bay (Severn River), and northern Labrador; winters from the Gulf and southern Atlantic coasts of the United States through Central America and the West Indies to Colombia (Sabanilla), western Ecuador (Esmeraldas, Chone), Peru (Paracas Bay), northern Chile (Chacalluta, Tacna), Venezuela (Lagunillas, Mérida), French and British Guiana, and Brazil (Marajó and Mexiana Islands; Cajútuba, Pará; Amaração, Piahy; Bahia); occasional in Patagonia (one record from Bahía Nueva, lat. 43° S., Chubut),¹ and (?) southern Chile (Isla la Mocha).

Field Museum Collection.—184: Alaska (Barrow, 2; Chipp River, Barrow, 2; Collinson Point, Barrow, 2; Nome, 1); British Columbia (Okanagan, 4; Sumas, 1); Saskatchewan (Maple Creek, 5; Quill Lake, 1); Quebec (Magdalen Islands, 4); Nova Scotia (Barrington, 2; Clark's Harbor, 5); Montana (Miles City, 1); North Dakota

¹ The specimen—now in the British Museum (ex Coll. Seebohm)—is labeled "Unevo Gulf, Patagonia, March, 1883, female, Capt. Harrison." The locality should really read "Nuevo Gulf"—Bahía Nueva. Sharpe (l.c., p. 766) credits the bird to Henry Durnford, who had died several years before it was collected.

(Towner County, 16; Stump Lake, Nelson County, 8); Colorado (Fort Lyon, Bent County, 3); Iowa (Burlington, 1); Wisconsin (Beaver Dam, 8; Edithton Beach, Kenosha County, 1; Lake Koshkonong, 1); Illinois, Lake County (Grass Lake, 1; Libertyville, 1); Michigan (Harbert, 1); New York (Jamaica Bay, 1; Cayuga Lake, 2); Massachusetts (Monomoy Island, 32; Cape Cod, 1; Cohasset, 1; Chatham, 1; Everett, 1); Rhode Island (Point Judith, Washington County, 1); Connecticut (New Haven County, 31; Guilford, 5; West Haven, 2; North Haven, 4; East Hartford, 1); Virginia (Buckree Beach, Elizabeth City County, 1); North Carolina (Pea Island, Dare County, 8); Florida (West Jupiter, 4); Bahama Islands (Great Inagua, 4); Jamaica (Grand Cayman, 1); Lesser Antilles (Dominica, 2; Guadeloupe, 2); Dutch West Indies (Aruba, 3); Costa Rica (Piedra de Blanca, Guanacaste, 4); Venezuela (Margarita Island, 1).

Conover Collection.—30: Alaska (Hooper Bay, Bering Sea, 6);¹ Alberta (Beaverhill Lake, Tofield, 2); Manitoba (Churchill, 2); Massachusetts (East Orleans, Barnstable County, 10); New York (Cayuga Lake, 2); Costa Rica (Punta Piedra, Guanacaste, 2); Ecuador (Rio San Antonio, Sur, Province de los Rios, 5); British Guiana (Buxton, Demerara, 1).

****Ereunetes mauri* Cabanis. WESTERN SANDPIPER.**

Ereunetes Mauri Cabanis,² Journ. Orn., 4, p. 420, 1856—South Carolina (May)³ (type in Berlin Museum); Allen, Auk, 23, p. 98 (in text), 1906 (crit.; nomencl.); Carriker, Ann. Carnegie Mus., 6, p. 421, 1910—Barranca de Puntarenas, Costa Rica (ex Bangs); Swarth, Univ. Calif. Pub. Zool., 7, p. 53, 1911—Kuiu Island, Prince of Wales Island, Coronation and Warren Islands, Alaska (Apr. 28–May 23); Brooks, Bull. Mus. Comp. Zool., 59, p. 381, 1915—East Cape (July 14) and Cape Serdze (July 16), north-eastern Siberia; Hersey, Smiths. Misc. Coll., 66, No. 2, p. 24, 1916—Norton Sound to the Yukon mouth (breeding); Brooks, Auk, 34, p. 36, 1917—Chilliwack, British Columbia (crit.; migratory visitor); Bartsch, Proc. Biol. Soc. Wash., 30, p. 132, 1917—near Port-au-Prince, Haiti (April 25); Ridgway, Bull. U. S. Nat. Mus., 50, (8), p. 215, 1919 (monog.; full bibliog.); Todd and Carriker, Ann. Carnegie Mus., 14, p. 184, 1922—Buritaca (Sept. 20) and Punto Caiman (Sept. 28, Oct. 1), Colombia;

¹ Four downy young.

²*Heteropoda mauri* Bonaparte (Geog. Comp. List, p. 49, 1838) is a nomen nudum.

³Cabanis's remarks on the longer bill and slightly larger measurements (which make his name identifiable), were exclusively based upon the specimens shot by himself in South Carolina, for he expressly states (p. 421) that he has not yet seen any from Cuba. Accordingly, *South Carolina* is the type locality, and *not* Cuba, as claimed by authors (cf. also Palmer, Condor, 33, pp. 243–244, 1931).

Danforth, Auk, 42, p. 562, 1925—Cartagena Lagoon, Puerto Rico (Aug. 26); Bailey, Condor, 28, p. 35, 1926—Nome, Wales, and Point Barrow, Alaska (nesting); Chapman, Bull. Amer. Mus. N. H., 55, p. 198, 1926—Bahía de Carraques (Feb. 24), Chone (Dec. 14), and Jambeli (Oct. 31), Ecuador (crit.); Conover, Auk, 43, p. 309, 1926—Hooper Bay, Alaska (common nester with *E. pusillus*; incubation period); Bent, Bull. U. S. Nat. Mus., 142, p. 255, 1927 (life hist.); McLellan, Proc. Calif. Acad. Sci., (4), 16, p. 14, 1927—Labrados and San Blas, Mexico; Wetmore, Sci. Surv. Porto Rico and Virgin Islands, 9, p. 373, 1927—Cartagena Lagoon, Puerto Rico; Grinnell, Univ. Calif. Pub. Zool., 32, p. 92, 1928—Lower California (spring and fall migrant); Peters, Auk, 47, p. 562, 1930—Massachusetts (in spring); Palmer, Condor, 33, p. 243, 1931 (nomencl. hist.); Wetmore and Swales, Bull. U. S. Nat. Mus., 155, p. 166, 1931—Hispaniola (Port-au-Prince, Apr. 25; Seven Brothers Islands, Feb. 1, 2); Griscom, Bull. Amer. Mus. N. H., 64, p. 135, 1932—Guatemala; Peters, Bds. World, 2, p. 281, 1934 (range); Griscom, Bull. Mus. Comp. Zool., 78, p. 308, 1935—Pacific coast of Panama; Belcher and Smooker, Ibis, 1935, p. 292—Trinidad; Dickey and van Rossem, Field Mus. Nat. Hist., Zool. Ser., 23, p. 177, 1938—El Salvador (Puerto del Triunfo, Dec. 31 to Jan. 6; Barra de Santiago, Apr. 1); Wetmore, Proc. U. S. Nat. Mus., 87, p. 193, 1939—Ocumare de la Costa, Venezuela (Oct. 22–31).

Tringa Cabanisii Cabanis, Journ. Orn., 4, p. 420 (in text), 1856—South Carolina (May) (type in Berlin Museum).¹

Ereunetes occidentalis Lawrence, Proc. Acad. Nat. Sci. Phila., for April, 1864, p. 107, June 30, 1864—"Pacific coast, California, Oregon" (type, from San Francisco, California, in collection of Geo. N. Lawrence, now in the American Museum of Natural History, New York; cf. Grinnell, Univ. Calif. Pub. Zool., 38, p. 272, 1932); Ridgway, Proc. U. S. Nat. Mus., 7, p. 178, 1884—Sabanilla, Colombia; Nelson, Nat. Hist. Coll. Alaska, 3, p. 113, 1887—Norton Sound and mouth of Yukon (nesting habits; descr. imm. plumage); Robinson, l.c., 18, p. 656, 1896—east of Porlamor, Margarita Island, Venezuela (July 7); Thayer and Bangs, Bull. Mus. Comp. Zool., 46, p. 147, 1905—San Miguel, Pearl Islands, Panama (Mar. 8); Bangs, Auk, 24, p. 291, 1907—Barránca de Puntarenas, Costa Rica (Aug. 12 and 20).

Heteropoda longirostris (Gundlach MS.) Léotaud, Ois. Trinidad, p. 480, 1866—Trinidad (type probably in Léotaud Collection, since destroyed by fire).

Ereunetes pusillus var. *occidentalis* Lawrence, Bull. U. S. Nat. Mus., 4, p. 47, 1876—San Mateo and Tehuantepec City, Oaxaca (Aug., Oct., Feb.).

Ereunetes pusillus occidentalis Seebohm, Geog. Distr. Charad., p. 403, 1887 (crit.); Hellmayr, Nov. Zool., 13, p. 54, 1906—Seelet, Trinidad (April).

Ereunetes pusillus (not *Tringa pusilla* Linnaeus) Sharpe, Cat. Bds. Brit. Mus., 24, pp. 514, 766, 1896—part, North, Central, and South America; Chubb, Ibis, 1919, p. 266—Trujillo, Peru (Mar. 13, Sept. 3, Dec. 22).²

¹ The same specimen that served as basis for the diagnosis of *Ereunetes mauri*.

² Dr. G. Carmichael Low, who has kindly examined these birds, writes that they are unquestionably *E. mauri*. The bill measures, in the male, 25; in the females, 22, 22.5, 26, and 26.5 mm., respectively.

Range.—Breeds on the coast of Alaska from Hooper Bay to Point Barrow; winters on both coasts of the Americas from Washington and North Carolina to Peru (Trujillo) and Venezuela and perhaps farther south; also in Cuba, Hispaniola, and Trinidad; occasional in northeastern Siberia (East Cape and Cape Serdze).

Field Museum Collection.—179: Alaska (Point Hope, 1; Cape Prince of Wales, 2; Nome, 5; Bethel, 5; St. Michaels, 2); British Columbia (Cowichan Bay, 4; Chilliwash, 1; Quatsino, 1; Okanagan, 2; Sumas, 2); Quebec (Magdalen Islands, 1); Nova Scotia (Barrington, 1); Washington (Puget Sound, 3); Oregon (Netarts Bay, 3); Colorado (Fort Lyon, Bent County, 1); Massachusetts (Monomoy Island, 3); Connecticut (North Haven, 1); North Carolina (Pea Island, Dare County, 4); South Carolina (Mount Pleasant, 3); Florida (Amelie Island, Nassau County, 2; Nassau County, 1; Anclote, Pasco County, 6; West Jupiter, Palm Beach County, 1); Texas (Corpus Christi, 30; Port Lavaca, Calhoun County, 2; Rockport, 1); Arizona (Tucson, 1); Oklahoma (Alva, Woods County, 1); California (Moss Landing, Monterey County, 8; Seaside, Monterey County, 1; Monterey, 9; Carmel, Monterey County, 11; Pacific Beach, San Diego County, 5; Nigger Slough, Los Angeles County, 17; Fairmont, Los Angeles County, 1; Los Angeles County, 2; Alamitos Bay, Los Angeles County, 4; Hyperion, 3; Hayward, Alameda County, 4; San Bruno, San Mateo County, 3; Westport, Mendocino County, 2; San Diego County, 1; Dulzura, San Diego County, 1; San Diego, 1; Los Banos, Merced County, 1; Santa Barbara, 1; Eureka, 1; Trinidad, 1); Bahama Islands (Andros, 1); Virgin Islands (St. Croix, 1; Anegada, 1); Costa Rica (Puerto Jimenez, Puntarenas, 2; Piedra de Blanca, Guanacaste, 7).

Conover Collection.—27: Alaska (Hooper Bay, Bering Sea, 8);¹ South Carolina (Copahee Sound, 2); California (Yermo, San Bernardino County, 1; Wilmington, Los Angeles County, 4; San Diego Bay, 1; Goleta, Santa Barbara County, 1; Newport, Orange County, 2); Mexico (La Paz, Lower California, 1); Costa Rica (Punta Piedra, Guanacaste, 6); Panama (Perme, Darien, 1).

Genus EURYNORHYNCHUS Nilsson

*Eurynorhynchus*² Nilsson, Orn. Svec., 2, p. 29, 1821—type, by monotypy,
Eurynorhynchus griseus Nilsson=*Platalea pygmea* Linnaeus.

¹ Four downy young.

² Variouslly "emended" (cf. Ridgway, Bull. U. S. Nat. Mus., 50, (8), pp. 302-303, 1919).

Eurynorhynchus pygmeus (Linnaeus). SPOON-BILLED SANDPIPER.

Platalea pygmea Linnaeus, Syst. Nat., 10th ed., 1, p. 140, 1758—"Surinam," errore,=eastern Asia (type now in Upsala Museum; cf. Lilljeborg, Journ. Orn., 8, p. 299, 1860); idem, Mus. Adolph.-Frid., 2, Prodr., p. 26, 1764.

Eurynorhynchus griseus Nilsson, Orn. Svec., 2, p. 29, 1821—new name for *Platalea pygmea* Linnaeus.

Eurhinorhynchus orientalis Blyth, Ann. Mag. Nat. Hist., 13, p. 179, 1844—based on *Eurynorhynchus griseus* Pearson, Asiat. Res., 19, p. 69, pl. 9, 1836, Edmonstone Island, Bengal (type now in Liverpool Museum).¹

Eurynorhynchus pygm(a)eus Harting, Ibis, 1869, p. 427, pl. 12 (nuptial plumage)—Behring's Straits (monog.); idem, Proc. Zool. Soc. Lond., 1871, pp. 111, 114—"Choris Peninsula, Alaska"; (?)Nelson, Nat. Hist. Coll. Alaska, 3, p. 112, 1887—Choris Peninsula, Kotzebue Sound, Alaska (one doubtful record, 1849); Sharpe, Cat. Bds. Brit. Mus., 24, p. 535, 1896 (monog.); Thayer, Auk, 28, pp. 153–155, pls. 2, 3, 1911—Wrangel Island, Siberia (breeding; descr. of nest and eggs); Brooks, Bull. Mus. Comp. Zool., 59, p. 382, 1915—Providence Bay and Cape Serdze, Siberia (breeding); Dixon, Auk, 35, pp. 387–404, 1918—Wainwright Inlet, Alaska (Aug. 15, 1914), and Chukchi Peninsula, Siberia (habits, food, nest, etc.); Ridgway, Bull. U. S. Nat. Mus., 50, (8), p. 303, 1919 (monog.; full bibliog.); Bent, l.c., 142, p. 237, 1927 (life hist.); Belopolski, Journ. Orn., 81, p. 424, 1933—Anadyr Bay, Siberia (Aug. 13; young descr.); Ticehurst, Bull. Brit. Orn. Cl., 53, p. 206, 1933 (downy young descr.); Peters, Bds. World, 2, p. 282, 1934 (range).

Range.—Breeds in northeastern Siberia on the Chukchi Peninsula from Cape Vankarem to Plover Bay; winters in southern China, Hainan, and casually to Tenasserim, Arrakan, and Bengal; accidental in Alaska (Wainwright Inlet, Aug. 15, 1914).

Genus **EROLIA** Vieillot

Erolia Vieillot, Anal. Nouv. Orn., p. 55, April, 1816—type, by monotypy, *Erolia variegata* Vieillot=*Scolopax testacea* Pallas.

Pelidna Cuvier, Règ. Anim., 1, p. 490, "1817" (=Dec. 7, 1816)—type, by monotypy,² *Tringa cinclus* Linnaeus=*Tringa alpina* Linnaeus.

Oerolia Vieillot, Nouv. Dict. Hist. Nat., nouv. éd., 24, p. 123, 1818—emendation of *Erolia* Vieillot.

Pisobia Billberg, Syn. Faun. Scand., 1, (2), p. 136, tab. A, 1828—type, by subs. desig. (A. O. U. Committee, Auk, 25, p. 366, July, 1908), *Tringa minuta* Leister.

Leimonites Kaup, Skizz. Entw.-Gesch. Nat. Syst. Thierw., p. 37, 1829—type, by monotypy, *Tringa temminckii* Leisler.

¹ Cf. Forbes and Robinson, Bull. Liverpool Mus., 2, p. 72, 1899.

² The two "species" listed by Cuvier are both referable to *Tringa alpina*.

- Ancylocheilus* Kaup, Skizz. Entw.-Gesch. Nat. Syst. Thierw., p. 50, 1829—type, by monotypy, *Scolopax subarquata* Gldenstdt=*Scolopax testacea* Pallas.
- Actodromas* Kaup, Skizz. Entw.-Gesch. Nat. Syst. Thierw., p. 55, 1829—type, by monotypy, *Tringa minuta* Leisler.
- Schoenichus* G. R. Gray, List Bds. Brit. Mus., 3, p. 104, 1844—type, by subs. desig., *Tringa cinclus* Linnaeus=*Tringa alpina* Linnaeus.
- Arquatella* Baird, Rep. Expl. Surv. R. R. Pac., 9, pp. 714, 717, 1858—type, by orig. desig., *Tringa maritima* Brnnich.
- Heteropygia* Coues, Proc. Acad. Nat. Sci. Phila., 1861, p. 190—type, by orig. desig., *Tringa bonapartei* Schlegel=*Tringa fuscicollis* Vieillot.
- Delopygia* Coues, Proc. Acad. Nat. Sci. Phila., 1861, p. 190 (footnote)—substitute name for *Heteropygia* Coues.
- Limnocinclus* Gould, Handb. Bds. Australia, 2, p. 254, 1865—type, by subs. desig. (Mathews, Bds. Australia, 3, p. 254, 1913), *Totanus acuminatus* Horsfield.
- Actia* Heine, in Heine and Reichenow, Nomencl. Mus. Orn. Hein., p. 329, 1890—new name for *Arquatella* Baird.
- Neopisobia* Mathews, Bds. Australia, 3, (3), p. 245 (in text), Aug. 18, 1913—type, by orig. desig., *Totanus damacensis* auct. (not of Horsfield)=*Tringa subminuta* Middendorff.

****Erolia ruficollis* (Pallas). RUFOUS-NECKED SANDPIPER.**

- Trynga ruficollis* Pallas, Reisen Russ. Reich., 3, p. 700, 1776—"circa lacus salsos Davuriae campestris"—Kulussutai, southern Transbaikalia; cf. Ridgway, Bull. U. S. Nat. Mus., 50, (8), p. 290, 1919.
- Limonites ruficollis* Sharpe, Cat. Bds. Brit. Mus., 24, pp. 545, 767, 1896 (monog.); Thayer, Condor, 11, p. 173, 1909—Nome, Alaska (July 10, 1908); Buturlin, l.c., 12, p. 44, 1910—(?) "America septentrionalis" (Branicki Collection).
- Pisobia minuta ruficollis* Brooks, Bull. Mus. Comp. Zool., 59, p. 382, 1915—Providence Bay and Cape Serdze, northeastern Siberia (breeding).
- Pisobia ruficollis* Ridgway, Bull. U. S. Nat. Mus., 50, (8), p. 290, 1919 (monog.; full bibliog.); Bailey, Condor, 26, p. 195, 1924—Cape Prince of Wales (June 11, 1921) and Wainwright (Aug. 15, 1922), Alaska; idem, l.c., 28, p. 32, 1926—same localities (breeding); Swarth, l.c., 29, p. 200, 1927—St. Paul Island, Pribilofs (Aug. 27, 1920); Bent, Bull. U. S. Nat. Mus., 142, p. 215, 1927 (life hist.); Ford, Auk, 51, p. 232, 1934—Cape Prince of Wales, Alaska (nest and eggs descr.); Hanna, Condor, 42, p. 122, 1940—near Cape Prince of Wales, Alaska (eggs descr.).
- Erolia ruficollis* Peters, Bds. World, 2, p. 282, 1934 (range).

Range.—Breeds in northeastern Siberia (Cape Serdze, Kooshka, Providence Bay, etc.) and northwestern Alaska (Cape Prince of Wales, Wainwright, Nome); winters from China and Japan south to Burma, the Andaman and Nicobar Islands, Philippines, Malay

Archipelago, and Australia. One record for the Pribilof Islands (St. Paul, Aug. 27, 1920).

Field Museum Collection.—1: Alaska (Nome, 1).

***Erolia subminuta* (Middendorff). LONG-TOED STINT.**

Tringa subminuta Middendorff, Reise N. O. und OstSibirien, 2, (2), p. 222, pl. 19, fig. 6, 1853—west slope of Stanovoi Mountains (May 19) and mouth of Uda River (June 30), Siberia (cotypes probably in Leningrad Museum); Seebohm, Geog. Distr. Charad., p. 438, 1887 (crit.); Hartert, Nov. Zool., 23, pp. 92–93, 1916 (nomencl.).

Tringa damacensis (not *Totanus damacensis* Horsfield)¹ Ridgway, Auk, 3, p. 275, 1886—Otter Island, Alaska (June 8, 1885).

Pisobia subminuta Ridgway, Bull. U. S. Nat. Mus., 50, (9), p. 300, 1919 (monog.; full bibliog.); Preble and McAtee, N. Amer. Fauna, 46, p. 73, 1923—Otter Island; Bent, Bull. U. S. Nat. Mus., 142, p. 213, 1927 (life hist.).

Erolia subminuta Peters, Bds. World, 2, p. 283, 1934 (range).

Range.—Breeds in eastern Siberia south to Kamchatka and on the Commander and Kurile Islands, perhaps also on Sakhalin; winters in India, Burma, Malay Peninsula, Sunda Islands, and Philippines; accidental in Alaska (Otter Island, Pribilof group, June 8, 1885).

****Erolia minutilla* (Vieillot). LEAST SANDPIPER.**

Tringa minutilla Vieillot, Nouv. Dict. Hist. Nat., nouv. éd., 34, p. 466, 1819—"en Amérique jusqu'au delà du Canada, . . . souvent vu à Halifax, dans la Nouvelle-Ecosse, . . . dans les îles Antilles";=Halifax, Nova Scotia (as designated in A.O.U. Check-List, 4th ed., p. 120, 1931); Schlegel, Mus. Pays-Bas, livr. 6, Scolopaces, p. 48, 1864—Wisconsin, Costa Rica, and Mexico (crit.); Léotaud, Ois. Trinidad, p. 476, 1866—Trinidad; Newton, Proc. Zool. Soc. Lond., 1867, p. 165, pl. 15, fig. 3 (egg)=Arctic coast east of Anderson River, Mackenzie (eggs descr.); Sclater and Salvin, l.c., p. 591—Mexiana Island, Pará, Brazil; iidem, l.c., 1870, p. 323—Indefatigable Island, Galápagos; iidem, l.c., 1873, p. 456 (geog. distr.); Layard, Ibis, 1873, p. 396—near Pará; Reinhardt, Vidensk. Medd. Naturhist. Foren., 1874, p. 179—near Niakornaet, Omenakfjord, Greenland (spring, 1867); Taczanowski, Proc. Zool. Soc. Lond., 1874, p. 561—Laguna Villa, near Chorillos, Lima, Peru; idem, l.c., 1877, p. 330—between Tumbes and Santa Lucia, Tumbes, Peru; Cory, Auk, 4, p. 313, 1887—West Indies (descr.); idem, Bds. W. Ind., p. 234, 1889 (descr.); Hartert, Ibis, 1893, p. 335—Bonaire Island (July 23); Richmond, Proc. U. S. Nat. Mus., 16, p. 526, 1893—Rio Escondido, Nicaragua (Dec.),

¹ *Totanus damacensis* Horsfield (Trans. Linn. Soc. Lond., 13, p. 192, 1821—Java; type in British Museum) is a synonym of *Trynga ruficollis* Pallas (cf. Hartert, Nov. Zool., 23, p. 92, 1916).

- and Rio Frio, Costa Rica (Feb. 29); Chapman, Bull. Amer. Mus. N. H., 6, p. 77, 1894—Moruga, Trinidad; Winge, Medd. Grøn., 21, p. 162, 1898—Niakornak, Greenland; Allen, Bull. Amer. Mus. N. H., 13, p. 126, 1900—Ciénaga, Colombia; Hartert, Nov. Zool., 9, p. 307, 1902—Bonaire; Hellmayr, l.c., 13, p. 54, 1906—Seelet, Trinidad (April); Chapman, Bull. Amer. Mus. N. H., 36, p. 224, 1917—Quibdó (Aug. 20 to Nov. 11), Juntas de Tamaná (Dec. 20), Novitá (Dec. 24), Cali (Dec. 25), Palmira (Apr. 13), and Rio Frio (Dec. 2), Colombia.
- Tringa wilsonii* Nuttall, Man. Orn. U. S. and Canada, Water Birds, p. 121, 1834—based on *Tringa pusilla* (not of Linnaeus) Wilson, Amer. Orn., 5, p. 32, pl. 37, fig. 4, Nootka Sound, west coast of America (type now in coll. of the Academy of Natural Sciences, Philadelphia; cf. Ridgway, Bull. U. S. Nat. Mus., 50, (8), p. 299, 1919); Cassin, Proc. Acad. Nat. Sci. Phila., 1860, p. 196—Carthagena, Colombia; Pelzeln, Orn. Bras., 3, p. 311, 1870—Cuyabá (Apr.) and Engenho do Cap Gama (Sept.), Matto Grosso, Brazil.

Handl.*, (3), 23, p. 73, 1945—Bolivia, El Beni (Cachuela Esperanza, Sept.).

Range.—Breeds in North America south of the Barren Grounds¹ from northwestern Alaska to Labrador, south to the upper Yukon Valley, northern part of British Columbia, Fort Churchill, the Magdalen Islands, Newfoundland, and Sable Island; winters from southern California, Texas, and North Carolina south through Mexico, Central America, the West Indies, and South America to the Galápagos Islands, Peru (Eten, Lambayeque; Trujillo, Libertad; Chorillos, Lima),² and southern Brazil (Matto Grosso and Bahia); casual in Greenland (three records) and in the British Isles.

Field Museum Collection.—297: Alaska (Bethel, 2); Yukon Territory (Yukon River, 5); British Columbia (Sumas, 5; Okanagan, 4);

¹ There would seem to be grave doubts as to the validity of the nesting records from Southampton Island and northward (cf. Sutton, *Mem. Carnegie Mus.*, 12, (2), sec. 2, p. 138, 1932).

² There is no record from Chile, included by certain authors in the winter range of the Least Sandpiper.

Saskatchewan (Maple Creek, 1); Quebec (Magdalen Islands, 2); Nova Scotia (Clarks Harbor, 5; Barrington, 2); Labrador (Indian Harbor, 3; Battle Harbor, 2); Montana (Miles City, 1); North Dakota (Towner County, 10; Rocklake, Towner County, 9; Stump Lake, Nelson County, 3; Oakes, Dickey County, 1; Devil's Lake, Ramsey County, 1); Wisconsin (Beaver Dam, 4); Illinois (Rondout, Lake County, 1; Libertyville, 1; Mud Lake, Cook County, 4; Hyde Park, Cook County, 1; Chicago, 1; Worth, Cook County, 2); Massachusetts (Monomoy Island, 12); Connecticut (New Haven County, 25; North Haven, 21; West Haven, 1; New Haven, 2; East Hartford, 5); New York (Suffolk County, 4); Colorado (Fort Lyon, Bent County, 3); North Carolina, Dare County (Pea Island, 12; Bodie Island, 1); South Carolina (Mount Pleasant, 1); Georgia (Roswell, Cobb County, 1); Florida (Anclote, Pasco County, 19; Amelie Island, Nassau County, 4; East Pass, Okaloosa County, 1; Key West, 1); Texas (Corpus Christi, 13; Austin, 1; Rockport, 4); Arizona (Fort Lowell, Pima County, 2); California (Carmel, Monterey County, 1; Salt Lagoons, Monterey County, 2; Moss Landing, Monterey County, 3; La Patera Point, Santa Barbara County, 5; Pacific Beach, San Diego County, 4; Sunset Beach, Orange County, 3; Corona, Riverside County, 4; Inverness, Marin County, 3; Red Bluff, Tehama County, 3; Rincon, Ventura County, 1); Mexico (La Paz, Lower California, 1; Salinas, Coahuila, 2; Pacaitun, Campeche, 1); Bahama Islands (Andros Island, 27; Great Inagua Island, 4; Nassau, New Providence Island, 2; Eleuthera Island, 2; Mari-guana Island, 3); Jamaica (Grand Cayman Island, 4); Virgin Islands (St. Croix, 1); Lesser Antilles (Guadeloupe, 4); Dutch West Indies (Aruba, 5); Guatemala (Los Amates, Izabal, 2; San José, 1); El Salvador (Laguna Olomega, 1); Costa Rica (Limón, Limón, 1); Venezuela (Lake Valencia, Aragua, 1; Margarita Island, 1); Brazil (Mangunça Island, Maranhão, 1); Peru (Pacasmayo, Libertad, 1).

Conover Collection.—29: Manitoba (Churchill, 6); North Dakota (Grafton, Walsh County, 2); Nebraska (thirty miles south of Wood Lake, Cherry County, 1); Massachusetts (East Orleans, 3; Rockport, 1; Pigeon Cove, 1); California (Yermo, San Bernardino County, 3; Point Magie, Ventura County, 1; Goleta, Santa Barbara County, 2); Mexico (Altamira, Tamaulipas, 1); Venezuela (Rio Cogollo, Perija, 1); Ecuador (Milagro, Guayas, 2; Malacatos, Loja, 1; Brazil (Ibiapaba, Piauhy, 1; Santarém, Pará, 3).

Erolia fuscicollis (Vieillot).¹ WHITE-RUMPED SANDPIPER.

Tringa fuscicollis Vieillot, Nouv. Dict. Hist. Nat., nouv. éd., 34, p. 461, 1819—based on "Chorlito pestorejo pardo" Azara, No. 404, Paraguay; Berlepsch, Journ. Orn., 22, p. 263, 1874—Blumenau, Santa Catharina (crit.); Durnford, Ibis, 1878, pp. 68, 404—province of Buenos Aires (April, Oct.) and Patagonia (valleys of the Sengel and Sengelen rivers, Chubut); Sclater and Salvin, Proc. Zool. Soc. Lond., 1878, p. 438—Falkland Islands; Sharpe, l.c., 1881, p. 16—Peckett Harbour, Straits of Magellan (Jan. 4); White, l.c., 1883, p. 42—La Plata, Buenos Aires (Nov. 3); Barrows, Auk, 1, p. 314, 1884—Entre Ríos (Concepción del Uruguay) and Buenos Aires (Carhué, Mar.-April); Berlepsch, Journ. Orn., 35, p. 36, 1887—Rio Pilcomayo, Chaco (Jan. 22); Salvin, Ibis, 1889, p. 379—Cozumel Island; Allen, Bull. Amer. Mus. N. H., 2, p. 109, 1889—falls of the Rio Madeira, Bolivia (Oct.); Cory, Bds. W. Ind., p. 235, 1889 (descr.; West Indian references and localities); Ridgway, Proc. U. S. Nat. Mus., 12, p. 137, 1890—Gregory Bay, Straits of Magellan; Oustalet, Miss. Sci. Cap Horn, 6, p. B. 127, 1891—Punta Arenas (Nov. 7), Tierra del Fuego (Bahía Orange, Sept. 9; Bahía Buen Suceso, Oct. 30), and Falkland Islands (French Bay, Mar. 7); Holland, Ibis, 1891, pp. 16, 20—Est. Espartillar, Buenos Aires; Kerr, l.c., 1892, p. 151—Rio Pilcomayo, Chaco; Holland, l.c., 1892, p. 211—Est. Espartillar (Mar. to Aug.); Allen, Bull. Amer. Mus. N. H., 5, p. 150, 1893—Chapada, Matto Grosso (Oct.); Winge, Medd. Grøn., 21, p. 163, 1898—Greenland; Crawshaw, Bds. Tierra del Fuego, p. 128, 1907—Useless Bay Settlement (Sept. 17, 1904); Hellmayr, Nov. Zool., 17, p. 425, 1910—Engenho do Gama, Rio Guaporé, Brazil (ex Pelzel); Reiser, Denks. Math.-Naturw. Kl. Akad. Wiss. Wien, 76, p. 94, 1910—Rio Grande near Barra, Bahia (Apr. 8); Grant, Ibis, 1911, p. 468—Buenos Aires (Los Yngleses, Ajó, Jan. 23, Mar. 15, Oct. 27; Cape San Antonio, Dec. 17) and Corrientes (Esquina, Nov. 14); Gibson, l.c., 1920, p. 67—Cape San Antonio, Buenos Aires (Oct. to Mar.).

Pelidna pectoralis Say, Long's Exp. Rocky Mts., 1, p. 171, 1823—near Council Bluffs, Iowa (type lost); Cassin, in Gilliss, U. S. Astr. Exp., 2, p. 195, 1855—Chile.

Tringa dorsalis (Lichtenstein MS.) Meyen, Nov. Act. Acad. Caes. Leop.-Carol. Nat. Cur., 16, Suppl., 1, p. 107, 1834—based on "Chorlito à dos noir" Azara, No. 401, plateaux of southern Peru;¹ Burmeister, Syst. Uebers. Th. Bras., 3, p. 374, 1856—southern Brazil, Montevideo and Chile (descr.); *idem*, Journ. Orn., 8, p. 261, 1860—Mendoza; *idem*, Reise La Plata St., 2, p. 503, 1861—Mendoza.

¹ Meyen states that his Peruvian specimen differs from those of Mexico and Montevideo by smaller size, but does not describe either of them. *Tringa dorsalis*, here published for the first time from Lichtenstein's manuscript, thus stands as a name proposed for Azara's No. 401, quoted by Meyen as "Chorlito à dos noir" from the French translation of the "Apuntamientos," and becomes a synonym of *T. melanotos*, having the same basis.

- Tringa pectoralis* Jardine, Ann. Mag. Nat. Hist., 20, p. 375, 1847—Tobago; Sclater, Proc. Zool. Soc. Lond., 26, p. 556, 1858—Riobamba, Ecuador; Reinhardt, Ibis, 1861, p. 11—Nanortalik, Greenland; Cabanis, Journ. Orn., 26, p. 199, 1878—Córdoba (March).

Pisobia aurita Anthony, Auk, 39, p. 106, 1922—Mission Bay, San Diego County, California.

Erolia acuminata Peters, Bds. World, 2, p. 284, 1934 (range).

Range.—Breeds in northeastern Siberia from the mouth of the Indigirka to the Chukchi Peninsula; winters in the eastern part of the Malay Archipelago, New Guinea, Australia, and on South Pacific Islands; during autumn migration in Alaska (Kotzebue Sound and Bering Sea coast), on the Pribilof and Aleutian Islands; occasional in British Columbia (Comox, Oct. 4, 1903; Masset, Queen Charlotte Islands), Washington (Westport, Nisqually), and California (San Diego, Sept. 16, 1921); casual in the Hawaiian Islands (three records); accidental in the British Isles.

Field Museum Collection.—9: Alaska (St. Michaels, 4; St. George Island, 1; Bethel, 2; Unalaska, 2).

****Erolia maritima* (Brünnich). PURPLE SANDPIPER.**

Tringa maritima Brünnich, Orn. Bor., p. 54, 1764—Christiansö and Norway; Holböll, Naturh. Tidskr. (Krøyer), 4, p. 408, 1843—Greenland; Seebohm, Geog. Distr. Charad., p. 428, 1887 (crit.); Winge, Medd. Grøn., 21, p. 164, 1898—Greenland.

Arquatella maritima Sharpe, Cat. Bds. Brit. Mus., 24, p. 578, 1896 (monog.); Ridgway, Bull. U. S. Nat. Mus., 50, (8), p. 239, 1919 (monog.; full bibliog.); Bent, l.c., 142, p. 146, 1927 (life hist.); Bradlee, Proc. Bost. Soc. N. H., 39, p. 317, 1931—Bermuda Islands (St. George's Harbor; sight record).

Calidris maritima maritima Løppenthin, Medd. Grøn., 91, No. 6, p. 55, 1932—Shannon, Sabine, and Clavering Islands, Greenland (breeding).

Erolia maritima Peters, Bds. World, 2, p. 285, 1934 (range); Trautman, Wilson Bull., 56, p. 46, 1944—Ohio; Soper, Auk, 63, p. 228, 1946—Baffin Island (migration; probably nesting).

Range.—In North America breeds from Melville and Ellesmere Islands south to Melville Peninsula and Baffin Island and in Greenland; also in Iceland, on the Färoes, and on the Arctic coasts of

northern Europe and Asia east to the Taimyr Peninsula, including Spitsbergen, Novaya Zemlya, and Franz Josef Land; winters on the Atlantic coast of America from southern Greenland to Long Island, casually to southern Florida and shores of the Great Lakes (Cleveland, Ohio, June, 1895; Cook County, Illinois, Nov., 1886); also in Iceland, northern and western Europe.

Field Museum Collection.—29: Greenland (Godhaven, Disko Island, 4; Godthaab, 1; Nanortalik, 1); Baffin Land (Franklin, 2); Prince Edward Island (Malpeque, 1); New Brunswick (Grand Manan Island, 8; unspecified, 2); Quebec (Magdalen Islands, 1); Maine (unspecified, 1; Matinicus, Knox County, 1); Massachusetts (Bristol County, 2); Connecticut (Stamford, 1; New Haven County, 1; Branford, 1; Stony Creek, New Haven County, 1; New Haven Harbor, 1).

Conover Collection.—21: Greenland (Godthaab, 7; Nanortalik, 1); Massachusetts, Essex County (Rockport, 8; Pigeon Cove, 4); Connecticut (Branford, New Haven County, 1).

****Erolia ptilocnemis tschuktschorum* (Portenko).¹ ALASKAN SANDPIPER.**

Arquatella maritima tschuktschorum Portenko, Mitt. Zool. Mus. Berlin, 22, p. 225, 1937—"Terrae Tschuktschorum" (type from Uelen in coll. of L. Portenko).

Tringa couesi Turner, Contr. Nat. Hist. Alaska, 2, p. 147, 1886—part, St. Michaels; Nelson, Nat. Hist. Coll. Alaska, 3, p. 103, 1887—St. Michaels (migration Aug., Oct.).

Tringa ptilocnemis Nelson, Nat. Hist. Coll. Alaska, 3, p. 105, 1887—part, St. Lawrence Island (nesting).

[*Arquatella maritima*] subsp. *a.* *Arquatella couesi* Sharpe, Cat. Bds. Brit. Mus., 24, p. 583, 1896—part, spec. a-w, St. Michaels and Port Etolin, Alaska.

¹*Erolia ptilocnemis tschuktschorum* (Portenko): Nearest to *E. p. couesi* but in breeding plumage is darker, more reddish, less ochraceous, above, with the white tips to the feathers broader and more conspicuous because of the generally darker appearance of the bird as a whole. This darker hue is brought about by the light edges to the feathers being narrower and dark reddish instead of dark buff. Winter and immature birds are indistinguishable. Size slightly larger.

From the typical race it differs in breeding dress by having the light edges to the feathers of the upper parts dark reddish, not reddish clay color; the rump, primaries, secondaries and upper wing coverts darker, with narrow white edges to latter; and the crown of the head darker, less grayish. The under parts also have a darker appearance. The winter and immature plumages are much darker.

Additional material examined.—Siberia: Emma Harbor, 14; East Cape, 3; Cape Serdze, 1.—Alaska: St. Lawrence Island, 18; Wales, 22; Norton Sound, 1; St. Michaels, 19; Hooper Bay, 1; Nunivak Island, 16; St. Paul Island, 4; Admiralty Island, 3; Sitka, 1; Juneau, 1; Forrester Island, 9.

Arquatella ptilocnemis ptilocnemis Ridgway, Bull. U. S. Nat. Mus., 50, (8), p. 247, 1919—part, St. Lawrence Island and Norton Sound; Friedmann, Proc. U. S. Nat. Mus., 80, art. 12, p. 19, 1932—St. Lawrence Island (nesting); Gabrielson, Auk, 61, p. 124, 1944—Nunivak Island (nesting).

Arquatella ptilocnemis couesi Ridgway, Bull. U. S. Nat. Mus., 50, (8), p. 247, 1919—part, northeastern Siberia, St. Lawrence Island, and coast of Alaska (Kotzebue Sound to Sitka); Bent, l.c., 142, p. 159, 1927—part, except Aleutian Islands; Swarth, Pac. Coast Avifauna, 22, p. 29, 1934—Nunivak Island (part, breeding population); Slipp, Condor, 45, p. 198, 1943—Smith Island, San Juan County, Washington.

Arquatella maritima couesi Preble and McAtee, N. Amer. Fauna, 46, p. 66, 1923—Pribilof Islands (St. Paul, Sept. to Nov.; Northeast Point, April 24; St. George Island, Feb. 12); Bailey, Condor, 27, p. 236, 1925—Wales, Alaska (nesting); Conover, Auk, 43, p. 306, 1926—Point Dall (migration), Igiak Bay (nesting?).

Erolia ptilocnemis ptilocnemis Peters, Bds. World, 2, p. 285, 1934—part, St. Lawrence Island only.

Erolia ptilocnemis couesi Peters, Bds. World, 2, p. 285, 1934—part, except Aleutian Islands.

Erolia ptilocnemis tschuktschorum Conover, Field Mus. Nat. Hist., Zool. Ser., 29, p. 174, 1944 (dist. chars.; plumages; range).

Range.—Known to nest in Siberia (Emma Harbor, on Providence Bay), on St. Lawrence and Nunivak Islands and at Wales, Alaska, but probably breeds on the Chukchi Peninsula, Siberia, and in suitable localities between Cape Prince of Wales and Hooper Bay, Alaska. Winters on the Pacific coast of North America from the Alaska Peninsula south to Washington and occasionally northwestern Oregon; probably also on the Kamchatka Peninsula.

Field Museum Collection.—71: Siberia (Kolintschin Bay, 1); Alaska (St. Lawrence Island, 3; Nome, 1; St. Michaels, 58; St. George Island, 1; Forrester Island, 5); British Columbia (Queen Charlotte Islands, 2).

Conover Collection.—26: Alaska (Nome, 1; Topkok, 2; Hooper Bay, 12; False Pass, 1; Wrangell, 3; Craig, Prince of Wales Island, 1); British Columbia (Comox, Vancouver Island, 2); Washington (Jefferson County, 4).

**Erolia ptilocnemis ptilocnemis* (Coues). PRIBILOF SANDPIPER.

Tringa ptilocnemis Coues, in H. W. Elliot, Rep. Seal Ids., Alaska, unpagcd, note "1873"=Jan., 1874—St. George Island, Pribilof Islands (type in U. S. National Museum); idem, Amer. Nat., 8, p. 500, 1874 (reprint orig. descr.); Nelson, Nat. Hist. Coll. Alaska, 3, p. 105, 1887—part, Fur Seal Islands and St. Mathews.

Tringa gracilis Harting, Proc. Zool. Soc. Lond., 1874, p. 242, pl. 40, figs. 4–6, after June 20, 1874—St. Paul Island, Pribilof group (type in collection of J. E. Harting, now in British Museum).

Arquatella ptilocnemis Ridgway, Bull. Nutt. Orn. Cl., 5, p. 163, 1880 (diag.; crit.); Hanna, Condor, 23, p. 50, 1921—part, except St. Lawrence Island (life hist.).

Tringa maritima ptilocnemis Seebohm, Geog. Distr. Charad., p. 431, 1887 (crit.).

[*Arquatella maritima*] subsp. β . *Arquatella ptilocnemis* Sharpe, Cat. Bds. Brit. Mus., 24, p. 584, 1896—part, spec. a–e, St. George and St. Paul Islands, Pribilof group (monog.).

Arquatella ptilocnemis ptilocnemis Ridgway, Bull. U. S. Nat. Mus., 50, (8), p. 244, 1919—part, except St. Lawrence Island and Norton Sound (monog.; full bibliog.); Bent, l.c., 142, p. 152, 1927—part, except St. Lawrence Island (life hist.); Swarth, Pac. Coast Avifauna, 22, p. 29, 1934—Nunivak Island (Oct. 5).

Arquatella maritima ptilocnemis Preble and McAtee, N. Amer. Fauna, 46, p. 67, 1923—Pribilof Islands (nesting; habits; food); Conover, Auk, 43, p. 307, 1926—Point Dall (May 23), Igiak Bay (July 23).

Erolia ptilocnemis ptilocnemis Peters, Bds. World, 2, p. 285, 1934—part, except St. Lawrence Island; Conover, Field Mus. Nat. Hist., Zool. Ser., 29, p. 170, 1944 (dist. chars.; plumages; range).

Range.—Breeds in Bering Sea on the Pribilof, St. Matthew and Hall Islands. Winter range not well known, but the bird leaves the Pribilofs by October and has been found sparingly either on migration or wintering at Hooper Bay (May 23), Nunivak Island (Oct. 5), and on the Alaska Peninsula and southern Alaska.

Field Museum Collection.—15: Pribilof Islands (St. Paul Island, 11; St. George Island, 4).

Conover Collection.—2: Alaska (Hooper Bay, Bering Sea, 2).

****Erolia ptilocnemis couesi* (Ridgway). ALEUTIAN SANDPIPER.**

Arquatella couesi Ridgway, Bull. Nutt. Orn. Cl., 5, No. 3, p. 160, July, 1880—"Aleutian Islands and coast of Alaska, north to St. Michael" (type from Chicagoff Harbor, Attu Island, Aleutian Islands, in the U. S. National Museum).

Tringa couesi Turner, Contr. Nat. Hist. Alaska, 2, p. 147, 1886—part, Aleutian Islands; Nelson, Nat. Hist. Coll. Alaska, 3, p. 103, pl. 6, 1887—Aleutian Islands (nesting; life hist.).

Tringa maritima couesi Seebohm, Geog. Distr. Charad., p. 430, 1887 (crit.).

[*Arquatella maritima*] subsp. α . *Arquatella couesi* Sharpe, Cat. Bds. Brit. Mus., 24, p. 583, 1896—part, spec. x–a¹, Unalaska and Atka Islands.

Arquatella maritima couesi Clark, Proc. U. S. Nat. Mus., 38, p. 50, 1911—Atka, Agattu and Attu Islands.

Arquatella ptilocnemis couesi Ridgway, Bull. U. S. Nat. Mus., 50, (8), p. 247, 1919—part, Aleutian Islands only (monog.; full bibliog.); Bent, l.c., 142, p. 159, 1927—part, Aleutian Islands only (life hist.).

Erolia ptilocnemis couesi Peters, Bds. World, 2, p. 285, 1934—part, Aleutian Islands only; Conover, Field Mus. Nat. Hist., Zool. Ser., 29, p. 173, 1944 (dist. chars.; plumages; range); Sutton and Wilson, Condor, 48, p. 88, 1946—Attu Island (wintering, Feb. 20–Mar. 18).

Range.—Resident on the Aleutian and Shumagin Islands. Probably intergrading with *E. p. tschuktschorum* on the Alaska Peninsula. Perhaps straggling in winter to the coast of southeastern Alaska.

Field Museum Collection.—7: Aleutian Islands (Unalaska, 6); Alaska Peninsula (Pavlof Bay, 1).

Conover Collection.—3: Aleutian Islands (Shemya Island, Semichi Islands, 3).

***Erolia ptilocnemis quarta* Hartert.¹ COMMANDER ISLAND SAND-PIPER.**

Erolia maritima quarta Hartert, Nov. Zool., 27, p. 137, 1920—Bering Island (type in the Tring Collection, now in the American Museum of Natural History, New York, examined).

[*Arquatella maritima*] subsp. β . *Arquatella ptilocnemis* Sharpe, Cat. Bds. Brit. Mus., 24, p. 584, 1896—part, spec. f, Bering Island.

Arquatella ptilocnemis couesi Ridgway, Bull. U. S. Nat. Mus., 50, (8), p. 247, 1919—part, Bering Island.

Arquatella maritima couesi Bailey, Condor, 27, p. 236, 1925—part, Wales, Alaska, No. 8962 only.

Erolia ptilocnemis quarta Peters, Bds. World, 2, p. 285, 1934 (range); Conover, Field Mus. Nat. Hist., Zool. Ser., 29, p. 177, 1944—Wales, Alaska (dist. chars.; range).

Range.—Breeding and probably resident on the Commander Islands. One record for Alaska (Wales, June 8).

***Erolia alpina arctica* Schiøler.² GREENLAND DUNLIN.**

¹*Erolia ptilocnemis quarta* Hartert: This race has the light edgings to the mantle, scapulars and tertials so broad that the dorsal surface has the appearance of being almost solid rufescent. Males, wing 117–126, culmen 25–28; females, wing 120–128, culmen 27–32.5 mm.

The specimen taken on Attu Island and referred provisionally by Bent (Bull. U. S. Nat. Mus., 142, p. 160, 1927) to *quarta* has been examined by the junior author and in his opinion is not nearly rusty enough for that race but simply a rather aberrant specimen of *couesi*. The example mentioned by Bailey (Condor, 27, p. 238, 1925) from Wales, Alaska, however, agrees in size and the redness of the dorsal surface with a breeding series from Bering Island.

Specimens examined.—Bering Island, 9.—Alaska, Wales, 1.

²*Erolia alpina arctica* Schiøler: Nearest to *E. a. alpina*, but smaller, being about the size of *E. a. schinzii*, of the Baltic countries; dorsal coloration less reddish, more brownish. Wing, 107–113, (female) 109–118; bill, 24–28, (female) 29–32.

Erolia alpina arctica Schiøler, Dansk. Orn. Foren. Tidsskr., 16, Nos. 1-2, p. 19, May, 1922—northeastern Greenland (type, not specified, in coll. of E. L. Schiøler, now in Copenhagen Museum); Peters, Bds. World, 2, p. 285, 1934 (range); Griscom, Auk, 54, p. 70, 1937—Massachusetts (dist. chars.).

Tringa schinzii (not of Brehm, 1822) Holböhl, Naturh. Tidskr., 4, p. 409, 1843—Nanortalik; Reinhardt, Ibis, 1861, p. 11—Greenland.

Tringa alpina (not of Linnaeus) Winge, Medd. Grøn., 21, p. 169, 1898—Greenland; Manniche, l.c., 45, No. 1, p. 136, 1910—Stormkap, northeastern Greenland (breeding habits).

Calidris alpina arctica Løppenthin, Medd. Grøn., 91, No. 6, p. 60, 1932—northeastern Greenland (crit.; habits); Hartert, Vög. Pal. Fauna, Ergänzungsband, p. 472, 1936 (crit.); Bird and Bird, Ibis, 1941, p. 144—Greenland (crit.; meas.); Hørring and Salomonsen, Medd. Grøn., 131, p. 38, 1941—Greenland.

Range.—Eastern Greenland (migration route and winter range unknown).¹ (?)Accidental in Massachusetts.

****Erolia alpina pacifica* (Coues). RED-BACKED SANDPIPER;
AMERICAN DUNLIN.**

Tringa alpina var. *americana* (not *Pelidna americana* Brehm 1855) Cassin, in Baird, Rep. Expl. Surv. R. R. Pac., 9, p. 719, 1858—temperate regions of North America (crit.; no type designated).

Pelidna pacifica Coues, Proc. Acad. Nat. Sci. Phila., 1861, p. 189 (in text)—Semiahmoo, Whatcom County, Washington (type in U. S. National Museum, No. 9540; cf. Stejneger, Bull. U. S. Nat. Mus., 29, p. 121, 1885).

Pelidna alpina pacifica Stejneger, Bull. U. S. Nat. Mus., 29, p. 120, 1885—Bering Island (crit.; nomencl.); Oberholser, Auk, 34, p. 200, 1917 (crit.); Bishop, Condor, 40, p. 225, 1938 (correct name for American birds).

Tringa alpina pacifica Seebohm, Geog. Distr. Charad., p. 427, 1887 (crit.); Dwight, Auk, 17, p. 381, 1900 (plumages).

Pelidna americana Sharpe, Cat. Bds. Brit. Mus., 24, pp. 608, 769, 1896 (monog.; in part).

Pelidna alpina sakhalina (not of Vieillot) Ridgway, Bull. U. S. Nat. Mus., 50, (8), p. 262, 1919 (monog.; full bibliog.); Conover, Auk, 43, p. 308, 1926—Hooper Bay, Alaska (nesting); Bent, Bull. U. S. Nat. Mus., 142, p. 221, 1927 (life hist.); Grinnell, Univ. Calif. Pub. Zool., 32, p. 91, 1928—Lower California (winter); Hurley, Murrelet, 13, p. 19, 1932—Nakeen, Bristol Bay, Alaska (nesting); Van Tyne, Occ. Pap. Mus. Zool. Univ.

¹ It is probable that most, if not all, of the records of *Erolia alpina alpina* (Linnaeus) from eastern North America (Fort Churchill, Keewatin; Shinnecock Bay, Long Island, Sept. 15, 1892; Chatham, Mass., Aug. 11, 1900) really pertain to *E. a. arctica* (cf. Ridgway, Bull. U. S. Nat. Mus., 50, (8), p. 257, 1919; Bent, l.c., 142, p. 221, 1927, s.n. *Pelidna a. alpina*). Griscom (Auk, 54, pp. 71-72, 1937), in fact, on reexamination found the Chatham bird to be *arctica*. Another (crippled) example shot at Cape Cod, Massachusetts, on August 16, 1936, he believes to be referable to the European *E. alpina alpina* (Linnaeus), mainly on account of its long bill (culmen 37.2 mm.).

Mich., 255, p. 2, 1933—Brownsville, Texas (wintering); Swarth, Pac. Coast Avifauna, 22, p. 33, 1934—Nunivak Island (nesting).

Erolia alpina sakhalina Hartert, Vög. Pal. Fauna, 2, p. 1577, 1920 (monog.); Buturlin, Alauda, 4, p. 266, 1932 (char.; range); Peters, Bds. World, 2, p. 286, 1934 (range); Griscom, Auk, 54, p. 70, 1937 (dist. chars.); Soper, l.c., 63, p. 230, 1946—Baffin Island (rare).

"*Pelidna alpina pacifica*; *P. a. sakhalina*" Bailey, Condor, 28, p. 33, 1926—northern Alaska (breeding).

Erolia alpina pacifica Conover, Condor, 47, p. 214, 1945 (dist. chars.; American birds differ from those of Siberia).

Range.—Breeds from Point Barrow, Alaska, east to the Boothia Peninsula and south to Bristol Bay and the west coast of Hudson Bay (Churchill); winters on the west coast of North America from British Columbia to Lower California and on the Gulf and South Atlantic coasts of the United States; casual in the West Indies (Dominica, Oct. 1, 1904) and in Nicaragua (Momotombo, May 23).

Field Museum Collection.—92: Alaska (Barrow, 2; Point Hope, 1; St. Lawrence Island, 3; Nome, 2; St. Michaels, 37); British Columbia (Queen Charlotte Islands, 2); North Dakota (Towner County, 3); Minnesota (Heron Lake, 2); Wisconsin (Beaver Dam, 6); Illinois (Chicago, 2; Waukegan, 2; Meredosia, 1); Massachusetts (Chatham, 6; Monomoy Island, 9); Connecticut (West Haven, 4; Stony Creek, 1; New Haven County, 1); New York (Cayuga Lake, 2); Virginia (Cape Charles, 6; Cobb's Island, 1); North Carolina, Dare County (Pea Island, 31; Bodie Island, 1); South Carolina (Mount Pleasant, 5); Florida (Amelia Island, 5; Anclote, 6); Texas (Cameron County, 1; Aransas Pass, 1; Port Lavaca, 2; Port O'Connor, 1; Seadrift, 2); California (San Francisco, 1; Miller, 8; mouth of Carmel River, Monterey County, 1; Monterey, 5; Trinidad, 4; Redwood, 1; Anaheim, 1; La Patera Point, 10; Hook's Point, 1; Alviso, 1; Pacific Beach, 1; San Diego, 4; Nigger Slough, Los Angeles County, 3; Motordrome, Los Angeles County, 1); Mexico (La Paz, Lower California, 2).

Conover Collection.—37: Alaska (Hooper Bay, 9; Igiak Bay, 2); North Dakota (Grafton, 2); Indiana (Wolf Lake, 1); Illinois (Calumet Lake, 1); Michigan (Thunder Bay Island, Alpena County, 1); Massachusetts (Chatham, 1; Ipswich, 1); New York (Cayuga, 1; Cayuga Lake, 2); North Carolina (Hatteras, 1); South Carolina (Copahee Sound, 2); Florida (Nassau County, 2; Amelia Island, 2); California (Moss Landing, 4; Goleta, 1; Point Magie, 1); Mexico (La Paz, Lower California, 1).

***Erolia ferruginea** (Pontoppidan). CURLEW SANDPIPER.

Tringa Ferrugineus Pontoppidan,¹ Danske Atlas, 1, p. 624, 1763—Iceland and Christiansoe Island (cf. Brünnich, Orn. Bor., p. 54, 1764).

Tringa (Hemipalama) audubonii Nuttall, Man. Orn. U. S. and Canada, Water Birds, p. 140, 1834—Hayes River, countries of Hudson's Bay, lat. 57° (based on *Tringa himantopus* Swainson and Richardson, Fauna Bor.-Amer., p. 380, 1831).

Hemipalama multistriata (Lichtenstein MS.) G. R. Gray, Gen. Bds., 3, p. [578], pl. 156, fig. 2, 1845—high northern latitudes (of North America), Hudson's Bay and northern and middle states of the American Union; Léotaud, Ois. Trinidad, p. 466, 1866—Trinidad; Pelzeln, Orn. Bras., 3, p. 311, 1870—Villa Bella de Matto Grosso, Matto Grosso, Brazil (Oct.).

Micropalama himantopus Sclater and Salvin, Ibis, 1859, p. 229—Dueñas, Guatemala; Sclater, Proc. Zool. Soc. Lond., 28, p. 290, 1860—Babahoyo, Ecuador (Sept.); idem, l.c., 1862, p. 369—Mexico; Gundlach, in Poeys, Repert. Fis.-Nat. Cuba, 1, p. 356, 1866—Cuba ("Sept. to May"); Sclater and Salvin, Proc. Zool. Soc. Lond., 1866, p. 199—eastern Peru (=Nauta); idem, l.c., 1873, p. 309—Nauta, Peru; Gundlach, Journ. Orn., 23, p. 326, 1875—Cuba (Sept., April); Lawrence, Bull. U. S. Nat. Mus., 4, p. 47, 1876—San Mateo, Oaxaca (Aug.); Gundlach, Journ. Orn., 26, p. 188, 1878—Puerto Rico; Taczanowski, Orn. Pér., 3, p. 363, 1886—Chorillos and Nauta, Peru; Ferrari-Perez, Proc. U. S. Nat. Mus., 9, p. 178, 1886—Laguna del Rosario, Tlaxcala, Mexico (Jan.); Cory, Auk, 4, p. 312, 1887—West Indian localities (descr.); idem, Bds. W. Ind., p. 233, 1889 (descr.); Allen, Bull. Amer. Mus. N. H., 2, p. 109, 1889—falls of the Rio Madeira, Bolivia (Oct.); Sharpe, Cat. Bds. Brit. Mus., 24, p. 401, 1896—United States, Mexico (Zacatecas, Aug.), Guatemala (Dueñas), Nicaragua (Momotombo, May), Grenada, Anegada, Uruguay (Colonia), Peru (Iquitos), and "Chile"; Salvadori and Festa, Boll. Mus. Zool. Torino, 15, No. 368, p. 44, 1900—Vinces, Ecuador (Sept.); Allen, Bull. Amer. Mus. N. H., 13, p. 126, 1900—Ciénaga, Colombia (Sept. 13); idem, Auk, 17, p. 364, 1900—same locality; Salvin and Godman, Biol. Centr.-Amer., Aves, 3, p. 370, 1903—Mexico (Matamoros; Zacatecas; Laguna del Rosario, Tlaxcala; San Mateo, Oaxaca), Guatemala (Dueñas), and Nicaragua (Momotombo); Clark, Proc. Bost. Soc. N. H., 32, p. 251, 1905—Barbados, Grenadines, and Grenada (transient); Berlepsch, Nov. Zool., 15, p. 306, 1908 (no record from French Guiana); Dabbenè, Anal. Mus. Nac. Buenos Aires, 18, p. 218, 1910—Buenos Aires; Grant, Ibis, 1911, p. 470—Los Yngleses, Ajó, Buenos Aires (Feb. 24), and near Esquina, Corrientes (Nov. 14); Bertoni, Faun. Parag., p. 80, 1914—Rio Paraguay, Corrientes; Brooks, Bull. Mus. Comp. Zool., 59, p. 379, 1915—Demarcation Point, Alaska (May 23–26, June 8), and Herschel Island (Aug. 2); Chubb, Ibis, 1919, p. 264—Trujillo, Peru (Aug. 18, Sept. 8); Ridgway,

after his death, or whether it was deposited in Peale's Philadelphia Museum, in which case it may be regarded as lost.

Bull. U. S. Nat. Mus., 50, (8), p. 205, 1919 (monog.; full bibliog.); Gibson, Ibis, 1920, p. 70—Ajó, Buenos Aires (Dec. 27); Tremoleras, El Hornero, 2, p. 13, 1920—Maldonado, Uruguay; Dabbene, l.c., p. 119, 1920—Argentina (Esquina, Corrientes; Belgrano [Aug. 7], Ajó, and Los Yngleses, Buenos Aires) and Uruguay (Colonia and Maldonado); Todd and Carriker Ann. Carnegie Mus., 14, p. 184, 1922—Ciénaga, Colombia (ex Allen); Chapman, Bull. Amer. Mus. N. H., 55, p. 195, 1926—Ecuador; Wetmore, Bull. U. S. Nat. Mus., 133, p. 158, 1926—Paraguayan Chaco (Sept.); idem, Tech. Bull. U. S. Dept. Agric., 26, p. 8, 1927—west of Puerto Pinasco, Paraguay (Sept. 20–25); Bent, Bull. U. S. Nat. Mus., 142, p. 122, 1927 (life hist.; range); Wetmore, Sci. Surv. Porto Rico and Virgin Islands, 9, p. 371, 1927—Puerto Rico and Anegada (transient); Pereyra, El Hornero, 4, p. 201, 1928—Rosas, Buenos Aires (Oct. 20); Wetmore and Swales, Bull. U. S. Nat. Mus., 155, p. 165, 1931—Hispaniola (ex Cory); Bradlee, Mowbray and Eaton, Proc. Bost. Soc. N. H., 39, p. 317, 1931—Bermuda Islands (transient); Griscom, Bull. Amer. Mus. N. H., 64, p. 133, 1932—Dueñas, Guatemala; Peters, Bds. World, 2, p. 287, 1934 (range); Belcher and Smooker, Ibis, 1935, p. 293—Trinidad (ex Léotaud); Pinto, Rev. Mus. Paul., 22, p. 143, 1938—Rio Guaporé, Matto Grosso, Brazil; Wetmore, Proc. U. S. Nat. Mus., 87, p. 194, 1939—Ocumare de la Costa, Venezuela (Oct. 24–28); Philippi, Rev. Chil. Hist. Nat., 44, p. 147, 1940—Las Vegas de Chacalluta, Arica, Chile.

Totanus himantopus March, Proc. Acad. Nat. Sci. Phila., 1864, p. 67—Jamaica (April, June, August).

Hemipalama himantopus Taczanowski, Proc. Zool. Soc. Lond., 1874, p. 561—Chorillos, Peru.

Ereunetes himantopus Seebohm, Geog. Distr. Charad., p. 400, 1887 (crit.).

Range.—Breeds in Arctic North America from Coronation Gulf to the west shore of Hudson Bay (Churchill); migrates chiefly through the interior (less frequently on the Atlantic coast of the United States), Florida, West Indies, Mexico, Guatemala (Dueñas), Nicaragua (Momotombo), Colombia (Ciénaga), Venezuela (Ocumare de la Costa), western Ecuador (Babahoyo, Vinces), and Peru (Nauta, Iquitos, Trujillo, Chorillos); winters in Bolivia (falls of the Rio Madeira), southern Brazil (Matto Grosso), Paraguay, Uruguay, and northern Argentina (Corrientes and Buenos Aires). One record for Chile (Arica).¹

Field Museum Collection.—76: Saskatchewan (Quill Lake, 2); Manitoba (Churchill, 3); North Dakota (Stump Lake, Nelson County, 34; Graham Island, Ramsey County, 2; Cranberry Lake, 1; Towner County, 6); Minnesota (Heron Lake, Jackson County, 1);

¹ The other alleged occurrence in "Chili," based on a specimen without history in the Salvin-Godman Collection (ex J. Gould), is open to doubt. The winter range of the Stilt Sandpiper is still very imperfectly known, there being but a few scattered records from northern Argentina and adjacent countries.

Wisconsin (Jefferson County, 1); Illinois, Cook County (Calumet Lake, 1; Hyde Park [Chicago], 1); New York (Southampton, 2); Massachusetts (Monomoy Island, 2; Great Island, 1); Connecticut (Grove Beach, New Haven County, 1; New Haven County, 1); Colorado (Laramie County, 1; Windsor, Weld County, 1; Fort Lyon, Bent County, 1); Texas (Brownsville, 5; Padre Island, 1); Florida (Banana River, Brevard County, 1; Indian River, Brevard County, 1; Merritt Island, Brevard County, 1; unspecified, 1); Virgin Islands (St. Croix, 1; Anegada Island, 2); Bolivia (Vacas, Cochabamba, 1).

Conover Collection.—43: Alberta (Beaverhill Lake, Tofield, 3); Manitoba (Churchill, 11); North Dakota (Grafton, Walsh County, 4); South Dakota (Eden, Marshall County, 5; Sanborn County, 7); Wisconsin (Big Muskego Lake, 3); Massachusetts (East Orleans, 3); Nebraska (Brownlee, Cherry County, 1); Colorado (Windsor, Weld County, 1); Texas (Tivoli, Refugio County, 1); Virgin Islands (St. Croix, 3); Bolivia (Vacas, Cochabamba, 1).

Genus TRYNGITES Cabanis

Tryngites Cabanis, Journ. Orn., 4, No. 24, "Nov., 1856," p. 418, 1857—type, by orig. desig., *Tringa rufescens* Vieillot=*Tringa subruficollis* Vieillot.

Tringites Sclater, Ibis, 4, p. 277, 1862—emendation.

**Tryngites subruficollis* (Vieillot). BUFF-BREASTED SANDPIPER.

Tringa subruficollis Vieillot, Nouv. Dict. Hist. Nat., nouv. éd., 34, p. 465, 1819—based on "Chorlito garganta blanca acanelada" Azara, No. 403, Paraguay (Nov.).

Tringa rufescens (not of Bechstein, 1809) Vieillot, Nouv. Dict. Hist. Nat., nouv. éd., 34, p. 470, 1819—Louisiana (location of type not stated); idem and Oudart, Gal. Ois., 2, p. 105, pl. 238, 1825—Louisiana; Darwin, Zool. Beagle, 3, Birds, p. 130, 1841—Montevideo, Uruguay; Léotaud, Ois. Trinidad, p. 470, 1866—Trinidad (Aug. to Oct.); Seeböhm, Geog. Distr. Charad., p. 446, 1887 (crit.).

Actidurus naevius Heermann, Proc. Acad. Nat. Sci. Phila., 7, p. 178, 1854—near San Antonio, Texas (type in U. S. National Museum; cf. Stone, Proc. Acad. Nat. Sci. Phila., 1899, p. 22).

Tryngites rufescens Gundlach, Journ. Orn., 4, p. 418, 1856—Cuba (April); idem, in Poey, Repert. Fis.-Nat. Cuba, 1, p. 355, 1866—Cuba; Dresser, Ibis, 1866, p. 39—Matamoros, Tamaulipas (Aug., Sept.); Sclater and Salvin, Proc. Zool. Soc. Lond., 1866, p. 199—upper Ucayali, Peru; Frantzius, Journ. Orn., 17, p. 377, 1869—Costa Rica; Gundlach, Journ. Orn., 23, p. 325, 1875—Cardenas, Cuba (early April); Durnford, Ibis, 1877, p. 200—west of Buenos Aires (=Moreno) (Feb. 20); Cabanis, Journ.

Buenos Aires, 18, p. 219, 1910—Córdoba, Misiones, and Buenos Aires; Bowles, Condor, 19, p. 187, 1917—Westport, Washington; Stone, Proc. Acad. Nat. Sci. Phila., 1918, p. 246—Gatún, Panama (Oct. 18); Ridgway, Bull. U. S. Nat. Mus., 50, (8), p. 226, 1919 (monog.; full bibliog.); Dabbene, El Hornero, 2, p. 121, 1920—Córdoba, Buenos Aires (Platanos, Mar. 28; Barracas al Sud, June 14, Dec. 10; Ajó, Mar. 8; Moreno, Feb. 20; Chascomús, Mar. 5), and Misiones; Lönnberg and Rendahl, Ark. Zool., 25, No. 14, p. 25, 1922—plains of Carapungo, Ecuador (July 10); Osgood and Conover, Field Mus. Nat. Hist., Zool. Ser., 12, p. 42, 1922—Lagunillas, Mérida, Venezuela (May 10); Todd and Carriker, Ann. Carnegie Mus., 14, p. 183, 1922—Ciénaga, Magdalena, Colombia (ex Allen); Bailey, Condor, 28, p. 36, 1926—Point Barrow, Alaska (nesting); Wetmore, Bull. U. S. Nat. Mus., 133, p. 157, 1926—Paraguay (west of Puerto Pinasco, Sept. 21) and Buenos Aires (Lavalley, Nov. 13; Guaminí, Mar.); Chapman, Bull. Amer. Mus. N. H., 55, p. 198, 1926—Ecuador; Pereyra, El Hornero, 4, p. 80, 1927—Rio Luján, Buenos Aires (Feb.); Bent, Bull. U. S. Nat. Mus., 146, p. 69, 1929 (life hist.); Moltoni, Atti Soc. Ital. Sci. Nat., 68, p. 313, 1929—near San Juan, Hispaniola (Oct. 1); Laubmann, Wiss. Erg. Deuts. Gran Chaco Exp., Vogel, p. 57, 1930—Mision Tacaaglé, Formosa (Nov. 14–15); Naumburg, Bull. Amer. Mus. N. H., 60, p. 80, 1930—Matto Grosso; Wetmore and Swales, Bull. U. S. Nat. Mus., 155, p. 167, 1931—San Juan, Hispaniola (ex Moltoni); Peters, Bds. World, 2, p. 288, 1934 (range); Griscom, Bull. Mus. Comp. Zool., 78, p. 308, 1935—Canal Zone, Panama (transient); Belcher and Smooker, Ibis, 1935, p. 293—Trinidad and Tobago; Pinto, Rev. Mus. Paul., 22, p. 143, 1938—São Paulo; Dickey and van Rossem, Field Mus. Nat. Hist., Zool. Ser., 23, p. 178, 1938—Lake Olomega, El Salvador (Aug. 19); Brooks, Ibis, 1939, p. 451, pl. 8,

fig. 1—Point Barrow, Alaska (downy young descr.); Gyldenstolpe, K. Svensk. Vetensk. Akad. Handl., (3), 23, p. 73, 1945—Riberalta and Victoria, El Beni, Bolivia (Sept., Oct.).

Tringites subruficollis Sharpe, Cat. Bds. Brit. Mus., 24, p. 521, 1896—North America, Mexico (Matamoros), Honduras (Ruatan Island), Colombia (Remedios), Peru (Iquitos, Sept. 2, 30; Pebas, Aug. 3; Cosnipata; Xeberos, Oct.; Chamicuros, Sept.), and Buenos Aires (Moreno, Feb. 20); Hartert, Nov. Zool., 5, p. 503, 1898—Paramba, Ecuador (Apr. 22); Ihering, Rev. Mus. Paul., 3, p. 436, 1899—São Paulo; Salvin and Godman, Biol. Centr.-Amer., Aves, 3, p. 384, 1903—North America, Mexico (Matamoros, Guanajuato), Ruatan Island, and Costa Rica (San José); Ihering, Cat. Faun. Braz., 1, p. 53, 1907—São Paulo; Berlepsch, Nov. Zool., 15, p. 307, 1909 (no record from French Guiana); Hartert and Venturi, l.c., 16, p. 251, 1909—Barracas al Sud, Buenos Aires (June 14); Hellmayr, l.c., 17, p. 425, 1910—Borba, Rio Madeira; Bertoni, Faun. Parag., p. 39, 1914—upper Rio Paraná, Paraguay; Brooks, Bull. Mus. Comp. Zool., 59, p. 381, 1915—Demarcation Point and Humphrey Point, Alaska.

Range.—Breeds on the Arctic coast of North America from Point Barrow, Alaska, to Mackenzie; migrates chiefly through the interior of North America, Central America (a few records from Mexico, El Salvador, Costa Rica, and Panama), and South America (scattered records from Colombia, western Ecuador, Venezuela, Peru, and Brazil) to Paraguay, Uruguay, and northern Argentina (Córdoba, Formosa, Buenos Aires, and Misiones); in the West Indies only recorded from Cuba (Cardenas), Hispaniola (near San Juan), Barbados, Tobago, and Trinidad;¹ found in summer on the Bering Sea coast of eastern Siberia (Cape Wankarem), occasional to shore of Okhotsk Sea and northern Japan (Owari); frequent straggler to the British Isles.

Field Museum Collection.—62: Siberia (Cape Surge, 1); Alaska (Point Barrow, 1); British Columbia (Chilliwack, 1); Alberta (Beaverhill Lake, 6); Massachusetts (Monomoy Island, 2; Duxbury, 1; Marshfield, 1); North Dakota (Maza, Towner County, 6; Towner County, 2); Kansas (Salina, 7; Hamilton, 1; Burlington, 1); Texas (Brownsville, 19; Corpus Christi, 9; Galveston, 1); Costa Rica (San José, 3).

Conover Collection.—31: Alaska (Point Barrow, 8; Chipp River, 1; Alaktak River, 4); Alberta (Beaverhill Lake, Tofield, 5); Massachusetts (Chatham, 1; North Eastham, 1; East Orleans, 1); New Hampshire (Seabrook, 1); Kansas (Salina, Saline County, 2); Texas (Brownsville, 4; Tivoli, Refugio County, 1); Venezuela (Lagunillas, Zulia, 2).

¹ The reported occurrence in the Bermuda Islands is questionable (cf. Bradlee, Proc. Bost. Soc. N. H., 39, p. 362, 1931).

Genus *PHILOMACHUS* Merrem¹

Philomachus Anonymous=Merrem,² Allg. Lit. Zeitung, 2, No. 168, col. 542, June 8, 1804—type, by monotypy, *Tringa pugnax* Linnaeus.

Pavoncella Leach, Cat. Mam. Bds. Brit. Mus., p. 29, 1816—type, by monotypy, *Tringa pugnax* Linnaeus.

Machetes Cuvier, Règ. Anim., 1, p. 490, "1817" (=Dec. 7, 1816)—type, by monotypy, *Tringa pugnax* Linnaeus.

Machophilus Thienemann, Rhea, Heft 1, p. 117, 1846—substitute name for *Philomachus* "G. R. Gray" (=Merrem).

Philomachus pugnax (Linnaeus). RUFF.

Tringa pugnax Linnaeus, Syst. Nat., 10th ed., 1, p. 148, 1758—based chiefly on Faun. Svec., No. 145, Sweden.

rests on the single example sent to Vienna by Münzberg. The collection reported upon by Pelzeln and rather vaguely attributed to "Spanish Guiana" turned out to consist of native made Bogotá skins. Sharpe changed "Spanish" to Dutch Guiana, and after that time the Ruff was admitted to the Surinam fauna without any corroborative evidence.

Himantopus melanurus (not of Vieillot) Sharpe, Cat. Bds. Brit. Mus., 24, p. 750, 1896—part, spec. r-v, Santa Cruz, Peru; Hellmayr, Abhandl. Math.-phys. Kl. Bayr. Akad. Wiss., 26, p. 97, 1912—Cajútuba, Pará.

Himantopus himantopus mexicanus Hellmayr, Field Mus. Nat. Hist., Zool. Ser., 12, p. 495, 1929—Mangunça Island, Maranhão (crit.); Zimmer, l.c., 17, p. 255, 1930—Puerto Bermúdez, Junín, Peru; Peters, Bds. World, 2, p. 290, 1934 (range); Belcher and Smooker, Ibis, 1935, p. 293—Trinidad (breed.; eggs descr.); Brodtkorb, Occ. Pap. Mus. Zool. Univ. Mich., 349, p. 2, 1937—Caviana Island, Brazil; Pinto, Rev. Mus. Paul., 22, p. 143, 1938—Maranhão (Primeira Cruz), Minas Geraes (Pirapora), and United States (Salton River, California; Enterprise, Florida); Dickey and van Rossem, Field Mus. Nat. Hist., Zool. Ser., 23, p. 178, 1938—Lake Olomega, El Salvador.

Himantopus himantopus melanurus Pinto, Rev. Mus. Paul., 22, p. 144, 1938—part, spec. from Cidade da Barra, Bahia, and Pirapora, Minas Geraes.

Range.—Breeds locally from Oregon, Utah, southern Nebraska, the coast of Louisiana, central Florida, and the Bahama Islands south to Lower California, Mexico, Central America, the West Indies and through South America south to northern Peru (Santa Lucia, Tumbes; Santa Cruz, Ucayali River; Ingapirca, Junín), Amazonia, and eastern Brazil, as far south as Minas Geraes (Rio São Francisco; Rio das Velhas) and Bahia (Rio Belmonte); also in the Galápagos Archipelago.¹ Probably only a migrant in the southern part of its range.

¹ Birds from lower Amazonia (Pará) and Maranhão are typical, and certain individuals from Bahia (Rio São Francisco) are not distinguishable from Mexican specimens. A single male from Piauí (near Parnaíba), one from Pirapora, Minas Geraes (fide O. Pinto, in litt.) and two from Peru (Santa Cruz), by possessing an uncomplete white nuchal band, form the transition to *H. h.*

Field Museum Collection.—80: Idaho (Payette, 1); Utah (Brigham, 1; Salt Lake City, 1); California (Seaside, Monterey County, 1; Pacific Beach, 1; Caswells, Los Angeles County, 1; Los Banos, Merced County, 14); Texas (Brownsville, 6; Cameron County, 3; Corpus Christi, 4; Tivoli, Refugio County, 1; Padre Island, 1); Florida (Wilson, Brevard County, 1; Marietta Island, Brevard County, 1; Banana Creek, Brevard County, 1; Lake Flirt, Glades County, 1; Cape Sable, 1; Bassenger, Okeechobee County, 3; Puggle Lake, Okeechobee County, 1); Bahama Islands (Acklin Island, 1; Great Inagua Island, 7; Mariguana Island, 1; Long Island, 2); Cuba (San Cristobal, 1); Haiti (Port de Paix, 1); Virgin Islands (St. Croix, 1); Lesser Antilles (Antigua, 1; Anguilla, 2); Jamaica (Cayman Brac, 1; Grand Cayman, 1); Mexico (Tampico, 2; Altamira, Tamaulipas, 1); Guatemala (San José, 2); Nicaragua (San Emilio, Rivas, 1); Venezuela (Los Roques, Colón, 1; Lake Valencia, Aragua, 7); British Guiana (Buxton, 1); Brazil (Mangunça Island, Maranhão, 1; Cidade do Barra, Bahia, 1).

Conover Collection.—39: Utah (Brigham, 12); California (Buena Vista Lake, Kern County, 6); Texas (Cameron County, 3); Florida (Banana Creek, Brevard County, 1; Wilson, Brevard County, 1); Virgin Islands (St. Croix, 4); Costa Rica (Punta Piedra, Guanacaste, 2); Venezuela (Lagunillas, Zulía, 1); British Guiana (Buxton, Demerara, 1); Ecuador (Isla Silva Sur, Province de los Rios, 5); Peru (Puerto Bermudez, Junin, 1);¹ Brazil (Obidos, Pará, 2).

****Himantopus himantopus melanurus* Vieillot.² SOUTH AMERICAN STILT.**

Himantopus melanurus Vieillot, Nouv. Dict. Hist. Nat., nouv. éd., 10, p. 42, 1817—based on "Zancúdo" Azara, No. 393, Paraguay; Sharpe, Cat. Bds. Brit. Mus., 24, pp. 316, 750, 1896—part, spec. a-m, n, q, Chile (Santiago, Valparaiso), Uruguay, Buenos Aires, and Matto Grosso

melanurus. Galápagos birds generally have shorter tarsi, and may prove to be separable.

¹ This specimen is typical of the North American race, *mexicanus*, as it has a black crown and no white collar.

² *Himantopus himantopus melanurus* Vieillot is chiefly distinguished from its northern representative by having a conspicuous white collar across the upper mantle. The other characters, viz. larger size and the greater extent of white on the pileum, are somewhat variable, and cannot always be relied upon. Even in young birds, the white dorsal band is more or less suggested. Specimens from southern Brazil (São Paulo, Matto Grosso), Argentina, and Chile do not show any tangible differences, as far as we can see. We have not seen any material from Lake Titicaca. Birds from northeastern Peru (Santa Cruz), though intermediate, we are inclined to refer to *H. h. mexicanus*.

Sud.*, p. 111, 1906—Lake Titicaca; Fontana, *Enum. Aves Región Andina*, p. 14, 1908—Catamarca; Dabbene, *Bol. Soc. Physis*, 1, p. 259, 1913—Catamarca; Hellmayr, *Field Mus. Nat. Hist., Zool. Ser.*, 19, p. 384, 1932—twenty miles east of San Pedro, Antofagasta (range in Chile); Peters, *Bds. World*, 2, p. 291, 1934—Laguna Blanca, Catamarca (range); Anonymous, *El Hornero*, 6, p. 358, 1936 (range); Philippi, *Bol. Mus. Nac. Santiago*, 16, p. 53, 1938—Laguna de Parinacota, Tacna, Chile.

Himantopus andinus Seebohm, *Ibis*, 1886, p. 232 (crit.); idem, *Geog. Distr. Charad.*, pp. xxi, 286, 1887—Chile (crit.).

Range.—Saline lagoons of the puna zone in southern Peru (from Junín to Puno and Tacna), western Bolivia (La Paz, Cochabamba, Oruro), northern Chile (south to Maricunga, Atacama), and north-western Argentina (Laguna Blanca, Catamarca; Salta; Jujuy).¹

Field Museum Collection.—4: Peru (Salinas, Arequipa, 1); Bolivia (Esperanza, Pacajes, La Paz, 2); Chile (San Pedro, Antofagasta, 1).

Conover Collection.—9: Peru, Arequipa (Cailloma, 1; Salinas, 1); Bolivia (Vacas, Cochabamba, 2; Esperanza, Pacajes, La Paz, 3); Chile (San Pedro, Antofagasta, 2).

Family PHALAROPODIDAE. Phalaropes

Genus PHALAROPUS Brisson²

¹ *Additional material examined*.—Bolivia, Oruro: Esperanza, 12; Sajama, 6.—Chile, Tarapacá: Huasco, 2; Sacaya, 1; Cueva Negra, 2.

² It is wholly a matter of personal opinion whether the phalaropes should be considered as congeneric or referred to three monotypic genera. The senior author would rather follow the former course.

Phalaropus Brisson, Orn., 1, p. 50, 6, p. 12, 1760—type, by tautonymy, "*Phalaropus*" Brisson=*Tringa fulicaria* Linnaeus.

Crymophilus Vieillot, Anal. Nouv. Orn. Elém., p. 62, 1816—type, by orig. desig., "*Phalarope à festons dentelés*" Buffon=*Tringa fulicaria* Linnaeus.

Crymophila Voigt, Thierreich, 1, p. 876 (footnote), 1831 (emendation).

****Phalaropus fulicarius* (Linnaeus). RED PHALAROPE.**

Tringa fulicaria Linnaeus, Syst. Nat., 10th ed., 1, p. 148, 1758—based on "The Red Coot-footed *Tringa*" Edwards, Nat. Hist. Bds., 3, p. 142, pl. 142, Hudson's Bay.

Phalaropus rufus Bechstein, Gemein. Naturg. Deutschl., 2nd ed., 4, p. 381, 1809—substitute name for *Tringa fulicaria* Linnaeus.

Phalaropus platyrhynchos Temminck, Man. d'Orn., p. 459, 1815—new name for *Tringa fulicaria* "Brünnich" (=Linnaeus); Holböll, Naturhist. Tidskr., 4, p. 411, 1843—Greenland (habits).

Phalaropus platyrhynchus Meyen, Nov. Act. Acad. Caes. Leop.-Carol. Nat. Cur., 16, Suppl. 1, p. 107, 1834—Coquimbo, Chile.

Phalaropus rufescens "Brisson" Keyserling and Blasius, Wirbelth. Eur., 1, p. lxxiii, 1840—based on "*Le Phalarope roussâtre*" Brisson, Orn., 6, p. 20 (ex *Tringa fulicaria* Linnaeus).

Phalaropus platyrostis "Temminck" Nordmann, in Démidoff, Voy. Russia Mérid., 3, p. 250, "1840"¹ (doubtless lapsus for *P. platyrhynchos* Temminck).

Lobipes hyperboreus (not *Tringa hyperborea* Linnaeus) Lesson, Echo du Monde Sav., 11, 2nd sem., No. 8, col. 183, July 28, 1844—Chile (transitional plumage).

Phalaropus fulicarius Des Murs, in Gay, Hist. Fís. Pol. Chile, Zool., 1, p. 430, 1847—Chile (ex Meyen); Schlegel, Mus. Pays-Bas, livr. 6, Scolopaces, p. 58, 1864 (crit.); Philippi, Anal. Univ. Chile, 31, p. 278, 1868 (ex Meyen); Salvin, Proc. Zool. Soc. Lond., 1883, p. 429—Coquimbo Bay, Chile (Nov.); Seebohm, Geog. Distr. Charad., p. 338, 1887 (crit.); Selater, Ibis, 1893, p. 569—Chile; Reed, Anal. Univ. Chile, 93, p. 210, 1896—Chile; Winge, Medd. Grøn., 21, p. 174, 1898—Greenland; Nicoll, Ibis, 1904, p. 50—Valparaiso Bay, Chile (Feb. 18); Manniche, Medd. Grøn., 45, No. 1, p. 152, 1910—Stormkap, Greenland (breeding habits); Ridgway, Bull. U. S. Nat. Mus., 50, (8), p. 418, 1919 (monog.; full bibliog.); Dabbene, El Hornero, 2, p. 124, 1920—Chile (Coquimbo) and province of Buenos Aires (Aug. 12, 1879); Bailey, Condor, 27, p. 233, 1925—Wainwright and Wales, Alaska (breeding); Meinertzhagen, Ibis, 1925, p. 326, pl. 8 (map) (breeding and winter range; migration routes); Conover, Auk, 43, p. 304, 1926—Hooper Bay, Alaska (nesting habits); Bent, Bull. U. S. Nat. Mus., 142, p. 1, 1927 (life hist.); Grinnell, Univ. Calif. Pub. Zool., 32, p. 88, 1928—Lower California (spring and fall transient); Bradlee, Mowbray, and Eaton, Proc. Bost. Soc. N. H., 39, p. 315, 1931—Bermuda Islands (Fort Catherina, March 12; Castle Harbor, Feb. 6); Hellmayr, Field Mus.

¹ The volume must have been published much later (cf. the note on p. 733) or else was issued in parts.

Nat. Hist., Zool. Ser., 19, p. 385, 1932—Chile (winter visitor); Soper, Canad. Field Nat., 48, p. 66, 1934—Baffin Island (nesting); Peters, Bds. World, 2, p. 292, 1934 (range); Murphy, Ocean. Bds. S. Amer., 2, p. 996, 1936 (winter range); Brodtkorb, Occ. Pap. Mus. Zool. Univ. Mich., 394, p. 3, 1938—Paraguay (March); Griscom, Auk, 56, p. 185, 1939 (migration off Massachusetts coast); Bird and Bird, Ibis, 1941, p. 149—Greenland (breeding); Bray, Auk, 60, p. 526, 1943—Southampton Island (breeding); Soper, l.c., 63, p. 231, 1946—Baffin Island (breeding).

Crymophilus fulicarius Sharpe, Cat. Bds. Brit. Mus., 24, p. 693, 1896 (monog.); Schalow, Zool. Jahrb., Suppl., 4, p. 662, 1898—Chile.

Phalaropus fulicarius jourdaini Iredale, Bull. Brit. Orn. Cl., 42, p. 8, 1921—Liefde Bay, Spitzbergen (type in British Museum); Løppenthin, Medd. Grønl., 91, No. 6, p. 65, 1932—northeastern Greenland (crit.); Peters, Condor, 36, p. 85, 1934 (crit.); Jourdain, l.c., p. 220, 1934 (crit.); Peters, l.c., p. 220, 1934 (crit.); Pedersen, Medd. Grønl., 100, No. 11, p. 21, 1934—Hochstatters Vorland, Greenland; Brooks, Ibis, 1935, p. 887 (crit.); Jourdain, l.c., 1936, p. 202 (crit.).¹

Range.—Breeds locally on the Arctic coasts and islands of the Holarctic region; in North America, from northern Alaska to Melville Island, northern Ellesmere Island, Baffin Island, and Greenland, south to Hooper Bay, Alaska, and Southampton Island; also in Iceland, Spitzbergen, Novaya Zemlya, along the Siberian coast from the mouth of the Yenesei to the Chukchi Peninsula, and on the New Siberian Islands; winters chiefly at sea off the coast of Africa,² Arabia, and Chile; casual in the Hawaiian Islands (Kauai), Bermuda Islands, province of Buenos Aires (one record) and Paraguay. Occasionally on migration in the interior of North America.

Field Museum Collection.—112: Alaska (Barrow, 8; Little Diomed Island, 1; Bering Sea, 6); Labrador (Hopedale, 1; unspecified, 1); Maine (Lincoln, 1); Massachusetts (Brant Rock, Plymouth County, 3; Chatham, 3); Connecticut (West Haven, 1; New Haven County, 1); Illinois (Waukegan, 1); North Carolina (Bodie Island, Dare County, 12); California (Carmel, Monterey County, 13; off Cypress Point, Monterey County, 2; Seaside, Monterey County, 6; Monterey, 38; mouth of Carmel River, Monterey County, 3; La Patera Point, Santa Barbara County, 4; Pacific Grove, Monterey County, 7).

¹ According to the researches of Peters and Brooks, it seems hardly worthwhile to maintain this race, although Salomonsen (in Jensen, Zool. Faeroes, Aves, p. 81, 1935) is still inclined to favor its recognition. Løppenthin (Medd. Grønl., 91, No. 6, p. 65, 1932) refers birds from the east coast of Greenland to *P. f. jourdaini*, those from the west coast to the typical race.

² Cf. Taning, Ibis, 1933, p. 132, and Holmes, Ibis, 1939, p. 331.

Conover Collection.—19: Alaska (Point Barrow, 1; Hooper Bay, Bering Sea, 10); Massachusetts (Chatham, 1; Brant Rock, Plymouth County, 1); Nebraska (Dad's Lake, Cherry County, 1); Oregon, Tillamook County (Netarts, 1; Tillamook, 1); California (Moss Landing, Monterey County, 2; Playa del Rey, Los Angeles County, 1).

Genus LOBIPES Cuvier

Lobipes Cuvier, *Règ. Anim.*, 1, p. 495, "1817" (=Dec. 7, 1817)—type, by orig. desig., *Tringa hyperborea* Linnaeus=*Tringa lobata* Linnaeus.

**Lobipes lobatus* (Linnaeus). NORTHERN PHALAROPE.

Tringa lobata Linnaeus, *Syst. Nat.*, 10th ed., 1, p. 148, 1758—based on "The Cock Coot-footed Tringa" Edwards, *Nat. Hist. Bds.*, 3, p. 143, pl. 143 (=nuptial plumage), Hudson's Bay (and "The Coot-footed Tringa" Edwards, l.c., 1, p. 46, pl. 46 [=winter plumage]; off the coast of Maryland).

Tringa hyperborea Linnaeus, *Syst. Nat.*, 12th ed., 1, p. 249, 1766—based chiefly on *Tringa lobata* Linnaeus, *Faun. Svec.* (ed. altera, 1761), No. 179, descr. posterior (=nuptial plumage), Lappland and Hudson Bay (ex Edwards, pl. 143).

Tringa fusca Gmelin, *Syst. Nat.*, 1, (2), p. 675, 1789—based on "Le Phalarope brun" Brisson (*Orn.*, 6, p. 18, 1760), which, in its turn, rests on *Tringa lobata* Linnaeus.

Phalaropus vulgaris Bechstein, *Orn. Taschenb.*, 2, p. 317, 1803—new name for *Tringa hyperborea* Linnaeus.

Phalaropus cinereus Meyer, in Meyer and Wolf, *Taschenb. Deuts. Vögelk.*, 2, p. 417, 1810—new name for *Tringa lobata* Linnaeus and *Tringa hyperborea* Linnaeus.

Phalaropus ruficollis Pallas, *Zoogr. Rosso-Asiat.*, 2, p. 203, 1811—substitute name for *Tringa hyperborea* Linnaeus.

Phalaropus cinerascens Pallas, *Zoogr. Rosso-Asiat.*, 2, p. 204, 1811—substitute name for *Tringa fusca* Gmelin.

Phalaropus angustirostris Naumann, *Naturg. Vög. Deuts.*, 8, p. 240, pl. 205, 1836—new name for *Tringa hyperborea* Linnaeus.

Phalaropus hyperboreus Holböll, *Naturhist. Tidskr.*, 4, p. 410, 1843—Greenland (habits); Sclater and Salvin, *Ibis*, 1860, p. 277—Lake Dueñas, Guatemala (August); Schlegel, *Mus. Pays-Bas*, livr. 6, Scolopaces, p. 58, 1864 (crit.); Taczanowski, *Proc. Zool. Soc. Lond.*, 1877, p. 330—Tumbez, Peru (Jan. 20); idem, *Orn. Pér.*, 3, p. 381, 1886—Tumbez; Seebohm, *Geog. Distr. Charad.*, p. 340, 1887 (crit.); Sharpe, *Cat. Bds. Brit. Mus.*, 24, p. 698, 1896 (monog.); Winge, *Medd. Grønland*, 21, p. 171, 1898—Greenland; Salvin and Godman, *Biol. Centr.-Amer.*, Aves, 3, p. 394, 1903—Mexico (Bahía de la Ventosa, Oaxaca), Guatemala (Lake Dueñas), and Costa Rica (Rio Desamparados).

Lobipes antarcticus Lesson, *Echo du Monde Sav.*, 11, 2nd sem., No. 8, col. 183 (in text), July 28, 1844—Chile (type in Abeillé Collection, Bordeaux);

idem, Compl. Oeuvr. Buffon, éd. Lévêque, 20, (Descr. Mamm. Ois.), p. 238, 1847—Chile; Sclater, Proc. Zool. Soc. Lond., 1867, p. 332—Chile (ex Lesson).

Phalaropus antarcticus Des Murs, in Gay, Hist. Fïs. Pol. Chile, Zool., 1, p. 431, 1847—Chile; Philippi, Anal. Univ. Chile, 31, p. 277, 1868—Valdivia, Chile; idem, Verh. Deuts. Wiss. Ver. Santiago, 2, p. 267, pl. 4, 1893—Santiago (April), Valdivia (November), and Chiloé (Feb.), Chile (crit.); idem, Anal. Mus. Nac. Chile, 15, p. 66, pl. 27, fig. 2, 1902—Chile (Spanish version of preceding).

Lobipes hyperboreus Lawrence, Bull. U. S. Nat. Mus., 4, p. 46, 1876—Ventosa Bay, Oaxaca, Mexico (October).

Phalaropus lobatus Snodgrass and Heller, Proc. Wash. Acad. Sci., 5, p. 257, 1904—off the southeast point of Narborough Island, Galápagos (March 29); Meinertzhagen, Ibis, 1925, p. 334, pl. 9 (map) (breeding and winter range); Bird and Bird, l.c., 1941, p. 149—Greenland (breeding).

Lobipes lobatus Carriker, Ann. Carnegie Mus., 6, p. 423, 1910—Rio Desamparados, Costa Rica; Ridgway, Bull. U. S. Nat. Mus., 50, (8), p. 424, 1919 (monog.; full bibliog.); Dabbene, El Hornero, 2, p. 125, 1920—Chaco (March) and Patagonia, Argentina; Bailey, Condor, 27, p. 234, 1925—Wainwright, Alaska (nesting); Chapman, Bull. Amer. Mus. N. H., 55, p. 200, 1926—coast of southern Ecuador (Dec. 6); Conover, Auk, 43, p. 304, 1926—Hooper Bay, Alaska (nesting; dist. char. pullus); Bent, Bull. U. S. Nat. Mus., 142, p. 15, 1927 (life hist.); Grinnell, Univ. Calif. Pub. Zool., 32, p. 89, 1928—Lower California (spring and fall transient); Bradlee and Mowbray, Proc. Bost. Soc. N. H., 39, p. 315, 1931—Bermuda Islands (near St. David's, April); Griscom, Bull. Amer. Mus. N. H., 64, p. 136, 1932—Lake Dueñas, Guatemala; Peters, Bds. World, 2, p. 293, 1934 (range); Pedersen, Medd. Grøn., 100, No. 11, p. 21, 1934—Hudson Land, northeastern Greenland; Murphy, Ocean. Bds. S. Amer., 2, p. 997, 1936 (winter range).

Range.—Breeds in the Holarctic region, in North America from northern Alaska, Melville Island, and Greenland south to the Aleutian Islands, upper Yukon Valley, northern Manitoba, southern James Bay, and Labrador; also in Iceland, Spitzbergen, Färoes, Hebrides, Scandinavia, northern Russia, and across northern Asia to the shores of the Okhotsk Sea, Commander Islands, and Sakhalin; winters at sea in the northwestern Indian Ocean, off the coasts of Ecuador, Peru,¹ and West Africa, as well as in the Papuan and in the Banda Sea; accidental in Argentina (Chaco and Patagonia). In migration found throughout the interior of North America.

Field Museum Collection.—144: Alaska (Barrow, 2; Nome, 2; St. Michael's, 7; Bethel, 1; Iditarod, 1; Hot Springs, 1; St. George Island, 1); Yukon Territory (Yukon River, 1; Lake Labarge, 1);

¹ Taczanowski lists a single male from Tumbez (Jan. 20). Berlepsch and Stolzmann's record of *P. lobatus* from "Chorillos" (cf. Proc. Zool. Soc. Lond., 1892, p. 400) probably refers to the same specimen.

Labrador (Indian Harbor, 2); British Columbia (Okanagan, 3); Alberta (Beaverhill Lake, 3; Walsh, 3); Saskatchewan (Osler, 3; Maple Creek, 20); North Dakota (Rocklake, Towner County, 7; Towner County, 3; Stump Lake, 1); Minnesota (Pelican Rapids, Otter Tail County, 1); Wisconsin (Beaver Dam, 3); Massachusetts (Monomoy Island, 3; Chatham, 2); Rhode Island (Sakonnet, Newport County, 1); Connecticut (East Haven, 2; Quinnipiac Marsh, New Haven County, 2; Fairfield Beach, Fairfield County, 1); Kansas (Blue Rapids, Marshall County, 1); Colorado (New Castle, Garfield County, 1); California (Eureka, 2; Santa Cruz, 1; Carmel, Monterey County, 16; Pacific Grove, Monterey County, 3; Moss Landing, Monterey County, 6; Monterey, 6; Seaside, Monterey County, 9; Trinidad, Humboldt County, 7; Nigger Slough, Los Angeles County, 9; Westport, Mendocino County, 2; Hayward, Alameda County, 2; Samoa, Humboldt County, 2).

Conover Collection.—26: Alaska (Hooper Bay, Bering Sea, 8; Alberta (Beaverhill Lake, Tofield, 4); Oregon (Netarts, Tillamook County, 1); North Dakota (Devil's Lake, Ramsey County, 2); Massachusetts (Pigeon Cove, Essex County, 6); California (Wilmington, Los Angeles County, 5).

Genus STEGANOPUS Vieillot

Steganopus Vieillot, *Nouv. Dict. Hist. Nat.*, nouv. éd., 24, p. 124, 1818 (diagnosis); idem, l.c., 32, p. 136, 1819—type, by monotypy, *Steganopus tricolor* Vieillot.

Holopodius Bonaparte, *Ann. Lyc. Nat. Hist. N. Y.*, 2, No. 2, p. 342, Feb. 5, 1828—type, by orig. desig., *Phalaropus wilsonii* Sabine=*Steganopus tricolor* Vieillot.

**Steganopus tricolor* Vieillot.¹ WILSON'S PHALAROPE.

Steganopus tricolor Vieillot, *Nouv. Dict. Hist. Nat.*, nouv. éd., 32, p. 136, 1819—based on "Chorlito tarso comprimido" Azara, No. 407, Paraguay (December); Sclater, *Proc. Zool. Soc. Lond.*, 1867, p. 332—Chile; Sharpe, *Cat. Bds. Brit. Mus.*, 24, p. 705, 1896 (monog.); Berlepsch and Stolzmann, l.c., 1902, (2), p. 53—Ingapirca, Junín, Peru (young male, May); Salvin and Godman, *Biol. Centr.-Amer., Aves*, 3, p. 395, 1903—Mexico (Tres Marias Islands; Valley of Mexico; Xochimilco, Ixtapalapa, Tlalpam, and Laguna de Chapulco, Puebla; Jerez, Zacatecas) and Guatemala (Lake

¹ *Tringa glacialis* Gmelin (*Syst. Nat.*, 1, (2), p. 675, 1789—based on "Plain Phalarope" Pennant, *Arct. Zool.*, 2, p. 495; "in mari glaciali"), while possibly referable to Wilson's Phalarope (cf. Coues, *Bds. Northwest*, p. 467 [footnote], 1874), is not identifiable with certainty. It is the genotype of *Amblyrhynchus* (not of Leach, 1816) Nuttall, *Man. Orn. U. S. and Canada, Water Birds*, p. 247, 1834.

Dueñas); Hartert and Venturi, Nov. Zool., 16, p. 251, 1909—Barracas al Sud, Buenos Aires (Sept. 13; Oct. 7); Dabbene, Anal. Mus. Nac. Buenos Aires, 18, p. 222, 1910—Chubut, Tucumán (Cumbre de Calchaqués), Mendoza, Misiones, and Buenos Aires (Barracas al Sud); Scott and Sharpe, Rep. Princet. Univ. Exp. Patagonia, 2, Orn., p. 345, 1912—Chubut Valley (descr.); Gifford, Proc. Calif. Acad. Sci., (4), 2, p. 57, 1913—Albemarle Island, Galápagos (Nov. 3); Bertoni, Faun. Parag., p. 39, 1914—Paraguay; Ridgway, Bull. U. S. Nat. Mus., 50, (8), p. 431, 1919 (monog.; full bibliog.); Dabbene, El Hornero, 2, p. 123, 1920—Argentina (Cumbre de Calchaqués, Tucumán, Oct.; Mendoza; Buenos Aires, Feb.; Barracas al Sud, Sept. 13, Oct. 7; Chubut; Misiones, Nov.), Falkland Islands, Bolivia (Alto Paraguay, Oct. 15), and Paraguay; Wace, l.c., p. 199, 1921—Falkland Islands; Chapman, Bull. Amer. Mus. N. H., 55, p. 201, 1926—Esmeraldas and Guayaquil (Aug. 21), Ecuador; Wetmore, Bull. U. S. Nat. Mus., 133, p. 145, 1926—Rio Ajó, below Lavalle (Nov. 15) and Carhue (Dec. 15–18), Buenos Aires; idem, Tech. Bull. U. S. Dept. Agric., 26, p. 8, 1927—Rio Ajó (Nov.), Carhue (Dec.); Bent, Bull. U. S. Nat. Mus., 142, p. 28, 1927 (life hist.); Grinnell, Univ. Calif. Pub. Zool., 32, p. 89, 1928—Lower California (spring and fall transient); Pereyra, El Hornero, 4, p. 201, 1928—Zelaya (Oct. 12) and Rosas (Oct. 23), Buenos Aires; Dabbene, l.c., p. 312, 1929—Rosas (Oct.); Naumburg, Bull. Amer. Mus. N. H., 60, p. 82, 1930—Matto Grosso; Wolfe, Condor, 33, p. 49, 1931—Utah (breeding habits); Hellmayr, Field Mus. Nat. Hist., Zool. Ser., 19, p. 386, 1932—Chile (winter visitor); Peters, Bds. World, 2, p. 292, 1934 (range); Berlioz, Bull. Mus. Hist. Nat. Paris, (2), 9, p. 118, 1937—San Mateo, Esmeraldas, Ecuador (Sept. 9); Pinto, Rev. Mus. Paul., 22, p. 144, 1938—Brazil (Matto Grosso); Philippi, Bol. Mus. Nac. Santiago, 16, p. 57, 1938—Vegas de Chacalluta, Tacna, Chile (Sept.); Dickey and van Rossem, Field Mus. Nat. Hist., Zool. Ser., 23, p. 179, 1938—Lake Olomega, El Salvador (Sept.); Holmes, Ibis, 1939, p. 335—Lake Languí (13,000 ft.; Aug. 25), Lake Titicaca (Puno Bay, Aug. 30; Guaquí, Sept. 28), lakes Lagunilla and Saracocha (13,000 ft.; early Sept.), Peru; Morrison, l.c., 1939, p. 465—Santa Inez (14,300 ft.), Huancavelica, Peru (Nov. 11).

Phalaropus Wilsoni(ii) Sabine, in Franklin's Narr. Journ. Polar Sea, 1, App., p. 691, 1823—Cumberland House, Saskatchewan (type probably in British Museum); Fraser, Proc. Zool. Soc. Lond., 11, p. 118, 1843—Lake Quintero, Valparaiso, Chile; Salvin, Ibis, 1860, p. 101—Lake Dueñas, Guatemala; Sclater, Proc. Zool. Soc. Lond., 1864, p. 179—Valley of Mexico; Schlegel, Mus. Pays-Bas., livr. 6, Scolopaces, p. 60, 1864—Canada, Wisconsin (Koskonong), Mexico (Vera Cruz), and Chile; Salvin, Ibis, 1866, p. 198—Guatemala; Sclater, Proc. Zool. Soc. Lond., 1867, p. 339—Chile; Pelzeln, Orn. Bras., 3, p. 313, 1870—Caicara, Matto Grosso, Brazil (Sept.); Durnford, Ibis, 1877, pp. 42, 198—Chubut River, Patagonia, and west of Buenos Aires (Feb.); Seebohm, Geog. Distr. Charad., p. 342, 1887 (crit.); Sclater and Hudson, Arg. Orn., 2, p. 181, 1889—Argentina; Philippi, Verh. Deuts. Wiss. Ver. Santiago, 2, p. 270, pl. 5, 1893—Iquique, Tarapacá (Sept.), and Rancagua, O'Higgins (Sept.), Chile; Sclater, Bull. Brit. Orn. Cl., 4, p. vi, 1894—Falkland Islands; idem, Ibis, 1895, p. 145—Falkland Islands; Reed, Anal. Univ. Chile, 93, p. 210, 1896—Chile;

Philippi, Anal. Mus. Nac. Chile, 15, p. 68, pl. 31, 1902—Iquique and Rancagua, Chile.

Phalaropus fimbriatus Temminck, Nouv. Rec. Pl. Col., livr. 62, pl. 370, Sept. 24, 1825—"Senegal"¹ and Mexico (cotypes in coll. of Count Riocour [Nancy] and coll. of Baron M. Laugier, their present location unknown).

Phalaropus frenatus Vieillot (and Oudart), Gal. Ois., 2, p. 178, pl. 271, circa 1826—New York (type in coll. of Count Riocour, actual location unknown;² Pelzeln, Reise Novara, Zool., 1, Vögel, p. 132, 1865—Chile (spec. examined).

Lobipes incanus Jardine and Selby, Illust. Orn., Part 1, pl. 16, Feb., 1827—Mexico (type in coll. of W. Jardine, now in British Museum).

Phalaropus stenodactylus Wagler, Isis, 1831, col. 523—Mexico (type in Munich Museum;=winter plumage).

Phalaropus lobatus (not *Tringa lobata* Linnaeus) Des Murs, in Gay, Hist. Fis. Pol. Chile, Zool., 1, p. 432, 1847—coast of Valparaiso, Chile; Philippi, Anal. Univ. Chile, 31, p. 277, 1868—Chile and "Peru" (=Tacna).

Phalaropus tricolor Stejneger, Auk, 2, p. 183, 1885 (crit.); Ferrari-Perez, Proc. U. S. Nat. Mus., 9, p. 178, 1886—Laguna de Chapulco, Puebla (Sept., Oct.); Meinertzhagen, Ibis, 1925, p. 342 (migration; winter range); Bennett, l.c., 1926, p. 324—Falkland Islands.

Steganopus wilsoni Grant, Ibis, 1911, p. 467—Alto Paraguay, Bolivia (Oct. 15).

Micropalama himantopus (errore) Pereyra, El Hornero, 4, p. 24, 1927—Zelaya (Oct. 12) and Rosas (Oct. 23), Buenos Aires.

Range.—Breeds from southern British Columbia, central Alberta, southern Saskatchewan, and southern Manitoba to central California, Utah, Colorado, Nebraska, central Iowa (formerly to southern Kansas and Missouri), and northwestern Indiana; winters in the highlands of Peru³ and Bolivia as well as in Chile and Argentina south to Chubut; accidental in the Falkland Islands (one record).

Field Museum Collection.—124: Alberta (Walsh, 2); Saskatchewan (Maple Creek, 2; Big Stick Lake, 7; Hay Creek, 3; Lake Johnson, 2; Quill Lake, 1); North Dakota (Towner County, 26; Rocklake, Towner County, 8; Pensimer, Towner County, 1; Stump Lake, Nelson County, 19; Cando, Towner County, 2); South Dakota (Harrison, Douglas County, 5); Minnesota (Jackson County, 1); Colorado (Fort Lyon, Bent County, 4; Cochetopa, Saguache County, 3); Wisconsin (Beaver Dam, 10; Lake Koshkonong, 1); Illinois,

¹ The locality is clearly erroneous. In fact, we are told by Vieillot, who doubtless described the very same specimen, that the bird in the Riocour Collection came from New York.

² The type is probably in the mounted series at Tring, where the bulk of the Riocour Collection is preserved.

³ Cf. Holmes and Morrison, Ibis, 1939, pp. 335, 465.

Cook County (Wolf Lake, 1; Hyde Lake, 1; South Chicago, 2; Chicago, 1); Oklahoma (Ponca Agency, Kay County, 1); Texas (Brownsville, 6); Oregon (Harney County, 1); California (Seaside, Monterey County, 2; Palo Alto Sports Club, Santa Clara County, 1; Moss Landing, Monterey County, 4); Brazil (Vaccaria, Matto Grosso, 1); Peru, Arequipa (Cailloma, 3; Salinas, 2); Bolivia (Guaqui, La Paz, 1).

Conover Collection.—26: Alberta (Beaverhill Lake, Tofield, 2); Utah (Brigham, Box Elder County, 11); California (Yermo, San Bernardino County, 4; Wilmington, Los Angeles County, 2); Ecuador (Laguna Yaguarcocha, Imbabura, 1); Peru (Puno, Puno, 1; Salinas, Arequipa, 1; Cailloma, Arequipa, 1); Bolivia (Guaqui, La Paz, 1; Esperanza, Pacajes, La Paz, 1; Aiquile, Cochabamba, 1).

Superfamily BURHINOIDEA

Family BURHINIDAE.¹ Thick-Knees

Genus BURHINUS Illiger

Burhinus Illiger, Prodr. Syst. Mamm. Av., p. 250, 1811—type, by monotypy, *Charadrius magnirostris* Latham.

Oedinenus Temminck, Man. d'Orn., p. 321, 1815—type, by tautonymy, *Charadrius oedinenus* Linnaeus.

Fedoa Leach, Cat. Mamm. Bds. Brit. Mus., p. 28, 1816—type, by monotypy, "*Fedoa Oedinenus*"=*Charadrius Oedinenus* Linnaeus.

**Burhinus bistriatus bistriatus* (Wagler). MEXICAN THICK-KNEE.

Charadrius bistriatus Wagler, Isis, 22, col. 648, 1829—Mexico (type, from San Mateo, in Berlin Museum; cf. van Rossem, Bull. Mus. Comp. Zool., 77, p. 388, 1934).

Oedinenus bistriatus Sclater, Proc. Zool. Soc. Lond., 1865, p. 397—Vera Cruz, Mexico; idem and Salvin, Exot. Orn., p. 60, 1867—part, Mexico; Lawrence, Bull. U. S. Nat. Mus., 4, p. 45, 1876—Tapana (Tehuantepec), Oaxaca; Seebohm, Geog. Distr. Charad., p. 85, 1887—part, Mexico; Sharpe, Cat. Bds. Brit. Mus., 24, pp. 12, 721, 1896—part, spec. a, b, o, Misantla, Vera Cruz, and "Torula" (=Tonalá), Chiapas, Mexico; Salvin and Godman, Biol. Centr.-Amer., Aves, 3, p. 339, 1903—part, Mexico (Misantla, Vera Cruz; Tapana, Oaxaca; Tonalá, Chiapas).

Oedinenus bistriatus bistriatus Ridgway, Bull. U. S. Nat. Mus., 50, (8), p. 20, 1919—part, southern Mexico, in states of Vera Cruz (Misantla, Tlalotalpám, Pasa Nueva), Oaxaca (Tapana, Huilótepec, Ishuatán), and Chiapas (Tonalá).

¹ For family characters, cf. Lowe, Ibis, 1931, pp. 504-507.

Burhinus bistriatus bistriatus Bangs and Peters, Bull. Mus. Comp. Zool., 68, p. 387, 1928—Chivelá, Oaxaca; Peters, Bds. World, 2, p. 296, 1934—part, Mexico.

Range.—Southern Mexico, in states of Vera Cruz, Oaxaca, and Chiapas.¹

Field Museum Collection.—1: Mexico (Reforma, Oaxaca, 1).

****Burhinus bistriatus vigilans* van Rossem.² INTERMEDIATE THICK-KNEE.**

Burhinus bistriatus vigilans van Rossem, Bull. Mus. Comp. Zool., 77, p. 388, Dec., 1934—Hacienda El Pelón, Guanacaste, Costa Rica (type in Dickey Collection at the University of California at Los Angeles); Dickey and van Rossem, Field Mus. Nat. Hist., Zool. Ser., 23, p. 179, 1938—Lake Olomega, El Carmen, Pasaquina, and Colima, El Salvador (habits).

Oedinemus —? Taylor, Ibis, 1860, p. 314—La Brea, Nacaome, and plain of Comayagua, Honduras (soft parts).

Oedinemus bistriatus (not *Charadrius bistriatus* Wagler) Owen, Ibis, 1861, p. 68—San Gerónimo, Guatemala (eggs descr.); Salvin, l.c., 1861, p. 356—Salamá, Vera Paz, Guatemala; idem, l.c., 1865, p. 198—Huamuchal, Guatemala; Sclater and Salvin, Exot. Orn., p. 60, 1867—part, Guatemala and Honduras; Frantzius, Journ. Orn., 17, p. 378, 1869—San Juan del Norte and "San José," Costa Rica; Seeböhm, Geog. Distr. Charad., p. 85, 1887—part, Guatemala and Honduras; Zeledón, Anal. Mus. Nac. Costa Rica, 1, p. 129, 1888—Costa Rica; Salvin and Godman, Biol. Centr.-Amer., Aves, 3, p. 339, 1903—part, Guatemala (Huamuchal, San Gerónimo), Honduras, Nicaragua (Sucuyá, San Juan del Norte), and Costa Rica ("San José"); Carriker, Ann. Carnegie Mus., 6, p. 424, 1910—"San José," Costa Rica (ex Frantzius).

Oedinemis bistriatus Nutting, Proc. U. S. Nat. Mus., 6, p. 389, 1884—Sucuyá, Nicaragua.

Oedinemus bistriatus bistriatus Ridgway, Bull. U. S. Nat. Mus., 50, (8), p. 20, 1919—part, Guatemala, Honduras, Nicaragua (Sucuyá, San Juan del Norte), and Costa Rica; Griscom, Bull. Amer. Mus. N. H., 64, p. 137, 1932—Ocos, Guatemala.

Burhinus bistriatus bistriatus Griscom, Auk, 50, p. 299, 1933—Philadelphia, Guanacaste, Costa Rica; Peters, Bds. World, 2, p. 296, 1934—part, Central America to western Costa Rica.

Range.—Central America from Guatemala to northwestern Costa Rica.³

¹ Six specimens, including one from Tonalá, Chiapas, examined.

² *Burhinus bistriatus vigilans* van Rossem: Very similar to *B. b. bistriatus*, but tarsus and toes on average slightly longer; upper parts and chest darker, more avellaneous, with the mesial streaking above broader and darker. Differs from *B. b. vocifer* by larger size, longer tarsus, stouter bill, and less brownish chest. Wing, 260–275; tail, 130–140; tarsus, 120–130; bill, 48–54.

³ The occurrence of any form of Thick-Knee in Panama is open to doubt. The captive bird bought at Panama City by Festa (cf. *Oedinemus bistriatus*

Field Museum Collection.—6: El Salvador (Cuscatlan, Colima, 2); Costa Rica, Guanacaste (Filadelphia, 3; Hacienda El Pelon, 1).

Conover Collection.—5: Costa Rica (Filadelphia, Guanacaste, 5).

****Burhinus bistriatus vocifer* (L'Herminier).¹ GUIANAN THICK-KNEE.**

Aedicnemus vocifer L'Herminier, Mag. Zool., 7, cl. 2, pl. 84, 1837—"llanos de Maturin, petite ville située sur les bords du Guarapiche et dépendante de la province de Cumaná"—Maturin, State of Monagas, northeastern Venezuela (cotype in Paris Museum).

Oedicnemus americanus Swainson, Anim. Menag., p. 349, Dec. 31, 1837—interior of [British] Guiana.²

Oedicnemus bistriatus (not *Charadrius bistriatus* Wagler) Cabanis, in Schomburgk, Reisen Brit. Guiana, 3, "1848," p. 749, 1849—savanna of British Guiana; Schlegel, Mus. Pays-Bas, livr. 7, Cursores, p. 19, 1865—"Guadeloupe" (=Maturin) and Forte do Rio Branco, Brazil (crit.); Sclater and Salvin, Exot. Orn., p. 60, 1867 (range in part); Pelzeln, Orn. Bras., 3, p. 296, 1870—Forte do [São Joaquim], Rio Branco, Brazil; Berlepsch, Ibis, 1884, p. 440—Angostura, Orinoco, Venezuela; Salvin, l.c., 1886, p. 177—British Guiana (ex Schomburgk); Seebohm, Geog. Distr. Charadr., p. 85, 1887—part, Colombia, Venezuela, and northern Brazil; Robinson and Richmond, Proc. U. S. Nat. Mus., 18, p. 656, 1896—Margarita Island, Venezuela; Sharpe, Cat. Bds. Brit. Mus., 24, pp. 12, 721, 1896—part, spec. f-m, p-r, Colombia (Bogotá), Venezuela (Mérida), British Guiana (Annai), and Brazil (Forte do Rio Branco); Berlepsch and Hartert, Nov. Zool., 9, p. 128, 1902—Caicara, Orinoco, Venezuela; Salvin and Godman, Biol. Centr.-Amer., Aves, 3, p. 339, 1903—part, Colombia, Venezuela, Guiana, and "Amazonas"; Ihering, Cat. Faun. Braz., 1, p. 57, 1907—part, Amazonas, Guiana, Venezuela; Beebe, Zoologica (N.Y.), 1, p. 75, 1909—La Brea, Orinoco Delta, Venezuela; Cory, Field Mus. Nat. Hist., Orn. Ser., 1, p. 238, 1909—Margarita Island (ex Robinson); Snethlage, Bol. Mus. Goeldi, 8, p. 95, 1914—"Pará" (cage-bird); Cherrie, Sci. Bull., Mus. Brookl. Inst., 2, p. 368, 1916—savannas of the Orinoco region, Venezuela; Chubb, Bds. Brit. Guiana, 1, p. 243, 1916—Annai and Quonga.

Burhinus bistriatus Chapman, Bull. Amer. Mus. N. H., 36, p. 226, 1917—Barranquilla, Colombia; Delacour, Ibis, 1923, p. 140—llanos of Guarico and Apure, Venezuela.

Salvadori and Festa, Boll. Mus. Zool. Torino, 14, No. 339, p. 12, 1899) might have come from either Colombia or Costa Rica.

¹*Burhinus bistriatus vocifer* (L'Herminier) differs from the northern races by smaller size, slenderer bill, shorter tarsus, and darker, more brownish buffy chest with dusky mesial streaks more pronounced. Wing, 230-245; tail, 120-130; tarsus, 100-110; bill, 44-50.

Additional material examined.—Colombia: "Bogotá," 1.—Venezuela: Maturin, 1; Caicara, Orinoco River, 2.—British Guiana: Annai, 2; unspecified, 1.—Brazil: Forte do São Joaquim, Rio Branco, 5.

² Collected by the elder (Robert) Schomburgk. Specimen "2," from "British Guiana (Old Collection)," in the British Museum, is probably the type.

Oedinemus bistriatus vocifer Ridgway, Bull. U. S. Nat. Mus., 50, (8), p. 20 (in text), 1919 (range; char.); Osgood and Conover, Field Mus. Nat. Hist., Zool. Ser., 12, p. 43, 1922—Rio Cogollo, Zulia, Venezuela; Todd and Carriker, Ann. Carnegie Mus., 14, p. 187, 1922—Rio Hacha, La Goajira, and Camperucho, Santa Marta region, Colombia.

Burhinus bistriatus vocifer Darlington, Bull. Mus. Comp. Zool., 71, p. 377, 1931—Ciénaga, Magdalena, Colombia; Peters, Bds. World, 2, p. 296, 1934 (range); Pinto, Rev. Mus. Paul., 22, p. 145, 1938 (range).

Range.—Arid Tropical zone of northern Colombia (Barranquilla; Ciénaga, Magdalena; Camperucho; La Goajira; "Bogotá") and Venezuela (south to the Orinoco), east to British Guiana and the adjoining districts of Brazil (upper Rio Branco).

Field Museum Collection.—3: Venezuela (Piacoa, Delta Amacuro, 1); Brazil (Serra da Lua, near Boa Vista, Amazonas, 2).

Conover Collection.—2: Venezuela (Rio Cogollo, Perija, 2).

****Burhinus bistriatus dominicensis* (Cory).¹ DOMINICAN THICK-KNEE.**

Oedinemus dominicensis Cory, Quart. Journ. Bost. Zool. Soc., 2, p. 46, 1883—La Vega, Dominican Republic (type in coll. of C. B. Cory, now in Field Museum, examined); idem, Auk, 1, p. 4, 1884 (repr. orig. descr.); idem, Bds. Haiti and San Dom., p. 140, col. pl. [19], 1884—Dominican Republic; Thompson, Auk, 2, p. 110, 1885 (voice); Cory, l.c., 4, p. 226, 1887 (descr.); idem, Cat. W. Ind. Bds., pp. 95, 131, 1892—Haiti; Sharpe, Cat. Bds. Brit. Mus., 24, p. 14, 1896—San Domingo; Cherrie, Field Columb. Mus., Orn. Ser., 1, p. 25, 1896—Dominican Republic; Christy, Ibis, 1897, p. 337—Almercen, Dominican Republic; Verrill, Proc. Acad. Nat. Sci. Phila., 61, p. 356, 1909—Dominican Republic (habits; eggs); Ridgway, Bull. U. S. Nat. Mus., 50, (8), p. 23, 1919 (monog.); Bond, Proc. Acad. Nat. Sci. Phila., 80, p. 497, 1928—northern and central plains of Haiti; Danforth, Auk, 46, p. 363, 1929—Gonaïves; Moltoni, Atti Soc. Ital. Sci. Nat., 68, p. 314, 1929—San Juan, Dominican Republic; Wetmore and Swales, Bull. U. S. Nat. Mus., 155, p. 169, 1931—Hispaniola (monog.).

Oedinemus bistriatus dominicensis Seebohm, Geog. Distr. Charad., p. 86, 1887—Hispaniola (crit.).

Burhinus bistriatus dominicensis Peters, Bds. World, 2, p. 296, 1934 (range).

Range.—Island of Hispaniola, Greater Antilles.

Field Museum Collection.—2: Hispaniola (La Vega, La Vega, Dominican Republic, 2).

Conover Collection.—1: Hispaniola (Pimetel, Dominican Republic, 1).

¹*Burhinus bistriatus dominicensis* (Cory) differs from the continental races by considerably smaller size, slenderer bill and legs, and decidedly creamy or buffy instead of white posterior lower parts. Wing, 205–215; tail, 104–108; tarsus, 90–95; bill, 40–44.

Burhinus superciliaris (Tschudi). PERUVIAN THICK-KNEE.

Oedicnensus (sic) *superciliaris* Tschudi, Arch. Naturg., 9, (1), p. 387, 1843—"in Oceani Pacifici littoralis"—Huacho, Dept. Lima, Peru (type in Neuchâtel Museum).

Oedicnemus superciliaris Tschudi, Arch. Naturg., 10, (1), p. 309, 1844—Peru; idem, Unters. Faun. Peru., Orn., p. 293, 1846—Huacho, Dept. Lima, Peru; Sclater and Salvin, Proc. Zool. Soc. Lond., 1868, pp. 176, 570—Tambo Valley, near Islay, Dept. Arequipa; Taczanowski, Orn. Pér., 3, p. 333, 1886—Lima to Tumbes, Peru; Seeböhm, Geogr. Dist. Charad., p. 87, 1887—Pacific coast of Peru (crit.); Berlepsch and Stolzmann, Proc. Zool. Soc. Lond., 1892, p. 395—Ica and Lima, Peru; Sharpe, Cat. Bds. Brit. Mus., 24, p. 14, 1896—Peru (monog.).

Burhinus superciliaris Chubb, Ibis, 1919, p. 269—Piura (Rio Chica, Amotape), Lambayeque (Eten), and Libertad (Trujillo), Peru; Chapman, Bull. Amer. Mus. N. H., 55, p. 202, 1926—Tumbes, Peru (ex Taczanowski); Peters, Bds. World, 2, p. 296, 1934 (range); Philippi, Bol. Mus. Nac. Santiago, 16, p. 58, 1938—near Arica, Tacna, Chile.

Range.—Arid littoral of the Pacific coast from Tumbes, Peru, to Arica, Chile.

Superfamily THINOCOROIDEA

Family THINOCORIDAE. Seed Snipes

Genus **ATTAGIS** (I. Geoffroy Saint-Hilaire and) Lesson

Attagis (I. Geoffroy Saint-Hilaire and) Lesson, Cent. Zool., p. 130, by March, 1831—type, by monotypy (p. 135), *Attagis gayi* I. Geoffroy Saint-Hilaire and Lesson.

***Attagis gayi latreillii** Lesson. LATREILLE'S SEED SNIPE.

Attagis latreillii Lesson, Bull. Sci. Nat. Géol., 25, No. 197, p. "243" (=343), June, 1831—"d'une collection expédiée de Buenos-Ayres," errore, = Ecuador (type in Pecquet Collection, Caen, present location unknown); idem, Illust. Zool., livr. 4, pl. 11, Nov. 3, 1832—"Chile" (fig. of type in Pecquet Collection);¹ Chapman, Bull. Amer. Mus. N. H., 55, p. 189, 1926—Mount Pichincha, Antisana, and Mount Chimborazo; Berlioz, Bull. Mus. Hist. Nat., Paris, 33, p. 355, 1927—Antisana.

Attagis chimborazensis Sclater, Proc. Zool. Soc. Lond., 28, p. 82, 1860—Panza, Chimborazo (alt. 14,000 ft.), Ecuador (type in British Museum examined); idem and Salvin, Exot. Orn., p. 157, pl. 79, 1869—Ecuador (fig. of type); Taczanowski and Berlepsch, Proc. Zool. Soc. Lond., 1885, p. 112—San Rafael, Ecuador; Sharpe, Cat. Bds. Brit. Mus., 24, p. 716,

¹ Although the plate is poor, there can be little doubt that the description refers to the Ecuadorian form. The origin of the type, once in the private collection of a Mr. Pecquet at Caen, is shrouded in uncertainty. Lesson at first stated that it was received in a collection shipped from Buenos Aires, but subsequently he gave "Chile" as its habitat, which cannot be correct either.

1896—Chimborazo; Salvadori and Festa, Boll. Mus. Zool. Torino, 15, No. 368, p. 45, 1900—Mount Corazón; Goodfellow, Ibis, 1902, p. 251—Pichincha; Rhoads, Auk, 29, p. 148, 1912—Páramo de Pichincha; Lönnberg and Rendahl, Ark. Zool., 14, No. 25, p. 21, 1922—Mount Pichincha (crit.).

Attagis gayi latreillei Chubb, Ibis, 1919, p. 260—Chimborazo and Antisana.

Attagis gayi latreillii Peters, Bds. World, 2, p. 306, 1934—Ecuador.

Range.—Páramo zone of Ecuador.¹

Field Museum Collection.—3: Ecuador (Llanganata, Tunguragua, 2; unspecified, 1).

Conover Collection.—10: Ecuador (Pichincha, 1; Cerro Puntas, Cordillera Oriental, 3; Cerro Guamani, near Mount Antisana, 6).

****Attagis gayi simonsi* Chubb.² SIMON'S SEED SNIPE.**

Attagis gayi simonsi Chubb, Bull. Brit. Orn. Cl., 38, p. 41, 1918—Cruzero, "Lake Titicaca," Peru (type in British Museum examined); idem, Ibis, 1919, p. 260—Cruzero, Peru (crit.); Peters, Bds. World, 2, p. 306, 1934—Peru and northern Bolivia; Morrison, Ibis, 1939, p. 463—Talahuarra, Huancavelica, Peru (crit.; remarks on type).

Attagis gayi (not of I. Geoffroy Saint-Hilaire and Lesson) Bridges, Proc. Zool. Soc. Lond., 15, p. 29, 1847—Pass of Tapaquilcha (east of Ascotan), Potosí, Bolivia; Taczanowski, l.c., 1874, p. 557—Ninarupa, Junín, Peru; idem, Orn. Per., 3, p. 284, 1886—Ninarupa; Sclater, Proc. Zool. Soc. Lond., 1891, p. 137—southwest of Sacaya, Tarapacá, Chile; Sharpe, Cat. Bds. Brit. Mus., 24, p. 715, 1896—part, Peru and Chile (Sacaya); Lane, Ibis, 1897, p. 307—near Sacaya, Tarapacá; Budin, El Hornero, 4, p. 404, 1921—Cumbre de Zenta, Jujuy.

Attagis latreillii (not of Lesson) Sclater and Salvin, Proc. Zool. Soc. Lond., 1879, p. 641—Bolivia (ex Bridges).

Attagis gayi gayi Philippi, Bol. Mus. Nac. Santiago, 16, p. 50, 1938—Parinacota, Tacna, Chile.

Range.—Páramo zone of central southern Peru (depts. of Junín, Huancavelica, and Puno), southwestern Bolivia (Dept. La Paz to Potosí), northern Chile and northern Argentina (south to Tarapacá and Jujuy).

¹ *Additional material examined*.—Ecuador: Panza, Chimborazo, 1 (type of *A. chimborazensis*); Mount Guamaní (alt. 14,000 ft.), 1; Antisana, 4; Chimborazo, 1; unspecified, 2.

² *Attagis gayi simonsi* Chubb: A rather poor race. Nearest to *A. g. gayi*, but upper parts, breast and abdomen more deeply pinkish cinnamon. Wing, 190–192; tail, 80–90.

A. g. simonsi has the light markings above more like *gayi*, buffy grayish rather than ochraceous as in the Ecuadorian race, and the coloring of the under parts, though somewhat darker than in the typical form, is far away from the deep cinnamon rufous of *latreillii*. The amount of dusky spotting on under wing coverts

Conover Collection.—3: Peru (San Antonio de Esquilache, Puno, 1); Argentina (Sierra de Trenta, Jujuy, 2).

**Attagis gayi gayi* (I. Geoffroy Saint-Hilaire and) Lesson. GAY'S SEED SNIPE.

Attagis gayi (I. Geoffroy Saint-Hilaire and) Lesson, Cent. Zool., p. 135, pl. 47, by March, 1831—"San-Iago"—Santiago, Chile (type in Paris Museum examined); Darwin, Zool. Beagle, 3, Birds, p. 117, 1841—Cordillera of Coquimbo and Andes behind Copiapó, Atacama, Chile; Fraser, Proc. Zool. Soc. Lond., 12, p. 157, 1844—Chile; Des Murs, in Gay, Hist. Fís. Pol. Chile, Zool., 1, p. 384, pl. 7, 1847—Cordilleras of Chile; Bibra, Denks. Math.-Naturw. Kl. Akad. Wiss. Wien, 5, p. 130, 1853—"Precordillera" of Santiago, Chile; Cassin, U. S. Astr. Exp., 2, p. 192, 1855—Andes of Chile; Sclater, Proc. Zool. Soc. Lond., 1867, pp. 331, 339—Chile; Philippi, Anal. Univ. Chile, 31, p. 269, 1868—Cordillera of Chile; Reéd, l.c., 49, p. 567, 1877—Cordillera of Cauquenes, Colchagua, Chile; Reed, Anal. Univ. Chile, 93, p. 210, 1896—Cordilleras of Chile; Sharpe, Cat. Bds. Brit. Mus., 24, p. 715, 1896—part, Chile (Santiago); Porter, Rev. Chil. Hist. Nat., 3, p. 179, 1899—Valle de San Antonio, Atacama; Albert, Anal. Univ. Chile, 106, p. 581, 1900—Cordilleras of Chile (monog.); Baer, Ornith., 12, p. 231, 1904—Cerro Pelado, Tucumán; Ménégau, Bull. Soc. Phil. Paris, (10), 1, p. 217, 1909—Bolivia; Dabbene, Anal. Mus. Nac. Buenos Aires, 18, p. 213, 1910—Cumbres Calchaqufes, Tucumán; Scott and Sharpe, Rep. Princet. Univ. Exped. Patagonia, 2, Orn., p. 239, 1910—Arroyo Gio, south of Lago Buenos Aires, Santa Cruz; Sanzin, El Hornero, 2, p. 148, 1918—Cerro Pelado (alt. 3,500 m.), Mendoza; Barros, Rev. Chil. Hist. Nat., 25, p. 172, 1921—Cordillera of Aconcagua, Chile; idem, l.c., 30, p. 315, 1930—Caracoles (alt. 10,000 ft.), Santiago, Chile.

Attagis latreillii (not of Lesson) Pelzeln, Reise Novara, Zool., 1, Vögel, p. 113, 1865—Chile (spec. examined); Koslowsky, Rev. Mus. La Plata, 6, p. 292, 1895—Catamarca (crit.).

Attagis gayi fitzgeraldi Chubb, Bull. Brit. Orn. Cl., 38, p. 40, 1918—Horcones Valley, Mendoza (type in British Museum examined).

Attagis gayi gayi Wetmore, Univ. Calif. Pub. Zool., 24, p. 430, 1926—Cerro Rojo and Planicir, south of Lago Buenos Aires, Santa Cruz; Hellmayr, Field Mus. Nat. Hist., Zool. Ser., 19, p. 401, 1932—Baños del Toro, Coquimbo (range in Chile); Peters, Bds. World, 2, p. 306, 1934 (range).

Range.—Puna zone of the Andes from (?) Antofagasta, Chile, and (?) Tucumán, Argentina, south to the Straits of Magellan.¹

and carpal edge is about the same as in *gayi*, while these markings, in *latreillii*, are much more extensive as well as darker, more sooty, in tone.

Additional material examined.—Peru: Talahuarra, Huancavelica, 5; Cruzero, Puno, 2.—Chile: three leagues southwest of Sacaya, Tarapacá, 1.—Bolivia: Potosí, 2.

¹ Birds from Mendoza (*A. g. fitzgeraldi*) are not separable. The type is a shade darker underneath than the majority of Chilean birds, while another ex-

Field Museum Collection.—4: Chile (Banos del Toro, Coquimbo, 1; Landbeck, 1; Cerro Toro, Ultima Esperanza, Magallanes, 1); Argentina (Nevada del Cajon, Salta, 1).

Conover Collection.—4: Chile (Banos del Toro, Coquimbo, 2; Cerro Toro, Ultima Esperanza, Magallanes, 1); Argentina (Aconquija Mountains, Catamarca, 1).

***Attagis malouinus* (Boddaert). WHITE-BELLIED SEED SNIPE.**

Attagis malouinus malouinus Peters, Bds. World, 2, p. 307, 1934 (range).

Range.—Patagonia, from the Cape Horn region and Tierra del Fuego north to Santa Cruz and in the foothills of the Andes north through Chubut (Valle del Lago Blanco) to western Rio Negro (Arroyo Pilcaniyeu); accidental on the Falkland Islands (one definite record from Mara Harbour, East Falkland).¹

Genus **THINOCORUS** Eschscholtz

Thinocorus Eschscholtz, Zool. Atlas, Heft 1, p. 2, pl. 2, 1829—type, by monotypy, *Thinocorus rumicivorus* Eschscholtz.

Ocypetes Wagler, Isis, 1829, Heft 7, col. 762, July, 1829—type, by monotypy, *Ocypetes torquatus* Wagler=*Thinocorus rumicivorus* Eschscholtz.

Tinocchorus Lesson, Cent. Zool., p. 132, by March, 1831 (emendation).

Thinocorys Sharpe, Hand-List Bds., 1, p. 146, 1899 (emendation).

***Thinocorus orbignyianus ingae** Tschudi.² TSCHUDI'S SEED SNIPE.

¹ Study of a good series tends to show that *A. m. cheeputi* was based on an individual mutant. The type, with its buffy gray-vermiculated rump and upper tail coverts and buffy-barred rectrices, is matched by a bird from Peckett Harbour and another from Tierra del Fuego (Sara Settlement). The other specimens from Tierra del Fuego are exceedingly variable in the markings of the posterior upper parts, and form an uninterrupted series from the "*cheeputi*" type to what Lowe takes for *malouinus*. Birds from Hermit Island, Cockle Cove, Euston Bay, and Chubut (Lago Blanco) generally have wider and more rufescent markings on rump and tail coverts than Tierra del Fuego specimens. However, one from Lago Blanco is not distinguishable from the buffiest Tierra del Fuego bird. Barred rectrices also occur in other individuals, e.g., in a male from Cockle Cove, which combines the banded tail with the normal coloration of *malouinus* (viz., concentric reddish-brown markings on rump and tail coverts). It is thus seen that the var. *cheeputi* is not confined to any particular area. In fact, one of the Lago Blanco specimens shot on the same day (June 29) as the type of *cheeputi* is among the most reddish colored of the *malouinus* pattern.

Material examined.—Cape Horn region: Hermit Island, 3.—Tierra del Fuego: Hardy Peninsula, 1; Sara Settlement, 3; Est. Viamonte, 1; Valley of Rio Chico, 1.—Straits of Magellan: Cockle Cove, 1; Peckett Harbour, 1; Euston Bay, 1.—Chubut: Valley del Lago Blanco, 6.

² *Thinocorus orbignyianus ingae* Tschudi: Similar to the nominate race, but somewhat smaller. Wing, 135–144; tail, 60–67, rarely to 73 mm.

In coloration this form does not differ from the larger southern subspecies. Individuals with the feathers of the upper parts broadly edged and others with these feathers narrowly edged with buff occur together in Peru, Bolivia, and northern Chile. Recent study of ample material tends to show that, if the two races be maintained, birds from Tacna and Tarapacá must undoubtedly be placed with *ingae*. Specimens from southern Bolivia, including one from Cinti, are likewise the northern form.

Additional material examined.—Peru: Páramo of Huamachuco, 1 (wing, 139); Santiago, 2 (wing, 138, 144); Páramo south of Recuay, Ancachs, 1 (wing, 138);

***Thinocorus rumicivorus cuneicauda* (Peale).² PACIFIC LESSER SEED SNIPE.**

Glareola cuneicauda Peale, U. S. Expl. Exp., 8, p. 244, 1848—San Lorenzo Island, near Callao, Peru (type in U. S. National Museum examined).

*Thinocorus pallidus*³ Salvadori and Festa, Boll. Mus. Zool. Torino, 25, No. 631, p. 1, 1910—Santa Elena, Ecuador (type in Turin Museum).

¹ Birds from Mendoza as well as others from western Chubut agree in dimensions with a Chilean series.

Additional material examined.—Chile: Cordillera de las Condes, 6; Santiago, 2; Colchagua, 1; "Central Chile," 10.—Argentina: Sierra de Mendoza, 2; Puente del Inca, Mendoza, 1; Valle del Lago Blanco, Chubut, 2.

² *Thinocorus rumicivorus cuneicauda* (Peale): Similar to the nominate race, but smaller and paler, the light markings to the dorsal plumage, wing coverts, and inner remiges being much paler, light buff instead of brownish, and the dusky brown central areas of the feathers being less extensive. Wing, 101–108; tail, 51–56.

³ *T. pallidus* appears to be inseparable from *cuneicauda*. An adult male topotype, in paleness of light edging above, is a good match for the type of *T. peruvianus* and a specimen from Arequipa, while the other available examples, including a second male from Santa Elena, have the edges darker buffy. It is well to remember that the Lesser Seed Snipe has not yet been found breeding in Ecuador, where it probably occurs only as a migratory visitor. Festa's specimens are in very fresh plumage. There is a possibility that *Tinochorus swainsonii* Lesson (Bull. Sci. Nat. Géol., 25, No. 197, p. "244" [=344], June, 1831; idem, Illust. Zool., livr. 6, pl. 16, Feb. 23, 1833) might be an earlier name. The type

Thinocorus rumicivorus (not of Eschscholtz) Selater and Salvin, Proc. Zool. Soc. Lond., 1867, p. 989—Islay, Peru (crit.); iidem, l.c., 1869, p. 176—Tambo Valley, Arequipa; iidem, l.c., p. 570—coast of Peru; Selater, l.c., p. 148—Lima; Taczanowski, l.c., 1874, p. 557—Lima and Chorillos; idem, Orn. Pér., 3, p. 283, 1886—Pacasmayo to Islay, Peru; Selater, Proc. Zool. Soc. Lond., 1891, p. 137—La Noria, Tarapacá, Chile; Sharpe, Cat. Bds. Brit. Mus., 24, p. 719, 1896—part, spec. a-k, Peru (near Lima, Arequipa, Islay, Tambo Valley) and Chile (Tarapacá); Lane, Ibis, 1897, p. 304—part, Tarapacá; Salvadori and Festa, Boll. Mus. Comp. Zool., 15, No. 369, p. 45, 1900—Puntilla de Santa Elena, Ecuador (Jan.).

Thinocorus peruvianus Lowe, Bull. Brit. Orn. Cl., 41, p. 109, April 27, 1921—Islay, Arequipa, Peru (type in British Museum examined); Wetmore, Bull. U. S. Nat. Mus., 133, p. 172 (in text), 1926 (crit.).

Thinocorus rumicivorus pallidus Chapman, Bull. Amer. Mus. N. H., 55, p. 190, 1926—Santa Elena, Ecuador; Peters, Bds. World, 2, p. 307, 1934—Ecuador.

Thinocorus rumicivorus cuneicauda Hellmayr, Field Mus. Nat. Hist., Zool. Ser., 19, p. 399, 1932—La Noria, Tarapacá, Chile; Peters, Bds. World, 2, p. 308, 1934 (range).

Range.—Coast region of southwestern Ecuador (Santa Elena), Peru, and extreme northern Chile (Tarapacá).

****Thinocorus rumicivorus bolivianus* Lowe.¹ BOLIVIAN LESSER SEED SNIPE.**

Thinocorus rumicivorus bolivianus Lowe, Bull. Brit. Orn. Cl., 41, p. 109, April 27, 1921—Uyuni, Potosí, Bolivia (type in British Museum examined); Peters, Bds. World, 2, p. 308, 1934 (range); Zotta, El Hornero, 6, p. 290, 1936—Abra Pampa, Puna de Jujuy.

Range.—Puna zone of southwestern Bolivia (Esperanza, Pacajes, La Paz; Challapata, Oruro; Uyuni, Potosí) and northwestern Argentina (Abra Pampa, Jujuy).

was received from "Buenos Aires," by the proprietor, Mr. Pecquet, of Caen, in a shipment of birds which also contained the type of *Attagis latreilli*, a species restricted in its range to Ecuador. Lesson's description is ambiguous, gives no wing measurement, and unless the type can be found, his bird will remain unidentifiable.

Material examined.—Ecuador: Puntilla de Santa Elena, 3.—Peru: San Lorenzo Island, off Callao, 3; vicinity of Lima, 1; Lurin, Lima, 2; pampas between Lurin and Villa, 1; Arequipa, 2; Islay, 1; Tambo Valley, 1.—Chile: La Noria, Tarapacá, 1.

¹ *Thinocorus rumicivorus bolivianus* Lowe: Differs from *T. r. rumicivorus* by longer wings and much more buffy coloration, the light edges to the dorsal plumage, wing coverts, inner remiges, and tail-feathers being pinkish buff to (in female) cinnamon buff instead of avellaneous to sayal brown. Furthermore, the black stripes on sides of throat and down the middle of the foreneck are evidently wider. The six specimens are in fresh plumage. Wing, 122, 125, 127, 128, 129, (female) 130.

Additional material examined.—Bolivia: Uyuni, Potosí, 1 (the type); Challapata, Oruro, 2.

Field Museum Collection.—1: Bolivia (Esperanza, Pacajes, La Paz, 1).

Conover Collection.—2: Bolivia (Esperanza, Pacajes, La Paz, 2).

****Thinocorus rumicivorus rumicivorus* Eschscholtz. CHILEAN LESSER SEED SNIPE.**

Thinocorus rumicivorus Eschscholtz, Zool. Atlas, Heft 1, p. 2, pl. 2, May, 1829—near the seacoast in the Bay of Concepción, Chile (cotypes probably in Leningrad Museum); Cassin, in Gilliss, U. S. Expl. Exp., 2, p. 191, 1855—"the higher mountain valleys" of Chile, errore; Burmeister, Journ. Ocypetes torquatus Wagler, Isis, 1829, Heft 7, col. 762, July, 1829—"Brazil" (the cotypes [females] in the Berlin Museum were obtained by Sellow at Montevideo, Uruguay).¹

Tinocorus eschscholtzii Lesson, Cent. Zool., p. 140, pl. 50, by March, 1831—new name for *T. rumicivorus* Eschscholtz (descr. and fig. of spec.² from Buenos Aires in Paris Museum); Fraser, Proc. Zool. Soc. Lond., 11, p. 116, 1843—plains of Chile.

Tinocorus rumicivorus Darwin, Zool. Beagle, 3, Birds, p. 117, 1841—Patagonia (Santa Cruz), Chile (near Concepción; Copiapó), and Buenos Aires (Sierra Ventana); Des Murs, in Gay, Hist. Ffs. Pol. Chile, Zool., 1, p. 387, 1847—Concepción, Chile; Philippi, Anal. Univ. Chile, 31, p. 269, 1868—Santiago to Valdivia, Chile.

Thinocorus swainsoni (not of Lesson) Pelzeln, Reise Novara, Zool., 1, Vögel, p. 113, 1865—Chile (spec. examined).

Thinocorus rumicivorus (sic) *patagonicus* Reichenow, Journ. Orn., 68, p. 88, Jan., 1920—"South Patagonia" (type, from Santa Cruz River, in Berlin Museum).

Thinocorus rumicivorus venturii Rothschild, Bull. Brit. Orn. Cl., 41, p. 111, Apr. 27, 1921—Barracas al Sud, Buenos Aires (type in Tring Collection, now in the American Museum of Natural History, New York).

Thinocorus rumicivorus rumicivorus Peters, Bull. Mus. Comp. Zool., 65, p. 293, 1923—Huanuluan, Puesto Horno, and Bariloche, Rio Negro (crit.); Wetmore, Bull. U. S. Nat. Mus., 133, p. 172, 1926—Zapala, Neuquén, and mouth of Rio Aconcagua, Valparaiso, Chile (habits); idem, Univ. Calif. Pub. Zool., 24, p. 429, 1926—Arroyo Secco, Rio Negro (Sept.); Hellmayr, Field Mus. Nat. Hist., Zool. Ser., 19, p. 398, 1932—Chile (Atacama to Llanquihue); Peters, Bds. World, 2, p. 308, 1934 (range); Belcher, El Hornero, 6, p. 313, 1936—Pilcaniyeu, Rio Negro (breeding).

Thinocorus rumicivorus subsp. Bennett, Ibis, 1926, p. 324—Falkland Islands.

Thinocorus rumicivorus patagonicus Laubmann, Wiss. Erg. Deuts. Gran Chaco Exp., Vögel, p. 61, 1930—Est. La Germania, Santa Fé (crit.); Peters, Bds. World, 2, p. 308, 1934—Santa Cruz to Tierra del Fuego.

Range.—Breeds in Chile and southern Argentina north to the Rio Negro; migrates in winter northward to Mendoza, Córdoba, Santa Fé, Entre Ríos, and Uruguay;³ accidental on the Falkland Islands (four records).

¹ Their wings measure 114 and 117 mm. respectively.

² Its wing measures 116 mm.

³ The several races which have been described appear to be unsatisfactory. At the outset it may be said that we are unable to separate the general run of Argentine birds from a Chilean series either in size or color. Some specimens, e.g.,

Field Museum Collection.—11: Chile ("Central Chile," 2; unspecified, 1; Rio Nirehuau, Aysen, 1); Argentina (Estancia Cullen, Tierra del Fuego, 1; Estancia Via Monte, Tierra del Fuego, 1; San Sebastian, Tierra del Fuego, 2; Paso Ibanez, Santa Cruz, 3).

Conover Collection.—38: Chile (Batuco, Santiago, 3; Angol, Bio Bio, 5; Rio Nirehuau, Aysen, 13); Argentina (Bonifacio, Buenos Aires, 1; Rawson, Chubut, 1; Estancia Pampa Alta, Santa Cruz, 4; Cerro Fortaleza, Santa Cruz, 6; Rio Gallegos, Santa Cruz, 3; Estancia Cullen, Tierra del Fuego, 1; Estancia Via Monte, Tierra del Fuego, 1).

one each from Tierra del Fuego (Viamonte; Feb. 17), Chubut Valley (Nov. 20), Est. Espartillar (May 11), and Ajó, Buenos Aires, have the edges to wing coverts and dorsal feathers somewhat paler, more whitish buff, as has been claimed by Rothschild for *T. r. venturii*, whose type was a migratory visitor taken, on June 4, near Buenos Aires. However, the majority of Argentine birds are just as dark as the Chilean specimens, and, with regard to the shade of gray on the rump, we cannot perceive the slightest difference between the two series. As to size, there is considerable variation, and this may be of some local significance, as a large percentage of long-winged individuals is found among breeding birds from certain parts of southeastern Patagonia (around the Rio Gallegos). If separable, this larger form is entitled to the name *T. r. patagonicus*, based upon a male from the Rio Santa Cruz. From the subjoined wing measurements, based upon our own material and data supplied by Messrs. Peters, Riley, Rogers, and Zimmer, it will be seen, however, that the variation is somewhat erratic, and hard to reconcile with particular geographic areas. The question is, furthermore, complicated by the fact that a large proportion of the available material consists of migratory specimens.

WING MEASUREMENTS

CHILE.—Coquimbo, female 115; Santiago, males 112, 114, 118, 120, 120; Temuco, male 114; Arauco, males 114, 120; Rio Nirehuau, Llanquihue, males 114, 118, 119, females 110, 116, 124.

ARGENTINA.—Neuquén: Zapala (Dec.), male 100, female 112.

Rio Negro: Maquinchao, Huanuluan, Bariloche (Aug. to Feb.), males 113½, 115, 115, 116, 118, females 118, 111, 113½, 114, 117.

Chubut: Valle del Lago Blanco, Chubut (Aug. to Nov.), males 112, 113, 114, 119, 123, 129.

Chubut: Rio Chubut (Nov.), male 117; Rawson (Sept.), female 113.

Buenos Aires: Barracas al Sud (June), males 112, 116, 120½; Laguna Alsina, Bonifacio (June), male 110, female 117; Est. Espartillar (May), male 115, female 115; Chirilcay (August), female 112; Conchitas, male 125, female 123; Ajó (April), females 115, 118, 125, 128; Bahia Blanca (April), male 132.

Santa Cruz: Rio Santa Cruz, males 124, 135 (type of *patagonicus*); Mount Pampa Alta (Sept., breeding), male 116, female 118; Cerro Fortaleza (March), males 114, 124, 126, females 113, 121; Rio Gallegos (Aug. to Jan.), 112, 114, 118, 119, 121, 123 (two), 124, 125–130 (twelve), 131 (two), 133, females 119, 120 (two), 121–125 (nine), 126, 127, 128, 129; near Mount Tigre (Aug.), female 129.

Straits of Magellan: Punta Arenas (Nov., Jan.), males 110, 113, 115, females 113, 124.

Tierra del Fuego: Viamonte (Sept., Feb.), males 115, 134.

Superfamily CHIONIDOIDEA

Family CHIONIDIDAE. Sheath-bills

Genus CHIONIS J. R. Forster

Chionis J. R. Forster, *Enchirid. Hist. Nat.*, p. 37, 1788 (generic characters only)—type, by subs. desig. (Gmelin, *Syst. Nat.*, 1, (2), p. 705, 1789), *Vaginalis* (*Chionis*) *alba* Gmelin.

Vaginalis Gmelin, *Syst. Nat.*, 1, (2), p. 705, 1789—type, by monotypy, *Vaginalis alba* Gmelin.

Coleoramphus Dumont, *Dict. Sci. Nat.*, 10, p. 36, 1818—type, by monotypy, *Coleoramphus nivalis* Dumont.

**Chionis alba* (Gmelin). SNOWY SHEATH-BILL.

Vaginalis alba Gmelin, *Syst. Nat.*, 1, (2), p. 705, 1789—based on "White Sheath-bill" Latham, *Gen. Syn. Bds.*, 3, (1), p. 268, pl. 89,¹ "New Zealand," errore, = Isla Año Nuevo, Staten Island.²

Vaginalis chionis Latham, *Ind. Orn.*, 2, p. 774, 1790—based on "White Sheath-bill" Latham, *Gen. Syn. Bds.*, 3, (1), p. 268, pl. 89 (in part).

Coleoramphus nivalis Dumont, *Dict. Sci. Nat.*, 10, p. 36, 1818—new name for *Vaginalis alba* Gmelin.

Chionis forsteri Stephens, in Shaw, *Gen. Zool.*, 12, (1), p. 281, 1824—new name for *Vaginalis alba* Gmelin.

Chionis alba Quoy and Gaimard, in Freycinet, *Voy. Uranie et Physic.*, *Zool.*, p. 131, pl. 30, 1824—Falkland Islands; Lesson, in Duperrey, *Voy. Coquille*, *Zool.*, 1, p. 724, 1830—Falkland Islands (Baie Française); Darwin, *Zool. Beagle*, 3, *Birds*, p. 118, 1841—Falkland Islands; Gould, *Proc. Zool. Soc. Lond.*, 27, p. 95, 1859—Falkland Islands; Scater, *l.c.*, 28, p. 386, 1860—Berkeley Sound, Falkland Islands; Abbott, *Ibis*, 1861, p. 154—Falkland Islands; Scater and Salvin, *l.c.*, 1869, p. 284—Dungeness Spit, Straits of Magellan (Feb. 16, 1868); Pagenstecher, *Jahrb. Hamb. Wiss. Anst.*, 2, p. 12, pl., fig. 3, 1885—South Georgia (breeding); Sharpe, *Cat. Bds. Brit. Mus.*, 24, p. 710, 1896—Straits of Magellan (Dungeness Spit) and Falkland Islands; Salvadori, *Ann. Mus. Civ. Stor. Nat. Genova*, 40, p. 624, 1900—Rio Gallegos, Santa Cruz, Patagonia (July 22, 1882); Dabbene, *Anal. Mus. Nac. Buenos Aires*, 8, p. 378, 1902—Staten Island, Straits of Magellan, and Falkland Islands; Clarke, *Ibis*, 1906, p. 182, pls. 3, fig. 2 (chick), 12, 13—South Orkney Islands (eggs; breeding habits); Lönnberg, *Svensk. Vetensk. Akad. Handl.*, 40, No. 5, p. 56, pl. 1 (chick), 1906—South Georgia; Scott and Sharpe, *Rep. Princet. Univ. Exped.*

¹ Latham's account is composite, comprising also some race of *C. minor*. As Peters (*Bds. World*, 2, pp. 308–309, 1934) has restricted Gmelin's name to the plate, which unquestionably represents *C. alba* auct., nomenclature need not be disturbed.

² J. R. Forster discovered this species on Jan. 3, 1775, on the Isla Año Nuevo, near Staten Island (cf. *Descr. Anim.*, p. 330, 1844). Therefore, there was no need for a corrected type locality (Falkland Islands), as proposed by Brabourne and Chubb (*Bds. S. Amer.*, 1, p. 36, 1912).

Patagonia, 2, Orn., p. 234, 1910—Patagonia; Dabbene, Anal. Mus. Nac. Buenos Aires, 18, p. 213, 1910 (range in Argentina); Brooks, Bull. Mus. Comp. Zool., 61, p. 149, 1917—Falkland Islands; Anon., El Hornero, 1, p. 41, 1917—Camarones, Chubut, Patagonia; Bennett, l.c., 2, p. 30, 1920—Falkland Islands; Wace, l.c., p. 197, 1921—Speedwell Island, Falklands; Bennett, Ibis, 1926, p. 321, pl. 6—Falkland Islands; Mathews, Discovery Rep., 1, p. 584, pl. 47, figs. 8, 9, 1929—South Georgia (nesting; food); Ardley, l.c., 12, p. 375, pl. 12, fig. 4, 1929—South Orkney Islands (nesting; food); Peters, Bds. World, 2, p. 308, 1934 (range); Castellanos, El Hornero, 6, p. 29, 1935—South Orkney (Laurie Island) and Año Nuevo Islands; Murphy, Ocean. Bds. S. Amer., 2, p. 1000, 1936 (monog.).

Chionis necrophagus Vieillot (and Oudart), Gal. Ois., 2, p. 146, pl. 258, 1825—substitute name for *Vaginalis alba* Gmelin.

Chionis vaginalis Temminck, Nouv. Rec. Pl. Col., livr. 86, pl. 509, Sept. 4, 1830—Falkland Islands (type in Paris Museum).

Chionis lactea Forster, Descr. Anim., p. 330, 1844—Isla Año Nuevo, Tierra del Fuego.

Range.—Breeds on South Georgia, the South Sandwich, South Orkney, and South Shetland Islands, and on various islands of the Antarctic Archipelago; occurs regularly in the Falkland Islands, the Diego Ramirez Islets, along the Straits of Magellan, and on the coast of southern Patagonia (Santa Cruz; Camarones Bay, Chubut).

Field Museum Collection.—4: Argentina (Cape Penas, Tierra del Fuego, 4).

Conover Collection.—2: Argentina (Cape Penas, Tierra del Fuego, 2).

Suborder LARI

Family STERCORARIIDAE. Skuas and Jaegers

Genus CATHARACTA Brünnich

Catharacta Brünnich, Orn. Bor., p. 32, 1764—type, by subs. desig. (Reichenbach, Av. Syst. Nat., p. v, 1852), *Catharacta skua* Brünnich.

Megalestris (Bonaparte MS.) Parzudaki, Cat. Ois. d'Europe, p. 11, 1856—type, by monotypy, "*Megalestris catarrhactes* Bp. ex L."=*Catharacta skua* Brünnich.

Buphagus "(Moehring, 1752)" Coues, Proc. Acad. Nat. Sci. Phila., 1863, p. 124—type, by orig. desig., *Larus catarractes* Linnaeus=*Catharacta skua* Brünnich.

Catharacta skua skua Brünnich. NORTHERN SKUA.

Catharacta skua Brünnich, Orn. Bor., p. 33, 1764—Färoes and Iceland; Bent, Bull. U. S. Nat. Mus., 113, p. 1, 1921 (life hist.); Garrison, Auk, 57, p. 567, 1940 (New England records).

Larus Catarractes Linnaeus, Syst. Nat., 12th ed., 1, p. 226, 1766—substitute name for *Catharacta skua* Brünnich.

Lestris catarractes Holböll, Naturhist. Tidsskr., 4, p. 424, 1843—southern Greenland; Winge, Medd. Grønl., 21, p. 213, 1898—Umanak, Greenland.

Buphagus skua Coues, Proc. Acad. Nat. Sci. Phila., 1863, p. 125 (monog.).

Stercorarius catarrhactes Saunders, Proc. Zool. Soc. Lond., 1876, p. 319 (monog.).

Megalestria catarrhactes Saunders, Cat. Bds. Brit. Mus., 25, p. 315, 1896 (monog.).

Megalestria skua Ridgway, Bull. U. S. Nat. Mus., 50, (8), p. 677, 1919 (monog.; full bibliog.).

Catharacta skua skua Peters, Bds. World, 2, p. 309, 1934 (range); Wynne-Edwards, Proc. Bost. Soc. N. H., 40, p. 310, 1935 (distr. in North Atlantic); Murphy, Ocean. Bds. S. Amer., 2, p. 1012, 1936 (descr.); Bird and Bird, Ibis, 1941, p. 154—Rio Treelva and Myggbukta, Greenland (June 3–15).

Stercorarius skua skua Salomonsen, Medd. Grønl., 93, (6), p. 8, 1935—Sukkertoppen, Greenland.

Range.—Known to breed in Iceland, the Färoes, Shetlands, and Orkneys; reported to have bred on Lady Franklin Island; south-eastern Baffin Island, and Greenland; winters off the Atlantic coast of North America from Newfoundland to Massachusetts and in the eastern Atlantic south to Spain.

****Catharacta skua chilensis* (Bonaparte).¹ CHILEAN SKUA.**

Stercorarius antarcticus b. *chilensis* Bonaparte, Consp. Gen. Av., 2, p. 207, 1857—"Amer. merid."=Chile (type in Berlin Museum).

Stercorarius antarcticus (not *Lestris antarcticus* Lesson) Des Murs, in Gay, Hist. Fïs. Pol. Chile, Zool., 1, p. 479, 1847—part, Magallania; Philippi, Anal. Univ. Chile, 31, p. 287, 1868—part, Magallania (ex Gay).

Lestris antarctica Sclater and Salvin, Ibis, 1869, p. 284—Sta. Magdalena, Straits of Magellan.

Stercorarius chilensis Saunders, Proc. Zool. Soc. Lond., 1876, p. 323, pl. 24—Mejillones Bay, "Bolivia" (now Antofagasta), Valparaíso, Coquimbo, and Straits of Magellan (descr.; crit.); idem, l.c., 1877, p. 800—Elizabeth Island, Straits of Magellan; Sharpe, l.c., 1881, p. 17—Straits of Magellan and Talcahuano, Chile; Saunders, l.c., 1882, p. 527—Callao Bay, Peru; MacFarlane, Ibis, 1887, p. 206—Callao Bay (Aug., Sept.); Oustalet, Miss. Sci. Cap Horn, 6, p. B. 172, 1891—Missioneros, Santa Cruz, Patagonia (Nov.); Reed, Anal. Univ. Chile, 93, p. 211, 1896—Chile.

Megalestria chilensis Saunders, Cat. Bds. Brit. Mus., 25, p. 318, 1896—Brazil (Rio de Janeiro, Aug.; Santa Catharina, Aug.), Straits of Magellan (Elizabeth Island), Chile (Talcahuano, Sept.; Mejillones Bay, Dec.–March;

¹ *Catharacta skua chilensis* (Bonaparte) differs from the nominate race by more cinnamonous coloring, especially by having the axillaries, under wing coverts, and ventral surface mostly cinnamon or cinnamon-rufous, instead of grayish brown. Size smaller.

Iquique), and Peru (Callao Bay); Schalow, Zool. Jahrb., Suppl., 4, p. 655, 1898—Chile (Coquimbo, Oct.) and Tierra del Fuego (San Huivantazgo, Admiralty Sound); Salvadori, Ann. Mus. Civ. Stor. Nat. Genova, 40, p. 629, 1900—Santa Cruz, Patagonia; Oates, Cat. Birds' Eggs Brit. Mus., 1, p. 225, 1901—Sea Lion Island, Santa Cruz River, Patagonia; Dabbene, Anal. Mus. Nac. Buenos Aires, 8, p. 382, 1902—Tierra del Fuego (ex Schalow); Nicoll, Ibis, 1904, p. 47—Port Dixon and Gray's Harbor, Straits of Magellan; Ihering, Cat. Faun. Braz., 1, p. 44, 1907—Rio Grande do Sul to Rio de Janeiro; Paessler, Orn. Monatsber., 17, p. 101, 1909—Santa María Island (off Coronel), Chile (breeding), and Smythe's Channel; Hartert and Venturi, Nov. Zool., 16, p. 255, 1909—Barracas al Sud, Buenos Aires (Sept. 18); Scott and Sharpe, Rep. Princet. Univ. Exped. Patagonia, 2, Orn., p. 226, fig. 134, 1910—Patagonia (descr.); Dabbene, Anal. Mus. Nac. Buenos Aires, 18, p. 209, 1910—Patagonia and Buenos Aires; Paessler, Journ. Orn., 70, p. 444, 1922—Chile north to Arica (habits, eggs descr.); Housse, Rev. Chil. Hist. Nat., 28, p. 53, 1924—Isla la Mocha, Arauco, Chile.

Catharacta chilensis Dabbene, El Hornero, 1, pp. 216, 218, 1918 (char.; range); (?) Wace, l.c., 2, p. 197, 1921—Falkland Islands (visitor); Bent, Bull. U. S. Nat. Mus., 113, p. 7, 1921—California (Monterey Bay, Aug. 4, 7; Sept. 21), Washington (off Gray's Harbour, June 28), and British Columbia (off Vancouver Island, June 20).

Megalestris skua chilensis Hellmayr, Field Mus. Nat. Hist., Zool. Ser., 19, p. 414, 1932—Chile (range); Bullock, Rev. Chil. Hist. Nat., 39, p. 249, 1935—Isla la Mocha, Chile; Philippi, El Hornero, 6, p. 236, 1936—Arica (Tacna) to Valparaíso, Chile; Bullock, Rev. Chil. Hist. Nat., 39, p. 169, 1936; Cowan, Murrelet, Seattle, 21, p. 69, 1940—British Columbia

Catharacta skua chilensis Reynolds, Ibis, 1932, p. 36—Snipe and Woodcock Islands, Beagle Channel; idem, El Hornero, 5, p. 353, 1934—Isla de los Conejos, Tierra del Fuego; Peters, Bds. World, 2, p. 310, 1934 (range); Reynolds, Ibis, 1935, p. 89—Islands around Cape Horn (breeding; eggs descr.); Murphy, Ocean. Bds. S. Amer., 2, p. 1013, 1936 (monog.; range); Pinto, Rev. Mus. Paul., 22, p. 145, 1938 (range); Brooks, Ibis, 1939, p. 325—off Santa Cruz, California (March 14); Hamilton, l.c., 1945, p. 103—off Santa Catharina Island, Brazil (sight record).

Range.—Breeds in Tierra del Fuego, the neighboring islets, and northward on the east coast of South America to the mouth of the Rio Santa Cruz (Sea Lion Island), Patagonia, and on the Pacific coast at least to Santa María Island, Bay of Arauco, Chile; outside the breeding season wanders north along the western coast of America to British Columbia and on the Atlantic coast to Rio de Janeiro.¹

Field Museum Collection.—3: Chile (Porvenir, Magallanes, 1); Argentina, Santa Cruz (Puerto Deseado, 1; Rio Gallegos, 1).

¹ Migrant birds recorded from the Atlantic coast may, however, prove to be brown individuals of *C. s. antarctica* (cf. Murphy, Ocean. Bds. S. Amer., p. 1015). Wace's record from the Falkland Islands requires confirmation. Bennett (Ibis, 1926, p. 318) and Murphy (Ocean. Bds. S. Amer., p. 1009) emphatically deny its occurrence on these islands.

Catharacta skua antarctica (Lesson).¹ FALKLAND ISLAND SKUA.

Lestris antarcticus Lesson, *Traité d'Orn.*, livr. 8, p. 616, 1831—Falkland Islands and New Zealand (type locality, as restricted by Mathews [Nov. Zool., 18, p. 212, 1918], Falkland Islands; cotypes in Paris Museum;² cf. Milne Edwards, *Ann. Sci. Nat.*, (6), Zool., 12, p. 21, 1881); Sclater and Salvin, *Proc. Zool. Soc. Lond.*, 1871, p. 579—part, Falkland Islands.

Patagonia*, 2, Orn., p. 228, 1910—part, Falkland Islands and Straits of Magellan.

Lestris antarctica Sclater, *Proc. Zool. Soc. Lond.*, 28, p. 390, 1860—Falkland Islands; Abbott, *Ibis*, 1861, p. 165—Falkland Islands (breeding in December).

Stercorarius antarcticus Saunders, *Proc. Zool. Soc. Lond.*, 1876, p. 321—part, Falkland Islands; idem, *l.c.*, 1877, p. 779—part, Falkland Islands; idem, *Rep. Voy. Challenger*, 2, Birds, p. 139, 1881—part, Falkland Islands; Milne-Edwards, *Ann. Sci. Nat.*, (6), Zool., 12, p. 21, 1881—Falkland Islands (crit.); Oustalet, *Miss. Sci. Cap Horn*, 6, p. B. 169, 1891—Falkland Islands (French Bay, Edwards Bay), Tierra del Fuego (Orange Bay), and Straits of Magellan (Elizabeth Island).

Magalestris antarctica falklandica Lönnberg, *Wiss. Erg. Schwed. Südpolar Exp.*, 5, No. 5, p. 8, 1905—Hope Bay, Louis Philippe Land (type in Stockholm Museum); Gyldenstolpe, *Ark. Zool.*, 19, A, No. 1, p. 103, 1937 (crit.).

Catharacta antarctica Brooks, *Bull. Mus. Comp. Zool.*, 61, p. 148, 1917—Falkland Islands.

Catharacta skua antarctica Dabbene, *El Hornero*, 1, pp. 217, 218, 1918—part, Falkland Islands; Wace, *l.c.*, 2, p. 197, 1921—Falkland; Daguerre, *l.c.*, p. 261, 1922—Rosas, Province of Buenos Aires (April to Aug.); Bennett, *Ibis*, 1926, p. 319—Falkland Islands; Lowe and Kinnear, *Brit. Antar. (Terra Nova) Exped., Nat. Hist. Rep.*, Zool., 4, pp. 116, 117, 1930—part, Falkland Islands (meas.); Hamilton, *Discovery Rep.*, 9, p. 169, 1934—Falkland Islands (crit.; meas.); Peters, *Bds. World*, 2, p. 310, 1934—

¹*Catharacta skua antarctica* (Lesson) most closely resembles *C. s. lönnbergi* and, though exceedingly variable in intensity of coloring, differs by the somewhat streaky or spotty dorsal surface, while the dimensions are generally less. The variations of this form have been discussed at length by Murphy (*Ocean. Bds. S. Amer.*, pp. 1020–1021).

²Lesson evidently based his description on two specimens obtained by the *Uranie* on the Falkland Islands. The locality New Zealand appears to have been added from the literature quoted by Quoy and Gaimard.

part, Falkland Islands to southern Argentina; Murphy, Ocean. Bds. S. Amer., 2, p. 1020, 1936—Falkland Islands (monog.; variation; meas.).

Range.—Breeds on the Falkland Islands, wandering outside the breeding season north along the South American coast to beyond the latitude of Cabo Frio, Brazil; strays to the western Antarctic (Louis Philippe Land).¹

***Catharacta skua lönnbergi* Mathews.² BROWN SKUA.**

Catharacta antarctica lönnbergi Mathews, Nov. Zool., 18, p. 212, Jan., 1912—New Zealand seas (type in coll. of G. M. Mathews [cf. Hartert, l.c., 35, p. 20, 1927], now in the American Museum of Natural History, New York).

Stercorarius antarcticus (not *Lectris antarcticus* Lesson) Saunders, Proc. Zool. Soc. Lond., 1876, p. 321—part, excl. of Falkland Islands; Sclater, Ibis, 1894, pp. 495, 497—Antarctica.

Megalestris antarctica Pagenstecher, Jahrb. Hamb. Wiss. Anst., 2, p. 24, 1885—South Georgia (breeding; eggs descr.); Saunders, Cat. Bds. Brit. Mus., 25, p. 319, 1896—part, spec. a–p, Campbell, Chatham, Norfolk, and Kerguelen Islands; Clarke, Ibis, 1906, p. 180—Laurie and Saddle Islands, South Orkneys (breeding habits); Dabbene, Anal. Mus. Nac. Buenos Aires, 18, p. 209, 1910—part, South Orkney Islands.

Catharacta antarctica Lönnberg, Svensk. Vetensk. Akad. Handl., 40, No. 5, p. 58, 1906—South Georgia (crit.; descr. of chick and eggs; habits); Bennett, El Hornero, 2, p. 26, 1920—South Shetland Islands; Wilkins, Ibis, 1923, p. 490—South Georgia.

Catharacta lönnbergi clarkii Mathews, Bds. Australia, 2, p. 494, Jan. 31, 1913—South Orkney Islands (type in Edinburgh Museum; cf. Stenhouse, Nov. Zool., 35, p. 275, 1930); Dabbene, El Hornero, 1, pp. 217, 218, 1919—South Georgia and South Orkney Islands (char.); Bennett, Ibis, 1926, p. 320—South Georgia, South Orkney, and South Shetland Islands; Mathews, Discovery Rep., 1, p. 580, pl. 47, figs. 3–4, pl. 53, fig. 4, pl. 54, fig. 1, 1929—South Georgia (nesting).

Catharacta skua clarkei Lowe and Kinnear, Brit. Antar. (Terra Nova) Exped., Nat. Hist. Rep., Zool., 4, pp. 116, 117, 1930—South Georgia, South Orkney, and South Shetland Islands (crit.; meas.); Peters, Bds. World, 2, p. 310, 1934 (same range); Hamilton, Discovery Rep., 9, p. 173, 1934 (crit.; range); Murphy, Ocean. Bds. S. Amer., 2, p. 1023, 1936 (monog.; char.; range).

¹ Birds from Tristan da Cunha and Gough Island, heretofore referred to *C. s. antarctica*, are believed by Murphy (Ocean. Bds. S. Amer., p. 1033) to be more closely linked with *C. s. lönnbergi*, from which they might, however, prove to be separable. Two birds, collected by R. H. Beck at Mar del Plata in October, seem also to belong to this undetermined race.

² *Catharacta skua lönnbergi* Mathews may be distinguished from the preceding races by larger size, notably longer, stouter bill and tarsus, and prevailing brown coloring with a minimum of chamois color and cinnamon.

According to Hamilton and Murphy, the proposed races from the South Orkney Islands (*C. lönnbergi clarkei*) and Kerguelen Island (*C. l. intercedens*) are not separable.

Catharacta skua lönnbergi Ardley, Discovery Rep., 12, p. 370, 1936—South Orkneys (nesting; crit.); Alcorn, Condor, 44, p. 218, 1942—(?) coast of Washington.

Range.—Circumpolar at islands in the Antarctic and Subantarctic zones; breeding in the South Shetlands, South Orkneys, South Georgia, and in the West Antarctic Archipelago to about 65° S. Lat., extralimittally in Stewart, Chatham, Snares, Auckland, Campbell, Antipode, and Macquarie Islands, also in Kerguelen, Crozet, and Prince Edward Islands.

Catharacta skua maccormicki (Saunders). SOUTH POLAR SKUA.

Stercorarius maccormicki Saunders, Bull. Brit. Orn. Cl., 3, p. xii, Dec. 30, 1893—Possession Island, Victoria Land (type in the British Museum).

Megalestris maccormicki Saunders, Cat. Bds. Brit. Mus., 25, p. 321, pl. 1, 1896—Possession Island, Victoria Land, and Antarctic Sea; Clarke, Ibis, 1906, p. 182—Laurie Island, South Orkneys (Nov. 11, 1904); Dabbene, Anal. Mus. Nac. Buenos Aires, 18, p. 209, 1910—South Orkney Islands.

Catharacta maccormicki wilsoni Mathews, Bds. Australia, 2, p. 495, Jan. 31, 1913—Weddell Sea (type, from 74° S. Lat., 22° W. Long., off Coat's Land, in Edinburgh Museum; cf. Stenhouse, Nov. Zool., 35, p. 275, 1930); Dabbene, El Hornero, 1, pp. 217, 218, 1919—Laurie Island, South Orkneys (char.; range).

Catharacta skua maccormicki Lowe and Kinnear, Brit. Antar. (Terra Nova) Exp., Nat. Hist. Rep., Zool., 4, pp. 121, 123, 1930 (crit.; meas.); Peters, Bds. World, 2, p. 310, 1934 (range); Hamilton, Discovery Rep., 9, p. 174, 1934 (crit.); Murphy, Ocean. Bds. S. Amer., 2, p. 1016, 1936 (monog.; range); Eklund, Proc. Amer. Phil. Soc., 89, No. 1, p. 302, 1945—King George VI Sound, Antarctica (life hist.).

Range.—Breeds on the shores of the Antarctic continent and in the West Antarctic Archipelago north to 65° S. Lat.; occasional in the South Shetland and South Orkney Islands.

Genus STERCORARIUS Brisson

Stercorarius Brisson, Orn., 1, p. 56, 6, p. 149, 1760—type, by tautonymy, "*Stercorarius*"=*Larus parasiticus* Linnaeus.

Coprotheres Reichenbach, Av. Syst. Nat., p. v, 1852 (1853)—type, by orig. desig., *Larus pomarinus* Temminck.

Atalolestris Mathews, Bds. Australia, 2, (5), pp. 500, 508, Jan. 31, 1913—type, by orig. desig., *Stercorarius longicaudus* Vieillot.

****Stercorarius pomarinus* (Temminck). POMARINE JAEGER.**

Lestris pomarinus Temminck, Man. d'Orn., p. 514, 1815—Arctic regions of Europe, on migration in Holland and France (type or cotypes probably

in Leyden Museum);¹ Holböll, Naturh. Tidsskr., 4, p. 424, 1843—northern Greenland.

Stercorarius pomatorhinus Saunders, Proc. Zool. Soc. Lond., 1876, p. 324 (crit.; range); idem, l.c., 1882, p. 527—Callao Bay, Peru (Dec., 1881); MacFarlane, Ibis, 1887, p. 206—Callao Bay, Peru (Nov. 17 and 18); Saunders, Cat. Bds. Brit. Mus., 25, p. 322, 1896 (monog.).

Lestris pomatorhina Winge, Medd. Grøn., 21, p. 218, 1898—Greenland.

Stercorarius pomarinus Rothschild and Hartert, Nov. Zool., 6, p. 192, 1899—Albemarle Island, Galápagos (Dec. 15, 1897); Chubb, Bds. Brit. Guiana, 1, p. 96, 1916—Georgetown Harbor; Bent, Bull. U. S. Nat. Mus., 113, p. 7, 1921 (life hist.); Bradlee, Proc. Bost. Soc. N. H., 39, p. 287, 1931—Bermuda Islands (Sept. 26, 1908); Peters, Bds. World, 2, p. 311, 1934 (range); Wynne-Edwards, Proc. Bost. Soc. N. H., 40, p. 298, 1935 (distr. in North Atlantic); Griscom, Bull. Mus. Comp. Zool., 78, p. 308, 1935—off Colon, Panama; Murphy, Ocean. Bds. S. Amer., 2, p. 1035, 1936—off Ancón, Peru (sight record); Porsild, Canad. Field Nat., 57, p. 29, 1943—Mackenzie Delta (rather rare); Southern, Ibis, 1944, p. 1 (dimorphism).

Coprotheres pomarinus Ridgway, Bull. U. S. Nat. Mus., 50, (8), p. 681, 1919 (monog.; full bibliog.); Brandt, Alaska Bird Trails, p. 400, 1943—Hooper Bay, Bering Sea, Alaska (breeding).

Range.—Breeds on Novaya Zemlya, the Yalmal Peninsula, Arctic coast of Siberia,² New Siberian Islands, Herald Island, and in northwestern Alaska, islands of the Arctic Archipelago, and the adjacent mainland south to Hooper Bay on the west, Southampton Island on the east, and central Greenland; winters off shore to western Africa, Mediterranean and Black Seas, Indian Ocean, Australia, Galápagos Islands (Albemarle Island, Dec. 15), coasts of Peru (Callao Bay, Nov. 17, Dec.; Ancón, May 8), Gulf of Mexico, the western Atlantic off the coast of Virginia, and British Guiana (Georgetown Harbor).

Field Museum Collection.—19: Alaska (Barrow, 3; St. Lawrence Island, 2; King Island, 1; Nome, 3); California (Moss Landing, 1); Greenland (Davy's Sound, East Coast, 1); Labrador (Okak, 1); Nova Scotia (off Dover, Halifax County, 3); Massachusetts (Chatham, 1; Monomoy Island, 2; Cohasset, 1).

****Stercorarius parasiticus* (Linnaeus). PARASITIC JAEGER.**

Larus parasiticus Linnaeus, Syst. Nat., 10th ed., 1, p. 136, 1758—"intra Tropicum cancri: Europae, Americae, Asia" (restricted type locality, coast of Sweden; cf. Lönnberg, Zoologist, (4), 7, pp. 338-342, 1903).

¹ Schlegel (Mus. Pays-Bas, livr. 4, p. 47, 1863) lists three "individus au plumage parfait, Mer du Nord," which are probably Temminck's originals.

² *Stercorarius nigricapillus* Bergman (Fauna och Flora, 18, No. 5, p. 232, 1923—cotypes from Taporkof and Pianaja Bay, Kamchatka, in Stockholm Museum) has

Catharacta Cepphus Brünnich, Orn. Bor., p. 36, 1764—"in Cimbria ad littus maris germanici, prope praedium Lönborregaard."

Catharacta Coprotheres Brünnich, Orn. Bor., p. 38, 1764—Iceland and Norway (descr. of dark phase).

*Larus crepidatus*¹ Gmelin, Syst. Nat., 1, (2), p. 602, 1789—based on *Catharacta cepphus* Brünnich, "Le Labbé ou Stercoraire" Buffon, etc., "in mari Americae et Europae septentrionali."

Lestris Schleepii C. L. Brehm, Lehrb. Naturg. Europ. Vögel, 2, p. 993, 1824—Greenland (type in Tring Collection [cf. Hartert, Nov. Zool., 25, p. 60, 1918], now in the American Museum of Natural History, New York).

Lestris Richardsonii Swainson, in Swainson and Richardson, Fauna Bor.-Amer., 2, "1831," p. 433, pl. 73, pub. Feb., 1832—Barren Grounds, lakes of Fur Countries, and [type from] Fort Franklin (descr. of dark phase; location of type unrecorded).²

Lestris parasitica Holbøll, Naturh. Tidsskr., 4, p. 425, 1843—southern Greenland; Winge, Medd. Grønl., 21, p. 207, 1898—Greenland.

Stercorarius parasiticus Coues, Proc. Acad. Nat. Sci. Phila., 1863, p. 132 (monog.); Ridgway, Bull. U. S. Nat. Mus., 50, (8), p. 687, 1919 (monog.; full bibliog.); Bent, l.c., 113, p. 14, 1921 (life hist.); Wetmore, l.c., 133, p. 129, 1926—15 miles south of Cape San Antonio, Buenos Aires (Nov. 4 and 7, 1920); Grinnell, Univ. Calif. Pub. Zool., 32, p. 58, 1928—Pacific coast of Lower California (migrant); Eaton, Proc. Bost. Soc. N. H., 39, p. 287, 1931—Bermuda Islands (Nov. 23, 1929; sight record); Hellmayr, Field Mus. Nat. Hist., Zool. Ser., 19, p. 413, 1932—Valparaiso Bay, Chile (ex Nicoll); Løppenthin, Medd. Grønl., 91, No. 6, pp. 83, 124, 1932—Greenland (breeding; crit.); Pedersen, l.c., 100, No. 11, pp. 7, 25, 1934—Greenland (Hudson Land, Wollaston Vorland, Hochstetters Vorland; breeding); Peters, Bds. World, 2, p. 311, 1934 (range); Griscom, Bull. Mus. Comp. Zool., 78, p. 308, 1935—Colon Harbor, Panama; Wynne-Edwards, Proc. Bost. Soc. N. H., 40, p. 303, 1935 (distr. in North Atlantic); Murphy, Ocean. Bds. S. Amer., 2, p. 1037, 1936—coast of Peru, Chile (Valparaiso Bay, Corral, Chiloé Island, Straits of Magellan), and Argentina (Mar del Plata); Brooks, Ibis, 1939, pp. 326, 327—off American coasts (char.); Southern, l.c., 85, p. 443, 1943 (distr. of two color phases); Bray, Auk, 60, p. 527, 1943—Southampton Island (nesting); Porsild, Canad. Field Nat., 57, p. 29, 1943—Mackenzie Delta (breeding); Brandt, Alaska Bird Trails, p. 402, 1943—Hooper Bay, Alaska; McCabe, Auk, 61, p. 465, 1944 (habits); Soper, l.c., 63, p. 233, 1946—Baffin Island (nesting).

Stercorarius tephrae Malmgren, Journ. Orn., 13, p. 392, 1865—Spitzbergen and Bear Island (type, from Spitzbergen, in Stockholm Museum; cf. Gyldenstolpe, Ark. Zool., 19, A, No. 1, p. 102, 1927).

been shown by Gyldenstolpe (Ark. Zool., 19, A, No. 1, p. 101, 1927) to be inseparable from *S. pomarinus*.

¹ *Larus crepidatus* Banks (Cook's Voyage, Hawkesworth ed., 2, p. 15, 1773) is a nomen nudum.

² Possibly in the University Museum, Cambridge, England.

Stercorarius crepidatus Saunders, Proc. Zool. Soc. Lond., 1876, p. 326 (monog.); Feilden, Ibis, 1889, p. 503—Barbados (July 10, 1888); Saunders, Cat. Bds. Brit. Mus., 25, p. 327, 1896 (monog.); Ihering, Rev. Mus. Paul., 3, p. 449, 1899—Rio de Janeiro to Rio Grande do Sul; Nicoll, Ibis, 1904, pp. 51, 563—Valparaiso Bay, Chile (Feb. 14), and between St. Vincent and Carriacou, Lesser Antilles (Jan. 27); Clark, Proc. Bost. Soc. N. H., 32, p. 256, 1905—Barbados and near St. Vincent; Grant, Ibis, 1911, p. 476—Tuyú, Ajó, Buenos Aires (Feb. 21, 1909).

Stercorarius parasiticus parasiticus Dabbene, El Hornero, 1, p. 219, 1919—Argentina; Bird and Bird, Ibis, 1941, p. 154—Myggbukta, Greenland (breeding).

Range.—Breeds in America from northwestern Alaska and Melville Island across the Arctic Archipelago to Greenland, south to the Aleutian Islands, southern Mackenzie, Hudson Bay, and northern Labrador (extralimittally in the arctic and subarctic regions of Europe and Asia); winters on the Pacific coast from California to the Straits of Magellan, and on the Atlantic coast from Florida to Argentina; occasional in the Bermuda Islands and the West Indies (Barbados; between St. Vincent and Carriacou). Casually in the interior of North America.

Field Museum Collection.—30: Alaska (Barrow, 2; Chipp River, near Barrow, 2; St. Michaels, 5; Yukon Delta, 2); Northwest Territories (Baillie Island, Mackenzie, 1); California (Eureka, 1; Cypress Point, 1; San Pedro, 2); Illinois (Cook County, 2); Indiana (Miller, Lake County, 1); Greenland (Agpamiut, 1; Egedesminde, 1; Sukkerloppen, 2; Ymer Island, 1); Labrador (Rama, 1; unspecified, 1); Massachusetts (Monomoy Island, 2; Chatham, 2).

Stercorarius longicaudus Vieillot. LONG-TAILED JAEGER.

Stercorarius longicaudus Vieillot, Nouv. Diet. Hist. Nat., nouv. éd., 32, p. 157, 1819—based primarily on "Le Stercoraire à longue queue (*Stercorarius longicaudus*)" Brisson, Orn., 6, p. 155, northern Europe, Asia, and America (restricted type locality, northern Europe); Ridgway, Bull. U. S. Nat. Mus., 50, (8), p. 694, 1919 (monog.; full bibliog.); Bent, l.c., 113, p. 21, 1921 (life hist.); Wetmore, l.c., 133, p. 130, 1926—25 km. south of Cape San Antonio, Buenos Aires (Nov. 4–7); Eaton, Proc. Bost. Soc. N. H., 39, p. 288, 1931—Nonsuch Island, Bermudas (May 8, 1929, and Sept. 11, 1930; sight records); Peters, Bds. World, 2, p. 312, 1934 (range); Griscom, Bull. Mus. Comp. Zool., 78, p. 308, 1935—Colon Harbour, Panama; Bird and Bird, Ibis, 1935, p. 853—Jan Mayen (breeding); Wynne-Edwards, Proc. Bost. Soc. N. H., 40, p. 306, 1935 (distr. in North Atlantic); Murphy, Ocean. Bds. S. Amer., 2, p. 1038, 1936—California to Peru (150 km. west of Ancón, June 11), Chile (Valparaiso Bay, Nov., Dec.; route to Juan Fernandez), and Argentina (off the coast of Mar del Plata, Oct.); Brooks, Ibis, 1939, p. 327 (migr.; char.); Bird and Bird, l.c., 1941, p. 154—Green-

land (crit.); Løppenthin, Medd. Grønl., 131, (12), p. 4, 1943 (monog.); Porsild, Canad. Field Nat., 57, p. 29, 1943—Mackenzie Delta (breeds north and east); Bray, Auk, 60, p. 527, 1943—Melville Peninsula (nesting); Brandt, Alaska Bird Trails, p. 404, 1943—Hooper Bay, Alaska (nesting); Soper, Auk, 63, p. 233, 1946—Baffin Island (breeding).

Lestris buffonii Meyer,¹ Zusätze zu Meyer and Wolf, Taschenb. Deuts. Vögelk., p. 212, 1822—seas of the Arctic circle, Spitzbergen, Greenland, etc.; Holbøll, Naturhist. Tidsskr., 4, p. 427, 1843—Greenland.

Stercorarius buffoni Coues, Proc. Acad. Nat. Sci. Phila., 1863, p. 136 (monog.).

Stercorarius parasiticus (not *Larus parasiticus* Linnaeus) Saunders, Proc. Zool. Soc. Lond., 1876, p. 330 (monog.); idem, Cat. Bds. Brit. Mus., 25, p. 334, 1896 (monog.).

Lestris longicauda Winge, Medd. Grønl., 21, p. 209, 1898—Greenland; Maniche, l.c., 45, No. 1, p. 173, 1910—northeastern Greenland (breeding habits).

Stercorarius longicaudus pallescens Løppenthin,² Medd. Grønl., 91, No. 6, pp. 85, 124, 1932—Cape Stosch, 74° N. Lat., 22° W. Long., northeastern Greenland (type in Copenhagen Museum); Pedersen, l.c., 100, No. 11, pp. 7, 26, 1934—Hochstetters Vorland, Greenland (breeding); Bird, Ibis, 1941, p. 154 (doubtful race); Løppenthin, Medd. Grønl., 131, p. 1, 1943 (crit.).

Range.—Breeds in Spitzbergen, Jan Mayen, northern Scandinavia, northern Russia, Novaya Zemlya, the New Siberian Islands, northern and western Alaska, northern Mackenzie, Ellesmere Island, northern Labrador, and Greenland; winters off the coasts of Peru, Chile, and Argentina. Casual in the interior of North America.

Field Museum Collection.—25: Alaska (Smith's Bay, near Point Barrow, 2; Nome, 4; Bethel, 3; St. Michaels, 1; Morzhovoi Bay, 1; St. George Island, Pribilof Islands, 1; Hot Springs, 1); Arctic America (Franklin Bay, 1); California (Pacific Beach, 1); Indiana (Dune Park, Porter County, 1); Greenland, east coast (Muskox Fjord, 8); New Brunswick (Grand Manan, 1).

Family LARIDAE. Gulls and Terns

Subfamily LARINAE. Gulls

Genus LEUCOPHAEUS Bruch³

¹ *Lestris buffoni* Bois (Isis, 1822, (1), col. 562) is a nomen nudum.

² Birds with extensively white under parts are more frequent in America and Greenland than in the Old World, but this average difference is not sufficiently constant to warrant the recognition of a western form (*pallescens* Løppenthin). Cf. Bird and Bird, Ibis, 1941, p. 154.

³ Although, in general, no advocate of monotypic genera, we are inclined to follow Dwight, Murphy, and Boetticher in recognizing *Leucophaeus* as distinct from *Gabianus* (type, *Larus pacificus* Latham).

Leucophaeus (Bonaparte MS.) Bruch, Journ. Orn., 1, p. 108, 1853—type, by monotypy, *Larus haematorhynchus* King=*Larus scoresbii* Traill.

Procellarus Bonaparte, Naumannia, 1854, p. 211—type, by orig. desig., *Procellarus neglectus* Bonaparte=*Larus scoresbii* Traill.

Epitelarus Bonaparte, Naumannia, 1854, p. 211—type, by orig. desig., *E.* [or *Procellarus*] *neglectus* Bonaparte=*Larus scoresbii* Traill.

Epitelolarus Heine and Reichenow, Nomencl. Mus. Orn. Hein., p. 359, 1890—emendation of *Epitelarus* Bonaparte.

****Leucophaeus scoresbii* (Traill). DOLPHIN GULL.**

Larus scoresbii Traill, Mem. Wernerian Nat. Hist. Soc., 4, (2), p. 514, pl. 16, fig. 1, 1823—"New South Shetland"—South Shetland Islands (type in the Museum of the Liverpool Royal Institution); Sclater, Proc. Zool. Soc. Lond., 28, p. 391, 1860—Falkland Islands; Abbott, Ibis, 1861, p. 165—Falkland Islands (breeding); Schlegel,¹ Mus. Pays-Bas, livr. 4, Lari, p. 33, 1863—Falkland Islands (crit.); Pelzeln, Reise Novara, Zool., 1, Vogel, pp. 151, 163, 1865—Chiloé Island, Chile; Sclater, Proc. Zool. Soc. Lond., 1867, pp. 336, 340—Chile; Saunders, l.c., 1878, p. 184 (crit.; range); Oustalet, Miss. Sci. Cap Horn, 6, p. B. 179, pl. 3, 1891—Rio Santa Cruz, Patagonia; Gable Island, Packsaddle Island, and Orange Bay, Tierra del Fuego; Sclater,¹ Ibis, 1894, pp. 495, 497—"Lat. 64° S., Long. 55° W";² Reed, Anal. Univ. Chile, 93, p. 211, 1896—Magallania to Chiloé, Chile.

Larus haematorhynchus King, Zool. Journ., 4, No. 13, p. 103, July, 1828—Straits of Magellan (type now in British Museum); Darwin, Zool. Beagle, 3, Birds, p. 142, 1841—Puerto San Julián, Santa Cruz, Patagonia; Des Murs, in Gay, Hist. Fis. Pol. Chile, Zool., 1, p. 481, 1847—Magellan Straits (ex King); Philippi, Anal. Univ. Chile, 31, p. 288, 1868—Magallanes to Chiloé.

Leucophaeus haematorhynchus Bruch, Journ. Orn., 1, p. 108, 1853 (crit.); idem, l.c., 3, p. 287, 1855 (crit.).

Procellarus [sive *Epitelarus*] *neglectus* Bonaparte, Naumannia, 1854, pp. 211, 213; idem, Rev. Mag. Zool., (2), 7, p. 13, 1855; idem, Consp. Gen. Av., 2, p. 211, 1857—"ex Maribus Antarecticis" (type in Paris Museum; descr. of young).³

Leucophaeus scoresbii Bonaparte, Consp. Gen. Av., 2, p. 231, 1857—Chile, "Peruvia, Ins. Falkland, Pacif. antarct." (diag.); Sclater and Salvin, Proc. Zool. Soc. Lond., 1871, p. 579—Patagonia (Puerto San Julián), Falkland Islands, and Chiloé (crit.); Saunders, Cat. Bds. Brit. Mus., 25, p. 299, 1896—Falkland Islands, Straits of Magellan, coast of Patagonia

¹ Specific name spelled *scoresbyi*.

² This locality is erroneous, for the specimen was obtained at the Falkland Islands (cf. Clarke, Ibis, 1907, p. 347).

³ The type, secured by d'Orbigny, who did not visit the Antarctic region, probably came from the coast of Patagonia.

(Lat. 45° S., Chubut), and Lat. 64° S., Long. 55° 45' W.; Salvadori,¹ Anal. Mus. Civ. Stor. Nat. Genova, 40, p. 629, 1900—Rio Pescado, Straits of Magellan; Dabbene, Anal. Mus. Nac. Buenos Aires, 8, p. 382, 1902—Tierra del Fuego (Orange Bay; ex Oustalet); Vallentin, Mem. Proc. Manchester Lit. Phil. Soc., 48, No. 23, p. 41, 1904—Falkland Islands (breeding); Dabbene, Anal. Mus. Zool., 61, p. 148, 1917—Falkland Islands; Dabbene,¹ El Hornero, 1, p. 56 (range); Wake,¹ l.c., 2, p. 197, 1921—Falkland Islands; Dwight, Bull. Amer. Mus. N. H., 52, p. 134, 1925 (plumages; range); Bennett,¹ Ibis, 1926, p. 319—Falkland Islands; Renard, El Hornero, 4, p. 412, 1931—Rio Deseado, Santa Cruz; Reynolds, Ibis, 1932, p. 36—eastern Woodcock Island, Beagle Channel (breeding); Hellmayr, Field Mus. Nat. Hist., Zool. Ser., 19, p. 413, 1932—Chile north to Chiloé Island; Reynolds, Ibis, 1935, p. 89—Cape Horn region; Bullock, Rev. Chil. Hist. Nat., 39, p. 249, 1935—Isla la Mocha; Murphy, Ocean. Bds. S. Amer., 2, p. 1043, 1936 (plumages; range).

Gabianus scoresbii Peters, Bds. World, 2, p. 313, 1934 (range).

Range.—Falkland Islands, Tierra del Fuego and surrounding islets, the Atlantic coast of Patagonia north to Camarones Bay, Chubut, and the Pacific coast north to Chiloé Island and even La Mocha Island, Arauco, Chile.

Field Museum Collection.—5: Chile (Hermit Island, Magallanes, 1; Cape Penas, Tierra del Fuego, 3); Falkland Islands (unspecified, 1).

Genus PAGOPHILA Kaup

Pagophila Kaup, Skizz. Entw.-Gesch. Nat. Syst. Eur. Thierw., pp. 69, 196, 1829—type, by monotypy, *Larus eburneus* Phipps.

Cetosparactes Macgillivray, Man. Brit. Orn., 2, p. 251, 1842—type, by monotypy, *Larus eburneus* Phipps.

Catosparactes G. R. Gray, Gen. Bds., 3, p. 655, 1845 (emendation).

**Pagophila eburnea* (Phipps).² IVORY GULL.

Larus eburneus Phipps, Voy. North Pole, App., p. 187, 1774—coast of Spitzbergen (no type extant); Winge, Medd. Grønl., 21, p. 200, 1898—Greenland; Manniche, l.c., 45, No. 1, p. 163, 1910—Renskaeret, Greenland (breeding habits).

Larus candidus O. F. Müller, Zool. Dan. Prodr., p. viii, 1776—Greenland.

¹ Specific name spelled *scoresbyi*.

² *Larus albus* Gunnerus (in Leem, Beskr. Finm. Lapp., p. 235, 1767) is unidentifiable. Cf. Saunders, Cat. Bds. Brit. Mus., 25, p. 301 (note), 1896, and Hartert, Vög. Pal. Fauna, 2, p. 1750, 1921.

- Larus niveus* Boddaert, Tabl. Pl. Enl., p. 58, Dec., 1783—based on "Le Goëland blanc du Spitzberg" Daubenton, Pl. Enl., pl. 994.
- Larus brachytarsus* Holbøll, Naturhist. Tidsskr., 4, p. 422, 1843—northern Greenland and Godthaab (specimens lost).
- Pagophila eburneus* Bruch, Journ. Orn., 1, p. 106, 1853—Greenland (crit.).
- Pagophila brachytarsus* Bruch, Journ. Orn., 1, p. 106, 1853—northern Greenland (crit.).
- Pagophila brachytarsa* Reinhardt, Ibis, 1861, p. 18—Greenland (crit.).
- Pagophila eburnea* Saunders, Cat. Bds. Brit. Mus., 25, p. 301, 1896 (monog.); Hartert, Vög. Pal. Fauna, 2, p. 1750, 1921 (monog.); Løppenthin, Medd. Grøn., 91, No. 6, pp. 69, 123, 1932—northeastern Greenland (breeding); Peters, Bds. World, 2, p. 313, 1934 (range); Soper, Auk, 63, p. 236, 1946—southwestern Baffin Island (rare straggler).
- Pagophila alba* (not *Larus albus* Gunnerus) Ridgway, Bull. U. S. Nat. Mus., 50, (8), p. 576, 1919 (monog.; full bibliog.); Bent, l.c., 113, p. 29, 1921 (life hist.); Dwight, Bull. Amer. Mus. N. H., 52, p. 138, 1925 (range; plumages); Langelier, Nat. Canad., Quebec, 68, p. 5, 1941—Gulf St. Lawrence (general account).

Range.—Breeds in Arctic America from Prince Patrick Island and Melville Island to northern Greenland and northern Baffin Land, and extralimittally on Spitzbergen, Franz Josef Land, Novaya Zemlya, etc.; winters south to British Columbia, Ontario, Massachusetts, and Long Island, New York.

Field Museum Collection.—17: Alaska (Barrow, 11); Labrador (Okak, 3; West St. Modest, 2); Maine (Calais, 1).

Genus *LARUS* Linnaeus¹

- Larus* Linnaeus, Syst. Nat., 10th ed., 1, p. 136, 1758—type, by subs. desig. (Selby, Cat. Gen. Subgen. Types Aves, p. 48, 1840), *Larus marinus* Linnaeus.
- Hydrocolocus* Kaup, Skizz. Entw.-Gesch. Nat. Syst. Eur. Thierw., pp. 113, 196, 1829—type, by subs. desig. (Gray, List Gen. Bds., 2nd ed., App., p. 15, 1841), *Larus minutus* Linnaeus.
- Chroicocephalus* Eyton, Hist. Rar. Brit. Bds., Cat., p. 53, 1836—type, by subs. desig. (Gray, List Gen. Bds., p. 79, 1840), *Larus capistratus* Temminck=*Larus ridibundus* Linnaeus.
- Dominicanus* Bruch, Journ. Orn., 1, p. 100, 1853—type, by tautonymy, *Larus dominicanus* Lichtenstein.
- Glaucus* (not of Forster, 1800) Bruch, Journ. Orn., 1, p. 101, 1853—type, by tautonymy, *Larus glaucus* Brünnich=*L. hyperboreus* Gunnerus.
- Adelarus* (Bonaparte MS.) Bruch, Journ. Orn., 1, p. 106, 1853—type, by subs. desig. (Gray, Cat. Gen. Subg. Bds., p. 130, 1855), *Larus leucophthalmus* Lichtenstein.

¹ A complete list of all generic synonyms proposed by authors is given by Dwight, Bull. Amer. Mus. N. H., 52, pp. 67–68, 1925.

Blasipus (Bonaparte MS.) Bruch, Journ. Orn., 1, p. 108, 1853—type, by monotypy, *Larus bridgesii* Fraser=*L. modestus* Tschudi.

Atricilla Bonaparte, Naumannia, 1854, p. 212, 1854—type, by tautonymy, *Larus atricilla* Linnaeus.

Cirrocephala Bonaparte, Naumannia, 1854, p. 213, 1854—type, by tautonymy, *Larus cirrocephalus* Vieillot.

Melanolarus Heine and Reichenow, Nomencl. Mus. Hein. Orn., p. 359, 1890—type, by orig. desig., *Larus franklini* Richardson=*L. pipixcan* Wagler.

Pacificolarus Boetticher, Jenaische Zeits. Naturw., 69, (3), p. 465, July 4, 1935—type, by orig. desig., *Larus crassirostris* Vieillot.

**Larus fuliginosus* Gould. DUSKY GULL.

Larus fuliginosus Gould, in Darwin, Zool. Voy. "Beagle," 3, Birds, Part 15, p. 141, March, 1841—James Island, Galápagos (type in British Museum);¹ Selater and Salvin, Proc. Zool. Soc. Lond., 1870, p. 323—Indefatigable and Abingdon Islands; Sundevall, l.c., 1871, p. 125—Charles and Indefatigable Islands; Selater and Salvin, l.c., p. 573—Galápagos Islands (crit.); Salvin, Trans. Zool. Soc. Lond., 9, p. 505, pl. 87 (adult and young), 1876—Indefatigable, Charles, and Abingdon Islands, Galápagos (crit.); Saunders, Proc. Zool. Soc. Lond., 1878, p. 184—Galápagos Islands (crit.); Ridgway, Proc. U. S. Nat. Mus., 12, p. 116, 1890—Indefatigable, James, and Chatham Islands; Saunders, Cat. Bds. Brit. Mus., 25, p. 222, 1896 (monog.); Ridgway, Proc. U. S. Nat. Mus., 19, p. 635, 1897—Galápagos (descr.); Rothschild and Hartert, Nov. Zool., 6, p. 189, 1899—Galápagos (egg descr.); iidem, l.c., 9, p. 413, 1902—Indefatigable and Albemarle Islands; Snodgrass and Heller, Proc. Wash. Acad. Sci., 5, p. 237, 1904—Tagus Cove, Albemarle Island; Gifford, Proc. Calif. Acad. Sci., (4), 2, p. 42, 1913—Galápagos Islands (habits; meas.); Dwight, Bull. Amer. Mus. N. H., 52, p. 140, 1925 (monog.); Fisher and Wetmore, Proc. U. S. Nat. Mus., 79, art. 10, p. 41, 1931—Tower Island; Swarth, Occ. Pap. Calif. Acad. Sci., 18, p. 64, 1931—Galápagos Islands; Peters, Bds. World, 2, p. 314, 1934 (range); Murphy, Ocean. Bds. S. Amer., 2, p. 1046, 1936—Galápagos Islands.

Blasipus fuliginosus Ridgway, Bull. U. S. Nat. Mus., 50, (8), p. 656, 1919 (monog.; full bibliog.).

Range.—Resident on the Galápagos Archipelago.

Field Museum Collection.—4: Galápagos Islands (Mangrove Point, Narborough Island, 1; Tagus Cove, Albemarle Island, 3).

**Larus modestus* Tschudi. GRAY GULL.

Larus modestus Tschudi, Arch. Naturg., 9, (1), p. 389, 1843—"in Oceani pacifici littoribus"—Lurín, south of Lima, Peru (type in Neuchâtel Museum); idem, Unters. Faun. Peru., Orn., p. 306, pl. 35, 1846—Lurín,

¹There can be hardly any doubt that spec. b (Cat. Bds. Brit. Mus., 25, p. 223), presented by C. Darwin, is the type, for Darwin says: "My specimen was killed at James Island."

Peru; Des Murs, in Gay, Hist. Fis. Pol. Chile, Zool., 1, p. 483, 1847—Valparaíso, Chile; Pelzeln, Reise Novara, Zool., 1, Vögel, p. 151, 1865—Chile; Sclater, Proc. Zool. Soc. Lond., 1867, pp. 336, 340—Valparaíso; Philippi, Anal. Univ. Chile, 31, p. 288, 1868—Valparaíso to Peru; Sclater and Salvin, Proc. Zool. Soc. Lond., 1871, p. 573—Peru and Chile (crit.); Saunders, l.c., 1878, p. 183—Callao to Valparaíso (crit.); Salvin, Cat. Strickl. Coll., p. 620, 1882—Chile; Reed, Anal. Univ. Chile, 93, p. 211, 1896—Chile; Saunders, Cat. Bds. Brit. Mus., 25, p. 223, 1896—Chile (Valparaíso; Iquique, Tarapacá) and Peru (Callao Bay); Nicoll, Ibis, 1904, p. 51—Valparaíso Bay; Chubb, l.c., 1919, p. 259—Trujillo, Peru; Dwight, Bull. Amer. Mus. N. H., 52, p. 144, 1925—Cautín (Valdivia) to the Chíncha Islands, Peru (breeding), and the Gulf of Guayaquil, Ecuador (plumages); Chapman, l.c., 55, p. 188, 1926—Jambeli Island and Santa Elena, Ecuador; Hellmayr, Field Mus. Nat. Hist., Zool. Ser., 19, p. 410, 1932—Chile (Tarapacá to Valdivia); Berlioz, Bull. Mus. Hist. Nat. Paris, (2), 4, p. 229, 1932—Isla Silva, Rio Babahoyo, Ecuador; Peters, Bds. World, 2, p. 314, 1934 (range); Murphy, Ocean. Bds. S. Amer., 2, p. 1049, 1936—Manta Bay, Ecuador, to Corral, Valdivia, Chile (descrip.; habits); Philippi, El Hornero, 6, p. 237, 1936—Arica, Tacna, Chile; idem, Bol. Mus. Nac. Santiago, 16, p. 61, 1938—Arica Bay, Chile; Goodall, Philippi and Johnson, Auk, 62, p. 450, pl. 21, 1945—35 km. inland from Tocopilla, Antofagasta, Chile (nesting in desert).

Larus fuliginosus (not of Gould) G. R. Gray, List Spec. Bds. Brit. Mus., 3, p. 170, 1844—part, spec. b, c, Chile (=juv.); Des Murs, in Gay, Hist. Fis. Pol. Chile, Zool., 1, p. 481, 1847—Chile (ex Gray).

Larus bridgesii Fraser, Proc. Zool. Soc. Lond., 13, p. 16, April, 1845—Valparaíso, Chile (type in coll. of Zoological Society of London, now in British Museum); idem, Zool. Typ., pl. 69, 1849—Valparaíso; Cassin, in Gilliss, U. S. Astr. Exp., 2, p. 205, 1855—Chile.

Blasipus bridgesii Bruch, Journ. Orn., 1, p. 108, 1853 (diag.; range imaginary); idem, l.c., 3, p. 280, 1855 (diag.; range imaginary).

Range.—From Manta Bay, Ecuador, south to Corral, Valdivia, Chile. Evidently nests in the deserts up to 100 km. inland from the coast (cf. Goodall, Philippi and Johnson, Auk, 62, p. 450, 1945).

Field Museum Collection.—4: Ecuador, Province de los Rios (Rio San Antonio, 1; Isla Silva Sur, 3).

****Larus heermanni* Cassin. HEERMANN'S GULL.**

Larus heermanni Cassin, Proc. Acad. Nat. Sci. Phila., 6, p. 187, for October, pub. Dec. 31, 1852—San Diego, California (type lost, once in coll. of the Academy of Natural Sciences, Philadelphia; cf. Grinnell, Univ. Calif. Pub. Zool., 38, p. 273, 1932); idem, Illust. Bds. Calif., Texas, etc., p. 28, pl. 5, 1856—harbor of San Diego, California; Saunders, Proc. Zool. Soc. Lond., 1878, p. 182—Vancouver Island to California, in winter to "Panama" (crit.); idem, Cat. Bds. Brit. Mus., 25, p. 225, 1896—North America to Guatemala (monog.); Nelson, N. Amer. Fauna, 14, p. 23, 1899—Isabel Island and Tres Marias (Maria Cleofa); Salvin and Godman,

Biol. Centr.-Amer., Aves, 3, p. 422, 1903—Pacific coast of North America to Guatemala (San José, Chiapam); Bent, Bull. U. S. Nat. Mus., 113, p. 148, 1921 (life hist.); Dwight, Bull. Amer. Mus. N. H., 52, p. 147, pl. 13, figs. 3-6, 1925 (range; molts; plumages); McLellan, Proc. Calif. Acad. Sci., (4), 15, p. 282, 1926—Isabel Island (breeding); Grinnell, Univ. Calif. Pub. Zool., 32, p. 60, 1928—Lower California (breeding); Griscom, Bull. Amer. Mus. N. H., 64, p. 129, 1932—Pacific coast of Guatemala (winter); Peters, Bds. World, 2, p. 314, 1934 (range); van Rossem, Occ. Pap. Mus. Zool. Louisiana State Univ., 21, p. 89, 1945—Gulf of California (resident), George Island (nesting).

Adelarus heermanni Bruch, Journ. Orn., 1, p. 107, 1853—California (crit.); idem, l.c., 3, p. 279, 1855—California (crit.).

Blasipus heermanni Ridgway, Bull. U. S. Nat. Mus., 50, (8), p. 654, 1919 (monog.; full bibliog.).

Range.—Breeds on the west coast of Mexico, on Isabel Island, the Tres Marias, on islands in the Gulf of California, and on San Roque Island, Pacific coast of Lower California; strays northward to Vancouver Island, British Columbia, and migrates in winter as far south as Pacific Guatemala (San José, Chiapam).

Field Museum Collection.—93: British Columbia (Vancouver Island, 1); California (Westport, 4; Tiburon, 1; Sausalito, 1; Monterey, 13; Pacific Grove, 1; Carmel Bay, 12; Moss Landing, 5; Seaside, 6; San Clemente Island, 7; Bolea Chico, 2; San Nicholas Island, 1; San Pedro, 1; El Secundo, 2; Clifton, 1; Hyperion, 22; Manhattan Beach, 1; Pacific Beach, 3; Santa Barbara, 1; Santa Cruz Island, 4); Mexico, Lower California (Consag Rock, 1; Cape San Luis Island, 1; Isla Raya, 2).

Larus belcheri Vigors. BELCHER'S GULL.

Larus belcheri Vigors, Zool. Journ., 4, No. 15, Oct. 1828 to Jan. 1829, p. 358, 1829—no locality given¹ (type once in coll. of Zoological Society of London, its present whereabouts unknown); idem, Zool. Voy. "Blossom," Orn., p. 39, 1839—no locality (repr. of orig. descr.); Schlegel, Mus. Pays-Bas, livr. 4, Lari, p. 9, 1863—"Chile" (crit.); Sclater, Proc. Zool. Soc. Lond., 1867, p. 340—Chile; idem and Salvin, l.c., p. 991—coast near Islay, Arequipa, Peru; idem, l.c., 1871, p. 575—Peru (Islay), Chile (Arica), and "Straits of Magellan" (crit.); Saunders, l.c., 1878, p. 182—Chorillos, near Callao, Peru (crit.); idem, l.c., 1882, p. 526—Peru (San Lorenzo Island, Aug., 1881; Callao Bay, Aug., 1881) and Chile (Coquimbo Bay, Nov., 1881); MacFarlane, Ibis, 1887, p. 205—San Lorenzo Island, Callao Bay, Peru (Aug. 28); Saunders, Cat. Bds. Brit. Mus., 25, p. 226, 1896—Chile (Coquimbo; Iquique, Tarapacá) and Peru (Mollendo, Islay, San

¹ The type was collected during Capt. Beechey's voyage and presented to the Zoological Society of London by Edward Belcher, First Lieutenant of the *Blossom*. It was probably secured on the coast of Peru.

Lorenzo, Callao Bay); Reed, Anal. Univ. Chile, 93, p. 211, 1896—Chile ("Cape Horn" to Arica); Murphy, Bird Islands of Peru, p. 283, 1925—Peru (breeding); Dwight, Bull. Amer. Mus. N. H., 52, p. 158, 1925—Ancón and San Gallén Island, Peru (plumages); Hellmayr, Field Mus. Nat. Hist., Zool. Ser., 19, p. 409, 1932—Chile (Coquimbo to Arica); Daguerre, El Hornero, 5, p. 214, 1933—San Blas, province of Buenos Aires (Feb. to April); MacDonagh, Not. Prelim. Mus. La Plata, 2, p. 312, 1934—San Blas (Feb.); Peters, Bds. World, 2, p. 314, 1934 (range); Murphy, Ocean. Bds. S. Amer., 2, p. 1052, 1936—Lobos de Tierra Islands, Peru, to Coquimbo, Chile (plumages and eggs descr.; habits; range); Philippi, El Hornero, 6, p. 237, 1936—Erizera (Arica), Tacna, Chile; idem, Bol. Mus. Nac. Santiago, 16, p. 61, 1938—Arica, Chile; Steullet and Deautier, Not. Mus. La Plata, 3, Zool., No. 7, p. 2, 1938—Rio Ajó, Buenos Aires (June 13; descr. of adult); Casares, El Hornero, 7, p. 286, 1939—Bahia San Blas and General Lavalle, Buenos Aires; Philippi, Rev. Chile. Hist. Nat., 44, p. 151, 1940—Arica and Punta Chucumata (nesting).

Larus frobenii Philippi and Landbeck, Anal. Univ. Chile, 18, No. 6, June, p. 732, 1861—Arica, Tacna, Chile (type, once in National Museum, Santiago de Chile, no longer extant; cf. Philippi, Bol. Mus. Nac. Santiago, 16, p. 61, 1938); iidem, Arch. Naturg., 27, (1), p. 292, 1861—Arica; Philippi, Anal. Univ. Chile, 31, p. 210, 1868—"Magellanes" and Peru (=Arica); idem, Anal. Mus. Nac. Chile, 15, p. 97, pl. 45, fig. 1, 1902—Arica (descr. and fig. of type).

Range.—Coasts of Peru and Chile south to Coquimbo (breeding on rocky islets from Lobos de Tierra to Vieja and Santa Rosa Islands, Peru, and near Punta Chucumata, Chile), and Atlantic coast of province of Buenos Aires, Argentina (Rio Ajó, June 13, 1937; Bahia de San Blas, Feb. to April).¹

****Larus delawarensis* Ord.² RING-BILLED GULL.**

Larus delawarensis Ord, in Guthrie's Geogr., 2nd Am. ed., 2, p. 319, 1815—Delaware River, below Philadelphia (no type extant); Saunders, Proc. Zool. Soc. Lond., 1878, p. 176 (crit.); idem, Cat. Bds. Brit. Mus., 25,

¹ Belcher's Gull was supposed to be confined to the Pacific coast from Peru to northern Chile. While it is wholly unknown in the Falkland Islands, various sight records from the Straits of Magellan and Patagonia, unsubstantiated as they are by any specimen in European or American collections, were assumed to be due to confusion with some other species, notably *Leucophaeus scoresbii* in immature plumage (cf. Murphy, Ocean. Bds. S. Amer., 2, p. 1054, 1936, and Hellmayr, Field Mus. Nat. Hist., Zool. Ser., 19, p. 409 [note 1], 1932). Recently, however, several examples have actually been secured on the coast of the province of Buenos Aires. Steullet and Deautier's notes on the coloration and bill-characters of two adults, taken on June 13, 1937, along the Rio Ajó, leave no doubt whatever as to the species. The collector, Sr. Runnacles, even believes that *L. belcheri* nests on the coast of General Lavalle. Direct comparison of Argentine specimens with others from the Pacific coast would be interesting.

² Stegmann (Journ. Orn., 82, p. 343, 1934) advances good reasons for treating the Ring-billed Gull as a race of the European Mew Gull (*L. canus*), but the subject appears to require further investigation with respect to the geographic distribution of *L. delawarensis* and *L. c. brachyrhynchus* during the breeding period.

p. 273, 1896 (monog.); Salvin and Godman, Biol. Centr.-Amer., Aves, 3, p. 424, 1903—Mexico (Guaymas, Mazatlan, Presidio, Guadalajara, coast of Tehuantepec); Ridgway, Bull. U. S. Nat. Mus., 50, (8), p. 623, 1919 (monog.; full bibliog.); Bent, l.c., 113, p. 132, 1921 (life hist.); Dwight, Bull. Amer. Mus. N. H., 52, p. 168, pl. 14, figs. 1, 2, 1925 (range; plumages); Grinnell, Univ. Calif. Pub. Zool., 32, p. 60, 1928—Lower California (winter); Bradlee, Proc. Bost. Soc. N. H., 39, p. 289, 1931—Bermuda Islands (one record, Jan. 1, 1849); Peters, Bds. World, 2, p. 315, 1934 (range); Stegmann, Journ. Orn., 82, p. 343, 1934 (crit.); Dickey and van Rossem, Field Mus. Nat. Hist., Zool. Ser., 23, p. 182, 1938—Acajutla, El Salvador (seen); Moffitt, Condor, 44, p. 105, 1942—Lassen County, California (breeding); Ludwig, Wilson Bull., 55, p. 234, 1943 (returns from birds banded on Great Lakes); van Rossem, Occ. Pap. Mus. Zool. Louisiana State Univ., 21, p. 90, 1945—Sonora (winter visitant).

Larus zonorhynchus Richardson, in Swainson and Richardson, Faun. Bor.-Amer., 2, "1831," p. 421, pub. Feb., 1832—Saskatchewan and Manitoba (type now in British Museum); Bruch, Journ. Orn., 1, p. 102, 1853 (crit.).

Gavina bruchi Bonaparte, Naumannia, 1854, pp. 212, 216; idem, Rev. Mag. Zool., (2), 7, p. 16, 1855—Mexico (location of type not stated); Bruch, Journ. Orn., 3, p. 283, 1855—Mexico (crit.).

Gavina zonorhynchus Bruch, Journ. Orn., 3, p. 282, 1855—North America (crit.).

Larus zonorhynchus a. mexicanus Bonaparte, Consp. Gen. Av., 2, p. 224, 1857—Central America (type in Verreaux Collection).

Range.—Breeds in North America (chiefly in the interior) from southern Alaska, Great Slave Lake, northern Manitoba, and James Bay south to northern California, northern Utah, southern Colorado, North Dakota, southern Ontario, and Quebec (near Cape Whittle); winters from southern British Columbia, Idaho, Montana, the Great Lakes and the New England coast south to southern Mexico, (?) El Salvador (Acajutla), and the Gulf coast; casual in the Bermuda Islands (one record).

Field Museum Collection.—137: Alberta (Beaver Lake, 1); Saskatchewan (Quill Lake, 13; Maple Creek, 5; Big Stick Lake, 4); California (Tiburon, 1; Farallon Islands, 1; Redwood, 2; Monterey, 9; Moss Landing, 6; Pacific Grove, 1; Seaside, 2; Sunset Beach, 4; Rincon, 1; San Diego Bay, 1; Hyperion, 32; Santa Barbara, 1); Colorado (Pueblo County, 1); Texas (Seadrift, 1; Port Lavaca, 1; Corpus Christi, 4); North Dakota (Nelson County, 17; Towner County, 3); Wisconsin (Beaver Dam, 1); Illinois (Waukegan, 1); Indiana (Miller, 1); Labrador (Kegashka, 7; Mullen Bay, 1); Quebec (Magdalen Islands, 1); Connecticut (New Haven County, 2); North Carolina, Dare County (Bodie Island, 5; Pea Island, 1); Florida (Pilot Town, 1; Mary Esther, 2; Santa Rosa County, 3).

****Larus canus brachyrhynchus* Richardson.¹ SHORT-BILLED GULL.**

Larus brachyrhynchus Richardson, in Wilson and Bonaparte, Amer. Orn., Jameson ed., 4, p. 352, 1831—Great Bear Lake, Mackenzie (type now in U. S. National Museum; cf. Ridgway, Bull. U. S. Nat. Mus., 50, (8), p. 634, 1919;=young); Coues, Proc. Acad. Nat. Sci. Phila., 1862, p. 302 (monog.; disc. of type); Saunders, Proc. Zool. Soc. Lond., 1878, p. 178 (monog.); idem, Cat. Bds. Brit. Mus., 25, p. 283, 1896 (monog.); Ridgway, Bull. U. S. Nat. Mus., 50, (8), p. 632, 1919 (monog.; full bibliog.); Bent, l.c., 113, p. 140, 1921 (life hist.).

Larus suckleyi Lawrence, Ann. Lyc. Nat. Hist. N. Y., 6, "1857," p. 264, pub. Feb., 1858—"North Pacific, Puget Sound," Washington (type in U. S. National Museum).

Rissa septentrionalis Lawrence, Ann. Lyc. Nat. Hist. N. Y., 6, "1857," p. 266, pub. Feb., 1858—"North Pacific, Puget Sound" (type, from Bellingham Bay, Washington, in the U. S. National Museum).

Larus canus brachyrhynchus Dwight, Bull. Amer. Mus. N. H., 52, p. 173, pl. 14, figs. 3, 4, 1925 (range; plumages); Peters, Bds. World, 2, p. 316, 1934 (range); idem, Auk, 54, p. 205, 1937—Pleasant Bay, Chatham, Massachusetts (Feb. 8, 1908); Porsild, Canad. Field Nat., 57, p. 30, 1943—Mackenzie Delta (breeds in wooded part).

Range.—Breeds in northwestern North America from Kotzebue Sound east to the Anderson River, south to central British Columbia and Lake Athabaska; winters on the Pacific coast from southeastern Alaska to southern California (San Diego); accidental in Quebec, Wyoming, and Massachusetts (Pleasant Bay).

Field Museum Collection.—59: Alaska (St. Michael, 6; Bethel, 1; Tocatna Forks, 3; Inako River, 1); Yukon Territory (Yukon River, 4); British Columbia (Seymour Narrows, 1); Washington (Port Townsend, 5); Oregon (Bay City, 1); California (San Rafael, 1; Tiburon, 1; Pacific Grove, 5; Hyperion, 29; Clifton, 1).

****Larus hyperboreus* Gunnerus. GLAUCOUS GULL.**

Larus hyperboreus Gunnerus, in Leem, Beskr. Finm. Lapper, p. 226 (footnote), 1767—northern Norway; Ridgway, Bull. U. S. Nat. Mus., 50, (8), p. 584, 1919 (monog.; full bibliog.); Bent, l.c., 113, p. 52, 1921 (life hist.); Dwight, Bull. Amer. Mus. N. H., 52, p. 243, 1925 (monog.; plumages; range); Løppenthin, Medd. Grøn., 91, No. 6, pp. 66, 123, 1932—northeastern Greenland (breeding); Pedersen, l.c., 100, No. 11, pp. 6, 22, 1934—

¹ The European Mew Gull (*L. canus canus* Linnaeus) has been admitted to the list of American birds on the basis of the taking of a young bird at Henley Harbor, Labrador (Aug. 21, 1860). Its identification is, however, by no means certain, and Ridgway (Bull. U. S. Nat. Mus., 50, (8), p. 629, 1919) strongly suspects it to be merely *L. delawarensis*.—C.E.H.

Hørring and Salomonsen (Medd. Grøn., 131, No. 5, p. 46, 1941) give three records for this gull from Greenland (Fiskenaes; Narssaq). However, two of the specimens are juveniles.—B.C.

- Ulla Island, Grandjean Fjord, and Bredefjord, Greenland (breeding); Peters, Bds. World, 2, p. 320, 1934 (range); Swarth, Pac. Coast Avifauna, 22, p. 36, 1934—Nunivak Island (disc.); Stegmann, Journ. Orn., 82, p. 351, 1934 (crit.; range); Bird and Bird, Ibis, 1935, p. 851—Jan Mayen (breeding); iidem, l.c., 1941, p. 151—Greenland (crit.); Rand, Canad. Field Nat., 56, p. 123, 1942 (range; dist. chars.; disc.).
- Larus glaucus* (not of Pontoppidan, 1763) Brünnich, Orn. Bor., p. 44, 1764—Iceland; Holböll, Naturhist. Tidsskr., 4, p. 415, 1843—Greenland (crit.; variation); Coues, Proc. Acad. Nat. Sci. Phila., 1862, p. 294 (monog.); Saunders, Proc. Zool. Soc. Lond., 1878, p. 165 (monog.); idem, Cat. Bds. Brit. Mus., 25, p. 289, 1896 (monog.); Winge, Medd. Grøn., 21, p. 186, 1898—Greenland; Manniche, l.c., 45, No. 1, p. 160, 1910—north-eastern Greenland (breeding).
- Larus leucereles* Schleep, Ann. Wetterau. Ges. Naturk., 4, p. 314, 1819—Greenland, Iceland, Spitsbergen, etc. (type [adult], from Greenland, in coll. of Herr Benicken, Schleswig, doubtless lost).
- "*Larus consul* Boie, in Wiedemann's Zool. Mag., 1, p. 126, 1819—Spitsbergen and Helsingör, Denmark."¹
- Larus leucopterus* Vieillot, Tabl. Enc. Méth., Orn., livr. 89, p. 346, 1820—based on *Larus glaucus* of Brünnich (Orn. Bor., p. 44, No. 148, 1764) and Fabricius (Faun. Greenl., p. 100), and on an adult from Baffin's Bay in coll. of L. A. F. Baillon.²
- Larus medius* C. L. Brehm, Beitr. Vögelk., 3, p. 810, 1822—"extreme north, Iceland, Norway" (type, from Iceland, in Tring Collection [cf. Hartert, Nov. Zool., 25, p. 60, 1918], now in the American Museum of Natural History, New York).
- Larus islandicus* Edmondston, Mem. Werner. Nat. Hist. Soc., 4, (1), p. 185, 1822—Balta Sound, Shetland Islands (type in coll. of L. E. Edmondston).
- Larus glacialis* Macgillivray, Mem. Werner. Nat. Hist. Soc., 5, (1), p. 270, 1824—Shetland Islands (substitute name for *Larus glaucus* Temminck, Man. d'Orn., 2nd éd., 2, p. 757, 1820=*L. glaucus* Brünnich).
- Larus minor* C. L. Brehm, Handb. Naturg. Vög. Deuts., p. 736, 1831—new name for *Larus medius* Brehm.
- Larus hutchinsii* Richardson, in Swainson and Richardson, Faun. Bor.-Amer., 2, "1831," p. 419, pub. Feb., 1832—Albany River, Hudson Bay (location of type unrecorded; descr. of immature plumage); Coues, Proc. Acad. Nat. Sci. Phila., 1862, p. 294 (monog.).
- Larus barrovianus* Ridgway, Auk, 3, p. 330, July, 1886—Point Barrow, Alaska (type in U. S. National Museum).
- Larus hyperboreus hyperboreus* Oberholser, Auk, 35, p. 468, 1918 (char.; range); Preble and McAtee, N. Amer. Fauna, 46, p. 33, 1923—Pribilof Islands (breeding); Soper, Auk, 63, p. 234, 1946—Baffin Island (breeding).

¹ This periodical was inaccessible to the authors.

² Dwight (Bull. Amer. Mus. N. H., 52, p. 256, 1925) is certainly mistaken in applying *L. leucopterus* to the Iceland Gull. Vieillot's references as well as Baillon's specimen apply without any question to the Glaucous Gull. The case has been very clearly set forth by Mayaud (Alauda, 6, pp. 370–375, 1934).

Larus hyperboreus barrovianus Oberholser, Auk, 35, p. 472, 1918 (char.; range); idem, Proc. Biol. Soc. Wash., 22, p. 173, 1919 (crit.); Preble and McAtee, N. Amer. Fauna, 46, p. 34, 1923—St. Paul Island, Pribilof Islands (June 21); Rand, Canad. Field Nat., 56, pp. 123, 126, 1942 (crit.); Porsild, l.c., 57, p. 29, 1943—Arctic coast (breeds north and east of Mackenzie Delta).

Range.—Breeds in America from Point Barrow, Alaska, Ellesmere Island, Melville Island, and northern Greenland south to the Pribilof Islands, Mackenzie, James Bay, Labrador, and Newfoundland, and extralimittally in Jan Mayen, Iceland, Spitzbergen, Franz Josef Land, and Novaya Zemlya;¹ winters south to the coasts of California, the Great Lakes, and Long Island.

Field Museum Collection.—51: Alaska (Barrow, 21; Little Diomede Island, 1; Nome, 1; St. Michael, 5; Bethel, 1; St. George Island, 1); California (Sunset Beach, 1; Hyperion, 1); Illinois (Chicago, 1); Arctic America (Franklin Bay, 3); Greenland (Sukkertoppen, 1; Ymer Island, 5); Labrador (Ailik, 1; Okak, 1; unspecified, 1; Davis Inlet, 4; Indian Harbor, 2).

****Larus glaucescens* Naumann.² GLAUCOUS-WINGED GULL.**

Larus glaucescens Naumann,³ Naturg. Vög. Deutschl., 10, p. 351 (in text), 1840—North America (type, from Bering Straits, in Berlin Museum); Coues, Proc. Acad. Nat. Sci. Phila., 1862, p. 295 (monog.); Saunders, Proc. Zool. Soc. Lond., 1878, p. 167 (monog.); Stejneger, Bull. U. S. Nat. Mus., 29, p. 62, 1885—Bering and Copper Islands (breeding); Saunders, Cat. Bds. Brit. Mus., 25, p. 284, 1896 (monog.); Ridgway, Bull. U. S. Nat. Mus., 50, (8), p. 597, 1919 (monog.; full bibliog.); Bent, l.c., 113, p. 65, 1921 (life hist.); Preble and McAtee, N. Amer. Fauna, 46, p. 34, 1923—Walrus Island, St. George Island, and Sealion Rock, Pribilof Islands (breeding); Dwight, Bull. Amer. Mus. N. H., 52, p. 239, pl. 13, figs. 1, 2, 1925 (range; plumages); Grinnell, Univ. Calif. Pub. Zool.,

¹ On the Arctic coast of Asia, from the Taimyr Peninsula to the East Cape, this form is replaced by *L. h. pallidissimus* Portenko (Ibis, (14), 3, p. 266, April, 1939—type, from Naukan, Chukchi Peninsula, in coll. of L. Portenko), said to be paler in all plumages. Whatever the value of this form may be, birds from Greenland, Arctic America, and Alaska are not separable from those of northern Europe. The Bird brothers contest the value of Portenko's race. The case of *L. barrovianus*, which Oberholser sought to revive, has been fully discussed by Dwight, with whom we agree that the slight difference in size is altogether too insignificant in such a large bird to justify further subdivision.

² *Larus glaucescens* Naumann, though nearly allied to *L. hyperboreus*, as has been insisted upon by Stegmann, breeds on the Pribilofs, especially Walrus Island, along with the latter species, a fact that speaks for their specific distinctness.

³ *Larus glaucopterus* Kittlitz (in Lütke's Voy. Séniavine, French transl., 3, pp. 272, 280, 1836—Unalaska) is too briefly diagnosed to allow of definite identification. Unless the type can be found (in the Leningrad Museum?), the name will remain in doubt.

32, p. 58, 1928—Lower California (winter); Peters, Bds. World, 2, p. 320, 1934 (range); Stegmann, Journ. Orn., 82, p. 351, 1934 (crit.; range); Swarth, Pac. Coast Avifauna, 22, p. 36, 1934—Nunivak Island (disc.); Sutton and Wilson, Condor, 48, p. 89, 1946—Attu Island (wintering).

Laroides chalcopterus (Lichtenstein MS.) Bruch, Journ. Orn., 3, p. 282, 1855—part, Bering Sea (type probably in Berlin Museum).

Range.—Breeds in northwestern North America on the islands of Bering Sea from St. Lawrence Island to the Pribilof, Aleutian, and Commander Islands, and on the Pacific coast from Norton Sound, Alaska, to Destruction Island, Washington;¹ winters from the Aleutian Islands and southern Alaska to Lower California.²

Field Museum Collection.—74: Alaska (Bethel, 1; St. Michael, 1; Dutch Harbor, 2; Unalaska, 1); British Columbia (Vancouver, 1; Victoria, 1; Vancouver Island, 3); Washington (Port Townsend, 4); California (Moss Landing, 5; Pacific Grove, 4; Seaside, 1; Carmel Lagoon, 1; Monterey, 6; Sunset Beach, 3; La Patera Point, 3; Hyperion, 35; El Segundo, 1; Redondo Beach, 1).

****Larus glaucoides* Meyer.³ ICELAND GULL.**

Larus glaucoides (Temminck MS.) Meyer, in Meyer and Wolf, Taschenb. Deuts. Vögelk., Zus. Bericht., p. 197, 1822—"Seas of the Arctic Zone, f.i. Iceland, in winter coasts of the North and Baltic Seas" (no type extant); Mayaud, Alauda, 6, p. 375, 1934 (nomencl.).

Larus leucopterus (not of Vieillot, 1820) Faber, Prodr. Isl. Orn., p. 91, 1822—Iceland; Holböll, Naturh. Tidsskr., 4, p. 418, 1843—Greenland (range); Coues, Proc. Acad. Nat. Sci. Phila., 1862, p. 294 (monog.); Saunders, Proc. Zool. Soc. Lond., 1878, p. 166 (monog.); idem, Cat. Bds. Brit. Mus., 25, p. 295, 1896 (monog.); Winge, Medd. Grøn., 21, p. 182, 1898—Greenland; Ridgway, Bull. U. S. Nat. Mus., 50, (8), p. 590, 1919 (monog.; full bibliog.); Bent, l.c., 113, p. 62, 1921 (life hist.); Dwight, Bull. Amer. Mus. N. H., 52, p. 250, 1925 (range; plumages); Peters, Bds. World, 2, p. 320, 1934 (range); Pedersen, Medd. Grøn., 100, No. 11, pp. 7, 22, 1934—Ulla Island, Greenland (breeding).

Larus Moltke Teilmann, Dan. og Isl. Fugle, p. 159, 1823—Iceland.

¹ According to Stegmann (Journ. Orn., 82, p. 352, 1934) this form is wholly absent from the Asiatic coast.

² *Larus nelsoni* Henshaw (Auk, 1, p. 250, July, 1884—St. Michaels, Alaska; type in U. S. National Museum; cf. Ridgway, Bull. U. S. Nat. Mus., 50, (8), p. 595, 1919; Bent, l.c., 113, p. 76, 1921) is now regarded to be of hybrid origin. Dwight (Bull. Amer. Mus. N. H., 52, p. 249, 1925) believes *L. hyperboreus* and *L. argentatus vegae* to be its parents, while Stegmann (Journ. Orn., 82, p. 353, 1934) considers it a cross between *L. hyperboreus* and *L. glaucescens*. Rand (Canad. Field Nat., 56, p. 123, 1942) believes it to be a good race, however.

³ *Larus glaucoides* Meyer is not unlike *L. argentatus thayeri* in general coloration, but differs markedly by shorter bill, smaller (light flesh-colored) feet, and wholly white, basally pale gray primaries without any dark markings.

Larus arcticus Macgillivray, Mem. Werner. Nat. Hist. Soc., 5, (1), p. 268, 1824—coast of Greenland (type in coll. of University of Edinburgh).

Laroides subleucopterus C. L. Brehm, Isis, 1826, col. 936—no locality (skull char.); idem, Handb. Naturg. Vög. Deuts., p. 746, 1831—Greenland (type in Tring Collection [cf. Hartert, Nov. Zool., 25, p. 60, 1918], now in the American Museum of Natural History, New York).

Larus argentatus leucopterus Stegmann, Journ. Orn., 82, pp. 350, 364, 1934 (char.; range).

"*Larus fuscus glaucoides=leucopterus*" Meinertzhagen, Ibis, 1935, p. 769 (crit.).

Range.—Breeds in the Canadian Arctic Archipelago south to Victoria Island and possibly to Boothia Peninsula, on both coasts of Greenland, and on Jan Mayen;¹ winters south to the Great Lakes and Long Island, Iceland, Färoes, British Isles, France, etc.

Field Museum Collection.—14: Greenland (Holsteinborg, 2; Sukkertoppen, 2; Godthaab, 1; Nanortalik, 1); Labrador (Port Manvers, 1); Quebec (Ile aux Grues, 1); Nova Scotia (Halifax, 2); New Brunswick (Grand Manan, 1; Mision Island, 3).

****Larus argentatus smithsonianus* Coues.² AMERICAN HERRING GULL.**

Larus Smithsonianus Coues, Proc. Acad. Nat. Sci. Phila., 1862, p. 296—eastern and western coasts of North America (no type or type locality indicated); Gundlach, Journ. Orn., 23, p. 387, 1875—Cuba (Matanzas, Cardenas); Rand, Canad. Field Nat., 56, p. 124, 1942 (range; dist. chars.; disc.).

Larus argentatus Gundlach, Journ. Orn., 5, p. 236, 1857—Cuba (one specimen); (?)Reinhardt, Ibis, 1861, p. 17—Godthaab, Greenland; Saunders, Proc. Zool. Soc. Lond., 1878, p. 167—part, America; idem, Cat. Bds. Brit. Mus., 25, p. 260, 1896—part, spec. m²-o³, Ungava to California; Salvin and Godman, Biol. Centr.-Amer., Aves, 3, p. 423, 1903—Mexico (off Progreso, Yucatan; Isabel Island and Tres Marias, off San Blas); Ridgway, Bull. U. S. Nat. Mus., 50, (8), p. 612, 1919—in part, America (monog.; full bibliog.); Bent, l.c., 113, p. 102, 1921 (life hist.).

¹ No breeding record exists from the Arctic regions of Asia.

² *Larus argentatus smithsonianus* Coues may be distinguished from *L. a. argenteus* Brehm, of western Europe, by paler, at the same time slightly more bluish mantle (between "pallid neutral gray" and "light gull gray"), more black at the tips of the primaries (nearly always a dark bar before the white tip of the first primary), and on average longer wings.

About the unidentifiable names *Laroides argentatoides* C. L. Brehm (Beitr. Vögelk., 3, p. 791, 1822—northeastern part of Germany and west coast of North America) and *Laroides Americanus* C. L. Brehm (Handb. Naturg. Vög. Deuts., p. 743, 1831—no locality), of which no types exist, the critical remarks by Coues (Proc. Acad. Nat. Sci. Phila., 1862, p. 299) and Stegmann (Journ. Orn., 82, p. 362, 1934) should be consulted.

Larus argentatus (typicus) Winge, Medd. Grøn., 21, p. 176, 1898—Godthaab, Greenland (June 28, 1886).

Larus argentatus smithsonianus Nelson, N. Amer. Fauna, 14, p. 23, 1899—San Juanito, Isabel, and Tres Marias Islands, Mexico; Dwight, Bull. Amer. Mus. N. H., 52, p. 181, pl. 11, fig. 2, pl. 12, fig. 4, 1925 (plumages; range); Grinnell, Univ. Calif. Pub. Zool., 32, p. 59, 1928—Lower California (winter); Bradlee, Mowbray, and Eaton, Proc. Bost. Soc. N. H., 39, p. 288, 1931—Bermuda Islands (winter); Wetmore and Swales, Bull. U. S. Nat. Mus., 155, p. 172, 1931—Cap Haïtien, Hispaniola (July 7, 1775); Peters, Bds. World, 2, p. 316, 1934 (range); Stegmann, Journ. Orn., 82, p. 362, 1934 (crit.); Griscom, Bull. Mus. Comp. Zool., 78, p. 308, 1935—Bocas del Toro, Panama (Dec. 10, 1933); Hennessey, Canad. Field Nat., 57, p. 97, 1943 (banded in Quebec, recovered in Florida); van Rossem, Occ. Pap. Mus. Zool. Louisiana State Univ., 21, p. 90, 1945—northern Sonora (uncommon winter visitant); Poor, Auk, 63, p. 135, pl. 5, 1946 (variations in plumage and color of soft parts); Soper, l.c., 63, p. 236, 1946—Baffin Island (breeding).

Larus fuscus smithsonianus Meinertzhagen, Ibis, 1935, p. 769 (char.).

Larus argentatus subsp. Porsild, Canad. Field Nat., 57, p. 30, 1943—MacKenzie Delta (breeding in wooded part).

Range.—Breeds in North America, from south-central Alaska, northern Mackenzie, southern Baffin Island, and Southampton Island, south to northern British Columbia, southern Manitoba, central Minnesota, the Great Lakes, Lake Champlain, and the New England coast; winters south to western Mexico, Yucatan, and Florida, rarely to the Bahama Islands, Cuba, and Hispaniola; accidental in Panama (Bocas del Toro, Dec. 10, 1933), and Greenland.¹

Field Museum Collection.—105: Alaska (Charlie Creek, Yukon River, 1); Yukon Territory (Lake Tagish, 1); California (Monterey, 6; Moss Landing, 1; Pacific Grove, 2; Seaside, 1; Sunset Beach, 1; Anaheim, 1; Hyperion, 34; Manhattan Beach, 1); Texas (Corpus Christi, 10); North Dakota (Nelson County, 1); Wisconsin (Beaver Dam, 3); Illinois (Lake Forest, 1; Cook County, 9); Indiana (Bluffton, 1); Labrador (Kegashka, 3); Ontario (Port Rowan, 1); Quebec (Magdalen Islands, 1); New Brunswick (Grand Manan, 1); Nova Scotia (Dover, 4); Maine (York County, 1); Massachusetts (Monomoy Island, 2; Cohasset, 1; Boston, 1); Rhode Island (Narragansett, 1); Connecticut (Stamford, 1; New Haven County, 7); North

¹ Here should be mentioned *Larus affinis* Reinhardt, Vidensk. Medd. Naturhist. Foren., 1853, p. 78—Nanortalik, Greenland (type in Copenhagen Museum); idem, Ibis, 1861, p. 17 (crit.). According to Jourdain (Nov. Zool., 35, pp. 82–84, pl. 4, 1929), the type is a specimen of *L. a. argentatus*, from which *L. a. argenteus* was not separated at that time. Considering the age of the type specimen and the close resemblance of the two North European races, it is impossible to allocate Reinhardt's name with certainty.

Carolina (Pea Island, Dare County, 4); Florida (Amelia Island, 1; Palm Beach, 1; Santa Rosa Island, 1).

****Larus argentatus thayeri* W. S. Brooks.¹ THAYER'S GULL.**

Larus thayeri W. S. Brooks, Bull. Mus. Comp. Zool., 59, p. 373, Sept., 1915—Buchanan Bay, Ellesmere Island (type in Museum of Comparative Zoology, Cambridge, Mass.); Dwight, Auk, 35, p. 413, pl. 15, 1917 (crit.); Ridgway, Bull. U. S. Nat. Mus., 50, (8), p. 600, 1919 (monog.; bibliog.); Bent, l.c., 113, p. 120, 1921 (habits; eggs); Rand, Canad. Field Nat., 56, p. 124, 1942 (range; dist. chars.; disc.).

Larus argentatus thayeri Dwight, Bull. Amer. Mus. N. H., 52, p. 181, pl. 11, fig. 1, 1925 (plumages; range); Peters, Bds. World, 2, p. 316, 1934 (range); Stegmann, Journ. Orn., 82, p. 363, 1934 (crit.); A. Brooks, The Murrelet, 18, p. 19, 1937—Pacific coast of British Columbia (coloration of soft parts); Hørring, Rep. Fifth Thule Exped., 2, No. 6, p. 68, 1937 (disc.); Bray, Auk, 60, p. 528, 1943—Fox Basin (nesting).

Larus fuscus thayeri Meinertzhagen, Ibis, 1935, p. 769 (char.).

Range.—Breeds in Arctic America from Banks Island to northern Ellesmere Island; on migration in Alaska; winters on the Pacific coast from British Columbia to California.²

Field Museum Collection.—14: Alaska (Barrow, 2; Nome, 1); British Columbia (Comox, Vancouver Island, 3); Washington (Port Townsend, 1); California (Pacific Grove, 2; Hyperion, 5).

****Larus argentatus vegae* Palmén.³ VEGA GULL.**

¹*Larus argentatus thayeri* W. S. Brooks differs from *L. a. smithsonianus* by paler coloration, especially of the mantle, and lesser extent as well as lighter (slaty rather than black) color of the dark markings on the primaries. According to Allan Brooks, the soft parts in life are somewhat different too, the straw-colored iris being thickly peppered with brown or grayish specks, the eyelids purplish pink instead of yellow to orange red, and the bill paler yellow to greenish. Dimensions and bill on average smaller.

²*Larus kumlieni* Brewster (Bull. Nutt. Orn. Cl., 8, p. 216, 1883—Cumberland Sound, Baffin Island; type in U. S. National Museum) seems to be a hybrid between *L. glaucoides* and *L. a. thayeri* (cf. Dwight, Bull. Amer. Mus. N. H., 52, pp. 254–255, 1925), although Taverner (Canad. Field Nat., 47, pp. 88–90, 1933) maintains its possible specific distinction. Cf. also Taverner and Sutton, Ann. Carnegie Mus., 23, p. 53, 1934 (Churchill, Manitoba; juvenile plumages). Description and synonymy in Ridgway (Bull. U. S. Nat. Mus., 50, (8), p. 593, 1919).—C.E.H.

For further discussion see also Hickey, Proc. Linn. Soc. N. Y., 49, p. 63, 1938 (plumage changes in captive bird); Hørring and Salomonsen, Medd. Grønland, 131, No. 5, p. 49, 1941; Rand, Canad. Field Nat., 56, p. 124, 1942 (crit.); Bishop, Field Mus. Nat. Hist., Zool. Ser., 29, p. 186, 1944 (disc.); Soper, Auk, 63, p. 235, 1946—Baffin Island (breeding).

Field Museum has three adult specimens from Halifax Harbor, Nova Scotia.—B.C.

³*Larus argentatus vegae* Palmén is decidedly darker on the back than the two preceding races, and the black markings on the primaries are even more extensive than in *L. a. smithsonianus*.

Larus argentatus Brünn. var. *vegae* Palmén, in Nordenskiöld, Vega-Exp. Vetensk. Iakttag., 5, p. 370, 1887—Pidlin (=Pitlekai), north coast of Chukchi Peninsula, northeastern Siberia (type in Stockholm Museum; cf. Gyldenstolpe, Ark. Zool., 19, A, No. 1, p. 104, 1927).

Larus vegae Saunders, Cat. Bds. Brit. Mus., 25, p. 269, 1896 (monog.); Ridgway, Bull. U. S. Nat. Mus., 50, (8), p. 618, 1919 (monog.; full bibliog.); Bent, l.c., 113, p. 122, 1921 (life hist.).

Larus argentatus vegae Dwight, Bull. Amer. Mus. Nat. Hist., 52, p. 181, 1925 (range; plumages); Peters, Bds. World, 2, p. 317, 1934 (range); Stegmann, Journ. Orn., 82, p. 364, 1934 (crit.).

Larus fuscus vegae Meinertzhagen, Ibis, 1935, p. 770 (char.).

Range.—Breeds in northeastern Siberia, from Cape Shelagski to Anadyr Bay; in migration on the coast of Alaska and in the Aleutian Islands; winters south to Japan and the coast of China, occasionally in India (Gurgaon, March 7, 1868).

Field Museum Collection.—1: Alaska (Nome, 1).¹

**Larus californicus* Lawrence.² CALIFORNIA GULL.

Larus californicus Lawrence, Ann. Lyc. Nat. Hist. N. Y., 6, p. 79, March, 1854—San Joaquin River, near Stockton, California (type in coll. of Geo. N. Lawrence, now in the American Museum of Natural History, New York; cf. Grinnell, Univ. Calif. Pub. Zool., 38, p. 273, 1932); Coues, Proc. Acad. Nat. Sci. Phila., 1862, p. 300 (monog.); Saunders, Proc. Zool. Soc. Lond., 1878, p. 175 (monog.); idem, Cat. Bds. Brit. Mus., 25, p. 276, 1896 (monog.); Salvin and Godman, Biol. Centr.-Amer., Aves, 3, p. 425, 1903—Mexico (Alvarado, Vera Cruz; San Mateo, Oaxaca); Ridgway, Bull. U. S. Nat. Mus., 50, (8), p. 620, 1919 (monog.; full bibliog.); Bent, l.c., 113, p. 124, 1921 (life hist.); Dwight, Bull. Amer. Mus. N. H., 52, p. 197, pl. 11, figs. 3, 4, 1925 (range; plumages); Grinnell, Univ. Calif. Pub. Zool., 32, p. 60, 1928—Lower California (winter); Peters, Bds. World, 2, p. 319, 1934 (range); Tanner, Great Basin Nat., Provo, Utah, 2, p. 98, 1941 (recoveries of birds banded in Utah); Beck, l.c., 4, p. 57, 1943 (plumages); Brooks, Auk, 60, pl. 2, p. 15, 1943 (crit.); van Rossem, Occ. Pap. Mus. Zool. Louisiana State Univ., 21, p. 91, 1945—Sonora (winter visitant).

Larus argentatus californicus Stegmann, Journ. Orn., 82, p. 380, 1934 (crit.).

Larus fuscus californicus Meinertzhagen, Ibis, 1935, p. 773 (crit.).

Range.—Breeds in the interior of North America from the upper Mackenzie, Great Slave Lake, and northern Saskatchewan south to California, Great Salt Lake, northwestern Wyoming, and north-

¹ In the Museum Collection is a specimen of *Larus nelsoni*, now considered a hybrid between this species and *Larus hyperboreus*. It was taken at Bethel, Alaska.

² *Larus californicus* Lawrence, though certainly allied to *L. argentatus*, may well stand as a distinct species, since it is not quite established that its breeding range does not overlap to a certain extent that of *L. a. smithsonianus*.

eastern South Dakota; winters on the Pacific coast from southern British Columbia to southwestern Mexico (Oaxaca) and from Great Salt Lake to the Gulf of California; occasional in Kansas (Reno County) and on the coast of Texas; accidental in the Hawaiian Islands.¹

Field Museum Collection.—138: Alberta (Beaverhill Lake, 1; Many Islands Lake, 2); Saskatchewan (Lake Johnston, 1; Big Stick Lake, 12); California (San Francisco, 1; Sausalito, 1; Tiburon, 1; Monterey, 11; Pacific Grove, 5; Moss Landing, 9; Seaside, 15; Carmel Bay, 6; Sunset Beach, 7; Trinidad, 3; Hyperion, 51); Utah (Salt Lake City, 2); North Dakota (Nelson County, 10).

***Larus marinus marinus* Linnaeus. GREAT BLACK-BACKED GULL.**

Larus marinus Linnaeus, Syst. Nat., 10th ed., 1, p. 136, 1758—"in Europa" (restricted type locality, Gotland, southern Sweden, after It. Gotl. 214, first reference); Holböll, Naturh. Tidsskr., 4, p. 414, 1843—Greenland; Coues, Proc. Acad. Nat. Sci. Phila., 1862, p. 295 (monog.); Saunders, Proc. Zool. Soc. Lond., 1878, p. 179 (monog.); idem, Cat. Bds. Brit. Mus., 25, p. 241, 1896 (monog.); Winge, Medd. Grønl., 21, p. 179, 1898—Greenland; Ridgway, Bull. U. S. Nat. Mus., 50, (8), p. 601, 1919 (monog.; full bibliog.); Bent, l.c., 113, p. 77, 1921 (life hist.); Dwight, Bull. Amer. Mus. N. H., 52, p. 234, 1925 (char.; range; plumages); Bradlee and Mowbray, Proc. Bost. Soc. N. H., 39, p. 288, 1931—Bermuda Islands (several records); Peters, Bds. World, 2, p. 320, 1934 (range); Stegmann, Journ. Orn., 82, p. 353, 1934 (char.; affinities); Bird and Bird, Ibis, 1935, p. 851—Jan Mayen (July, Aug.); idem, l.c., 1941, p. 151—Gromsdalen, Greenland (May 18, 1937); Wilcox, Auk, 61, p. 653, 1944—Maine and New York (nesting); Gross, l.c., 62, p. 241, 4 pls., 1945—coast of Maine (status).

Larus Fabricii C. L. Brehm, Isis, 1826, col. 936—no locality given; idem, Handb. Naturg. Deuts., p. 730, 1831—Greenland (type in Tring Collection [cf. Hartert, Nov. Zool., 25, p. 59, 1918], now in the American Museum of Natural History, New York).

Larus mülleri C. L. Brehm, Handb. Naturg. Deuts., p. 729, 1831—Iceland, in winter on the coast of the North Sea (no type extant).

Range.—Breeds in the western hemisphere from North Devon Island and western Greenland southward along the coast of

¹ The admission of *Larus fuscus fuscus* Linnaeus to the North American fauna rests on two sight records from Beach Haven, Ocean County, New Jersey, Sept. 9, 1934 (cf. Edwards, Auk, 52, p. 85, 1935), and Key West, Florida, March 10, 1938 (cf. Sprunt, Auk, 55, p. 672, 1938), respectively. Considering the difficulty of identifying this gull from mere observation in the field, we hesitate to allow it a place among American birds without further evidence. However, according to Steullet and Deautier (Notas Mus. La Plata, Zool., 4, p. 245, 1939), an immature specimen of a gull taken on the coast of Argentina in March of 1931 has been identified by Dr. Robert Cushman Murphy as *Larus fuscus*.

Labrador to eastern Quebec, Anticosti Island, Newfoundland, Nova Scotia, and Massachusetts, also in Iceland, the Färoes, British Isles, Scandinavia, northern Russia, etc.; winters south to the Great Lakes and New Jersey, more rarely to Florida (St. Augustine; Pilot Town) and the Bermuda Islands.¹

Field Museum Collection.—17: Labrador (Kegashka, 3; unspecified, 1; Indian Harbor, 2; Bowdoin Bay, 1; Windy Tickle, 1); Quebec (Magdalen Islands, 2); Nova Scotia (Dover, 1); New Brunswick (North Head, Grand Manan, 4); Massachusetts (Monomoy Island, 1); Florida (Pilot Town, 1).

****Larus marinus schistisagus* Stejneger.² SLATY-BACKED GULL.**

Larus schistisagus Stejneger, Auk, 1, p. 231, July, 1884—Bering Island, Commander Group, Bering Sea (type in U. S. National Museum); idem, Bull. U. S. Nat. Mus., 29, p. 67, 1885—Bering Island and Petropaulski, Kamchatka (char.; habits); Saunders, Cat. Bds. Brit. Mus., 25, p. 258, 1896 (monog.); Preble, N. Amer. Fauna, 27, p. 264, 1908—Franklin Bay, Mackenzie (June 9, 1901); Ridgway, Bull. U. S. Nat. Mus., 50, (8), p. 605, 1919 (monog.; full bibliog.); Hartert, Nov. Zool., 27, p. 132, 1920—Bering and Copper Islands (Apr. to June); Bent, Bull. U. S. Nat. Mus., 113, p. 86, 1921 (life hist.); Preble and McAtee, N. Amer. Fauna, 46, p. 36, 1923—Pribilof Islands (visitor); Dwight, Bull. Amer. Mus. N. H., 52, p. 229, 1925 (range; plumages); Peters, Bds. World, 2, p. 320, 1934 (range); Stegmann, Journ. Orn., 82, p. 353, 1934 (char.; affinity; range).

Range.—Breeds in Kamchatka, on the Kurile Islands and Sakhalin, possibly on the Commander Islands; winters south to Japan; casual in Alaska (various records); accidental at Franklin Bay, Mackenzie (June 9, 1901).

Field Museum Collection.—1: Alaska (Nome, 1).

****Larus marinus occidentalis* Audubon. WESTERN GULL.**

Larus occidentalis Audubon, Orn. Biog., 5, p. 320, 1839—Cape Disappointment, Washington (type once in coll. of S. F. Baird [cf. Lawrence, in Baird, Rep. Expl. Surv. R. R. Pac., 9, p. 845, 1858], but now lost; cf. Dwight, Bull. Amer. Mus. N. H., 52, p. 223, 1925); Coues, Proc. Acad. Nat. Sci. Phila., 1862, p. 296 (monog.); Saunders, Proc. Zool. Soc. Lond., 1878, p. 172 (monog.; range in part); idem, Cat. Bds. Brit. Mus., 25,

¹ The record from Cuba turned out to have been based upon an example of *L. argentatus smithsonianus* (cf. Gundlach, Journ. Orn., 23, p. 388, 1875).

² *Larus marinus schistisagus* Stejneger differs from the nominate race by on average smaller size, lighter (less sooty) mantle, and darker primaries with a distinct dusky subapical wedge in the white tip of the first remex. We fully agree with Stegmann in associating this gull with *L. marinus*, which, by certain characters, it connects with *L. m. occidentalis*.

p. 257, 1896—part, spec. a-e, California (Pacific Beach, Farallones, San Francisco Bay); Ridgway, Bull. U. S. Nat. Mus., 50, (8), p. 610, 1919 (monog.; full bibliog., excl. of southern California and Lower California); Bent, l.c., 131, p. 89, 1921 (life hist.; range in part); Stegmann, Journ. Orn., 82, p. 354, 1934 (char.; affinity).

Larus occidentalis occidentalis Dwight, Bull. Amer. Mus. N. H., 52, p. 217, pl. 12, figs. 1-3, 1925 (plumages; range in part); Dickey and van Rossem, Condor, 27, p. 164, 1925 (breeding range); Peters, Bds. World, 2, p. 319, 1934 (range); Ferris, Condor, 42, p. 189 (2 maps), 1940 (movements traced by banding).

Range.—Breeds on the Pacific coast of the United States from Washington to northern California and the Farallon Islands (fide Peters); in winter to southern California.

Field Museum Collection.—26: California (San Francisco, 1; Trinidad, 1; Monterey, 3; Pacific Grove, 2; Moss Landing, 9; Del Monte Forest, 1; Seaside, 3; mouth of Carmel River, 2; Hyperion, 4).

****Larus marinus wymani* Dickey and van Rossem.¹ WYMAN'S GULL.**

Larus occidentalis wymani Dickey and van Rossem, Condor, 27, p. 163, July 15, 1925—Santa Catalina Island, California (type in coll. of Donald R. Dickey, now in University of California at Los Angeles); Grinnell, Univ. Calif. Pub. Zool., 32, p. 59, 1928—Lower California (range); Peters, Bds. World, 2, p. 319, 1934 (range).

Larus occidentalis (not of Audubon) Saunders, Cat. Bds. Brit. Mus., 25, p. 257, 1896—part, spec. f-p, California (Santa Cruz Island, San Miguel Island, Ventura, San Diego) and Lower California (Magdalena Bay); Ridgway, Bull. U. S. Nat. Mus., 50, (8), p. 610, 1919 (in part).

Range.—Resident on the coast of California and Pacific coast of Lower California from Monterey County and the Santa Barbara Islands south to Asunción Island (possibly even to Magdalena Bay).

Field Museum Collection.—80: California (Monterey, 2; Pacific Grove, 4; Carmel Bay, 11; Moss Landing, 4; Del Monte Forest, 2; Seaside, 3; San Clemente Island, 2; Arch Beach, 1; Anaheim Landing, 2; Sunset Beach, 1; Hyperion, 45; Pacific Beach, 1; La Patera Point, 1; Santa Cruz, 1).

****Larus marinus livens* Dwight.² YELLOW-FOOTED WESTERN GULL.**

¹*Larus marinus wymani* Dickey and van Rossem: Similar to *L. m. occidentalis*, but differing by darker, deep neutral gray instead of light neutral gray mantle; similar in color of mantle to *L. m. livens*, but feet flesh-color, and eyelids (at least in breeding season), more orange.

²*Larus marinus livens* Dwight: In coloration of mantle similar to *L. m. wymani*, but legs and feet lemon-yellow.

Larus occidentalis livens Dwight, Proc. Biol. Soc. Wash., 37, p. 11, Feb. 14, 1919—San José Island, Lower California (type in coll. of L. C. Sanford, now in the American Museum of Natural History, New York); idem, Bull. Amer. Mus. N. H., 52, p. 217, 1925—part, islands in the Gulf of California; Dickey and van Rossem, Condor, 27, p. 164, 1925 (breeding range); Grinnell, Univ. Calif. Pub. Zool., 32, p. 59, 1928—Lower California (Gulf of California); Peters, Bds. World, 2, p. 319, 1934 (range); van Rossem, Occ. Pap. Mus. Zool. Louisiana State Univ., 21, p. 91, 1945—Sonora (resident and breeding).

Larus occidentalis (not of Audubon) Ridgway, Bull. U. S. Nat. Mus., 50, (8), p. 610, 1911—part, islands in the Gulf of California.

Range.—Breeds on islands in the Gulf of California from Consag Rock south to San José Island.

Field Museum Collection.—3: Mexico, Lower California (San Luis Island, 2; Consag Rock, 1).

****Larus marinus dominicanus* Lichtenstein.¹ KELP GULL.**

Larus dominicanus Lichtenstein, Verz. Doubl. Zool. Mus. Berlin, p. 82, 1823—coast of Brazil (type in Berlin Museum); Wied, Beitr. Naturg. Bras., 4, (2), p. 850, 1833—Ilhas Raza and Redonda, Rio de Janeiro (breeding); Darwin, Zool. Beagle, 3, Birds, p. 142, 1841—Buenos Aires and Bahia Blanca, Argentina; Fraser, Proc. Zool. Soc. Lond., 11, p. 119, 1843—shores of Chile; Des Murs, in Gay, Hist. Fís. Pol. Chile, Zool., 1, p. 480, 1847—Chile; Peale, U. S. Expl. Exp., 8, p. 289, 1848—Valparaiso Bay; Boeck, Naumannia, 1855, p. 512—Chiloé Island, Chile; Kittlitz, Denkw. Reise, 1, p. 113, 1858—San-Tomé, Concepción, Chile; Gould, Proc. Zool. Soc. Lond., 27, p. 97, 1859—Falkland Islands; Sclater, l.c., 28, p. 390, 1860—Falkland Islands; Germain, Proc. Bost. Soc. N. H., 7, p. 314, 1860—Chile (breeding habits); Abbott, Ibis, 1861, p. 165—Falkland Islands (breeding); Schlegel, Mus. Pays-Bas, livr. 4, p. 13, 1863—Falkland Islands, "Paraguay," Chile, and Peru (Chincha Islands); Sclater, Proc. Zool. Soc. Lond., 1867, p. 340—Chile; Philippi, Anal. Univ. Chile, 31, p. 287, 1868—Chile; Sclater and Salvin, Ibis, 1868, p. 189—Sandy Point, Straits of Magellan; idem, l.c., 1870, p. 284—Halt Bay, Straits of Magellan; idem, Proc. Zool. Soc. Lond., 1871, p. 576—coast of Brazil, Buenos Aires, Chile, and Falkland Islands (crit.); Saunders, l.c., 1877, p. 799—Nassau Harbour and Elizabeth Island, Magellan Straits; Durnford, Ibis, 1877, p. 45—mouth of Chubut River and Ninfas Point, Patagonia; idem, l.c., 1878, pp. 68, 405—Buenos Aires (soft parts) and Chubut Valley, Patagonia (nesting at Tombo Point); Saunders, Proc. Zool. Soc. Lond., 1878, p. 180 (monog.); Gibson, Ibis, 1880, p. 163—Cape San Antonio, Buenos Aires; Doering, in Roca, Inf. Ofic. Exp. Rio

¹*Larus marinus dominicanus* Lichtenstein is almost identical in coloration, notably in the dark shade of the mantle, with the far-away *L. m. marinus*, but differs by smaller dimensions, olivaceous feet, and longer white tips to the secondaries. Wetmore (Bull. U. S. Nat. Mus., 133, p. 132, 1926) and Stegmann (Journ. Orn., 82, pp. 355–356, 1934) have already insisted on its close relationship to *L. m. marinus*, and we do not hesitate to group them together.

Negro, Zool., 1, p. 57, 1881—Laguna Epecren (Carhué), Puan, and Salinas Chicas, Buenos Aires; Sharpe, Proc. Zool. Soc. Lond., 1881, p. 17—Straits of Magellan (Tom Bay, Cockle Cove, Puerto Bueno, Puerto Henry) and Chile (Valparaiso); Saunders, l.c., 1882, p. 527—Coquimbo, Chile, and Callao, Peru; Holmberg, Act. Acad. Nac. Cienc. Córdoba, 5, p. 92, 1884—Arroyo Collon-Gueyú, Buenos Aires; MacFarlane, Ibis, 1887, pp. 202, 205—La Compañía (Coquimbo), Chile, and Callao Bay, Peru; Withington, l.c., 1888, p. 472—Lomas de Zamora, Buenos Aires; Ridgway, Proc. Orn., 70, p. 442, 1922—Coronel, Santa María, and Quiriquina Islands, Chile (breeding); Peters, Bull. Mus. Comp. Zool., 65, p. 292, 1922—San Antonio Oeste and Lake Nahuel Huapi, Rio Negro (breeding); Dwight, Bull. Amer. Mus. N. H., 52, p. 223, 1925 (monog.; plumages); Chapman, l.c., 55, p. 189, 1926—Gulf of Jambeli and Santa Clara Island, Ecuador; Wet-

more, Bull. U. S. Nat. Mus., 133, p. 131, 1926—Rio de Janeiro, Montevideo, and Buenos Aires (crit.); idem, Univ. Calif. Pub. Zool., 24, p. 425, 1926—San Antonio Oeste and Bariloche, Rio Negro; Bennett, Ibis, 1926, p. 319—Falkland Islands; Friedmann, Bull. Mus. Comp. Zool., 68, p. 163, 1927—Cabo Frio, Rio de Janeiro, and Buenos Aires; Jaffuel and Pirion, Rev. Chil. Hist. Nat., 31, p. 114, 1927—Marga Marga, Valparaiso, Chile; Bullock, l.c., 33, p. 207, 1929—Angol, Malleco, Chile; Reynolds, Ibis, 1932, p. 36—Snipe and Woodcock Islands, Beagle Channel (breeding); Peters, Bds. World, 2, p. 319, 1934 (range in part); Stegmann, Journ. Orn., 82, p. 355, 1934 (char.; affinity); Murphy, Ocean. Bds. S. Amer., 2, p. 1057, 1936 (monog.; life hist.); Pinto, Rev. Mus. Paul., 22, p. 146, 1938—Rio de Janeiro (Pedras Brancas, Bahia de Guanabara), São Paulo (Iguapé, Santos), and Santa Catharina (São Francisco), Brazil; Holmes, Ibis, 1939, p. 339—off La Libertad, Ecuador, and Santos and Rio de Janeiro, Brazil.

Dominicanus vociferus Bruch, Journ. Orn., 1, p. 100, 1853—"South America" (no type specified).

Larus verreauxi Bonaparte,¹ Rev. Mag. Zool., (2), 7, p. 16, 1855—Chile (location of type not stated).

Dominicanus azarae "Lesson" Bonaparte, Consp. Gen. Av., 2, p. 214, 1857—Brazil and Patagonia (cotypes in Frankfurt and Paris Museums).

Larus azarae Pelzeln, Reise Novara, Zool., 1, Vögel, p. 151, 1865—Chile (eggs descr.); idem, Orn. Bras., 3, p. 323, 1870—Isla de Marambaya and Praia do Sai (Sapitiba), Rio de Janeiro; idem, Verh. Zool. Bot. Ges. Wien, 23, p. 160, 1873—Callao Bay, Peru (July 12–15).

Larus dominicanus dominicanus Hellmayr, Field Mus. Nat. Hist., Zool. Ser., 19, p. 408, 1932—Chile; Reynolds, El Hornero, 5, p. 352, 1934—Yewin, Tierra del Fuego; idem, Ibis, 1935, p. 89—Freycinet and Herschel Islands, Cape Horn (breeding); Bullock, Rev. Chil. Hist. Nat., 39, p. 249, 1935—Isla la Mocha (resident); Philippi, El Hornero, 6, p. 236, 1936—Arica, Tacna, Chile; Bullock, Rev. Chil. Hist. Nat., 41, p. 202, col. pl. 8, fig. 8, 1937 (egg); Philippi, Bol. Mus. Nac. Santiago, 16, p. 60, 1938—Chacaluta, Arica, Chile.

Range.—Breeds locally off the coast of South America from Lobos de Tierra, Peru (on migration north to the Gulf of Guayaquil, Ecuador), on the west, and from Rio de Janeiro on the east, south to Tierra del Fuego, also on some of the Andean lakes in western Argentina, and on the Falkland Islands.²

Field Museum Collection.—3: Chile (Isla Hermite, Magallanes, 1); Argentina (Puerto Deseado, Santa Cruz, 2).

¹*Larus verreauxii* Bonaparte (Naumannia, 4, p. 211, 1854) is a nomen nudum.

²It is not within the scope of this work to discuss the question whether or not the birds breeding in the African and New Zealand regions, etc., are the same as the South American Kelp Gull.

****Larus marinus austrinus* Fleming.¹ SOUTH SHETLAND KELP GULL.**

Larus dominicanus austrinus Fleming, Proc. Biol. Soc. Wash., 37, p. 139, Dec. 29, 1924—Deception Island, South Shetland Islands (type in coll. of J. H. Fleming).

Larus dominicanus (not of Lichtenstein) (?) Pagenstecher, Jahrb. Hamb. Wiss. Anst., 2, p. 24, 1885—South Georgia (chick and eggs descr.); Sclater, Ibis, 1894, pp. 495, 497—Antarctic region (64° 15' S. Lat., 55° 50' W. Long.); Saunders, Cat. Bds. Brit. Mus., 25, p. 245, 1896—part, spec. a', South Shetland Islands; Clarke, Ibis, 1906, p. 178—South Orkney Islands (breeding); (?) Lönnberg, Svensk. Vetensk. Akad. Handl., 40, No. 5, p. 62, 1906—South Georgia (eggs descr.; habits); Bennett, El Hornero, 2, p. 26, 1920—South Shetland and South Orkney Islands (crit.); (?) Wilkins, Ibis, 1923, p. 489—South Georgia; Mathews, Discovery Rep., 1, p. 581, pl. 46, figs. 1–9, 1929—South Georgia (nesting); Bennett, Ibis, 1931, p. 13—South Shetland Islands (habits); Peters, Bds. World, 2, p. 319, 1934—part, South Shetland, South Orkney, and (?) South Georgia Islands; Eklund, Proc. Amer. Phil. Soc., 89, p. 303, 1945 (nests south to 67° 56' S.—76° 24' W. (life hist.)).

Range.—South Shetland, South Orkney, and South Georgia Islands.

Field Museum Collection.—1: South Shetland Islands (Decepción Island, 1).

****Larus atricilla* Linnaeus. LAUGHING GULL.**

Larus Atricilla Linnaeus, Syst. Nat., 10th ed., 1, p. 136, 1758—based on "Laughing Gull" Catesby, Nat. Hist. Carolina, 1, p. 89, pl. 89, Bahama Islands; Pelzeln, Orn. Bras., 3, p. 323, 1870—Praia de Cajútuba, near Cintra, Pará, Brazil (Feb. 20); Sclater and Salvin, Proc. Zool. Soc. Lond., 1871, p. 576 (range); Taczanowski, l.c., 1877, p. 749—Santa Lucia, Tumbez, Peru (Dec. 20); Saunders, l.c., 1878, p. 194 (monog.); Hartert, Ibis, 1893, pp. 311, 326, 337—Aruba, Curaçao, and Bonaire, Dutch West Indies; Robinson, Proc. U. S. Nat. Mus., 18, p. 653, 1895—Margarita Island, Venezuela; Saunders, Cat. Bds. Brit. Mus., 25, p. 194, 1896 (monog.); Robinson and Richmond, Proc. U. S. Nat. Mus., 24, p. 164, 1901—La Guaira, Venezuela (summer); Hartert, Nov. Zool., 9, p. 309, 1902—Aruba, Curaçao, and Bonaire; Salvin and Godman, Biol. Centr.-Amer., Aves, 3, p. 421, 1903—Mexico to Costa Rica; Clark, Proc. Bost. Soc. N. H., 32, p. 256, 1905—Barbados (casual), St. Vincent, Grenada, and Grenadines (breeding; eggs descr.); Hellmayr, Nov. Zool., 13, p. 55, 1906—Port-of-Spain, Trinidad (June), and Tobago; Ihering, Cat. Faun. Braz., 1, p. 43, 1907 (range); Berlepsch, Nov. Zool., 15, p. 310, 1908 (no record from French Guiana); Cory, Field Mus. Nat. Hist., Orn. Ser.,

¹*Larus marinus austrinus* Fleming differs from *L. m. dominicanus* by less sooty, more slaty coloration of the mantle, slightly larger size, and paler immature plumage. From the material seen by us this form would seem to be worthy of recognition.

- 1, pp. 194, 233, 1909—Aruba and Margarita Islands; Snethlage, Bol. Mus. Goeldi, 8, p. 80, 1914—Dunas, Marajó, Brazil; Cherrie, Sci. Bull., Mus. Brookl. Inst., 2, p. 374, 1916—about the mouths of the Orinoco and shores of the Gulf of Paria, Venezuela; Bent, Bull. U. S. Nat. Mus., 113, p. 154, 1921 (life hist.); Chapman, Bull. Amer. Mus. N. H., 55, p. 188, 1926—Santa Elena, Ecuador; Wetmore, Sci. Surv. Porto Rico and Virgin Islands, 9, p. 376, 1927—Puerto Rico, St. Croix, and St. Thomas (crit.); Grinnell, Univ. Calif. Pub. Zool., 32, p. 61, 1928—San José del Cabo, Lower California (Sept. 6); Young, Ibis, 1929, p. 768—coastland of British Guiana; Bradlee and Mowbray, Proc. Bost. Soc. N. H., 39, p. 289, 1931—Bermuda Islands (accidental); Wetmore and Swales, Bull. U. S. Nat. Mus., 155, p. 173, 1931—Hispaniola; Griscom, Bull. Amer. Mus. N. H., 64, p. 128, 1932—Guatemala (winter visitor); Stone, Proc. Acad. Nat. Sci. Phila., 84, p. 304, 1932—Puerto Castilla, Honduras; Peters, Bds. World, 2, p. 321, 1934 (range); Belcher and Smooker, Ibis, 1935, p. 294—Soldado Rock (off Trinidad), Giles Rock (off Tobago; Mar. 27, June 23), and Little Tobago; Griscom, Bull. Mus. Comp. Zool., 78, p. 309, 1935—Canal Zone, Panama; Murphy, Ocean. Bds. S. Amer., 2, p. 1071, 1936 (monog.; life hist.); Pinto, Rev. Mus. Paul., 22, p. 146, 1937 (range); Dickey and van Rossem, Field Mus. Nat. Hist., Zool. Ser., 23, p. 182, 1938—Acajutla, El Salvador (Jan. 13, 26); Wetmore, Proc. U. S. Nat. Mus., 87, p. 195, 1939—La Guaira, Venezuela (Oct. 16); Nichols and Bond, Mem. Soc. Cub. Hist. Nat., 17, p. 31, 1943—Virgin Islands (nesting on Saba, Flat Kalkum, French Cap, and Cockroach Cay); van Rossem, Occ. Pap. Mus. Zool. Louisiana State Univ., 21, p. 92, 1945—Sonora (distr.).
- Xema wilsonii* Boie, Isis, 1828, col. 358—St. Croix (new name for *Larus ridibundus* [not of Linnaeus] Wilson, Amer. Orn., 9, p. 89, pl. 74, fig. 4).
- Xema atricilla* Jardine, Ann. Mag. Nat. Hist., 20, p. 378, 1847—Tobago; Cabanis, in Schomburgk, Reisen Brit. Guiana, 3, "1848," p. 761, 1849—coast region.
- Atricilla catesbyi* "Bonaparte" Bruch, Journ. Orn., 3, p. 287, 1855—"the warmer North America" (no type specified; evidently a new name for *Larus atricilla* Linnaeus).
- Atricilla megalopterus* "Bonaparte" Bruch, Journ. Orn., 3, p. 287, 1855—"Peru and the Gulf of Mexico" (type, from Peru, in Mayence Museum).¹
- Atricilla micropterus* "Bonaparte" Bruch, Journ. Orn., 3, p. 288, 1855—"southern part of North America" (no type specified).
- Atricilla catesbaei* Bonaparte, Compt. Rend. Acad. Sci. Paris, 42, No. 17, p. 771, April, 1856—new name for *Larus atricilla* Linnaeus.
- Atricilla macroptera* Bonaparte, Compt. Rend. Acad. Sci. Paris, 42, No. 17, p. 771, April, 1856—substitute name for *Atricilla megalopterus* Bruch.
- Chroicocephalus atricilla* Coues, Proc. Acad. Nat. Sci. Phila., 1862, p. 309 (monog.); Gundlach, Journ. Orn., 23, p. 385, 1875—Cuba (breeding; pullus descr.); Ridgway, Bull. U. S. Nat. Mus., 50, (8), p. 636, 1919

¹ Bruch states that *A. megalopterus* is the bird labeled as *L. serranus* in the collection under his care and described under the latter name in his former paper (Journ. Orn., 1, p. 106, 1853), where only Peru is mentioned as locality.

(monog.; full bibliog.); Todd and Carriker, Ann. Carnegie Mus., 14, p. 180, 1922—Buritaca and Trojas de Cataca, Colombia.

Larus ridibundus (not of Linnaeus) Léotaud, Ois. Trinidad, p. 532, 1866—Trinidad.

Larus atricilla atricilla Noble, Bull. Mus. Comp. Zool., 60, p. 367, 1916—Guadeloupe (crit.; meas.).

Larus atricilla megalopterus Noble, Bull. Mus. Comp. Zool., 60, pp. 367, 368, 1916—United States (crit.; meas.).

Hydrocoloeus atricilla Dwight, Bull. Amer. Mus. N. H., 52, p. 262, pl. 15, figs. 1, 2, 1925 (crit.; range; plumages).

Range.—Breeds locally along the Atlantic and Gulf coasts of the United States from Nova Scotia to Texas, in southern California, on the Caribbean coast of Central America, Bahama Islands, Cuba, and in the Lesser Antilles south to the Grenadines; recorded in summer from islets near Tobago and Trinidad, the coast of Venezuela, and the islands of Aruba, Curaçao, and Bonaire; winters from South Carolina and the Gulf coast south to northeastern Brazil (Marajó Island; Cajútuba, near Cintra, Pará) and northwestern Peru (Santa Lucia, Dept. Tumbes).¹

Field Museum Collection.—94: Texas (Brownsville, 1; Port Isabel, 3; Cameron County, 6; Corpus Christi, 20; Seadrift, 3); Massachusetts (Nantucket County, 2); Virginia (Northampton County, 7); North Carolina, Dare County (Pea Island, 13; Bodie Island, 6); Florida (Pilot Town, 1; Punta Rassa, 2; Amelia Island, 2; Palm Beach County, 2); Bahama Islands (Acklin, 2; Great Bahama, 1; Mayaguana, 2; New Providence, 1; San Salvador, 1); Virgin Islands (Antigua, 14); Lesser Antilles (Guadeloupe, 2); Mexico (Rio Lagartos, Yucatan, 1); Venezuela (Margarita Island, 1); British Guiana (Buxton, 1).

****Larus cirrocephalus cirrocephalus* Vieillot. GRAY-HOODED GULL.**

Larus cirrocephalus Vieillot, Nouv. Dict. Hist. Nat., nouv. éd., 21, p. 502, 1818—Brazil, coll. Delalande jr., = Rio de Janeiro (type in Paris Museum); idem and Oudart, Gal. Ois., 2, p. 223, pl. 289, 1825—Brazil (fig. of type).

¹ Birds from the United States are generally larger, but as pointed out by Dwight (Bull. Amer. Mus. N. H., 52, pp. 266–267, 1925) and again by Wetmore (Sci. Surv. Porto Rico and Virgin Islands, 9, pp. 378–379, 1927) there is much overlapping in the wing measurements of North American and West Indian specimens. Until adequate series of authentic breeding birds from the West Indies are available for study, it will be difficult to recognize a northern race, *L. a. megalopterus*, which Noble (Bull. Mus. Comp. Zool., 60, pp. 367, 368, 1916) sought to revive.

Larus poliocephalus Lesson,¹ *Traité d'Orn.*, p. 618, 1831—Brazil (substitute name for *Larus cirrocephalus* Vieillot); Wied, *Beitr. Naturg. Bras.*, 4, (2), p. 854, 1833—coast of southeastern Brazil; Salvin, *Ibis*, 1874, p. 320 (crit.).

Cirrocephalus plumbiceps (not *Larus plumbiceps* Meyer, 1822) Bruch, *Journ. Orn.*, 3, p. 288, 1855—"South America" (no type specified).

Larus maculipennis (not of Lichtenstein)² Burmeister, *Syst. Uebers. Th. Bras.*, 3, p. 448, 1856—bay of Rio de Janeiro; idem, *Journ. Orn.*, 8, p. 267, 1860—Rio Paraná, Argentina; idem, *Reise La Plata St.*, 2, p. 518, 1861—Rio Paraná.

Larus cirrhocephalus Selater and Salvin, *Proc. Zool. Soc. Lond.*, 1868, p. 146—Conchitas, Buenos Aires; idem, l.c., 1871, p. 578—La Plata; Saunders, l.c., 1874, p. 292—Buenos Aires and Chorillos, Peru (crit.); Durnford, *Ibis*, 1877, p. 201—north of city of Buenos Aires; Saunders, *Proc. Zool. Soc. Lond.*, 1878, p. 204—coast of Brazil, Rio de la Plata, and Peru (Chorillos; Chincha Islands); Gibson, *Ibis*, 1880, p. 163—Cape San Antonio, Buenos Aires; Doering, in *Roca, Inf. Ofic. Exp. Rio Negro, Zool.*, 1, p. 57, 1881—Azúl to the Rio Negro; Saunders, *Proc. Zool. Soc. Lond.*, 1882, p. 525—Payta, Peru (Jan.; crit.); Holmberg, *Act. Acad. Nac. Cienc. Cordoba*, 5, p. 92, 1884—Collongueyú, between Tandil and Ayacucho, Buenos Aires; Macfarlane, *Ibis*, 1887, p. 208—Payta, Peru; Holland, l.c., 1890, p. 428—Est. Espartillar, Buenos Aires; idem, l.c., 1892, p. 213—Est. Espartillar (July to Feb.); Aplin, l.c., 1894, p. 211—Montevideo Bay, Uruguay; Holland, l.c., 1895, p. 216—Santa Elena, Buenos Aires (breeding); Saunders, *Cat. Bds. Brit. Mus.*, 25, p. 198, 1896—part, spec. a-s, Buenos Aires (Ajó, Belgrano) and Peru (Callao Bay, Payta); Holland, *Ibis*, 1897, p. 287—Santa Elena (breeding); Lönnberg, l.c., 1903, p. 444—Laguna del Sauzal, Quinta, Jujuy; Ihering, *Cat. Faun. Braz.*, 1, p. 43, 1907—La Plata (range); Hartert and Venturi, *Nov. Zool.*, 16, p. 254, 1909—Barracas al Sud, Buenos Aires; Grant, *Ibis*, 1911, p. 475—Los Yngleses, Ajó, Buenos Aires; Dabbene, *Anal. Mus. Nac. Buenos Aires*, 18, p. 212, 1918—Quinta, Jujuy, and estuary of La Plata River; Chubb, *Ibis*, 1919, p. 259—Eten, Peru (Sept. 16); Gibson, l.c., 1920, p. 82—Cape San Antonio, Buenos Aires; Tremoleras, *El Hornero*, 2, p. 13, 1920—Montevideo, Canelones, Maldonado, and Rocha, Uruguay; Daguerre, l.c., 2, p. 261, 1922—Rosas, Buenos Aires; Wetmore, *Bull. U. S. Nat. Mus.*, 133, p. 135, 1926—Los Yngleses, Buenos Aires (crit.); Reiser, *Denks. Math.-Naturw. Kl. Akad. Wiss. Wien*, 76, p. 242, 1923 (1926)—Miritiba, Maranhão (Jan. 26); Friedmann, *Bull. Mus. Comp. Zool.*, 68, p. 164, 1927—Santa Elena, Entre Ríos; Quabicker, *Orn. Monatsb.*, p. 57, 1939—Ecuador (Guayaquil) and Peru (Pisca).

¹*Larus poliocephalus* Temminck (Man. d'Orn., 2nd ed., 2, p. 780, note, 1820) is a nomen nudum.

²Bonaparte (Compt. Rend. Acad. Sci. Paris, 42, No. 17, p. 771, 1856) introduced *Cirrocephalus major* as a substitute name for *Larus maculipennis* Lichtenstein and *L. cirrocephalus* Vieillot, two perfectly distinct species, which he evidently regarded as identical. *C. major*, thus, is an unidentifiable composite without nomenclatorial standing.

Larus atricilla (not of Linnaeus) Reiser, Denks. Math.-Naturw. Kl. Akad. Wiss. Wien, 76, p. 100, 1910—Miritiba, Maranhão, Brazil.

Hydrocoloeus cirrhocephalus cirrhocephalus Dwight, Bull. Amer. Mus. N. H., 52, p. 270, 1925 (monog.; range; plumages).

Larus cirrocephalus cirrocephalus Hellmayr, Field Mus. Nat. Hist., Zool. Ser., 12, p. 498, 1929—Miritiba, Maranhão (ex Reiser); Peters, Bds. World, 2, p. 321, 1934 (range); Murphy, Ocean. Bds. S. Amer., 2, p. 1074, 1936 (monog.; life hist.); Pinto, Rev. Mus. Paul., 22, p. 147, 1938—Bõa Vista, Maranhão (Nov.), and La Plata.

Range.—Breeds in southern South America from Rio de Janeiro to province of Buenos Aires, ranging up the rivers Paraná and Paraguay; recorded outside the breeding season from northern Brazil (Miritiba and Bõa Vista, Nov., Jan. 26), western Argentina (Quinta, Jujuy and Tucumán), the coast of Peru (Chorillos, Dec.; Eten, Sept. 16; Chinch Islands; Payta, Jan., July), and Ecuador (Guayaquil).¹

Field Museum Collection.—5: Argentina (Concepción, Tucumán, 3; Rio Sali, Tucumán, 1; unspecified, 1).

****Larus serranus* Tschudi. ANDEAN GULL.**

Larus serranus Tschudi, Arch. Naturg., 10, (1), p. 414, 1844—Peru (type in Neuchâtel Museum); idem, Unters. Faun. Peru., Orn., p. 307, 1846—Sierra and Puna region, Valley of Jauja, Junín; Philippi, Anal. Univ. Chile, 31, p. 288, 1868—Chile to Peru; Sclater and Salvin, Proc. Zool. Soc. Lond., 1869, p. 158—Tinta, Cuzco, Peru; idem, l.c., 1871, p. 577—Peru (Islay and Tinta), Bolivia, and "Mendoza (ex Burmeister)," errore (crit.); Allen, Bull. Mus. Comp. Zool., 3, p. 359, 1876—Moho, Lake Titicaca; Reed, Anal. Univ. Chile, 49, p. 568, 1877—Laguna de los Pejerreyes, Colchagua, Chile; Saunders, Proc. Zool. Soc. Lond., 1878, p. 196 (crit.; range); Sclater and Salvin, l.c., 1879, p. 641—Bolivia; Saunders, l.c., 1882, p. 525—Callao Bay, Peru; Sclater, l.c., 1886, p. 404—Huasco, Sitani, and Cueva Negra, Tarapacá, Chile; Macfarlane, Ibis, 1887, pp. 204, 207—Callao Bay, Peru; Philippi, Ornith., 4, p. 160, 1888—Antofagasta, Chile; Allen, Bull. Hydrocoloeus pipixcan Dwight, Bull. Amer. Mus. N. H., 52, p. 288, pl. 15, figs. 3, 4, 1925 (monog.; plumages).

Range.—Breeds in North America, from central Alberta, southern Saskatchewan, and south-central Manitoba to Utah, South Dakota, and southern Minnesota; winters on the Gulf coast of the United States, but chiefly on the Pacific coast of South America from the Gulf of Guayaquil, Ecuador, to Concepción, Chile; casual in the West Indies (St. Bartholomew), Galápagos Islands (three records), and in the Hawaiian Islands (Mauai).

Field Museum Collection.—78: Alberta (Walsh, 1; Many Islands Lake, 6); Saskatchewan (Quill Lake, 2; Moose Jaw, 1; Maple Creek, 3; Big Stick Lake, 1); Manitoba (Selkirk, 1); Texas (Corpus Christi, 6); North Dakota (Nelson County, 22; Pierce County, 1; Ramsey County, 10; Rolette County, 2; Towner County, 12); South Dakota (Harrison, 1); Minnesota (Heron Lake, 1); Iowa (Loon Lake, 1); Kansas (Oberlin, 2); Wisconsin (Beaver Dam, 2); Illinois (Cook County, 1); Indiana (Liverpool, 1); Guatemala (San José, 1).

****Larus ridibundus maculipennis* Lichtenstein.¹ PATAGONIAN BROWN-HEADED GULL.**

Larus maculipennis Lichtenstein, Verz. Doubl. Zool. Mus. Berlin, p. 411, Sept., 1823—Montevideo, Uruguay (type in Berlin Museum); Pelzeln, Orn. Bras., 3, p. 323, 1870—Rio de Janeiro (Registo do Sai, Santa Ana), São Paulo (Ypanemá), and Matto Grosso (Cidade de Matto Grosso);² Durn-

¹*Larus ridibundus maculipennis* Lichtenstein is so close to the European nominate race that we do not hesitate to follow Laubmann in reducing it to sub-specific rank.

Dwight has shown that *L. glaucoodes* and *L. maculipennis* are the same, the former being the fully adult bird, while the latter represents an abnormal (reversionary) type of second-year plumage.

Falkland Island birds are slightly smaller, but the divergency is too insignificant to justify the recognition of a distinct race (*roseiventris*).—C.E.H.

O. Murie (Auk, 62, p. 313, 1945) has recorded a specimen of *Larus ridibundus sibiricus* from Kiska Island in the Aleutians.—B.C.

²According to Dr. M. Sassi, Natterer's specimens, including the one from Cidade de Matto Grosso, are unquestionably *maculipennis*.

ford, Ibis, 1877, pp. 43, 202—mouth of Rio Chubut, Patagonia (breeding), and province of Buenos Aires (Baradero, etc.); idem, l.c., 1878, p. 405—Lake Colguape and Rio Sengel, Chubut (breeding); Saunders, Proc. Zool. Soc. Lond., 1878, p. 201 (crit.; range); Gibson, Ibis, 1880, p. 163—Cape San Antonio, Buenos Aires; Saunders, Proc. Zool. Soc. Lond., 1882, p. 526—Talcaguano, Chile (crit.); White, l.c., p. 628—Punta Lara, Peheco, and Salto, Buenos Aires; Withington, Ibis, 1888, p. 472—Lomas de Zamora, Buenos Aires; Holland, l.c., 1890, p. 425—Est. Espartillar, Buenos Aires; idem, l.c., 1892, p. 213—Est. Espartillar (breeding); Aplin, l.c., 1894, p. 211—Montevideo Bay; Holland, l.c., 1895, p. 216—Santa Elena, Buenos Aires (breeding); Saunders, Cat. Bds. Brit. - Larus cirrhocephalus* Des Murs, in Gay, Hist. Fís. Pol. Chile, Zool., 1, p. 482, 1847—Chile (part, young); Boeck, Naumannia, 1855, p. 512—Valdivia and "Arend" (=Ancud), Chiloé, Chile; Frauenfeld, Verh. Zool. Bot. Ges. Wien, 10, Abh., p. 639, 1860—Lake Aculeo, Santiago, Chile; Pelzeln, Reise Novara, Zool., 1, Vögel, p. 151, 1865—Chile (eggs); Sharpe, Proc. Zool. Soc. Lond., 1881, p. 16—Talcaguano, Chile; Reed, Anal. Univ. Chile, 93, p. 211, 1896—coast of Tarapacá, Chile.
- Larus albipennis* Peale, U. S. Expl. Exp., 8, p. 288, 1848—harbor of Valparaíso, Chile (type in U. S. National Museum examined); Kittlitz, Denkw. Reise, 1, p. 133, 1858—Valparaíso.
- Chroicocephalum glaucotes* Bruch, Journ. Orn., 1, p. 105, 1853—Chile (crit.); idem, l.c., 3, p. 291, 1855—Chile (crit.).
- Larus erythropus* (not of Gmelin, 1789) Kittlitz, Denkw. Reise, 1, p. 113, 1858—San-Tomé, Concepción, Chile (substitute name for *L. albipennis* Peale).
- Gavia roseiventris* Gould, Proc. Zool. Soc. Lond., 27, p. 97, 1859—Falkland Islands (type now in British Museum).
- Larus roseiventris* Sclater, Proc. Zool. Soc. Lond., 28, p. 391, 1860—Falkland Islands (crit.); Abbott, Ibis, 1861, p. 166—Falkland Islands (breeding).
- Larus serranus* (not of Tschudi) Burmeister, Journ. Orn., 8, p. 267, 1860—Mendoza; idem, Reise La Plata St., 2, p. 519, 1861—Mendoza.

Larus glaucotis Sclater, Proc. Zool. Soc. Lond., 1867, p. 340—Chile.

Hydrocoloeus maculipennis Dwight, Bull. Amer. Mus. N. H., 52, p. 295, 1925 (monog.; plumages).

Larus glaucoides Bullock, Rev. Chil. Hist. Nat., 33, p. 208, 1929—Angol, Malleco, Chile.

Larus ridibundus maculipennis Laubmann, Verh. Orn. Ges. Bay., 22, p. 262, 1934—Est. La Geraldina, Santa Fé (crit.).

Range.—Breeds in southern South America from Valdivia, Chile, and the La Plata estuary to Tierra del Fuego and the Falkland Islands; ranges north to Tarapacá, Chile, Alagôas, Brazil, and (according to Sassi) Matto Grosso.

Field Museum Collection.—5: Chile (Concepción, Talcaguano, 1; Lake Gualletue, Cautín, 1; Angol, Bio Bio, 1; Quellon, Chiloé Island, 1; Chonchi, Chiloé Island, 1).

****Larus philadelphia* (Ord). BONAPARTE'S GULL.**

Sterna Philadelphia Ord, in Guthrie's Geogr., 2nd Am. ed., 2, p. 319, 1815—no locality=near Philadelphia, Pennsylvania (no type extant).

Larus marginatus Rafinesque, Kentucky Gazette, n.s., 1, No. 8, p. 3, col. 5, Feb. 21, 1822—near Harrodsburg, Kentucky (no type extant).

Larus melanorhynchus Temminck, Nouv. Rec. Pl. Col., livr. 85, pl. 504, 1830—"Chile" (descr. of nuptial plumage; type in the Leyden Museum; cf. Schlegel, Mus. Pays-Bas, livr. 4, p. 41, 1863).

Larus bonapartii Richardson, in Swainson and Richardson, Faun. Bor.-Amer., 2, "1831," p. 425, pl. 72, pub. Feb., 1832—"Great Slave Lake," Mackenzie (type, from Fort Franklin, Great Bear Lake, in Edinburgh Museum; cf. Stenhouse, Nov. Zool., 35, p. 275, 1930).

Chroicocephalus bonapartii Bruch, Journ. Orn., 1, p. 105, 1853—North America (monog.); idem, l.c., 3, p. 292, 1855 (descr.; crit.).

Chroicocephalus subulirostris (Bonaparte MS.) Bruch, Journ. Orn., 1, p. 105, 1853—North America (type in Mayence Museum).

Chroicocephalus philadelphia Coues, Proc. Acad. Nat. Sci. Phila., 1862, p. 310 (monog.); Ridgway, Bull. U. S. Nat. Mus., 50, (8), p. 645, 1919 (monog.; full bibliog.).

Larus philadelphiae Saunders, Proc. Zool. Soc. Lond., 1878, p. 206 (monog.).

Larus philadelphia Saunders, Cat. Bds. Brit. Mus., 25, p. 185, 1896 (monog.); Salvin and Godman, Biol. Centr.-Amer., Aves, 3, p. 418, 1903—Mexico (Mazatlan, Guanajuato, Guadalajara, Jalisco); Bent, Bull. U. S. Nat. Mus., 113, p. 175, 1921 (life hist.); Grinnell, Univ. Calif. Pub. Zool., 32, p. 61, 1928—Lower California; Bradlee, Mowbray, and Eaton, Proc. Bost. Soc. N. H., 39, p. 289, 1931—Bermuda Islands (winter); Peters, Bds. World, 2, p. 324, 1934 (range); Porsild, Canad. Field Nat., 57, p. 30, 1943—Mackenzie Delta (nesting in wooded part); Beardslee, Wilson Bull., 56, p. 9, 1944 (habits; plumages); van Rossem, Occ. Pap. Mus. Zool. Louisiana State Univ., 21, p. 92, 1945—Sonora (winter visitant).

Hydrocoloeus philadelphia Dwight, Bull. Amer. Mus. N. H., 52, p. 306, pl. 15, figs. 5, 6, 1925 (monog.; plumages).

Range.—Breeds in North America from northwestern Alaska and northern Mackenzie south to central British Columbia and central Alberta; winters on the Pacific coast from southeastern Alaska to Lower California and western Mexico, on the Atlantic from New England to Florida, the Bermuda Islands, and on the Gulf coast to Yucatan; accidental in the Hawaiian Islands and in Europe.¹

Field Museum Collection.—144: Alaska (Bethel, 3; Inako River, 1); Yukon Territory (Yukon River, 1); British Columbia (Seymour Narrows, 1; Saturna Island, 1; Victoria, 1); Alberta (Cooking Lake, 1); Manitoba (Churchill, 1); California (San Francisco, 1; Eureka, 1; Monterey, 22; Pacific Grove, 2; Seaside, 1; Hyperion, 15; Motordrome, Los Angeles County, 1; San Diego County, 1); North Dakota (Nelson County, 7; Rolette County, 8; Towner County, 2); Minnesota (Pelican Rapids, 2); Wisconsin (Beaver Dam, 9); Illinois (Lake County, 3; Cook County, 1); Indiana (Lake County, 1); Michigan (St. Joseph, 1); Quebec (Magdalen Islands, 5); Maine (Portland, 1); Massachusetts (Monomoy Island, 3); Connecticut (New Haven County, 3); New York (Cayuga Lake, 2; Suffolk County, 2); North Carolina, Dare County (Bodie Island, 17; Pea Island, 1); Florida (Pilot Town, 5; Amelia Island, 4; East Pass, 8; Mary Esther, 3; Santa Rosa, 2).

Larus minutus Pallas. LITTLE GULL.

Larus minutus Pallas, Reisen Versch. Prov. Russ. Reiches, 3, p. 702, 1776—rivers of Siberia and southern Russia (restricted type locality Berezof, Tobolsk, Siberia; cf. Ridgway, Bull. U. S. Nat. Mus., 50, (8), p. 650, 1919); Saunders, Cat. Bds. Brit. Mus., 25, p. 173, 1896 (monog.); Norton, Auk, 27, p. 447, 1910 (occurrences in America); Bent, Bull. U. S. Nat. Mus., 113, p. 180, 1921 (life hist.); Peters, Bds. World, 2, p. 324, 1934 (range).

Hydrocoloeus minutus Ridgway, Bull. U. S. Nat. Mus., 50, (8), p. 649, 1919 (monog.; full bibliog.); Dwight, Bull. Amer. Mus. N. H., 52, p. 309, 1925 (monog.; plumages).

Range.—Breeds locally in northern Europe and northern Asia; accidental in the eastern United States; on Long Island, New York (Fire Island, Sept. 15, 1887; Rockaway Beach, May 2, 1902) and

¹ Bonaparte's Gull has never occurred anywhere in South America. The record from the Tambo Valley, Peru, turned out to be based on an immature bird of *L. serranus*, and Des Murs (in Gay, Hist. Fis. Pol. Chile, Zool., 1, p. 483, 1847) is undoubtedly mistaken in including *L. bonaparti* among the birds of Chile.

in Maine (St. George, Aug. 12, 1904; Pine Point, near Scarborough, July 20, 1910).¹

Genus RHODOSTETHIA Macgillivray

Rossia (not of Owen, 1835) Bonaparte, Geog. Comp. List, p. 62, 1838—type, by monotypy, *Larus roseus* Macgillivray.

Rhodostethia Macgillivray, Man. Brit. Orn., 2, p. 252, 1842—type, by orig. desig., *Larus rossii* Richardson=*Larus roseus* Macgillivray.

**Rhodostethia rosea* (Macgillivray). ROSS'S GULL.

Larus roseus Macgillivray, Mem. Wernerian Nat. Hist. Soc., 5, (1), p. 249, 1824—no locality given=Melville Peninsula, Keewatin² (type in Edinburgh Museum); Jardine and Selby, Illustr. Orn., 1, (1), pl. 14, Feb., 1827 (fig. of type); Winge, Medd. Grøn., 21, p. 199, 1898—Greenland.

Larus rossii Richardson, App. Parry's Second Voy., p. 359, 1825—Melville Peninsula, Keewatin (type, from Alagnak, 69° 15' N., in Edinburgh Museum; cf. Stenhouse, Nov. Zool., 35, p. 275, 1930).

Larus Richardsonii Lesson, Compl. Oeuvr. Buffon, 9, p. 516, 1837—Arctic Circle.

Rhodostethia roseus Bruch, Journ. Orn., 1, p. 106, 1853 (diag.); idem, l.c., 3, p. 278, 1855—Kamchatka (crit.).

Rhodostethia rosea Saunders, Cat. Bds. Brit. Mus., 25, p. 167, 1896 (monog.); Buturlin, Ibis, 1906, pp. 131, 333, 661—Kolyma Delta, Siberia (breeding grounds; habits; nest and eggs descr.); Dresser, l.c., p. 610, pl. 20 (eggs); Ridgway, Bull. U. S. Nat. Mus., 50, (8), p. 669, 1919 (monog.; full bibliog.); Bent, l.c., 133, p. 183, 1921 (life hist.); Hartert, Vög. Pal. Fauna, 2, p. 1718, 1921 (monog.); Preble and McAtee, N. Amer. Fauna, 46, p. 36, 1923—St. George Island, Pribilofs (March 24, May 25); Dwight, Bull. Amer. Mus. N. H., 52, p. 314, 1925 (range; plumages); Helms, Dansk. Orn. Foren. Tidsskr., 27, p. 18, 1933—Ikamiut, Greenland; Ticehurst, Ibis, 1933, p. 785—lands near Ikamiut, Greenland (June 20; male, female with egg); Peters, Bds. World, 2, p. 325, 1934 (range).

Range.—Breeds in northern Siberia at the mouths of rivers between Cape Swjatoi Noss and the Indigirka River, and in the valleys of the Indigirka, Alazei, and Kolyma south to about 67° 30' N. Lat., also on islands near Ikamiut, Greenland (June 20, 1885); on migration in Kamchatka, the Arctic coast of Alaska, and the Pribilofs (two records from St. George Island).

Field Museum Collection.—20: Alaska (Barrow, 20).

¹ Records from the Bermuda Islands pertain to *L. philadelphia* (cf. Bradlee, Mowbray, and Eaton, Proc. Bost. Soc. N. H., 39, pp. 289–290, 1931).

² Macgillivray's provisional name, based on the characteristic shape of the tail ("subcuneate, the middle feathers being considerably longer, the rest graduated"),

Genus *RISSA* Stephens

Rissa Stephens, in Shaw, Gen. Zool., 13, (1), p. 180, 1826—type, by monotypy, *Rissa brunnichii* Stephens=*Larus tridactylus*.

Cheimonea Kaup, Skizz. Entw.-Gesch. Nat. Syst. Europ. Thierw., pp. 84, 196, 1829—type, by monotypy, *Larus tridactylus* Linnaeus.

****Rissa tridactyla tridactyla* (Linnaeus). KITTIWAKE.**

Larus tridactylus Linnaeus, Syst. Nat., 10th ed., 1, p. 136, 1758—based on "The Cuddy Moddy" Albin, Nat. Hist. Bds., 2, p. 80, pl. 87, and "*Larus cinereus*" Raius, Syn. Meth. Av., p. 128, Great Britain; Holböll, Naturh. Tidsskr., 4, p. 420, 1843—Greenland (Godthaab); Winge, Medd. Grønl., 21, p. 190, 1898—Greenland.

Larus Rissa Brünnich, Orn. Bor., p. 42, 1764—Iceland and Christiansøe Island, also near Copenhagen.

Larus naevius Linnaeus, Syst. Nat., 12th ed., 1, p. 225, 1766—based on Brisson (Orn., 6, p. 185, pl. 17, fig. 2), Aldrovandi, etc., "in Mari Europaeo."

Larus albus (not of Gunnerus, 1767) P. L. S. Müller, Natursyst., Suppl., p. 104, 1776—based on "Mouette cendrée tachetée" Daubenton, Pl. Enl., pl. 387.

Larus cinerarius (not of Linnaeus, 1766) Fabricius, Faun. Greenl., p. 101, 1780—Greenland (descr. of winter plumage).

Larus Riga Gmelin, Syst. Nat., 1, (2), p. 594, 1789—based on *Larus Rissa* Brünnich, Orn. Bor., p. 42, No. 140, and "Kittiwake" of Pennant and Latham, northern America, Europe, and Asia.

Rissa Brunnichii (Leach MS.) (Stephens, in Shaw, Gen. Zool., 13, (1), p. 181, pl. 21, 1826—substitute name for *Larus tridactylus* Linnaeus.

Rissa tridactylus Bruch, Journ. Orn., 1, p. 103, 1853 (diag.); idem, l.c., 3, p. 284, 1855 (descr.).

Rissa borealis C. L. Brehm, Vogelfang, p. 341, 1855—Greenland, not rare in Europe (type, from Greenland, in Tring Collection [cf. Hartert, Nov. Zool., 25, p. 60, 1918], now in the American Museum of Natural History, New York).

Rissa tridactyla Saunders, Cat. Bds. Brit. Mus., 25, p. 305, 1896 (in part, excepting Bering Sea and North Pacific regions); Racey, Canad. Field Nat., 53, p. 25, 1939 (banded in Russian Arctic, recovered in Newfoundland); Hennessy, l.c., 57, p. 63, 1943 (banded in Iceland, recovered off Nova Scotia).

Rissa tridactyla tridactyla Ridgway, Bull. U. S. Nat. Mus., 50, (8), p. 565, 1919 (monog.; full bibliog.); Bent, l.c., 113, p. 36, 1921 (life hist.); Hartert, Vög. Pal. Fauna, 2, p. 1751, 1921 (monog.); Dwight, Bull. Amer. Mus. N. H., 52, p. 317, pl. 14, fig. 6, 1925 (range; plumages); Bradlee, Mowbray, and Eaton, Proc. Bost. Soc. N. H., 39, p. 288, 1931—Bermuda

rests on the very same specimen from Parry's Arctic Expedition, which was subsequently described by Richardson as *Larus rossii* and is still preserved in the Edinburgh Museum.

Islands (regular winter visitor); Løppenthin, Medd. Grøn., 91, No. 6, pp. 69, 123, 1932—eastern Greenland (breeding); Peters, Bds. World, 2, p. 325, 1934 (range); Bird and Bird, Ibis, 1935, p. 852—Jan Mayen (breeding); Wynne-Edwards, Proc. Bost. Soc. N. H., 40, p. 319, 1935 (distr. in North Atlantic); Soper, Auk, 63, p. 236, 1946—Baffin Island.

Range.—Breeds in Arctic and Subarctic North America from Wellington Channel, northern Greenland, south to Somerset Island, east coast of Baffin Island, and the Gulf of St. Lawrence, and extralimittally in Iceland, Jan Mayen, Spitzbergen, Franz Josef Land, Novaya Zemlya, northwestern Europe, and northern Asia; winters from the Gulf of St. Lawrence south to New Jersey and the Bermuda Islands. Accidental in the interior.

Field Museum Collection.—33: Arctic Canada (Resolution Island, 1); Greenland (Agpamiut, 3; Simiutak, 1; Godhavn, 1; Sukkertoppen, 2; Godthaab, 2; Julianehaab, 1; east coast, 5); Labrador (Jack Lane's Bay, 1; Rama, 1); Quebec (Magdalen Islands, 10); Nova Scotia (Halifax, 1); Massachusetts (Provincetown, 3); Illinois (Meredosia, Morgan County, 1).

****Rissa tridactyla pollicaris* Ridgway. PACIFIC KITTIWAKE.**

[*Rissa tridactyla*] b. *pollicaris* (Stejneger MS.) Ridgway, in Baird, Brewer, and Ridgway, Water Bds. N. Amer., 2, p. 202, 1884—Kotzebue Sound, Alaska (new name for *Rissa brachyrhynchus* [not *Larus brachyrhynchus* Gould, 1843] Bruch, Journ. Orn., 1, p. 103, 1853).

Rissa tridactyla pollicaris Stejneger, Bull. U. S. Nat. Mus., 29, p. 78, 1885—Bering Island and Staritskoff Island, Kamchatka (nomencl.; crit.; breeding); Ridgway, l.c., 50, (8), p. 571, 1919 (monog.; full bibliog.); Bent, l.c., 113, p. 44, 1921 (life hist.); Hartert, Vög. Pal. Fauna, 2, p. 1753, 1921 (monog.); Preble and McAtee, N. Amer. Fauna, 46, p. 31, 1923—Pribilof Islands (breeding); Dwight, Bull. Amer. Mus. N. H., 52, p. 317, 1925 (range; plumages); Grinnell, Univ. Calif. Pub. Zool., 32, p. 58, 1928—Lower California (San Gerónimo Island, March, 1897; vicinity of Los Coronados Islands, winter); Peters, Bds. World, 2, p. 325, 1934 (range).

Rissa brachyrhynchus (not *Larus brachyrhynchus* Gould, 1843) Bruch, Journ. Orn., 1, p. 103, 1853—North America (diag.); idem, l.c., 3, p. 285, 1855—northwest coast of America (diag.).

Range.—Breeds in northwestern North America, from Cape Lisburne and Point Barrow, Alaska, south to the Aleutian Islands, and extralimittally on Wrangel and Herald Islands, north coast of eastern Siberia west to Kolinchin Bay, the coast and islands of Bering Sea, the Commander Islands, Kurile Islands, and Kamchatka; winters from southeastern Alaska to northern Lower California and Japan.

Field Museum Collection.—17: Alaska (Barrow, 4; Little Diomed Island, 3; Nome, 5; St. Michaels, 4; Icy Strait, 1).

****Rissa brevirostris* Bruch. RED-LEGGED KITTIWAKE.**

Rissa brevirostris (Brandt MS.) Bruch, Journ. Orn., 1, p. 103, 1853—"North west coast of North America" (type in Leningrad Museum); idem, l.c., 3, pp. 285, 293, 1855 (diag.); Stejneger, Bull. U. S. Nat. Mus., 29, p. 82, 1885—Bering Island (breeding); Saunders, Cat. Bds. Brit. Mus., 25, p. 312, 1896 (monog.); Ridgway, Bull. U. S. Nat. Mus., 50, (8), p. 573, 1919 (monog.; full bibliog.); Bent, l.c., 113, p. 49, 1921 (life hist.); Hartert, Vög. Pal. Fauna, 2, p. 1754, 1921 (monog.); Preble and McAtee, N. Amer. Fauna, 46, p. 32, 1923—Pribilof Islands (breeding); Dwight, Bull. Amer. Mus. N. H., 52, p. 322, 1925 (range; plumages); Gabrielson, Auk, 50, p. 216, 1933—Delake, Oregon; Peters, Bds. World, 2, p. 326, 1934 (range).

Larus brachyrhynchus (not of Richardson, 1832) Gould, Proc. Zool. Soc. Lond., 11, p. 106, Dec., 1843—"Russian America" (type now in British Museum); idem, Zool. Voy. Sulphur, Birds, Part 2, p. 50, pl. 34, Jan., 1844—"Russian America" (fig. of type).

Rissa Kotzebuii Bonaparte, Naumannia, 1854, pp. 212, 217—"Ex Am. s. occ., California" (substitute name for *Rissa brevirostris* Bruch); idem, Rev. Mag. Zool., (2), 7, p. 18, 1855 (reprint).¹

Larus Warnecki Coinde, Rev. Mag. Zool., (2), 12, p. 401, 1860—St. Paul Island, Pribilofs (type in Paris Museum).

Range.—Breeds on the Pribilof, Near, and Commander Islands (more or less resident); casual in Alaska (St. Michaels), Yukon Territory (Forty Mile), and Oregon (Delake, Jan. 28, 1933).

Field Museum Collection.—4: Alaska (St. George Island, 1; Bering Sea, 3).

Genus CREAGRUS Bonaparte

Creagrus Bonaparte, Naumannia, 1854, p. 213—type, by orig. desig., *Larus furcatus* Néboux.

****Creagrus furcatus* (Néboux). SWALLOW-TAILED GULL.**

"Mouette à queue fourchue" Néboux, Rev. Zool., 3, p. 290, 1840—"rade de Monterey (Haute-Californie)" (type in Paris Museum; cf. Grinnell, Univ. Calif. Pub. Zool., 38, p. 318, 1932).

Larus furcatus Néboux, Voy. "Vénus," Atlas, Zool., Ois., pl. 10, 1846; Prévost and Des Murs, Voy. "Vénus," 5, Zool., p. 277, 1849—"rade de Monterey (Haute-Californie)."

Xema furcatus Bruch, Journ. Orn., 1, p. 103, 1853—California (crit.).

Creagrus furcatus Coues, Proc. Acad. Nat. Sci. Phila., 1862, p. 312 (ex Néboux); Salvin, Trans. Zool. Soc. Lond., 9, p. 506, 1876—Dalrymple

¹ Specific name spelled *Kotzebui*.

Rock, Chatham Island, Galápagos (crit.); Ridgway, Proc. U. S. Nat. Mus., 12, p. 117, 1890—Dalrymple Rock (generic char.; descr. of breeding plumage); Townsend, Bull. Mus. Comp. Zool., 27, p. 125, 1895—Malpelo Island, off Bay of Panama (March); Ridgway, Proc. U. S. Nat. Mus., 19, p. 638, 1897—Brattle, Hood, Chatham, off James, and Tower Islands, Galápagos, and Malpelo Island, Colombia (descr.; meas.); Baur, Amer. Nat., 31, p. 783, 1897—rock between Gardner and Hood Islands (breeding), Barrington Island, near Seymour Island and Abingdon Island, Galápagos; Snodgrass and Heller, Proc. Wash. Acad. Sci., 5, p. 237, 1904—Culpepper, Wenman, and Albemarle Islands (descr. of eggs); Gifford, Proc. Calif. Acad. Sci., (4), 2, p. 35, 1913—Galápagos (habits; plumages; meas.); Ridgway, Bull. U. S. Nat. Mus., 50, (8), p. 659, 1919 (monog.; full bibliog.); Dwight, Bull. Amer. Mus. N. H., 52, p. 328, 1925 (monog.; plumages); Chapman, l.c., 55, p. 187, 1926—off Talara, Peru, and off Gulf of Guayaquil, Ecuador (Dec. 6); Swarth, Occ. Pap. Calif. Acad. Sci., 18, p. 65, 1931—Galápagos; Fisher and Wetmore, Proc. U. S. Nat. Mus., 79, art. 10, p. 42, 1931—Tower Island and Galápagos; Peters, Bds. World, 2, p. 326, 1934—Galápagos; Murphy, Ocean. Bds. S. Amer., 2, p. 1086, 1936 (monog.; life hist.); Bond and de Schauensee, Proc. Acad. Nat. Sci. Phila., 90, p. 156, 1938—Malpelo Island, Colombia (breeding).

Xema furcatum Saunders, Proc. Zool. Soc. Lond., 1878, p. 210—Dalrymple Rock, Chatham Island (crit.); idem, l.c., 1882, p. 523, pl. 34 (adult and young)—Paracas Bay, Peru (Oct.; descr. of young); Streets, Auk, 29, p. 233, 1912—off Chatham Island (habits).

(?) *Creagrus furcata* Anthony, Auk, 12, p. 291, 1895—off San Diego, California (April 4, 1895).

Xema furcata Saunders, Cat. Bds. Brit. Mus., 25, p. 165, 1896—Dalrymple Rock, Chatham Island, Galápagos, and Paracas Bay, Peru; Rothschild and Hartert, Nov. Zool., 6, p. 190, 1899—Wenman, Culpepper, Tower, and Hood Islands (nest and eggs descr.); idem, l.c., 9, p. 412, 1902—Wenman, Daphne, Guy Fawkes, and Albemarle Islands.

Range.—Breeds in the Galápagos Islands and on Malpelo Island, off Bay of Panama; casual off the coast of Ecuador (Gulf of Guayaquil, Dec. 6) and Peru (off Talara; Paracas Bay, Oct.).¹

Field Museum Collection.—8: Galápagos Islands (Wenman Island, 1; Hood Island, 3; Champion Island, 3; Tower Island, 1).

Genus XEMA Leach

Xema Leach, in Ross, Voy. Disc. Baffin's Bay, App. 2, p. lvii, 1819—type, by monotypy, *Larus sabini* Sabine.

Zema Holböhl, Naturhist. Tidsskr., 4, p. 423, 1843 (emendation).

¹ The occurrence of *C. furcatus* off the California coast is open to doubt. The locality of the type specimen, "Monterey, California," may be due to a confusion of labels, since the *Venus* also stopped at the Galápagos Islands.

Chema Reichenow, Journ. Orn., 17, p. 188, 1889—substitute name for *Xema* Leach.

****Xema sabini* (Sabine). SABINE'S GULL.**

Larus sabini Sabine, Trans. Linn. Soc. Lond., 12, (2), p. 522, pl. 29, 1819—"low rocky islands on the west coast of Greenland (lat. 75° 29' N. and long. 60° 9' W.)" (type, from Sabine Islands, near Melville Bay, in the British Museum); Winge, Medd. Grønl., 21, p. 197, 1898—Greenland; Manniche, l.c., 45, No. 1, p. 167, pl. 6 (eggs), 1910—Renskaeret, Greenland (breeding habits).

Xema sabini(i) Leach, in Ross, Voy. Disc. Baffin's Bay, App. 2, p. lvii, with col. plate, 1819 (descr. of type); Reinhardt, Ibis, 1861, p. 19—north of Upernavik, Greenland (breeding); Sclater and Salvin, Proc. Zool. Soc. Lond., 1878, p. 141—Tumbez, Peru; Saunders, l.c., p. 209 (monog.); idem, l.c., 1882, p. 524—Callao Bay, Peru (Dec., 1881); MacFarlane, Ibis, 1887, p. 207—San Lorenzo Island, Callao Bay, Peru (Jan., Feb.); Saunders, Cat. Bds. Brit. Mus., 25, p. 162, 1896 (monog.; full bibliog.); Ridgway, Bull. U. S. Nat. Mus., 50, (8), p. 663, 1919 (monog.; full bibliog.); Bent, l.c., 113, p. 191, 1921 (life hist.); Hartert, Vög. Pal. Fauna, 2, p. 1717, 1921 (monog.); Dwight, Bull. Amer. Mus. N. H., 52, p. 327, pl. 14, fig. 5, 1925 (plumages; range); Grinnell, Univ. Calif. Pub. Zool., 32, p. 61, 1928—Lower California (San Quintín, Aug. 14, 1905; near Los Coronados Islands, Aug. 20, 1910); Bradlee and Mowbray, Proc. Bost. Soc. N. H., 39, p. 290, 1931—St. George's, Bermuda Islands (one record); Løppenthin, Medd. Grønl., 91, No. 6, pp. 70, 123, 1932—Sand Island, Greenland (crit.; meas.; egg descr.; nesting habits); Pedersen, l.c., 100, No. 11, pp. 7, 23, 1934—Sand Island, Greenland (breeding); Peters, Bds. World, 2, p. 326, 1934 (range); Bird, Ibis, 1941, p. 150—northeast Greenland (breeding; crit.); Porsild, Canad. Field Nat., 57, p. 30, 1943—Arctic coast east of Mackenzie Delta (said to breed); Bray, Auk, 60, p. 529, 1943—Southampton Island (nesting); Dalquist, Condor, 46, p. 34, 1944—California.

[*Xema sabini*] *sabini* Portenko, Ibis, 1939, p. 267—Greenland (crit.); Soper, Auk, 63, p. 237, 1946—Baffin Island (nesting).

[*Xema sabini*] *tschuktschorum* Portenko, Ibis, (14), 3, p. 268, April, 1939—Uelen, Chukchi Peninsula (type in coll. of L. Portenko).

[*Xema sabini*] *woznesenskii* Portenko, Ibis, (14), 3, p. 268, April, 1939—Hooper Bay, Alaska (type in Leningrad Museum).

Xema sabini sabini Bird and Bird, Ibis, 1941, p. 150—Greenland (crit.).

Range.—Breeds on Spitzbergen, the Arctic coast and islands of Siberia from the Taimyr Peninsula to Anadyr Gulf, the west coast of Alaska from Norton Sound to the Kuskokwim River, in northern Mackenzie, Victoria Island, Ellesmere Island, Baffin Island, Southampton Island, and northern Greenland;¹ migrates off the Pacific

¹ The subdivision of this species attempted by Russian ornithologists appears to rest on very slender grounds. Birds from Alaska seem to us inseparable from

coast of America and winters on the coast of Peru; of frequent occurrence in the interior of the United States and on the shores of the North Atlantic Ocean; accidental in the Bermuda Islands (one record).

Field Museum Collection.—38: Alaska (Barrow, 4; Chipp River, near Barrow, 1; King Island, 2; Nome, 4; St. Michaels, 7); Oregon (Tillamook County, 2; Netarts, 1); California (Eureka, 1; Monterey, 3; Cypress Point, 5; off San Pedro, 4); Greenland (Godthaab, 1); Maine (near Calais, 1); Peru (Talara, 2).

Subfamily STERNINAE. Terns

Genus CHLIDONIAS Rafinesque

Chlidonias Rafinesque, Kentucky Gazette, n.s., 1, No. 8, p. 3, col. 5, Feb. 21, 1822—type, by monotypy, *Sterna melanops* Rafinesque=*Sterna surinamensis* Gmelin.

Hydrochelidon Boie, Isis, 1822, (1), col. 563, May, 1822—type, by subs. desig. (Gray, List Gen. Bds., 2nd ed., p. 100, 1841), *Hydrochelidon niger* (Linn.)=*Sterna nigra* Linnaeus.

Viralva Stephens, in Shaw, Gen. Zool., 13, (1), p. 166, 1826—type, by subs. desig. (Salvin, Cat. Bds. Brit. Mus., 25, p. 5, 1896), *Sterna nigra* Linnaeus.

Pelodes Kaup, Skizz. Entw.-Gesch. Nat. Syst. Europ. Thierw., p. 107, 1829—type, by monotypy, *Sterna leucopareia* Temminck=*Sterna hybrida* Pallas.

Chlidonias leucoptera (Temminck). WHITE-WINGED BLACK TERN.

Sterna leucoptera Temminck, Man. d'Orn., p. 483, 1815—shores of Mediterranean and lakes beyond the Alps (lakes of Locarno, Lugano, Como, and Geneva).¹

Hydrochelidon leucoptera Brewer, Amer. Nat., 8, p. 188, 1874—Lake Koshkonong, Wisconsin (July 5, 1873); Feilden, Ibis, 1889, p. 502—Barbados (Oct. 24, 1888); Saunders, Cat. Bds. Brit. Mus., 25, p. 6, 1896 (monog.); Clark, Proc. Bost. Soc. N. H., 32, p. 259, 1905—Barbados (ex Feilden); Ridgway, Bull. U. S. Nat. Mus., 50, (8), p. 536, 1919 (monog.; full bibliog.).

those of Greenland, though they have the mantle on average slightly darker. Yet, according to Portenko, who distinguishes not less than four races on the basis of color-intensity, a single specimen from Griffin Point, Arctic Alaska, pertains to his dark-headed form *tshuktschorum*, while two (!) other skins from Hooper Bay, Alaska (June), stated to be even darker, are separated as *woznesenskii*. We strongly doubt the possibility of there being two distinct races in different parts of Alaska. Hartert (Vög. Pal. Fauna, Ergänzt., p. 493) is even unable to recognize *X. s. palaeartica* Stegmann (Orn. Monatsb., 42, p. 25, 1934).

¹ There seems little doubt that the two examples in adult plumage from the Lake of Geneva in the Leyden Museum (cf. Schlegel, Mus. Pays-Bas, livr. 5, Sternae, p. 32, 1864, s.n. *Sterna nigra*) are the actual cotypes of Temminck's description.

Chlidonias leucoptera Bent, Bull. U. S. Nat. Mus., 113, p. 299, 1921 (American records, habits); Peters, Bds. World, 2, p. 328, 1934 (range).

Range.—Breeds in southeastern Europe and northern Asia; accidental in the United States (one record from Lake Koshkonong, Wisconsin, July 5, 1873) and the West Indies (Barbados, Oct. 24, 1888).¹

***Chlidonias nigra surinamensis (Gmelin). BLACK TERN.**

Sterna surinamensis Gmelin, Syst. Nat., 1, (2), p. 604, 1789—based on (Latham ex) "Hirondelle de mer, grande espèce," Fermin, Descr. Surinam, 2, p. 187, 1769, Surinam.

Sterna plumbea Wilson, Amer. Orn., 7, p. 83, pl. 60, fig. 3, 1813—Schuylkill River, Pennsylvania (descr. of young; type lost).

Sterna melanops Rafinesque, Kentucky Gazette, n.s., 1, No. 8, p. 3, col. 5, Feb. 21, 1822—near Harrodsburg, Kentucky (no type extant).

Sterna exilis Tschudi, Arch. Naturg., 9, (1), p. 389, 1843—"in Oceani Pacifici littoribus"—coast of Peru (type in Neuchâtel Museum;=winter plumage; cf. Saunders, Cat. Bds. Brit. Mus., 25, p. 21, 1896); idem, Unters. Fauna Peru., Orn., p. 306, 1846—coast and "eastern slope of Cordilleras," Peru.

Hydrochelidon plumbea Lawrence, Ann. Lyc. Nat. Hist. N. Y., 7, p. 479, 1862—Lion Hill, Panama; Pelzeln, Reise Novara, Zool., 1, Vögel, p. 155, 1865—Chile (vicinity of Santiago).

Hydrochelidon fissipes (not *Sterna fissipes* Linnaeus) Sclater, Proc. Zool. Soc. Lond., 1867, pp. 337, 340—Chile (ex Pelzeln); idem and Salvin, l.c., 1871, p. 573—coasts of Cuba, British Honduras, and Chile; Gundlach, Journ. Orn., 23, p. 393, 1875—Cuba (north coast and Zapata marsh).

Hydrochelidon nigra (not *Sterna nigra* Linnaeus) Saunders, Proc. Zool. Soc. Lond., 1876, p. 642—part, America; Reed, Anal. Univ. Chile, 93, p. 211, 1896—Chile.

Hydrochelidon nigra surinamensis Zeledón, Anal. Mus. Nac. Costa Rica, 1, p. 133, 1887—Puntarenas, Costa Rica; Stone, Proc. Acad. Nat. Sci. Phila., 70, p. 244, 1918—Gatún, Panama; Ridgway, Bull. U. S. Nat. Mus., 50, (8), p. 532, 1919 (monog.; full bibliog.); Todd and Carriker, Ann. Carnegie Mus., 14, p. 180, 1922—Trojas de Cataca and Tierra Nueva, Colombia.

Hydrochelidon surinamensis Saunders, Cat. Bds. Brit. Mus., 25, p. 20, 1896—United States, Mexico, British Honduras (Cay Dolores Channel), Guatemala (Coban), and Peru (Callao Bay); Salvin and Godman, Biol. Centr.-Amer., Aves, 3, p. 398, 1903—Mexico (numerous localities), British Honduras (southern Water Cay, Curlew Cay, Cay Dolores Channel), Guatemala (Coban), Costa Rica (Puntarenas), and Panama (Lion Hill);

¹ The British Museum has a young bird of *Chlidonias hybrida hybrida* (Pallas) marked "Barbados," which was presented by Sir Robert H. Schomburgk who, however, did not include the species among the birds of that island in his History of Barbados, pp. 680–682, 1848. Cf. also Clark, Proc. Bost. Soc. N. H., 32, p. 259, 1905, s.n. *Hydrochelidon hybrida*, and Ridgway, Bull. U. S. Nat. Mus., 50, (8), p. 528, s.n. *H. leucopareia*. The evidence does not seem to be quite satisfactory.

Berlepsch, Nov. Zool., 15, p. 308, 1908 (no Cayenne record); Carriker, Ann. Carnegie Mus., 6, p. 414, 1910—Puntarenas, Costa Rica.

Chlidonias nigra surinamensis Bent, Bull. U. S. Nat. Mus., 113, p. 290, 1921 (life hist.); Chapman, Bull. Amer. Mus. N. H., 55, p. 185, 1926—coast of Manaví, Ecuador (Feb. 13); Wetmore, Sci. Surv. Porto Rico and Virgin Islands, 9, p. 385, 1927—Puerto Rico (San Juan; Cartagena Lagoon, Aug. 18 to Oct. 7); Grinnell, Univ. Calif. Pub. Zool., 32, p. 63, 1928—Lower California (transient); Wetmore and Swales, Bull. U. S. Nat. Mus., 155, p. 181, 1931—Saona Island, Hispaniola (Sept. 13); Bradlee, Proc. Bost. Soc. N. H., 39, p. 292, 1931—Bermuda Islands (Oct., 1876); Peters, Bull. Mus. Comp. Zool., 71, p. 302, 1931—Cricamola, Panama (Sept. 19); Hellmayr, Field Mus. Nat. Hist., Zool. Ser., 19, p. 408, 1932—Chile; Griscom, Bull. Amer. Mus. N. H., 64, p. 126, 1932—Ocos, Guatemala (Oct. 18); idem, Auk, 50, p. 300, 1934—Puerto Jiménez, Costa Rica (Sept. 29); Peters, Bds. World, 2, p. 328, 1934 (range); Griscom, Bull. Mus. Comp. Zool., 78, p. 309, 1935—Panama; Murphy, Ocean. Bds. S. Amer., 2, p. 1089, 1936 (monog.); Dickey and van Rossem, Field Mus. Nat. Hist., Zool. Ser., 23, p. 184, 1938—Lake Olomega, El Salvador (Sept. 4).

Range.—Breeds in North America from Alaska, Great Slave Lake, central Manitoba and Ontario to California, Nevada, Colorado, Kansas, northern Missouri and Tennessee, also in northern Ohio, northwestern Pennsylvania, and western New York; winters in South America to Surinam in the east and to Peru and Chile in the west.

Field Museum Collection.—113: Alberta (Many Island Lake, 1); Saskatchewan (Quill Lake, 1; Crane Lake, 1); California (Los Banos, 3; Los Angeles County, 2); Colorado (Fort Lyon, 1); Texas (Tivoli, 2); North Dakota (Nelson County, 10; Ramsey County, 9; Rolette County, 3; Towner County, 13); South Dakota (Harrison, 1); Kansas (Burlington, 1); Wisconsin (Beaver Dam, 6); Illinois (Lake County, 7; Cook County, 6; Cairo, 1); Ohio (Sandusky, 2); Quebec (Magdalen Islands, 1); Massachusetts (Monomoy Island, 2; Duxbury Beach, 1); Connecticut (New Haven County, 3); New York (Cayuga Lake, 1); North Carolina (Pea Island, Dare County, 20); Georgia (Montezuma, 1); Florida (Punta Rassa, 1; Lake Conday, 1; Palm Beach, 1; West Jupiter, 10); Mexico (Rio Lagartos, Yucatan, 1).

¹ Variouslly spelled *Phaetusa*, *Phaëtusa*, and *Phaethusa*.

tidal waters of Essequibo River and Rupununi River, British Guiana (nest and eggs).

Phaetusa chloripoda Ridgway, Bull. U. S. Nat. Mus., 50, (8), p. 541, 1919 (monog.; full bibliog.).

Phaethusa (magnirostris) chloropoda Reiser, Denks. Math.-Naturw. Kl. Akad. Wiss. Wien, 76, p. 240, 1923—northern Brazil (eggs and downy young descr.).

Phaetusa simplex chloropoda Wetmore, Bull. U. S. Nat. Mus., 133, p. 140, 1926—Rio Paraguay, Chaco (crit.; nomencl.); Friedmann, Bull. Mus. Comp. Zool., 68, p. 165, 1927—Bovril Islands, Santa Fé; Naumburg, Bull. Amer. Mus. N. H., 60, p. 75, 1930—Matto Grosso; Stone and Roberts, Proc. Acad. Nat. Sci. Phila., 86, p. 376, 1934—Descalvados, Matto Grosso; Peters, Bds. World, 2, p. 329, 1934 (range); Laubmann, Verh. Orn. Ges. Bay., 20, p. 261, 1934—Est. La Geraldina, Santa Fé (crit.); Pinto, Rev. Mus. Paul., 22, p. 148, 1938—Minas Geraes (Pirapora) and São Paulo (Iguapé, São Sebastião, Santos, Presidente Epitacio, Rio Paraná).

Phaetusa simplex simplex Peters, Bds. World, 2, p. 329, 1934 (range); Belcher and Smooker, Ibis, 1935, p. 294—Caroni Swamp, Trinidad (nest and eggs); Pinto, Rev. Mus. Paul., 22, p. 148, 1938—Amazonas (Rio Jurua, Manacapuru) and Bahia (Cidade da Barra); Gyldenstolpe, K. Svensk. Vetensk. Akad. Handl., (3), 23, p. 74, 1945—Cachuela Esperanza, El Beni, Bolivia (disc.).

Phaetusa simplex Murphy, Ocean. Bds. S. Amer., 2, p. 1090, 1936 (monog.).

Range.—Colombia, Venezuela, islands of Aruba and Trinidad, and the Guianas south through Amazonas, Brazil, eastern Bolivia, Paraguay, and eastern Argentina to the provinces of Córdoba and Buenos Aires;¹ Ecuador (Riobamba; Guayaquil; province de Los Rios); accidental in Cuba (Laguna del Centeno, May 28, 1910).

Field Museum Collection.—25: Ecuador (Isla Silva Sur, province de Los Rios, 4); Venezuela (Lake Valencia, Aragua, 8); Dutch West Indies (Aruba, 1); British Guiana (Mazaruni River, 1; Buxton, 6); Dutch Guiana (Braamspunt, 1); Brazil, Amazonas (Conceicao, 1; Serra Grande, Rio Branco, 2); Argentina (Concepción, Tucumán, 1).

¹The Large-billed Tern has been split by certain authors (Wetmore, Laubmann, Peters, Pinto) into two races, *P. s. simplex* and *P. s. chloropoda*, on the basis of the color of the upper parts. There is an undeniable tendency to a darker gray tone on hindneck, mantle, and tail in southern examples, but we find the difference to hold only when birds from the two extreme ends of the distributional area (Venezuela to lower Amazonia on one side, Argentina and Paraguay on the other) are compared, whereas the population of the enormous area of the Brazilian highlands is so variously intermediate that its assignation to one rather than the other race would be wholly arbitrary.

Additional material examined.—Venezuela, 6; British Guiana, 7; Trinidad, 2; Marajó, 3; Pará, 1; Piahy, 2; Pernambuco, 1; Bahia, 5; Rio de Janeiro, 3; São Paulo, 4; Santa Catharina, 2; Paraguay, 5; Buenos Aires, 3; Peru, 2.

Genus GELOCHELIDON C. L. Brehm

Gelochelidon C. L. Brehm, Isis, 23, col. 994, 1830—type, by monotypy, "*Gelochelidon meridionalis*" Brehm=*Sterna meridionalis* C. L. Brehm=*Sterna anglica* Montague.

Laropsis Wagler, Isis, 1832, col. 1225—type, by monotypy, *Sterna anglica* Montague.

****Gelochelidon anglica vanrossemei* Bancroft.¹ VAN ROSSEM'S GULL-BILLED TERN.**

Gelochelidon nilotica vanrossemei Bancroft, Trans. San Diego Soc. N. H., 5, p. 284, Dec. 10, 1929—Salton Sea, Imperial County, California (type in coll. of Donald R. Dickey, University of California at Los Angeles); Peters, Bds. World, 2, p. 330, 1934 (range).

Gelochelidon anglica (not *Sterna anglica* Montague) Salvin, Ibis, 1865, p. 190, 1866, p. 199—lagoon of Chiapám, Guatemala; Sclater and Salvin, Proc. Zool. Soc. Lond., 1871, p. 572—part, Chiapám; Lawrence, Bull. U. S. Nat. Mus., 4, p. 51, 1876—San Mateo, Tehuantepec, Oaxaca (Feb., Aug.); Saunders, Cat. Bds. Brit. Mus., 25, 1896—part, spec. b⁴, c⁴, Chiapám; Salvin and Godman, Biol. Centr.-Amer., Aves, 3, p. 400, 1903—part, Pacific coast of Mexico (San Mateo, Tehuantepec) and Guatemala (Chiapám).

Gelochelidon nilotica (not *Sterna nilotica* Gmelin)² Hartert, Nov. Zool., 9, p. 604, 1902—seashore near Vaqueria, province of Esmeraldas, Ecuador (Sept.); Ridgway, Bull. U. S. Nat. Mus., 50, (8), p. 479, 1919—part, Pacific coast of Mexico (Gulf of Tehuantepec, San Mateo), Guatemala (Chiapám), and Ecuador (Vaqueria); Murphy, Ocean. Bds. S. Amer., 2, p. 1092, 1936—part, Ecuadorian localities.

Gelochelidon nilotica aranea (not *Sterna aranea* Wilson) Chapman, Bull. Amer. Mus. N. H., 55, p. 185, 1926—Gulf of Jambeli (July 17–18), Vaqueria (Sept. 13), and Puná Island (Feb. 26), Ecuador; Grinnell, Univ. Calif. Pub. Zool., 32, p. 61, 1928—Cape San Lucas, Lower California (spec. lost); Griscom, Bull. Amer. Mus. N. H., 64, p. 126, 1932—part, Chiapám,

¹*Gelochelidon anglica vanrossemei* Bancroft; Similar in coloration to *G. a. aranea*, but decidedly larger in all dimensions. Wing, 303–315, (female) 280–295; tail, 107–123, (female) 102–114; bill, 40–43, (female) 39–41½; depth of bill at angle of gonys, 10½–11½; tarsus, 32–35.

Two birds from Pacific Guatemala (Chiapám) agree with Bancroft's measurements, being decidedly larger than specimens from eastern North America. A single adult from western Ecuador, however, hardly differs from the latter in size and depth of bill. Chapman (Bull. Amer. Mus. N. H., 55, p. 186) likewise insists on the resemblance of Ecuadorian birds to *aranea*, and his measurements (wing, 280–295; bill, 34–39) are apt to cast some doubt on the distinctness of the Pacific race, to which, if maintainable, those from Ecuador certainly ought to belong.

²*Sterna nilotica* Gmelin (Syst. Nat., 1, (2), p. 606, 1789; ex Hasselquist, Reise, p. 273, Egypt) is doubtful, being described as having flesh-colored feet besides other discrepancies, whereas *S. anglica* Montague (type, from Sussex, in the British Museum) is of unquestionable pertinence.

Guatemala; idem, Auk, 50, p. 299, 1934—Puerto Jiménez, Costa Rica (Sept. 29).

Range.—Breeds on Salton Sea, California, and probably on islands in the Gulf of California; winters on the Pacific coast of Mexico, Guatemala, Costa Rica, and Ecuador.

Field Museum Collection.—2: California (Salton Sea, Imperial County, 2).

****Gelochelidon anglica aranea* (Wilson).¹ AMERICAN GULL-BILLED TERN.**

World, 2, p. 330, 1934 (range); Pinto, Rev. Mus. Paul., 22, p. 149, 1938—part, Bóavista, Maranhão (Nov.), and Iguapé, São Paulo, Brazil.

Sterna anglica (not of Montague) Wied, Beitr. Naturg. Bras., 4, (2), p. 867, 1833—lakes of Marica and Sagoarema, Rio de Janeiro; Holland, Ibis, 1890, pp. 425, 428—Est. Espartillar, near Ranchos, Buenos Aires; idem, l.c., 1892, p. 212—Est. Espartillar.

Viralva aranea (not *Sterna aranea* Wilson) Darwin, Zool. Beagle, 3, Birds, p. 145, 1841—Bahia Blanca, province of Buenos Aires.

Sterna aranea Burmeister, Syst. Uebers. Th. Bras., 3, p. 452, 1856—Brazil (crit.); Pelzeln, Orn. Bras., 3, p. 325, 1870—Rio de Janeiro (July, Aug.).

Gelochelidon anglica Sclater and Salvin, Proc. Zool. Soc. Lond., 1871, p. 572—part, coast of Brazil; Saunders, Cat. Bds. Brit. Mus., 25, p. 25, 1896—part, spec. g⁴-n⁴, Demerara, Bahia, Santa Catharina, and Bahia Blanca; Holland, Ibis, 1897, p. 168—Santa Elena (near Media Luna), Buenos Aires (Oct. 12); idem, l.c., p. 286—Santa Elena (breeding; eggs descr.); Ihering, Rev. Mus. Paul., 3, p. 443, 1899—Rio Grande do Sul to Rio de Janeiro;

¹ No Trinidad specimens are available. Belcher and Smooker refer the Gull-billed Tern, which is stated to be a fairly common winter visitor on the island, to the Nearctic form, but the birds might just as well be wanderers from British Guiana (*G. a. grönvoldi*).

²*Gelochelidon anglica grönvoldi* Mathews differs from *G. a. aranea* by larger, deeper bill (depth at angle of gonys $9\frac{1}{2}$ -11 mm.), which in bulk, approaches that of *G. a. vanrossemi*. Wing, 300-320. Three specimens from Rio de Janeiro and two from Buenos Aires, indeed, have bulkier (deeper) bills than any we have seen from the United States, but run very close to certain European individuals. A single adult from Demerara, while not especially large-billed, appears to be nearer to *grönvoldi* than to *aranea*. *G. a. grönvoldi* breeds (in August) abundantly on Mexiana Island, Pará, and as it has also been found nesting by Holland at Santa Elena (near Media Luna) in Buenos Aires Province, other colonies doubtless exist on the coast of Brazil. The study of adequate series of breeding birds is required for the proper understanding of its characters.

Hagmann, Orn. Monatsber., 14, p. 106, 1906—Mexiana Island, Pará, Brazil (Aug. 18; eggs descr.); idem, Zool. Jahrb. (Syst.), 26, p. 45, 1907—Mexiana Island (eggs and downy young descr.); Ihering, Cat. Faun. Braz., 1, p. 39, 1907—lower Amazon (range); Berlepsch, Nov. Zool., 15, p. 309, 1908 (no Cayenne records); Hartert and Venturi, l.c., 16, p. 253, 1909—Barracas al Sud, Buenos Aires (Feb., Sept.); Scott and Sharpe, Rep. Princet. Univ. Exped. Patagonia, 2, Orn., p. 176, 1910—Bahia Blanca, Buenos Aires (Jan.); Grant, Ibis, 1911, p. 474—Luiconia, Ajó, Buenos Aires (March, Apr. 29), and Bellavista (Rio Paraná), Corrientes (Nov. 12); Hellmayr, Abhandl. Math.-phys. Kl. Bayr. Akad. Wiss., 26, No. 2, p. 122, 1912—Mexiana, Brazil; Snethlage, Bol. Mus. Goeldi, 8, p. 77, 1914—Marajó (Pacoval, Lago de Tapera, Dunas) and Amapá, Pará, Brazil.

Gelochelidon nilotica (not *Sterna nilotica* Gmelin) Dabbene, Anal. Mus. Nac. Buenos Aires, 18, p. 210, 1910—Est. Espartillar and estuary of La Plata, Buenos Aires; Ridgway, Bull. U. S. Nat. Mus., 50, (8), p. 479, 1919—part, Brazil and Argentina; Wetmore, Bull. U. S. Nat. Mus., 133, p. 136, 1926—Buenos Aires (Lake Epiquen [near Carhué] and Bahia Blanca, Jan.) and Uruguay (Carrasco, near Montevideo, Jan. 9); Murphy, Ocean. Bds. S. Amer., 2, p. 1092, 1936—part, Argentine localities.

Range.—Atlantic coast of South America from British Guiana (Blairmont; Demerara) south to Bahia Blanca, province of Buenos Aires, extending up the La Plata River to Bellavista, Corrientes (found breeding on Mexiana Island, Pará, Brazil, and at Santa Elena, near Media Luna, province of Buenos Aires).

Genus HYDROPROGNE Kaup

Hydroprogne Kaup, Skizz. Entw.-Gesch. Nat. Syst. Eur. Thierw., p. 91, 1829—type, by subs. desig. (G. R. Gray, Gen. Bds., 3, p. [658], 1846), *Sterna caspia* Pallas=*Sterna tschegrava* Lepechin.

Gylochelidon C. L. Brehm, Handb. Naturg. Vög. Deutschl., p. 767, 1831—type, by monotypy, *Sterna caspia* Pallas.

Helopus Wagler, Isis, 1832, col. 1224—type, by monotypy, *Sterna caspia* Pallas.

Pontochelidon Hogg, Edinb. New Phil. Journ., 41, pp. 55, 69, July, 1846—type, by subs. desig. (Mathews, Austr. Av. Rec., 2, p. 133, 1915), *Sterna caspia* Pallas.

**Hydroprogne tschegrava tschegrava* (Lepechin). CASPIAN TERN.

Sterna Tschegrava Lepechin, Novi Comment. Acad. Sci. Petrop., 14, (1), p. 500, pl. 13, fig. 2, 1770—Caspian Sea.

Sterna caspia Pallas, Novi Comment. Acad. Sci. Petrop., 14, (1), p. 582, pl. 22, fig. 2, 1770—Caspian Sea; Saunders, Proc. Zool. Soc. Lond., 1876, p. 656 (in part); Bent, Bull. U. S. Nat. Mus., 113, p. 202, 1921 (life hist.).

Thalasseus caspius Coues, Proc. Acad. Nat. Sci. Phila., 1862, p. 537 (monog.).

Thalasseus imperator Coues, Proc. Acad. Nat. Sci. Phila., 1862, p. 538 (in text)—North America (neither type nor type locality indicated).

Hydroprogne caspia Saunders, Cat. Bds. Brit. Mus., 25, p. 32, 1896 (monog.); Salvin and Godman, Biol. Centr.-Amer., Aves, 3, p. 401, 1903—Mexico (Mazatlan, Presidio); Ridgway, Bull. U. S. Nat. Mus., 50, (8), p. 461, 1919 (monog.; full bibliog.); Witherby, Brit. Bds., 34, p. 184, 1941—Lake Michigan (banded), Yorkshire, England (recovered); Miller, Condor, 45, p. 220, 1943—San Francisco Bay (note on colony).

Hydroprogne tschegrava imperator Mathews, Bds. Australia, 2, p. 337, 1912—North America (crit.);¹ Lincoln, Auk, 57, p. 569, 1940—Port au Prince, Haiti; Ludwig, Bds. Banding, Boston, 13, p. 1, 1942—Great Lakes (migration).

Hydroprogne caspia imperator Grinnell, Univ. Calif. Pub. Zool., 32, p. 62, 1928—Lower California (breeding at Scammons Lagoon); Hayward, Condor, 37, p. 140, 1935—Great Salt Lake, Utah (breeding); Oberholser, Bird Life Louisiana, p. 305, 1938—Louisiana (breeding).

Hydroprogne tschegrava tschegrava Peters, Bds. World, 2, p. 331, 1934 (range); van Rossem, Occ. Pap. Mus. Zool. Louisiana State Univ., 21, p. 93, 1945—Guaymas and lower Colorado River, Sonora.

Range.—Nearly cosmopolitan. Breeds in North America at Great Slave Lake, Klamath Lake, Great Salt Lake, in Lower California (Scammons Lagoon), Lakes Winnipeg and Winnipegosis in Manitoba, Lakes Michigan and Huron, north shore of Gulf of St. Lawrence, coast of Virginia, South Carolina, and the Gulf coast from Mississippi to Texas; winters from the South Atlantic and Gulf coasts to Mexico.

Field Museum Collection.—46: California (Moss Landing, 1); Texas (Cameron County, 6; Padre Island, 3; Corpus Christi, 5; Aransas County, 2; Seadrift, 4; Port Lavaca, 2); North Dakota (Nelson County, 1); Minnesota (Farm Island Lake, 1); Illinois (unspecified, 1); Louisiana (Buras, Plaquemines Parish, 2); Quebec (Magdalen Islands, 1); North Carolina, Dare County (Bodie Island, 11; Pea Island, 5); South Carolina (Mount Pleasant, 1).

Genus STERNA Linnaeus

Sterna Linnaeus, Syst. Nat., 10th ed., 1, p. 137, 1758—type, by tautonymy, "*Sterna*"=*Sterna hirundo* Linnaeus.

Sternula Boie, Isis, 1822, (1), col. 563, Mar., 1822—type, by monotypy, *Sterna minuta* Linnaeus=*Sterna albifrons* Pallas.

¹ American specimens are on average slightly larger than those from Europe, but for a bird of this size this trifling divergency is altogether too slight to justify the retention of *H. t. imperator*.

Chelido Billberg, Syn. Faun. Scand., 1, (2), p. 193, tab. A, 1828—substitute name for *Sterna* Linnaeus.

Onychoprion Wagler, Isis, 1832, col. 277—type, by monotypy, *Sterna serrata* Wagler (ex Forster MS.)=*Sterna fuscata* Linnaeus.

Planetis Wagler, Isis, 1832, col. 1222—type, by monotypy, *Sterna guttata* Wagler=*Sterna fuscata* Linnaeus.

Haliplana Wagler, Isis, 1832, col. 1224—type, by monotypy, *Sterna fuliginosa* Gmelin=*Sterna fuscata* Linnaeus.

Melanosterna Blyth, Journ. Asiat. Soc. Bengal, 15, p. 373, 1846—type, by monotypy, *Sterna Anaethetus* Scopoli.

Dipsaleon Gistel, Naturg. Thierr. für höhere Schulen, p. x, 1848—new name for *Planetis* Wagler.

**Sterna hirundinacea* Lesson. CASSIN'S TERN.

Sterna hirundinacea (Cuvier MS.) Lesson, Traité d'Orn., livr. 8, p. 621, 1831—"côtes du Brésil"—Santa Catharina (type in Paris Museum; cf. Pucheran, Rev. Mag. Zool., [2], 2, p. 539, 1850); Saunders, Proc. Zool. Soc. Lond., 1876, p. 647 (crit.; range); idem, l.c., 1877, p. 796—Messier Channel and Elizabeth Island, Straits of Magellan (breeding); Durnford, Ibis, 1877, p. 43—mouth of Chubut River, Patagonia; idem, l.c., 1878, p. 404—Lake Colguape, Rio Sengel, and Tombo Point, Chubut (breeding); Sharpe, Proc. Zool. Soc. Lond., 1881, p. 16—Tom Bay and Cockle Cove, Straits of Magellan; Saunders, l.c., 1882, p. 522—Callao Bay, Peru (Aug.), and Coquimbo Bay, Chile (Nov.); MacFarlane, Ibis, 1887, p. 208—Chimbote, Peru (Aug. 2-5); Ridgway, Proc. U. S. Nat. Mus., 12, p. 139, 1889—Elizabeth Island and Point Grappler, Straits of Magellan; Oustalet, Miss. Sci. Cap Horn, 6, p. B. 183, 1891—Orange Bay and Ushuaia, Tierra del Fuego; Aplin, Ibis, 1894, p. 210—coast off Montevideo, Uruguay; Reed, Anal. Univ. Chile, 93, p. 211, 1896—Chile; Saunders, Cat. Bds. Brit. Mus., 25, p. 52, 1896—Brazil (Bahia; Rio de Janeiro, May to Aug.; Santa Catharina), Argentina (80 miles south of Bahia Blanca; Chubut; Puerto Santa Cruz), Falkland Islands, Straits of Magellan, Chile (Coquimbo), and Peru (Callao Bay, Chimbote); Schalow, Zool. Jahrb., Suppl., 4, p. 658, 1898—Calbuco (Puerto Montt), Llanquihue (eggs descr.); Ihering, Rev. Mus. Paul., 3, p. 445, 1899—São Sebastião, São Paulo; Salvadori, Anal. Mus. Civ. Stor. Nat. Genova, 40, p. 630, 1900—Rio de la Plata (Aug. 21); Dabbene, Anal. Mus. Nac. Buenos Aires, 8, p. 380, 1902—Ushuaia, Tierra del Fuego; Vallentin, Mem. Proc. Manchester Lit. Phil. Soc., 48, No. 23, p. 41, 1902—Falkland Islands (breeding); Nicoll, Ibis, 1904, pp. 42, 43—Straits of Magellan (Punta Arenas, etc.); Clarke, Ibis, 1906, p. 177—Saddle and Laurie Islands, South Orkneys (breeding); Ihering, Cat. Faun. Braz., 1, p. 40, 1907—São Paulo (Iguapé, São Sebastião) and Patagonia (Santa Cruz); Hartert and Venturi, Nov. Zool., 16, p. 253, 1909—Isla de Lesner, mouth of Santa Cruz River, Patagonia; Dabbene, Anal. Mus. Nac. Buenos Aires, 18, p. 211, 1910—Patagonia (Santa Cruz), Tierra del Fuego, South Orkney Islands, and estuary of La Plata River; Scott and Sharpe, Rep. Princet. Univ. Exped. Patagonia, 2, Orn., p. 180, 1910—Patagonia (descr.; range); Brooks, Bull. Mus. Comp. Zool., 61, p. 147, 1917—Falkland Islands (breeding);

- Dabbene, El Hornero, 1, pp. 135, 138, 1918 (char.; range); Coker, Proc. U. S. Nat. Mus., 56, p. 459, 1919—San Gallán Island and Islas de Santa Rosa, Peru (breeding); Tremoleras, El Hornero, 2, p. 13, 1920—coast of Montevideo, Canelones, Maldonado, and Rocha, Uruguay; Bennett, l.c., p. 25, 1920—Falkland, South Shetland, and South Orkney Islands (breeding); Wace, l.c., p. 197, 1921—Falkland Islands; Paessler, Journ. Orn., 70, p. 443, 1922—Isla Santa María, Arauco, and Coronel, Chile (eggs descr.); Wetmore, Bull. U. S. Nat. Mus., 133, p. 138, 1926—below Cape San Antonio, Buenos Aires (Nov. 4); idem, Univ. Calif. Pub. Zool., 24, p. 426, 1926—San Antonio Oeste, Río Negro; Bennett, Ibis, 1926, p. 318—part, Falkland Islands; Hellmayr, Field Mus. Nat. Hist., Zool. Ser., 19, p. 405, 1932—Río Inio, Chiloé Island, Chile (range in Chile); Reynolds, Ibis, 1932, p. 36—Woodcock Island, Beagle Channel (breeding); Peters, Bds. World, 2, p. 332, 1934 (range); Reynolds, El Hornero, 5, p. 352, 1934—Isla de los Conejos and Yewin, Tierra del Fuego; idem, Ibis, 1935, p. 89—Cape Horn region (breeding); Ardley, Discovery Rep., 12, p. 373, 1936—South Orkney Islands; Murphy, Ocean. Bds. S. Amer., 2, p. 1094, 1936 (monog.; life hist.); Pinto, Rev. Mus. Paul., 22, p. 149, 1938—São Paulo (Iguapé, São Sebastião, Santos) and Patagonia (Santa Cruz); Philippi, Bol. Mus. Nac. Santiago, 16, p. 60, 1938—Arica, Tacna, Chile (crit.).
- Sterna hirundo* (not of Linnaeus) Wied, Beitr. Naturg. Bras., 4, (2), p. 865, 1833—Rio de Janeiro, Brazil (crit.); Bibra, Denks. Math.-Naturw. Kl. Akad. Wiss. Wien, 5, p. 132, 1853—Valparaíso Bay, Chile.
- Sterna acutirostris* Tschudi, Arch. Naturg., 9, (1), p. 389, 1843—"in Oceani Pacifici littoribus"—coast of Peru (type in Neuchâtel Museum); idem, Unters. Fauna Peru., Orn., p. 305, 1846—"highlands of Peru" (error!).
- Sterna antarctica* (not of Lesson, 1831) Peale, U. S. Expl. Exp., 8, p. 280, 1848—Orange Bay, "Cape Horn"—Tierra del Fuego (cotypes in U. S. National Museum and in Museum of Comparative Zoology, Cambridge, Mass.; cf. Bangs, Bull. Mus. Comp. Zool., 70, p. 174, 1930); Philippi, Anal. Univ. Chile, 31, p. 289, 1868—Straits of Magellan to Valdivia.
- Sterna wilsonii* (not of Bonaparte) Burmeister, Syst. Uebers. Th. Bras., 3, p. 451, 1856—coast of Brazil.
- Sterna meridionalis* (not of Brehm, 1824) Cassin, U. S. Expl. Exp., Mamm. Orn., p. 385, 1858—Orange Bay, "Cape Horn" (substitute name for *Sterna antarctica* Peale); Schlegel, Mus. Pays-Bas, livr. 5, Sternae, p. 15, 1864—Falkland Islands and Chile (crit.).
- Sterna aranea* (not of Wilson) Germain, Proc. Bost. Soc. N. H., 7, p. 314, 1860—Chiloé Island, Chile (breeding habits).
- Sterna cassinii* Scater, Proc. Zool. Soc. Lond., 28, p. 391, 1860—Falkland Islands (substitute name for *Sterna antarctica* Peale and *S. meridionalis* Cassin, preoccupied); Abbott, Ibis, 1861, p. 166—Falkland Islands (breeding); Pelzeln, Reise Novara, Zool., 1, Vögel, pp. 153, 163, 1865—Chiloé Island, Chile; Scater, Proc. Zool. Soc. Lond., 1867, pp. 336, 340—Chile; idem and Salvin, Ibis, 1869, p. 284—Santiago Bay, Straits of Magellan (Dec. 7); idem, l.c., 1870, p. 500—Coquimbo, Chile; idem, Proc. Zool. Soc. Lond., 1871, p. 570—Falkland Islands, coast of Brazil (Santa Catharina), and Chile north to Valdivia.

Sterna Trobeni (sic) Philippi and Landbeck, Anal. Univ. Chile, 19, p. 613, 1861—Arica, Tacna, Chile (=winter plumage; type in National Museum, Santiago de Chile; cf. Philippi, Bol. Mus. Nac. Santiago, 16, p. 60, 1938).

Sterna frobeenii Philippi and Landbeck, Arch. Naturg., 29, (1), p. 125, 1863—Arica Bay, Chile (German version of orig. descr.); Philippi,¹ Anal. Univ. Chile, 31, p. 289, 1868—Valparaíso and Arica, Chile; Landbeck,² l.c., 41, p. 515, 1872—Arica and Corral (Valdivia), Chile (crit.); idem,² Arch. Naturg., 40, (1), p. 113, 1874 (German version); Philippi,¹ Anal. Mus. Nac. Chile, 15, p. 100, pl. 47, fig. 2, 1902—Arica (disc. of type).

Range.—Breeds on both coasts of South America from middle Peru (San Gallán Island, Pisco Bay) and the Patagonian coast of Argentina (north at least to the mouth of the Chubut River) south to Tierra del Fuego, also in the Falkland Islands;³ winters north to Chimbote, Peru, and the bay of Bahia, Brazil.

Field Museum Collection.—3: Chile (Rio Inio, Chiloé Island, 1); Argentina (Quilmes, Buenos Aires, 1; Puerto Deseado, Santa Cruz, 1).

****Sterna hirundo hirundo* Linnaeus. COMMON TERN.**

Sterna hirundo Linnaeus, Syst. Nat., 10th ed., 1, p. 137, 1758—based principally on Fauna Svec., No. 127, Europe, restricted type locality, Sweden (cf. Lönnberg, Ibis, 1913, pp. 301–303); Hartert, Ibis, 1893, pp. 309, 326, 337—Aruba, Curaçao, and Bonaire (crit.); idem, Nov. Zool., 9, p. 309, 1902—Aruba and Bonaire; Cory, Field Mus. Nat. Hist., Orn. Ser., 1, p. 194, 1909—Aruba (crit.); Stone, Proc. Acad. Nat. Sci. Phila., 70, p. 244, 1918—Gatún Lake, Panama; Chubb, Ibis, 1919, p. 257—Lima, Peru (June 22); Ridgway, Bull. U. S. Nat. Mus., 50, (8), p. 493, 1919 (monog.; full bibliog.); Bent, l.c., 113, p. 236, 1921 (life hist.); Chapman, Bull. Amer. Mus. N. H., 55, p. 186, 1926—Jambeli Island, Ecuador (July, Nov.); Grinnell, Univ. Calif. Pub. Zool., 32, p. 63, 1928—Lower California (winter); Griscom, Bull. Amer. Mus. N. H., 64, p. 127, 1932—Puerto Barrios, Guatemala (Aug. 21); Clark, Auk, 61, p. 474, 1944—Ohio.

Sterna fluviatilis Naumann, Isis, 1819, col. 1847—rivers of Germany; Saunders, Cat. Bds. Brit. Mus., 25, p. 54, 1896—many localities from North America, Grenada (Sept. 14), Cayenne, Brazil (Bahia), and Guatemala (San José); Salvin and Godman, Biol. Centr.-Amer., Aves, 3, p. 403, 1903—San José, Guatemala (Dec. 8); Ihering, Cat. Fauna Braz., 1, p. 40, 1907—Bahia; Berlepsch, Nov. Zool., 15, p. 309, 1908—Cayenne.

Sterna wilsoni Bonaparte, Geog. Comp. List Bds., p. 61, 1838—based on *Sterna hirundo* Wilson, Amer. Orn., 7, p. 76, pl. 60, fig. 1, 1813, eastern

¹ Spelled *frobei*.

² Spelled *frobeii*.

³ Records from the South Shetland and South Orkney Islands are due to confusion with races of *S. vittata* (cf. Murphy, Ocean. Bds. S. Amer., 2, pp. 1095, 1105, 1936).

United States; Bryant, Proc. Bost. Soc. N. H., 7, p. 134, 1859—Bahama Islands; Pelzeln, Orn. Bras., 3, p. 325, 1870—Rio de Janeiro (July).

Sterna fluviatilis (an subsp.?) Hellmayr, Nov. Zool., 13, p. 55, 1906—Seelet, Trinidad.

Sterna hirundo hirundo Wetmore, Sci. Surv. Porto Rico and Virgin Islands, 9, p. 379, 1927—Puerto Rico (Johuda Bay, Aug. 28; near Cabo Rojo, March 4 to Oct. 29); idem and Swales, Bull. U. S. Nat. Mus., 155, p. 175, 1931—Hispaniola (several records); Bradlee and Eaton, Proc. Bost. Soc. N. H., 39, p. 290, 1931—Bermuda Islands (visitant); Peters, Bds. World, 2, p. 332, 1934 (range); Griscom, Bull. Mus. Comp. Zool., 78, p. 309, 1935—Canal Zone, Panama (two records); Belcher and Smooker, Ibis, 1935, p. 295—Trinidad (winter visitant); Murphy, Ocean. Bds. S. Amer., 2, p. 1098, 1936 (monog.; range); Pinto, Rev. Mus. Paul., 22, p. 149, 1938 (range); Oberholser, Bird Life Louisiana, p. 293, 1938 (breeding); Palmer, Auk, 58, p. 164, pl. 7, 1941 (immature plumages); Williams, l.c., 59, p. 578, 1942—Bear River, Utah; Nichols and Bond, Mem. Soc. Cub. Hist. Nat., 17, p. 31, 1943—Virgin Islands (nesting); Peters and Burleigh, Auk, 62, p. 565, 1945—Newfoundland (nesting).

Range.—Breeds in North America from Great Slave Lake, northern Manitoba, central Ontario, Newfoundland, and the north shore of the Gulf of St. Lawrence south locally to the Gulf of Mexico and southeastern Atlantic coasts, and the Florida keys, also Virgin Islands (Little Flat Cay); winters from Lower California and Florida south to the coasts of Ecuador and Peru (Lima) and on the Caribbean and Atlantic coasts of northern and eastern South America to Rio de Janeiro, Brazil, and even to the coast of Patagonia (Puerto Deseado, Santa Cruz).¹

Field Museum Collection.—173: Alberta (Walsh, 1); Saskatchewan (Quill Lake, 16; Maple Creek, 1); California (Eureka, 4; Pacific Grove, 1; Pacific Beach, 3); North Dakota (Benson County, 10; Nelson County, 13; Ramsey County, 3; Rolette County, 1); Wisconsin (Beaver Dam, 1); Illinois (Lake County, 3; Cook County, 6); Michigan (Iosco County, 1); Labrador (Kagaskka, 1); Quebec (Magdalen Islands, 4); New Brunswick (Grand Manan Island, 1); Nova Scotia (Pictou, 1; Clark's Harbor, 4; Seabright, 4; Dover, 1); Prince Edward Island (Malpeque, 5); Massachusetts (Yarmouth, 3; Chatham, 6; Monomoy Island, 22; Woepecket Island, 6); Rhode Island (Dyer Island, 1); Connecticut (New Haven County, 2); New York (Plum Island, 1; Shelter Island, 26; Napeague Harbor, 2; Suffolk County, 2); Virginia (Cobb's Island, 2); North Carolina (Pea Island, Dare County, 5); Florida (Amelia Island, 1; West Jupiter,

¹ No certain breeding record exists for any South American locality. Birds observed during the summer months in these countries were probably barren individuals lacking the physiological impulse to migrate.

1); Virgin Islands (St. Croix, 1); Mexico (Altamira, Tamaulipas, 3; Rio Lagartos, Yucatan, 1); Dutch West Indies (Aruba, 1); British Guiana (Kartabo, 1); Peru (Talara, 1).

****Sterna paradisaea* Pontoppidan. ARCTIC TERN.**

Sterna paradisaea Pontoppidan, Danske Atlas, 1, p. 622, 1763—no locality stated=Christiansoë, Denmark (cf. Brünnich, Orn. Bor., p. 46, 1764);¹ Ridgway, Bull. U. S. Nat. Mus., 50, (8), p. 499, 1919 (monog.; full bibliog.); Bent, l.c., 113, p. 249, 1921 (life hist.); Chapman, Bull. Amer. Mus. N. H., 55, p. 187, 1926—Tumbez, Peru (ex Taczanowski); Hellmayr, Field Mus. Nat. Hist., Zool. Ser., 19, p. 406, 1932—Arica (Oct. 4) and Valdivia, Chile; Peters, Bds. World, 2, p. 333, 1934 (range); Murphy, Ocean. Bds. S. Amer., 2, p. 1099, 1936 (monog.; life hist.); idem, Amer. Mus. Nov., 977, p. 6, 1938 (disc.; char.); Bray, Auk, 60, p. 529, 1943—Foxye Basin (nesting); Porsild, Canad. Field Nat., 57, p. 30, 1943—Mackenzie Delta (nesting); Eklund, Auk, 61, p. 648, 1944—Greenland (nesting); Soper, l.c., 63, p. 237, 1946—Baffin Island (nesting).

Sterna macrura Naumann, Isis, 1819, col. 1847—Island of Nordstrand, coast of Schleswig, Germany; Saunders, Proc. Zool. Soc. Lond., 1876, p. 650—off Bahia, Brazil (crit.; range); MacFarlane, Ibis, 1887, p. 203—Arica, Tacna, Chile (Oct. 4); Saunders, Cat. Bds. Brit. Mus., 25, p. 62, 1896 (monog.); Winge, Medd. Grønl., 21, p. 204, 1898—Greenland; Ihering, Cat. Faun. Braz., 1, p. 40, 1907 (range); Clarke, Ibis, 1907, p. 345—Weddell Sea (wintering); Manniche, Medd. Grønl., 45, No. 1, p. 170, 1910—northeastern Greenland (breeding habits); Løppenthin, l.c., 91, No. 6, pp. 77, 123, 1932—Sand Island and Loch Fine, Greenland (nomencl.; meas.; breeding habits); Pedersen, l.c., 100, No. 11, pp. 7, 25, 1934—northeastern Greenland (breeding); Bird and Bird, Ibis, 1941, p. 150—eastern Greenland (range).

Sterna arctica Temminck, Man. d'Orn., 2nd éd., 2, p. 742, Oct., 1820—"les régions du cercle arctique" (no type extant);² Philippi, Anal. Univ. Chile, 31, p. 289, 1868—province of Valdivia, Chile.

Sterna coccineirostris Reichenbach, Vollst. Naturg. Schwimmvögel, pl. 271, fig. 2262 (=Novit. viii=xxiic), 1836—"Mexico" (location of type not stated).

Sterna pikei Lawrence, Ann. Lyc. Nat. Hist. N. Y., 6, p. 3, April, 1853—vicinity of Monterey, California (type lost, formerly in coll. of Geo. N. Lawrence; cf. Grinnell, Univ. Calif. Pub. Zool., 38, p. 273, 1932); Coues, Proc. Acad. Nat. Sci. Phila., 1862, p. 550 (disc. of type; crit.).

¹ Cf. Hartert, Vög. Pal. Fauna, Nachtrag 1, p. 85, 1923. Løppenthin (Medd. Grønl., 91, No. 6, p. 77, note 1, 1932), however, considers the name *S. paradisaea* to be of questionable applicability.

² Temminck states that three specimens received through Mr. Sabine from Baffin's Bay and Davis Straits do not differ from others shot in Scotland and on the coast of England. None of these appear to exist nowadays in the Leyden Museum (cf. Schlegel, Mus. Pays-Bas, livr. 5, Sternæ, p. 15, 1864, s.n. *S. paradisaea*).

Sterna atrofasciata Philippi and Landbeck, Anal. Univ. Chile, 21, p. 440, Nov., 1862—Laguna de Vichuquen, Curicó, Chile (type in National Museum, Santiago; cf. Gigoux and Looser, Bol. Mus. Nac. Santiago, 13, p. 30, 1930); iidem, Arch. Naturg., 29, (1), p. 204, 1863—Llico, near the lagoon of Vichuquen, "Colchagua" (German version of orig. descr.); Philippi, Anal. Mus. Nac. Chile, 15, p. 102, pl. 47, fig. 1, 1902—Laguna of Vichuquen (=young).¹

Sterna macroura Coues, Proc. Acad. Nat. Sci. Phila., 1862, p. 549 (monog.); Taczanowski, Proc. Zool. Soc. Lond., 1877, p. 749—Tumbez, Peru (Sept. 19).

Sterna portlandica Ridgway, Amer. Nat., 8, No. 7, p. 433 (in text), July, 1874—Portland Harbor, Maine (type in U. S. National Museum); idem, l.c., 9, pp. 54, 55, 1875 (crit.); Brewster, Ann. Lyc. Nat. Hist. N. Y., 11, p. 201, 1876 (crit.;=immature).

Sterna macrura antistrophe Reichenow, Orn. Monatsber., 12, No. 3, p. 47, March, 1904—"coasts of the Antarctic continent"—Posadowsky Gulf, Lat. 66° S., [Long. 91° W.]² (type in Berlin Museum); Clarke, Ibis, 1907, p. 347 (crit.); Reichenow, Deuts. Südpolar Exp., 9, p. 463, 1908 (fig. of head).

Sterna paradisea Dabbene, El Hornero, 1, pp. 135, 138, 1918 (char.; range); Pinto, Rev. Mus. Paul., 22, p. 150, 1937 (range).

Range.—Circumpolar. Breeds in North America from the Arctic coast of Alaska, Parry Islands, northern Ellesmere Land, and northern Greenland south to the Aleutian Islands, northern British Columbia, lower Slave River, northern Manitoba, and Massachusetts; winters in the Antarctic Ocean;³ accidental on the coasts of Peru (Tumbez), Chile (Arica, Tacna; Laguna of Vichuquen, Curicó; Valdivia), and Brazil (off Caravellas, Bahia).

Field Museum Collection.—54: Alaska (Barrow, 5; Point Hope, 1; Nome, 5; St. Michaels, 7; Bethel, 1; Yukon River, 1; Stewart Island, 1; Skagway, 1; Taku Glacier, 1); Yukon Territory (Tagish Lake, 4); Arctic Canada (Cumberland Sound, 1; Whale Point, Hudson Straits, 1); Manitoba (Churchill, 1); Greenland (Godthaab, 1; Godhavn, 1; Egedesminde, 2; Sukkertoppen, 9; Musk-Ox Fjord, 1; Scoresby Sound, 1); Labrador (at sea, 1); California (Pacific Grove, 1; Moss Landing, 1); North Dakota (Nelson County, 1); Massachusetts (Chatham, 4; Muskeget Island, 1).

¹ *S. atrofasciata*, after all, seems to have been based upon a young Arctic Tern, since it is *S. frobeni* that proved to be *S. hirundinacea*.

² Cf. Reichenow, Sitzungsber. Gesells. Naturf. Freunde Berlin, 1904, No. 8, p. 172, Oct., 1904.

³ Birds wintering in the Antarctic were erroneously supposed to belong to a breeding race (*S. m. antistrophe* Reichenow). Cf. Murphy, Amer. Mus. Nov., 977, pp. 3-4, 1938.

***Sterna vittata georgiae* Reichenow.¹ SOUTH GEORGIA TERN.**

Sterna vittata georgiae Reichenow, Orn. Monatsber., 12, No. 3, p. 47, March, 1904—South Georgia (type in Berlin Museum); Lönnberg, Svensk. Vetensk. Akad. Handl., 40, No. 5, p. 64, 1906—South Georgia (crit.; habits); Dabbene, Anal. Mus. Nac. Buenos Aires, 18, p. 211, 1910—South Georgia; idem, El Hornero, 1, pp. 135, 138, 1918—part, South Georgia (char.); Wilkins, Ibis, 1923, p. 490—South Georgia; Mathews, Discovery Rep., 1, p. 582, pl. 54, fig. 2, 1929—South Georgia (nesting); Peters, Bds. World, 2, p. 333, 1934—part, South Georgia; Murphy, Ocean. Bds. S. Amer., 2, p. 1109, 1936—South Georgia (monog.; life hist.); (?)Ardley, Discovery Rep., 12, p. 373, 1936—South Orkneys (nesting); Pinto, Rev. Mus. Paul., 22, p. 150, 1938 (range); Murphy, Amer. Mus. Nov., 977, p. 12, 1938—South Georgia (char.; meas.).

Sterna vittata (not of Gmelin) (?)Saunders, Cat. Bds. Brit. Mus., 25, p. 51, 1895—part, spec. n., at sea, 147 miles southeast of Imbituba, Santa Catharina, Brazil (July); (?)Ihering, Cat. Faun. Braz., 1, p. 40, 1907—off coast of Santa Catharina, Brazil (ex Saunders); Bennett, Ibis, 1931, p. 13—South Georgia (breeding); Eklund, Proc. Amer. Phil. Soc., 89, No. 1, p. 304, 1945—Palmer Land (70° 04' S.—68° W.).

Range.—Breeds in South Georgia; (?)accidental off the Brazilian coast (147 miles southeast of Imbituba, Santa Catharina).²

***Sterna vittata gaini* Murphy.³ GAIN'S TERN.**

Sterna vittata gaini Murphy, Amer. Mus. Nov., 977, p. 13, May 4, 1938—Deception Island, South Shetlands (type in the American Museum of Natural History, New York).

Range.—Breeds in the South Shetlands and probably other islands in the West Antarctic Archipelago.⁴

****Sterna trudeaui* Audubon. TRUDEAU'S TERN.**

Sterna trudeaui(i) Audubon, Bds. Amer., fol. ed., 4, pl. 409, fig. 2, 1838; idem, Orn. Biog., 5, p. 125, 1839—"Great Egg Harbor in New Jersey";⁵

¹ *Sterna vittata georgiae* Reichenow differs from the extralimital nominate race (type locality, Kerguelen Island) by smaller bill, legs, and feet, and lesser development of the streamers of the outer rectrices. Wing, 246–270, (female) 255–266; tail, 123–137, (female) 121–134; bill, 30–33, (female) 28½–30½; tarsus, 16–18.

² This specimen possibly pertains to *S. v. tristanensis* Murphy (Amer. Mus. Nov., 977, p. 9, 1938—Tristan d'Acunha).

³ *Sterna vittata gaini* Murphy: Similar to *S. v. georgiae*, but larger in all dimensions. Wing (male), 277–284; tail, 146–157; bill, 35–37; tarsus, 18–19.

⁴ The breeding race of the South Orkney Islands (*S. v. georgiae* of Dabbene, El Hornero, 1, p. 138, 1918; Peters, Bds. World, 2, p. 333, 1934) is in doubt. Cf. Murphy, Amer. Mus. Nov., 977, p. 12, 1938.

⁵ There is some uncertainty about the present location of the type. Audubon, in describing the species, says: "The individual obtained was in company of a few

Des Murs, in Gay, Hist. Fís. Pol. Chile, Zool., 1, p. 284, 1847—Chile (ex Gray); Lawrence, in Baird, Rep. Expl. Surv. R. R. Pac., 9, p. 861, 1858—"coasts of New Jersey and Long Island" (descr.); Coues, Proc. Acad. Nat. Sci. Phila., 1862, p. 542 (monog.); Schlegel, Mus. Pays-Bas, livr. 5, Sternæ, p. 29, 1864—Brazil (crit.); Philippi, Anal. Univ. Chile, 31, p. 289, 1868—coasts of Santiago and Colchagua, Chile; Sclater and Salvin, Proc. Zool. Soc. Lond., 1871, p. 570—coast of Brazil and Chile (crit.); Landbeck, Anal. Univ. Chile, 41, p. 515, 1872—Chile (crit.); idem, Arch. Naturg., 40, (1), p. 113, 1874—Chile (crit.); Saunders, Proc. Zool. Soc. Lond., 1876, p. 660—southern Brazil, Argentina, and Chile (crit.); Durnford, Ibis, 1877, p. 200—Flores Island (La Plata), Punta Lara, and Montevideo; Holland, l.c., 1890, pp. 425, 428—Est. Espartillar, Buenos Aires (breeding; eggs descr.); idem, l.c., 1892, p. 212—Est. Espartillar (Sept. to Feb.; breeding; eggs descr.); Reed, Anal. Univ. Chile, 93, p. 211, 1896—Chile; Saunders, Cat. Bds. Brit. Mus., 25, p. 130, 1896—Brazil (Rio de Janeiro, Aug.; Santa Catharina, Aug.), Uruguay (Maldonado, Jan.), Argentina (Punta Lara, Oct.; Buenos Aires, Sept., Nov.; Ajó), and Chile; Ihering, Cat. Faun. Braz., 1, p. 42, 1907—São Paulo (São Sebastião) and Argentina (Buenos Aires; Santa Cruz, Patagonia); Hartert and Venturi, Nov. Zool., 16, p. 253, 1909—Barracas al Sud and Est. San Martín Monte, Buenos Aires; Dabbene, Anal. Mus. Nac. Buenos Aires, 18, p. 211, 1910—"Chaco Austral" and estuary of Rio de la Plata; Scott and Sharpe, Rep. Princet. Univ. Exped. Patagonia, 2, Orn., p. 190, 1910 (descr.); Grant, Ibis, 1911, p. 473—Los Yngleses, Luiconia, and Tuyú, Ajó, Buenos Aires; Dabbene, El Hornero, 1, pp. 134, 137, 1918 (char.; range); Ridgway, Bull. U. S. Nat. Mus., 50, (8), p. 488, 1919 (monog.; full bibliog.); Tremoleras, El Hornero, 2, p. 13, 1920—coasts of Montevideo, Canelones, and Maldonado, Uruguay; Gibson, Ibis, 1920, p. 75—Cape San Antonio, Buenos Aires (breeding habits); Bent, Bull. U. S. Nat. Mus., 113, p. 227, 1921—Argentina (La Plata to Punta Arenas), Brazil, and "St. Ambrose Island," Chile (life hist.; eggs descr.); Daguerre, El Hornero, 2, p. 261, 1922—Rosas, Buenos Aires; Serié and Smyth, l.c., 3, p. 40, 1923—Santa Elena, Entre Ríos; Pereyra, l.c., p. 162, 1923—Zelaya, Buenos Aires; Wilson, l.c., p. 351, 1926—Venado Tuerto, Santa Fé; Wetmore, Bull. U. S. Nat. Mus., 133, p. 137, 1926—Buenos Aires (near Lavallo, Dolores) and Uruguay (near Carrasco; La Paloma, Rocha; Laguna Castillos, below San Vicente) (habits; soft parts); Friedmann, Bull. Mus. Comp. Zool., 68, p. 164, 1927—Santa Elena, Entre Ríos; Hellmayr, Field Mus. Nat. Hist., Zool. Ser., 19, p. 404, 1932—Chile (excl. of syn. *S. frobeni*); Peters, Bds. World, 2, p. 334, 1934 (range); Murphy, Ocean. Bds. S. Amer., 2, p. 1114, 1936 (monog.; life hist.); Pinto, Rev. Mus. Paul., 22, p. 151, 1938—São Paulo (São Sebastião),

others of the same kind." Both Lawrence (in Baird, Rep. Expl. Surv. R. R. Pac., 9, p. 861, 1858) and Coues (Proc. Acad. Nat. Sci. Phila., 1862, p. 542) described "a typical specimen" in the collection of J. P. Giraud "supposed to be also the original of Audubon's plate and description" (Coues). This example is stated by Orton (Amer. Nat., 4, p. 716, 1871) to be in the collection of Vassar College, Poughkeepsie, N. Y., and would seem to have ample claims for being the real type. Still, Ridgway (1919, p. 489) lists the type, though with a question mark, as being in the U. S. National Museum.

Patagonia (Santa Cruz), and Buenos Aires; Barros, Rev. Chil. Hist. Nat., 44, p. 130, 1940 (migration and other habits).

Thalasseus Trudeaui G. R. Gray, List Spec. Bds. Brit. Mus., 3, p. 176, 1844—Chile.

Range.—Breeds in province of Buenos Aires (Est. Espartillar, Cape San Antonio, district of Ajó); occurs on the Chilean coast from Valparaíso¹ to the Straits of Magellan (Punta Arenas) and on the Atlantic coast of South America north to Rio de Janeiro, and extends along the La Plata River inland to provinces of Santa Fé and Entre Ríos.²

Field Museum Collection.—1: Brazil (Santa Catharina, 1).

****Sterna forsteri* Nuttall. FORSTER'S TERN.**

Sterna forsteri Nuttall, Man. Orn. U. S. and Canada, 2, p. 274 (note), 1834—based on *Sterna hirundo* (not of Linnaeus) Swainson and Richardson, Fauna Bor.-Amer., 2, "1831," p. 412, pub. Feb., 1832, banks of the Saskatchewan between Cumberland House and Lake Winnipeg, Manitoba (no type extant); Coues, Proc. Acad. Nat. Sci. Phila., 1862, p. 544 (monog.); Sclater and Salvin, Proc. Zool. Soc. Lond., 1871, p. 569—Guatemala (Lake Dueñas) and Brazil (300 miles off Pernambuco); Saunders, l.c., 1876, p. 651 (monog.); idem, Cat. Bds. Brit. Mus., 25, p. 46, 1896—North America, Lower California (La Paz), Oaxaca (Tehuantepec), Guatemala (Lake of Dueñas), and Brazil (200–300 miles off Pernambuco); Salvin and Godman, Biol. Centr.-Amer., Aves, 3, p. 402, 1903—Mexico (Mazatlan, San Mateo, Ventosa Bay, Tehuantepec) and Guatemala (Lake of Dueñas); Ridgway, Bull. U. S. Nat. Mus., 50, (8), p. 490, 1919 (monog.; full bibliog.); Bent, l.c., 113, p. 229, 1921 (life hist.); Grinnell, Univ. Calif. Pub. Zool., 32, p. 63, 1928—Lower California; Griscom, Bull. Amer. Mus. N. H., 64, p. 127, 1932—Lake of Dueñas, Guatemala; Peters, Bds. World, 2, p. 334, 1934 (range); Pinto, Rev. Mus. Paul., 22, p. 150, 1938 (range); van Rossem, Occ. Pap. Mus. Zool. Louisiana State Univ., 21, p. 93, 1945—Sonora, Mexico (winter visitant).

Sterna havelli Audubon, Bds. Amer., folio ed., pl. 409, fig. 1, 1838; idem, Orn. Biog., 5, p. 122, 1839—opposite New Orleans, Louisiana (descr. of winter plumage; type in U. S. National Museum?);³ Coues, Proc. Acad. Nat. Sci. Phila., 1862, p. 543 (crit.).

Range.—Breeds locally in the interior of North America from Washington, Alberta, Manitoba, and western Ontario (formerly) south to California, Great Salt Lake, Colorado, northern Nebraska,

¹ The breeding on San Ambrosio Island, as reported by Bent, is open to doubt (cf. Murphy, Ocean. Bds. S. Amer., 2, p. 1115, 1936).

² Audubon's original locality, "Great Egg Harbor, New Jersey," is open to doubt.

³ Oberholser appears to have seen the type, but does not state the collection where it is preserved.

Minnesota, and northern Illinois; also on the coasts of Virginia, Louisiana, and Texas;¹ winters from southern California, the Gulf coast and South Carolina to Guatemala; accidental off the coast of Brazil (200–300 miles from Pernambuco).

Field Museum Collection.—86: Alberta (Walsh, 1); California (Redwood, 3; Moss Landing, 1; Los Banos, 8; Hyperion, 5; Los Angeles, 1; Los Angeles County, 3; Sunset Beach, 6; San Diego Bay, 2; San Diego, 1; Pacific Beach, 1); Texas (Cameron County, 4; Corpus Christi, 6; Port Lavaca, 1; Tivoli, 2); North Dakota (Ramsey County, 3); Illinois (Cook County, 1); Indiana (Miller, 1; Michigan City, 1); Louisiana (Buras, 1); Mississippi (Ocean Springs, 1); Virginia (Cobb's Island, 8); North Carolina, Dare County (Pea Island, 15; Hatteras, 2); South Carolina (Mount Pleasant, 2); Florida (Pilot Town, 1; Punta Rassa, 1; Amelia Island, 2; Santa Rosa County, 2).

****Sterna dougallii dougallii* Montagu. ROSEATE TERN.**

*Sterna Dougallii*² Montagu, Orn. Dict. Suppl., unpagcd text and plate, 1813—Cumbrey Islands, Firth of Clyde, Scotland (cotypes in British Museum [cf. Saunders, Cat. Bds. Brit. Mus., 25, p. 73, 1896] and in Liverpool Museum [cf. Forbes and Robinson, Bull. Liverpool Mus., 2, p. 54, 1899]); Sundevall, Oefvers. Vetensk. Akad. Handl., 26, p. 589, 1869—St. Bartholomew; Selater and Salvin, Proc. Zool. Soc. Lond., 1871, p. 571—coast of Cuba, St. Bartholomew, Belize, and Trinidad; Saunders, l.c., 1876, p. 652—part, Europe and America (crit.); Cory, Auk, 8, pp. 46, 48, 351, 1891—Antigua, Guadeloupe, and Inagua (Bahama Islands) (crit.); idem, Cat. W. Ind. Bds., p. 82, 1892—Bahama Islands (New Providence, Great Inagua), Cuba, Jamaica, Puerto Rico, St. Bartholomew, Antigua, Guadeloupe, Dominica, Martinique, and Grenada; Hartert, Ibis, 1893, p. 310—Aruba (breeding; crit.); Saunders, Cat. Bds. Brit. Mus., 25, p. 70, 1896—part, spec. a–h, i'–z", Great Britain, Madeira, United States, British Honduras (Grassy Cay), Antigua, Guadeloupe, and St. Vincent; Hartert, Nov. Zool., 9, p. 308, 1902—Aruba (breeding; crit.); Salvin and Godman, Biol. Centr.-Amer., Aves, 3, p. 404, 1903—Mexico (Ventosa Bay, Tehuantepec) and British Honduras (Belize, Grassy Cay); G. M. Allen, Auk, 22, p. 117, 1905—Bahama Islands (outer cays; breeding); Bureau, Ornith., 14, pp. 289–346, pl. 13, 1907 (monog.; plumages; ecology; range in part); Ridgway, Bull. U. S. Nat. Mus., 50, (8), p. 505, 1919 (monog.; in part); Bent, l.c., 113, p. 256, 1921 (life hist.).

¹ Since the above was written, Dr. Oberholser (Bull. No. 28, Dept. Conserv. State of Louisiana, p. 290, 1938) has separated the breeding birds of the South Atlantic and Gulf coast, on account of smaller size and paler gray upper parts, as *S. forsteri litoricola* (type, from Smith Island, Northampton County, Virginia, in U. S. National Museum). Judging from a series of Texas breeding birds, this form seems to be quite recognizable.

² Frequently spelled *dougalli*.

Sterna rosea Graves, Brit. Orn., 3, text and plate, 1821—new name for *S. dougallii* Montagu.

Sterna Macdougalli Macgillivray, Man. Brit. Orn., 2, p. 233, 1842—emendation of *S. dougallii* Montagu.

Sterna paradisaea (not *S. paradisaea* Pontoppidan) Coues, Proc. Acad. Nat. Sci. Phila., 1862, p. 551 (monog.); Léotaud, Ois. Trinidad, p. 539, 1866—Trinidad; Salvin, Ibis, 1866, p. 199—Grassy Cay, off British Honduras; Gundlach, Journ. Orn., 23, p. 391, 1875—coasts of Cuba and Puerto Rico.

Sterna dougalli gracilis (not *Sterna gracilis* Gould) Cory, Cat. W. Ind. Bds., pp. 82, 135, 1892—Antigua and Redonda (crit.); Clark, Proc. Bost. Soc. N. H., 32, p. 257, 1905—St. Vincent, Grenada, and Grenadines (Frigate Island and Rose Rock; breeding; nest and eggs descr.).

Sterna dougalli(i) dougalli(i) Noble, Bull. Mus. Comp. Zool., 60, p. 368, 1916—Isles Les Saintes and Tête Anglaise, Guadeloupe (breeding); Wetmore, Sci. Surv. Porto Rico and Virgin Islands, 9, p. 379, 1927—Puerto Rico; idem and Swales, Bull. U. S. Nat. Mus., 155, p. 176, 1931—Cayos de los Pájaros, Hispaniola (breeding); Bradlee, Proc. Bost. Soc. N. H., 39, p. 292, 1931—Bermuda Islands (rare visitor); Peters, Bds. World, 2, p. 334, 1934 (range); Belcher and Smooker, Ibis, 1935, p. 295—Trinidad and Tobago (winter visitor); Murphy, Ocean. Bds. S. Amer., 2, p. 1117, 1936 (monog.; life hist.); Pinto, Rev. Mus. Paul., 22, p. 151, 1938—Bahia, Brazil (ex Peters); Nichols and Bond, Mem. Soc. Cub. Hist. Nat., 17, p. 31, 1943—Virgin Islands (breeding in many localities).

Range.—Breeds on the Atlantic coast of America,¹ from Sable Island, off Nova Scotia, to Long Island, in Florida, the Bahama Islands, on cays off British Honduras, in Hispaniola, the Virgin Islands, on some of the Lesser Antilles south to the Grenadines, and on Aruba Island, off Venezuela; extralimittally in the British Isles, islands off Jutland, coast of Brittany, on islets off southern Tunisia, etc.; winters from Louisiana and the Bahama Islands to Tobago, Trinidad and even as far south as Bahia, Brazil;² accidental on the west coast of Mexico (Ventosa Bay, Tehuantepec).

Field Museum Collection.—56: Massachusetts (Woods Hole, 1; Chatham, 11; Monomoy Island, 3; Raynham, 1; Woepecket Island, 7; Nantucket, 1; Muskeget Island, 2); Connecticut (Guilford, 1); New York (Shelter Island, 6); North Carolina (Pea Island, Dare County, 1); Bahama Islands (Acklin, 2; Great Inagua, 3; Long

¹ Birds from North America do not differ in the least from the European ones. It is now established that the color of the bill, which gave rise to the segregation of an alleged West Indian race, depends on season. Breeding birds from Antigua and St. Vincent cannot be separated from others taken in Massachusetts. For detailed information about plumage, molt, ecology, and geographical distribution of the species in its entirety the reader is referred to Louis Bureau's admirable monographic essay.

² Specimens were collected by R. H. Beck off Bahia on April 28, 1916.

Island, 1); Virgin Islands (Antigua, 7; St. Thomas, 1); Lesser Antilles (Guadeloupe Island, 8).

****Sterna aleutica* Baird. ALEUTIAN TERN.**

Sterna aleutica Baird, Trans. Chicago Acad. Sci., 1, p. 321, pl. 31, fig. 1, 1869—Kodiak Island, Alaska (type in U. S. National Museum); Saunders, Proc. Zool. Soc. Lond., 1876, p. 665 (monog.); idem, Cat. Bds. Brit. Mus., 25, p. 98, 1896—St. Michaels, Alaska, and Inaboye (off Yedo), Japan (monog.); Ridgway, Bull. U. S. Nat. Mus., 50, (8), p. 513, 1919 (monog.; full bibliog.); Hartert, Nov. Zool., 27, p. 132, 1920—Copper Island (Sept. 7); Bent, Bull. U. S. Nat. Mus., 113, p. 265, 1921 (life hist.); Peters, Bds. World, 2, p. 337, 1934 (range).

Range.—Breeds on Sakhalin and on two small islands in Norton Sound, Alaska, and has also occurred on the Alaskan mainland, in northeastern Siberia, and on the Commander Islands (Copper Island, Sept. 7); winters on the west coast of the North Pacific Ocean to Sakhalin and northern Japan.

Field Museum Collection.—4: Alaska (St. Michaels, 4).

****Sterna anaethetus recognita* (Mathews).¹ CARIBBEAN BRIDLED TERN.**

Melanosterna anaethetus recognita Mathews, Bds. Australia, 2, (4), p. 403, Nov. 1, 1912—Bahama Islands (location of type not stated).

Onychoprion panayensis (not *Sterna panayensis* Gmelin) Sclater and Salvin, Proc. Zool. Soc. Lond., 1871, p. 572—cays of British Honduras and West Indies (Sombbrero Island).

Sterna anaetheta (not *Sterna anaethetus* Scopoli) Saunders, Proc. Zool. Soc. Lond., 1876, p. 664 (char.; range in part); Hartert, Ibis, 1893, p. 310—coral reef off Cero Colorado, Aruba (breeding); Saunders, Cat. Bds. Brit. Mus., 25, p. 101, 1896—part, spec. q³-e⁴, Florida (Cape Cañaveral), Bahama Islands (Clarence Harbor), Jamaica, Redonda, Guadeloupe, St. Vincent, Grenada, and British Honduras (Southern Water and Saddle Cays); Bonhote, Ibis, 1903, p. 314—Washerwoman Cay, Andros, Bahama Islands (breeding); Salvin and Godman, Biol. Centr.-Amer., Aves, 3, p. 408, 1903—cays off Belize coast (Lighthouse Reef, Saddle Cay, Curlew Cay, Southern Water Cay).

Haliplana anaetheta Gundlach, Journ. Orn., 29, p. 400, 1881—Cayo Mono Grande, Cuba (breeding).

Sterna anaethetus Wells, Proc. U. S. Nat. Mus., 9, p. 632, 1887—Lee Rocks, Grenadines (breeding); Scott, Auk, 8, p. 360, 1891—Jamaica (breeding habits; eggs); Cory, Cat. West Ind. Bds., p. 83, 1892—Bahama Islands

¹ An earlier name is probably *Sterna melanoptera* Swainson (Bds. W. Afr., 2, p. 249, 1837—West Africa; type in University Museum, Cambridge, Engl.), as intimated by Hartert (Vög. Pal. Fauna, 2, p. 1711, 1921), but until comparison of adequate breeding birds from both sides of the Atlantic has been made, it seems advisable to retain Mathews' term, which is of unquestionable pertinence.

(Abaco, New Providence, Andros, Long Island, Miraporvos), Cuba, Jamaica, Sombrero, Guadeloupe, and Dominica; Field, Auk, 11, p. 119, 1894—cays in Kingston Harbor, Jamaica (breeding); G. M. Allen, l.c., 22, p. 118, 1905—Long Rock, off Abaco, Bahama Islands; Riley, l.c., p. 353, 1905—Andros, Eleuthera, and near Abaco, Bahama Islands; Clark, Proc. Bost. Soc. N. H., 32, p. 258, 1905—St. Vincent, Grenada, and Grenadines (breeding on Lee Rocks and Rose Rock).

Sterna anaetheta Hartert, Nov. Zool., 9, p. 309, 1902—Aruba; Bent, Bull. U. S. Nat. Mus., 113, p. 287, 1921 (life hist.).

Sterna anaetheta recognita Ridgway, Bull. U. S. Nat. Mus., 50, (8), p. 512, 1919 (monog.; full bibliog.).

Sterna anaetheta melanoptera Wetmore, Sci. Surv. Porto Rico and Virgin Islands, 9, p. 380, 1927—Mona and Desecheo Islands (breeding; eggs descr.); idem and Swales, Bull. U. S. Nat. Mus., 155, p. 177, 1931—Hispaniola (various records); Peters, Bds. World, 2, p. 337, 1934 (range); Murphy, Ocean. Bds. S. Amer., 2, p. 1118, 1936 (monog.; life hist.).

Range.—Breeds in the Bahama Islands, Jamaica, Cuba (Cayo Mono Grande), Puerto Rico (Desecheo and Mona Islands), islets off St. Thomas, Dominica, Guadeloupe, the Grenadines (Lee Rocks, Rose Rock), on Aruba Island, in the southern Caribbean Sea, and on cays off British Honduras (Saddle Cay, etc.); occasional in Tobago; accidental in Florida (Cape Cañaveral), Georgia, and South Carolina (Frogmore, Aug. 25, 1885).

Field Museum Collection.—26: Bahama Islands (Grassy Creek Cays, 1; Long Island, 4; Miraporvos Island, 2); Virgin Islands (St. Thomas, 2); Lesser Antilles (Dominica, 6; Guadeloupe, 10; Martinique, 1).

***Sterna anaethetus nelsoni* Ridgway. PACIFIC BRIDLED TERN.**

Sterna anaethetus nelsoni Ridgway, Bull. U. S. Nat. Mus., 50, (8), pp. 487, 514, 1919—Sihuatanejo, Guerrero, Mexico (type in U. S. National Museum); Wetmore, Condor, 25, p. 171, 1923—Cape Mala, Panama (Sept. 24, 1922); Griscom, Bull. Mus. Comp. Zool., 78, p. 309, 1935—off Cape Mala, Panama.

Sterna anaethetus nelsoni Peters, Bds. World, 2, p. 338, 1934 (range).

Range.—Pacific coast of Mexico (Sihuatanejo, Guerrero); also recorded from Cape Mala, Panama (breeding place unknown).

****Sterna fuscata fuscata* Linnaeus. SOOTY TERN.**

Sterna fuscata Linnaeus, Syst. Nat., 12th ed., 1, p. 228, 1766—based on "L'Hirondelle-de-Mer brune" Brisson, Orn., 6, p. 220, pl. 21, fig. 1, San Domingo (type in Réaumur Collection); Bent, Bull. U. S. Nat. Mus., 113, p. 279, 1921 (life hist.); Wilkins, Ibis, 1923, p. 510—Ascension Island.

Sterna fuliginosa Gmelin, Syst. Nat., 1, (2), p. 605, 1789—based on "L'Hirondelle de Mer à grande envergure" Buffon (Hist. Nat. Ois., 8, p. 345;

- Ascension Island), "Sooty Tern" Latham (Gen. Syn. Bds., (3), 2, p. 352; New York), etc.;¹ Bryant, Proc. Bost. Soc. N. H., 7, p. 134, 1859—Bahama Islands (breeding on the cays); Saunders, Proc. Zool. Soc. Lond., 1876, p. 666 (monog.; in part); idem, l.c., 1877, p. 796—part, Boatswain Island, Ascension; Penrose, Ibis, 1879, p. 277—Boatswain Island, Ascension (breeding; descr. nest, eggs, and young); Wells, Proc. U. S. Nat. Mus., 9, p. 632, 1887—Grenadines (Isle de Rhonde, Kick-'em-Jenny, Lee Rocks, etc.; breeding); Young, Ibis, 1891, p. 145—Morant Cays, Jamaica; Scott, Auk, 8, p. 361, 1891—Jamaica (breeding; habits; descr. eggs); Cory, Cat. W. Ind. Bds., p. 83, 1892—Bahama Islands, Greater and Lesser Antilles; Field, Auk, 11, p. 120, 1894—Morant, Pedro, and other cays, Jamaica (breeding); Saunders, Cat. Bds. Brit. Mus., 25, p. 106, 1896—part, spec. a-n, p, s-z, Texas (Corpus Christi), British Honduras (South Water Cay), Brazil (mouth of the Amazon, Fernando Noronha Island), and Ascension Island; Bonhote, Ibis, 1903, p. 314—Washerwoman Cays, Andros Island, Bahamas (breeding); Salvin and Godman, Biol. Centr.-Amer., Aves, 3, p. 409, 1903—part, British Honduras (Curlew Cay, Saddle Cay, Southern Water Cay), Honduras (Ruatan Island), and Nicaragua (Greytown); Nicoll, Ibis, 1904, p. 39—Fernando Noronha (breeding); Riley, Smiths. Misc. Coll., 47, p. 280, 1904—Antigua; Clark, Proc. Bost. Soc. N. H., 32, p. 258, 1905—southern Grenadines (Isle de Rhonde, Kick-'em-Jenny, Lee Rocks, Bonaparte Rock, Isla de Large; breeding); Berlepsch, Nov. Zool., 15, p. 309, 1906—Cayenne (ex Latham); Ihering, Cat. Faun. Braz., 1, p. 41, 1907 (range off Brazil); Cory, Field Mus. Nat. Hist., Orn. Ser., 1, pp. 195, 226, 1909—Aruba and Los Hermanos Islands (breeding).
- Sterna spadicea* Gmelin, Syst. Nat., 1, (2), p. 610, 1789—based on "Brown Tern" Latham, Gen. Syn. Bds., 3, (2), p. 359, Cayenne.
- Anous L'Herminieri* Lesson, Oeuvr. Buffon, éd. Lévêque, 20, (Descr. Mamm. et Ois.), p. 255, 1847—Guadeloupe.
- Haliplana fuliginosa* Coues, Proc. Acad. Nat. Sci. Phila., 1862, p. 556 (monog.; in part); Gundlach, Journ. Orn., 23, p. 393, 1875—Cayo Mono Grande, Cuba (breeding habits).
- Onychoprion fuliginosus* Sclater and Salvin, Proc. Zool. Soc. Lond., 1871, p. 572—part, Cuba, Jamaica, and Belize.
- Sterna fuscata fuscata* Noble, Bull. Mus. Comp. Zool., 60, p. 369, 1916—Guadeloupe (breeding on outlying cays); Ridgway, Bull. U. S. Nat. Mus., 50, (8), p. 514, 1919 (monog.; full bibliog.); Wetmore, Sci. Surv. Porto Rico and Virgin Islands, 9, p. 381, 1927—Puerto Rico, Mona Island, and Tortola; idem and Swales, Bull. U. S. Nat. Mus., 155, p. 177, 1931—Hispaniola (breeding); Bradlee, Mowbray, and Eaton, Proc. Bost. Soc. N. H., 39, p. 292, 1931—Bermuda Islands (rare visitant); Stone, Proc. Acad. Nat. Sci. Phila., 84, p. 304, 1932—Puerto Castilla, Honduras; Peters, Bds. World, 2, p. 338, 1934 (range); Belcher and Smooker, Ibis, 1935, p. 295—Soledade Rock (off Trinidad) and Tobago (breeding); Murphy, Ocean. Bds. S. Amer., 2, p. 1121, 1936 (monog.; distr.; life hist.); Pinto, Rev. Mus. Paul., 22, p. 151, 1938—Fernando Noronha and coast of Brazil.

¹ Some of the other references do not pertain to this tern.

Range.—Breeds from the Dry Tortugas, Florida, and the Bahama Islands through the West Indies and islands off the east coast of Central America to islands in the southern Caribbean Sea (Los Hermanos Islands; Soledade Rock, off Trinidad; Tobago), also on Fernando Noronha, Rocas Reef, South Trinidad, Martin Vas, Ascension Island, and other extralimital islands; on migration to the east coast of South America (Cayenne; mouth of the Amazon)¹ and the Atlantic and Gulf coasts of the United States.

Field Museum Collection.—15: Texas (Padre Island, Gulf coast, 2; Corpus Christi, 4); Bahama Islands (Brown's Cay, 1; Miraporvos Island, 1); Virgin Islands (St. Thomas, 2); Lesser Antilles (Anguilla, 1; Dominica, 1); Dutch West Indies (Aruba, 1); Venezuela (Orquilla Island, Nueva Esparta, 2).

****Sterna fuscata crissalis* (Lawrence). SOCORRO SOOTY TERN.**

Haliplana fuliginosa var. *crissalis* (Baird MS.) Lawrence, Proc. Bost. Soc. N. H., 14, "1871," p. 285, pub. April, 1872—vicinity of Tres Marias Islands and (breeding) "Isabele" Island, near San Blas, Mexico (type, from Socorro Island, in U. S. National Museum); Grayson, l.c., p. 301, 1872—Socorro Island; Lawrence, Mem. Bost. Soc. N. H., 2, p. 318, 1874—Socorro and Tres Marias Islands.

Haliplana fuliginosa (not *Sterna fuliginosa* Gmelin) Salvin, Proc. Zool. Soc. Lond., 1867, p. 161—Santiago de Veragua, Panama.

Sterna fuliginosa Saunders, Cat. Bds. Brit. Mus., 25, p. 106, 1896—part, spec. o, q, r, Veragua, Panama, and Mazatlan; Anthony, Auk, 15, p. 316, 1898—Socorro Island (breeding); Rothschild and Hartert, Nov. Zool., 6, p. 191, 1899—Culpepper and Wenman Islands, Galápagos (crit.); iidem, l.c., 9, p. 413, 1902—Culpepper and Clipperton Islands (breeding); Snodgrass and Heller, Proc. Wash. Acad. Sci., 4, p. 505, 1902—Clipperton Island (meas.; egg descr.); Salvin and Godman, Biol. Centr.-Amer., Aves, 3, p. 409, 1903—part, Socorro Island, Mexico (Mazatlan, Isabel Island, Tres Marias), and Panama (Veraguas); Snodgrass and Heller, Proc. Wash. Acad. Sci., 5, p. 239, 1904—Wenman and Culpepper Islands, Galápagos; Gifford, Proc. Calif. Acad. Sci., (4), 2, p. 19, 1913—Crossman, Culpepper, and Wenman Islands, Galápagos; McLellan, l.c., (4), 15, p. 283, 1926—Alijos Rocks (off Lower California), Roca Partida (breeding), Oneal Rock (near Socorro), and Isabel Island (breeding).

Sterna fuliginosa crissalis Nelson, N. Amer. Fauna, 14, p. 24, 1899—Isabel Island, off Mexico (breeding; habits; crit.); Bailey, Auk, 23, p. 378, 1906—Isabel Island (breeding); Ridgway, Bull. U. S. Nat. Mus., 50, (8), p. 519, 1919 (monog.); Grinnell, Univ. Calif. Pub. Zool., 32, p. 63, 1928—off Abreojos Point and Alijos Rocks, off Lower California; Swarth, Occ. Pap. Calif. Acad. Sci., 18, p. 66, 1931—Galápagos; Peters, Bds. World, 2, p. 338, 1934 (range); Griscom, Bull. Mus. Comp. Zool., 78, p. 309,

¹ The locality Falkland Islands, quoted by Ridgway, is a mistake.

1935—Panama (Canal Zone and Veragua); Murphy, Ocean. Bds. S. Amer., 2, p. 1121, 1936 (char.; range); Wetmore, Smiths. Misc. Coll., 98, No. 22, p. 5, 1939—Clipperton Island.

Range.—Breeds on Isabel Island, the Revillagigedo group, Clipperton Island, and the northern Galápagos (Culpepper and Wenman Islands); on migration to the west coast of America from Lower California to Panama.

Field Museum Collection.—2: Pacific Ocean (3° 27' N.—88° 31' W., 1; 1° 23' N.—90° 02' W., 1).

Sterna fuscata luctuosa Philippi and Landbeck.¹ CHILEAN SOOTY TERN.

Sterna luctuosa Philippi and Landbeck, Arch. Naturg., 32, (1), p. 126, 1866—Rio Valdivia, between Corral and Valdivia, Chile (type in National Museum, Santiago de Chile; cf. Gigoux and Looser, Boll. Mus. Nac. Santiago, 13, p. 29, 1930); Sclater, Proc. Zool. Soc. Lond., 1867, pp. 337, 340—Chile; Philippi, Anal. Univ. Chile, 31, p. 289, 1868—Valdivia; idem, Anal. Mus. Nac. Chile, 15, p. 101, pl. 46, fig. 1, 1902—Rio Valdivia.

Sterna fuscata luctuosa Hellmayr, Field Mus. Nat. Hist., Zool. Ser., 19, p. 407, 1932—Rio Valdivia, Chile (crit.); Murphy, Ocean. Bds. S. Amer., 2, p. 1121, 1936—San Felix Island (breeding), Rio Valdivia, and off Valparaíso, Chile (char.).

Range.—Breeds at San Felix Island, Chile; known also from waters around the Juan Fernández Islands and from the coast of Chile (off Valparaíso; Rio Valdivia).²

**Sterna superciliaris* Vieillot.³ YELLOW-BILLED TERN.

Sterna superciliaris Vieillot, Nouv. Dict. Hist. Nat., nouv. éd., 32, p. 176, 1819—based on "Hatf ceja blanca" Azara, Apunt. Hist. Nat. Páx., 3, p. 377, No. 415, Paraguay; Sclater and Salvin, Proc. Zool. Soc. Lond., 1866, p. 200—Ucayali, Peru; idem, l.c., 1867, p. 593—Rio Tocantins, Pará; Reinhardt, Vidensk. Medd. Naturh. Foren., 1870, p. 19—Lagõa Santa and Lake Sumidouro, Minas Geraes; Sclater and Salvin, Proc.

¹ *Sterna fuscata luctuosa* Philippi and Landbeck; Very close to *S. f. crissalis*, but larger, grayer on the under parts, and more dusky on the rectrices. Wing, 306–327; tail, 170–187; bill, 42–48. While obviously separable from *S. f. crissalis*, the distinctness of this form from the Hawaiian *S. f. oahuensis* (Bloxham) remains to be ascertained by the comparison of adequate series.

² Birds observed at Independencia Bay, Peru, might have been this race.

³ *Sterna superciliaris* Vieillot, though superficially resembling *S. albifrons antillarum*, is nevertheless quite distinct by reason of its darker gray upper parts, stouter bill, and olivaceous (not bright yellow) feet. The bill is always wholly yellow, and the black loreal streak is more restricted. Saunders (Proc. Zool. Soc. Lond., 1876, p. 662) rightly insisted on the specific distinctness of the two birds, while our own remarks (Field Mus. Nat. Hist., Zool. Ser., 12, p. 497, 1929) on this subject miss the point.—C.E.H.

Zool. Soc. Lond., 1871, p. 571—Cuyabá, Brazil, and Ucayali, Peru (crit.); *idem*, l.c., 1873, p. 310—lower Ucayali and Santa Cruz, Peru; Salvin, Ibis, 1874, p. 319 (crit. note on type of *S. argentea* Wied); Saunders, Proc. Zool. Soc. Lond., 1876, p. 662 (crit.; range); Durnford, Ibis, 1877, p. 201—Montevideo, Uruguay, and Baradero, Buenos Aires; White, Proc. Zool. Soc. Lond., 1882, p. 628—Itapua, Misiones; Berlepsch, Journ. Orn., 37, p. 321, 1889—Sarayacu, Ucayali, Peru; Sclater and Hudson, Arg. Orn., 2, p. 197, 1889—Rio Paraná, Argentina; Saunders, Cat. Bds. Brit. Mus., 25, p. 124, 1896—British Guiana (Rupununi River), Surinam, Brazil (Rio Tocantins, Rio de Janeiro, São Paulo), Peru (Santa Cruz), Uruguay (Colonia), and Argentina (Baradero, Rio Paraná); Ihering, Rev. Mus. Paul., 3, p. 446, 1899—São Sebastião, São Paulo; Salvadori, Boll. Mus. Zool. Torino, 15, No. 378, p. 16, 1900—Cárandasinho, Matto Grosso; Berlepsch and Hartert, Nov. Zool., 9, p. 132, 1902—Caicara, Orinoco River, Venezuela; Ihering, Rev. Mus. Paul., 6, p. 452, 1904—Rio Juruá, Brazil; *idem*, Cat. Faun. Zool., 68, p. 165, 1927—Bovril Islands, Santa Fé; Young, Ibis, 1928, p. 766—coast land of British Guiana; Naumburg, Bull. Amer. Mus. N. H., 60, p. 75, 1930—Matto Grosso; Peters, Bds. World, 2, p. 339, 1934 (range); Davis, Ibis, 1935, p. 531—Rupununi River, British Guiana (nest and eggs); Murphy, Ocean. Bds. S. Amer., 2, p. 1132, 1936 (monog.); Pinto, Rev. Mus. Paul., 22, p. 151, 1938—Amazonas (Rio Juruá, Manacapurú), Pará (Belem; Pau da Letra, Rio Tapajóz), Minas Geraes (Pirapora), São Paulo (Piassaguera, Casqueirinho, Cananéia, São Sebastião), and Rio Grande do Sul (Itaqui); Niceforo, Caldasia, 3, p. 374, 1945—Villavicencio, Meta, Colombia; Gyldenstolpe, K. Svensk. Vetensk. Akad. Handl., (3), 22, p. 44, 1945—Santo Antonio, Rio Juruá, Brazil; *idem*, l.c., (3), 23, p. 75, 1945—Puerto Salinas, El Beni, Bolivia.

Sterna maculata Vieillot, Nouv. Dict. Hist. Nat., nouv. éd., 32, p. 176, 1819—based on "Hatí manchado" Azara, Apunt. Hist. Nat. Páx., 3, p. 379, No. 416, Paraguay (=young).

Sterna argentea Wied, Reise Bras., 1, p. 67, 1820—Rio Parahyba, Rio de Janeiro (type now in the American Museum of Natural History, New York; cf. Allen, Bull. Amer. Mus. N. H., 2, p. 272, 1889); idem, Beitr. Naturg. Bras., 4, (2), p. 871, 1833—Sagoarema and Rio Parahyba, Rio de Janeiro; Burmeister, Syst. Uebers. Th. Bras., 3, p. 452, 1856—Brazil; idem, Journ. Orn., 8, p. 267, 1860—Rio Paraná, near Santa Fé and Paraná, Argentina; idem, Reise La Plata St., 2, p. 419, 1861—Rio Paraná; Pelzeln, Orn. Bras., 3, p. 325, 1870—Rio de Janeiro (Sapitiba), São Paulo (Ypanemá), Matto Grosso (Cuyabá), and Pará (Cajútuba), Brazil.

Sternula superciliaris Dabbene, El Hornero, 1, p. 139, 1918 (range); Serié and Smyth, l.c., 3, p. 40, 1923—Santa Elena, Entre Ríos; Tremoleras, l.c., 2, p. 13, 1928—coasts of Colonia and Montevideo, Uruguay.

Sterna superciliaris (subsp.?) Hellmayr, Field Mus. Nat. Hist., Zool. Ser., 12, p. 497, 1929—São Luiz, Maranhão, Brazil (crit.).

Range.—Rivers of South America east of the Andes from Colombia, Venezuela, and the Guianas south through Peru and Brazil to eastern Bolivia, Paraguay, Uruguay, and northeastern Argentina (Rio Paraná to the coast of the province of Buenos Aires).

Field Museum Collection.—6: Peru (Lagunas, Loreto, 4); British Guiana (Rockstone, 2).

****Sterna lorata* Philippi and Landbeck. PERUVIAN TERN.**

Sterna lorata Philippi and Landbeck, Anal. Univ. Chile, 19, p. 612, Nov., 1861—Arica Bay, Tacna, Chile (type in National Museum, Santiago de Chile; cf. Gigoux and Looser, Bol. Mus. Nac. Santiago, 13, p. 30, 1930); idem, Arch. Naturg., 29, (1), p. 124, 1863—Arica Bay (German version of orig. descr.); Saunders, Cat. Bds. Brit. Mus., 25, p. 126, 1896—Peru (Callao Bay; Paracas Bay; coast near Lima) and Chile; Philippi, Anal. Mus. Nac. Chile, 15, p. 103, pl. 45, fig. 2, 1902—Arica (descr. and fig. of type); Chubb, Ibis, 1919, p. 258—Eten, Lambayeque, Peru (Sept.); Chapman, Bull. Amer. Mus. N. H., 55, p. 187, 1926—off Santa Clara Island, Ecuador (July); Hellmayr, Field Mus. Nat. Hist., Zool. Ser., 19, p. 407, 1932—Arica, Chile; Peters, Bds. World, 2, p. 340, 1934 (range); Murphy, Ocean. Bds. S. Amer., 2, p. 1134, 1936 (monog.; life hist.); Philippi, Bol. Mus. Nac. Santiago, 16, p. 60, 1938—Arica (Sept. 7).

Sterna exilis (not of Tschudi) Sclater, Proc. Zool. Soc. Lond., 1867, pp. 336, 340—Chile; idem and Salvin, l.c., 1871, p. 572—coast of Peru (near Lima) and Chile (Arica) (crit.); Saunders, l.c., 1876, p. 663 (crit.); idem, l.c., 1882, p. 522—Paracas Bay, Peru (Oct.; crit.); MacFarlane, Ibis, 1887, p. 204—San Lorenzo Island, Callao Bay, Peru (Aug.).

Sterna loricata G. R. Gray, Hand-List Gen. Spec. Bds., 3, p. 121, 1871 (lapsus for *S. lorata* Ph. and L.).

Range.—Breeds on the coast and islands of Peru, occurring north to Santa Clara Island, Ecuador, and south to Arica Bay, extreme northern Chile.¹

Field Museum Collection.—1: Peru (Talara, 1).

****Sterna albifrons antillarum* (Lesson). LEAST TERN.**

Sternula Antillarum Lesson, Oeuvr. Buffon, éd. Leveque, 20, (Descr. Mamm. Ois.), p. 256, 1847—Guadeloupe, Lesser Antilles (descr. of adult; location of type not designated).

Sternula melanorhynchus Lesson, Oeuvr. Buffon, éd. Leveque, 20, (Descr. Mamm. Ois.), p. 257, 1847—Guadeloupe (descr. of young; location of type not designated).

Sterna frenata Gambel, Proc. Acad. Nat. Sci. Phila., 4, for Dec., 1848, p. 128, pub. 1849—new name for *Sterna argentea* (not of Wied) Nuttall, Man. Orn. U. S. and Canada, Water Birds, p. 280, 1834, eastern United States.

Sterna antillarum Coues, Proc. Acad. Nat. Sci. Phila., 1862, p. 552 (monog.); Salvin, Ibis, 1864, pp. 384, 387—Long Cay and Grassy Cay, British Honduras (breeding); Coues, l.c., 1864, p. 390—Glover's Reef, British Honduras (crit.); Sclater and Salvin, Proc. Zool. Soc. Lond., 1871, p. 571—Cuba, Trinidad, and British Honduras (crit.); Gundlach, Journ. Orn., 23, p. 391, 1875—cays of Cuba (breeding habits; descr. of plumages); Saunders, Proc. Zool. Soc. Lond., 1876, p. 661 (crit.; range); Feilden, Ibis, 1889, p. 502—Barbados (Chancery Lane, Sept. 8, Oct. 17); Cory, Cat. W. Ind. Bds., p. 83, 1892—Bahama Islands (Abaco, New Providence, Andros, Great Inagua, Cay Sal Islands), Cuba, Jamaica, Haiti, Puerto Rico, St. Bartholomew, Antigua, Guadeloupe, Dominica, and Barbados; Hartert, Ibis, 1893, pp. 310, 337—Aruba and Bonaire Islands (breeding); Robinson, Proc. U. S. Nat. Mus., 18, p. 653, 1895—Margarita Island, Venezuela (breeding); Saunders, Cat. Bds. Brit. Mus., 25, p. 122, 1896—part, spec. a-q', United States, Antigua, Barbados, Venezuela, and British Honduras (Long Cay, Glover's Reef); Bonhote, Ibis, 1899, p. 520—New Providence, Bahama Islands; Hartert, Nov. Zool., 9, p. 308, 1902—Aruba and Bonaire; Salvin and Godman, Biol. Centr.-Amer., Aves, 3, p. 410, 1903—part, Mexico (Matamoros), British Honduras (Long Cay, Grassy Cay, Glover's Reef), and Guatemala (Coban); Bonhote, Ibis, 1903, p. 314—Grassy Creek, Andros, Bahama Islands; Riley, Smiths. Misc. Coll., 47, p. 280, 1904—Antigua; Clark, Proc. Bost. Soc. N. H., 32, p. 258, 1905—Barbados (ex Feilden); Cory, Field Mus. Nat. Hist., Orn. Ser., 1, p. 195, 1909—Aruba; Reiser, Denks. Math.-Naturw. Kl. Akad. Wiss. Wien, 76, p. 97, 1910—Amaração, coast of Piauí, Brazil (Sept.); Snethlage, Bol. Mus. Goeldi, 8, p. 79, 1914—Marajó (Ilha dos Machados), Brazil; Todd, Ann. Carnegie Mus., 10, p. 209, 1916—mouth of Nuevas River and Cayo Largo, Isle of Pines, Cuba (sight record); Bangs, Bull. Mus. Comp. Zool., 60, p. 305, 1916—Little Cayman (breeding); Bent, Bull. U. S. Nat. Mus., 113, p. 270, 1921 (life hist.); Reiser, Denks. Math.-Naturw. Kl. Akad.

¹ We have examined in the British Museum some fifteen specimens from Peru (Eten; Callao; Paracas Bay) and a single one from "Chile" without precise locality.

Wiss. Wien, 76, p. 241, 1923—Amaração, Piahy (summer and winter plumages descr.).

Sterna argentea (not of Wied) Léotaud, Ois. Trinidad, p. 545, 1866—Trinidad.

Sterna minuta americana Sundevall, Öfv. Svensk. Vetensk.-Akad. Handl., 26, p. 589, 1869—St. Bartholomew (substitute name for *S. frenata* Gambel).

Sternula antillarum antillarum Oberholser, Auk, 34, p. 199, 1917 (crit.); Ridgway, Bull. U. S. Nat. Mus., 50, (8), p. 521, 1919 (monog.; full bibliog.).

Sterna albifrons antillarum Wetmore, Sci. Surv. Porto Rico and Virgin Islands, 9, p. 382, 1927—Puerto Rico (breeding near Cabo Rojo lighthouse); idem and Swales, Bull. U. S. Nat. Mus., 155, p. 178, 1931—Hispaniola (breeding); Peters, Bds. World, 2, p. 341, 1934 (range); Belcher and Smooker, Ibis, 1935, p. 295—Caroni Swamp, Trinidad (June); Murphy, Ocean. Bds. S. Amer., 2, p. 1136, 1936 (monog.); Pinto, Rev. Mus. Paul., 22, p. 152, 1938 (range); Dugand, Caldasia, 1, p. 58, 1941—mouth of Rio Magdalena; Burleigh, Occ. Pap. Mus. Zool. Louisiana State Univ., 20, p. 383, 1944—Mississippi Gulf coast (breeding).

Sterna antillarum antillarum Mowbray, Proc. Bost. Soc. N. H., 39, p. 292, 1931—Islands around Bermuda (breeding); Griscom, Bull. Amer. Mus. N. H., 64, p. 127, 1932—Puerto Barrios, Guatemala (Aug. 21).

Range.—Breeds on the Atlantic and Gulf coasts of the United States from Massachusetts to Florida and Texas; Bermudas; Bahamas; locally in the West Indies (Cuba, Little Cayman Island, Hispaniola, Puerto Rico), on islands off the coast of Venezuela (Aruba, Bonaire, and Margarita), and on the coast of British Honduras; winters from the Gulf coast south to northeastern Brazil (Marajó Island, Pará; Amaração, Piahy).

Field Museum Collection.—67: Texas (Port Isabel, 1; Cameron County, 3; Padre Island, 7); Massachusetts (Chatham, 5; Monomoy Island, 3); North Carolina, Dare County (Bodie Island, 3; Pea Island, 1); South Carolina (McClellanville, 1); Florida (Brevard County, 2; Nassau County, 10; West Jupiter, 1); Bahama Islands (Acklin Island, 1; Great Inagua, 13); Lesser Antilles (Antigua, 10); Mexico (Rio Lagartos, Yucatan, 1); Dutch West Indies (Aruba, 3); Brazil (São Luis, Maranhão, 2).

****Sterna albifrons athalassos*¹ Burleigh and Lowery. MISSISSIPPI VALLEY LEAST TERN.**

Sterna albifrons athalassos Burleigh and Lowery, Occ. Pap. Mus. Zool. Louisiana State Univ., 10, p. 173, March 4, 1942—St. Francisville, West Feliciana Parish, Louisiana (type in Museum of Zoology, Louisiana State University); Mayfield, Wilson Bull., 55, p. 245, 1943—Monroe County, southeastern Michigan.

¹ *Sterna albifrons athalassos* Burleigh and Lowery is said to differ from *antillarum* by having the upper parts much darker, with little or no distinction between the color of the back and that of the hind neck. Like *staebleri* but lacking the

Sternula albifrons antillarum Oberholser, Bull. 28, Dept. Conserv. State Louisiana, p. 296, 1938—southern Louisiana (breeding).

Range.—Fresh-water lagoons of the lower Mississippi Valley from the Gulf coast to Iowa on the Missouri River and Ohio on the east.

Field Museum Collection.—4: Mississippi (Rosedale, 4).

****Sterna albifrons browni* Mearns.¹ BROWN'S LEAST TERN.**

Sterna antillarum browni Mearns, Proc. Biol. Soc. Wash., 29, p. 71, April 4, 1916—near Monument No. 258, Mexican boundary line, on the edge of the Pacific Ocean, San Diego County, California (type now in U. S. National Museum; cf. Grinnell, Univ. Calif. Pub. Zool., 38, p. 274, 1932); Grinnell, Univ. Calif. Pub. Zool., 32, p. 63, 1928—Lower California (breeding at Scammons Lagoon).

Sterna antillarum (not *Sternula antillarum* Lesson) Grinnell, Pac. Coast Avif., 11, p. 25, 1915—coast of California north to Monterey Bay (breeding).

Sternula antillarum browni Oberholser, Auk, 34, p. 199, 1917 (crit.); Ridgway, Bull. U. S. Nat. Mus., 50, (8), p. 525, 1919—part, California and Lower California (monog.).

Sterna albifrons browni Peters, Bds. World, 2, p. 341, 1934—part, California and Lower California.

Range.—Breeds on the Pacific coast of North America from Monterey Bay, California, to northern Lower California (Scammons Lagoon).

Field Museum Collection.—26: California (Moss Landing, 15; Balboa Beach, 1; Orange County, 6; Los Angeles County, 4).

***Sterna albifrons mexicana* van Rossem and Hachisuka.² SONORAN LEAST TERN.**

Sterna albifrons mexicanus van Rossem and Hachisuka, Trans. San Diego Soc. N. H., 8, p. 333, June 15, 1937—Tobari Bay, Sonora, Mexico (type in coll. of Donald R. Dickey, now in University of California at Los Angeles); van Rossem, Occ. Pap. Mus. Zool. Louisiana State Univ., 21, p. 94, 1945—south of Guaymas, Sonora (April 26–May 16).

extensive suffusion of pearl gray on the under parts and having the bill less extensively tipped with black.

Our three adult specimens appear to bear out the above differences when compared with adults of *antillarum*.

¹ *Sterna albifrons browni* Mearns differs from the Caribbean race by darker, usually gray back, more grayish under parts, and by the *three* external primaries being dusky on the outer web. Wing, 168–178, (female) 168–174.

² *Sterna albifrons mexicana* van Rossem and Hachisuka: Nearest to *S. a. browni*, but smaller and darker, the under parts being more strongly suffused with pearl gray. Wing, 162–164, (female) 160–165 (van Rossem and Hachisuka, Trans. San Diego Soc. N. H., 8, p. 333, 1937).

Range.—Coast of western Mexico from Guaymas, Sonora, south to Sinaloa and probably to Nayarit (San Blas)¹ and Colima (Manzanillo).²

***Sterna albifrons staebleri* Brodkorb.³ STAEBLER'S LEAST TERN.**

Sterna albifrons staebleri Brodkorb, Auk, 57, p. 542, Oct., 1940—Barra de Cahuacán, Chiapas, Mexico (type in Museum of Zoology, University of Michigan, Ann Arbor).

Sterna antillarum (not *Sternula antillarum* Lesson) Salvin, Ibis, 1866, p. 199—[Pacific coast of] Guatemala; Lawrence, Bull. U. S. Nat. Mus., 4, p. 52, 1876—San Mateo, Oaxaca, Mexico; Salvin and Godman, Biol. Centr.-Amer., Aves, 3, p. 410, 1903—part, Oaxaca (San Mateo) and Pacific coast of Guatemala.

Sternula antillarum browni (not *Sterna antillarum browni* Mearns) Ridgway, Bull. U. S. Nat. Mus., 50, (8), p. 525, 1919—part, Oaxaca and Pacific coast of Guatemala.

Sterna antillarum browni Griscom, Bull. Amer. Mus. N. H., 64, p. 127, 1932—Champerico and Ocos, Pacific coast of Guatemala.

Range.—Pacific coast of southern Mexico (in states of Oaxaca and Chiapas) and Guatemala.⁴

Genus THALASSEUS Boie⁵

Thalasseus Boie, Isis, 1822, (1), col. 563—type, by subs. desig. (Wagler, Isis, 1832, col. 1225), "*Th. cantiacus*" = *Sterna cantiaca* Gmelin = *Sterna sandvicensis* Latham.

Actocheilidon Kaup, Skizz. Entw.-Gesch. Nat. Syst. Europ. Thierw., p. 31, 1829—type, by monotypy, *Sterna cantiaca* Gmelin = *S. sandvicensis* Latham.

****Thalasseus maximus maximus* (Boddaert). ROYAL TERN.**

Sterna maxima Boddaert, Tabl. Pl. Enl., p. 58, 1783—based on "Hirondelle de Mer, de Cayenne" Daubenton, Pl. Enl., pl. 988, Cayenne; Sclater and Salvin, Proc. Zool. Soc. Lond., 1871, p. 567 (range; crit.); Saunders, l.c.,

¹ *Sterna antillarum* Saunders, Cat. Bds. Brit. Mus., 25, p. 122, 1896—part, spec. r'-t', San Blas, Nayarit.

² *Sterna superciliaris* (not of Vieillot) Lawrence, Mem. Bost. Soc. N. H., 2, p. 318, 1874—Manzanillo, Colima.

³ *Sterna albifrons staebleri* Brodkorb: Similar to *S. a. mexicana*, but larger in length of bill and tail; bill strongly tipped with black; exposed portion of usually only two (instead of three) outer primaries dusky. Wing, 165-171, (female) 166-177; tail, 82-97, (female) 71-83; bill 28-31, (female) 26½-28 (P. Brodkorb, Auk, 57, p. 542, 1940).

⁴ Bent's record (Bull. U. S. Nat. Mus., 113, p. 279, 1921) from "the west coast of Peru (Sarayacu)" appears to be a mistake.

⁵ This genus hardly deserves recognition.

- 1876, p. 655—part, America (crit.; synonym.); Taczanowski, l.c., 1877, p. 749—Santa Lucia, Tumbes, Peru; Saunders, l.c., 1882, p. 521—Payta, Peru (Jan.; crit.); Wells, Proc. U. S. Nat. Mus., 9, p. 632, 1887—islets off Grenada (breeding); Cory, Cat. W. Ind. Range.—Recorded from islands in the southern Caribbean Sea (Aruba, Margarita, Trinidad, Tobago) and from various localities on the coasts of Brazil (Bahia, Camamú, Rio de Janeiro, Santa

¹ *Thalasseus eurygnathus* (Saunders), while probably conspecific with *T. elegans*, is too little known to permit of any final judgment as to its status.

² A single young bird of very small size may pertain to the present species.

Catharina) and Argentina (Puerto Deseado, Chubut); breeding places unknown.¹

**Thalasseus elegans* (Gambel). ELEGANT TERN.

Sterna elegans Gambel,² Proc. Acad. Nat. Sci. Phila., 4, for December, 1848, p. 129, pub. 1849—Mazatlan, Sinaloa, Mexico (type in the Academy of Natural Sciences, Philadelphia; cf. Stone, Proc. Acad. Nat. Sci. Phila., 1899, p. 19); Saunders, Proc. Zool. Soc. Lond., 1876, p. 653—Pacific coast from the Gulf of California to Chile (crit.); idem, l.c., 1882, p. 521—Callao Bay, Peru (Sept.), and Coquimbo Bay, Chile (Nov.); idem, Cat. Bds. Brit. Mus., 25, p. 84, 1896—Texas (Corpus Christi, July), Oaxaca (San Mateo), El Salvador (La Unión), Peru (Chorillos; Callao Bay), and Chile (Iquique; Coquimbo Bay; Viña del Mar, near Valparaiso; Valdivia); Brewster, Bull. Mus. Comp. Zool., 41, p. 24, 1902—Lower California (La Paz, Mar. 14) and Sonora (Guaymas; breeding); Salvin and Godman, Biol. Centr.-Amer., Aves, 3, p. 407, 1903—Mexico (Guaymas, Mazatlan, Isabella Island, San Mateo), El Salvador (La Unión), and Honduras (Gulf of Fonseca); Bent, Bull. U. S. Nat. Mus., 113, p. 219, 1921 (life hist.).

Sterna comata Philippi and Landbeck, Anal. Univ. Chile, 19, p. 614, Nov., 1861—Bay of Arica, Tacna, Chile (=winter plumage; type in National Museum, Santiago de Chile; cf. Gigoux and Looser, Bol. Mus. Nac. Santiago, 13, p. 29, 1930); iidem, Arch. Naturg., 29, (1), p. 126, 1863—Arica (German version of orig. descr.); Philippi, Anal. Univ. Chile, 31, p. 289, 1868—northern Chile and Peru; Landbeck, Anal. Univ. Chile, 41, p. 518, 1872—Corral, Chile (Nov.-Feb.; crit.); idem, Arch. Naturg., 40, (1), p. 114, 1874 (crit.); Philippi, Anal. Mus. Nac. Chile, 15, p. 99, pl. 46, fig. 2, 1902—Arica (disc. of type).

Thalasseus elegans Coues, Proc. Acad. Nat. Sci. Phila., 1862, p. 540 (monog.); idem, Ibis, 1864, p. 389—San Salvador (=La Unión) (Dec.); Salvin, l.c., 1866, p. 198—Fonseca Bay, Honduras; Ridgway, Bull. U. S. Nat. Mus., 50, (8), p. 472, 1919 (monog.; full bibliog.); Grinnell, Univ. Calif. Pub. Zool., 32, p. 62, 1928—Lower California (breeding); Peters, Bds. World, 2, p. 344, 1934 (range); Murphy, Ocean. Bds. S. Amer., 2, p. 1141, 1936 (monog.); Dickey and van Rossem, Field Mus. Nat. Hist., Zool. Ser., 23, p. 183, 1938—La Unión, El Salvador (winter visitant); van Rossem, Occ. Pap. Mus. Zool. Louisiana State Univ., 21, p. 95, 1945—Sonora (resident).

Sterna galericulata (not of Lichtenstein) Sclater and Salvin, Proc. Zool. Soc. Lond., 1871, p. 568—part, Tehuantepec, Pacific coast of Honduras, and

¹ There is no certainty that the eggs "from the coast of Brazil" described by Ihering (Rev. Mus. Paul., 4, p. 294, 1900) were really of this species.

² According to Mathews (Bull. Brit. Orn. Cl., 58, p. 13, 1937), *S. elegans* is preoccupied by *Sterna elegans* Wood (Analyst, 3, p. 211, 1836). Not being able to consult this scarce periodical, we cannot verify whether the name is validly proposed or is merely a nomen nudum (as is the case with *Martula* Wood revived by Mathews in the same note). However, if *S. elegans* Gambel is rendered invalid, the name of the Elegant Tern becomes *S. comata*, based on a bird wintering in Chile, and there was no need for the introduction of a new term (*ichla*).

Peru (Arica) (crit.); Lawrence, Mem. Bost. Soc. N. H., 2, p. 317, 1874—Mazatlan, Sinaloa, and Isabella Island, Mexico.

Sterna elegans elegans Hellmayr, Field Mus. Nat. Hist., Zool. Ser., 19, p. 406, 1932—Arica to Valdivia, Chile (winter visitor); Philippi, Bol. Mus. Nac. Chile, 16, p. 60, 1938—Arica, Tacna (Nov.), and San Vicente de Talcahuano, Concepción (Feb.), Chile.

Thalasseus ichla Mathews, Bull. Brit. Orn. Cl., 58, p. 13, Nov. 5, 1937—new name for *Sterna elegans* Gambel.

Range.—Breeds in Lower California (Scammons Lagoon; San Roque Island), Sonora, and on islands in the Gulf of California (Raza and Cerralvo Islands); strays north to San Francisco Bay; winters off the Pacific coast of South America from Callao Bay, Peru, to Valdivia, Chile.¹

Field Museum Collection.—15: California (Pacific Beach, 1); Mexico, Lower California (Isla Rasa, 1; Georges Island, 13).

****Thalasseus sandvicensis acutiflavus* (Cabot). CABOT'S TERN.**

Sterna acutiflava Cabot, Proc. Bost. Soc. N. H., 2, p. 257, 1847—Tancah, Yucatan (type now in Museum of Comparative Zoology, Cambridge, Mass.; cf. Bangs, Bull. Mus. Comp. Zool., 70, p. 174, 1930); Lawrence, Ann. Lyc. Nat. Hist. N. Y., 9, p. 210, 1869—Celestin, Yucatan.

Thalasseus acutiflavus Coues, Proc. Acad. Nat. Sci. Phila., 1862, p. 540 (monog.); Salvin, Ibis, 1864, p. 381—Saddle Cay, British Honduras; Coues, l.c., 1864, p. 389—Chiapám, Guatemala; Salvin, l.c., 1866, p. 198—coasts of Guatemala; Gundlach, Journ. Orn., 23, p. 390, 1875—Cuba (breeding).

Sterna cautiaca (not of Gmelin) Pelzeln, Orn. Bras., 3, p. 324, 1870—Rio de Janeiro (Bay of Rio de Janeiro, Aug.; Marambaya, March; Ilha do Pescador, Sapitiba, March; Praia do Sai, April), Paraná (Rio do Boraxudo, Dec.), and Pará (Cajútuba), Brazil; Selater and Salvin, Proc. Zool. Soc. Lond., 1871, p. 569—Cuba, British Honduras, and Pacific coast of Guatemala (crit.); Saunders, l.c., 1876, p. 653—part, America south to Brazil (Bahia); idem, Cat. Bds. Brit. Mus., 25, p. 75, 1896—part, qⁿ-o^s, United States, Mexico, British Honduras (Lighthouse Reef), Guatemala (Chiapám), and Colombia (Carthagená, Feb.); Ihering, Rev. Mus. Paul., 5, p. 289, 1902—Iguapé, São Paulo (June 18); Salvin and Godman, Biol. Centr.-Amer., Aves, 3, p. 405, 1903—Mexico (San Mateo, Oaxaca; Laguna Verde and La Antigua, Vera Cruz; Celestin, Yucatan; Cozumel Island), British Honduras (Lighthouse Reef, Saddle Cay, Northern Two Cays), and Guatemala (Chiapám); Ihering, Cat. Faun. Braz., 1, p. 40, 1907—Iguapé, São Paulo.

Sterna sandvicensis acutiflava Cory, Cat. W. Ind. Bds., p. 82, 1892—Bahama Islands (Eleuthera, Acklin Island, Great Inagua), Cuba, Jamaica, Puerto Rico, and Antigua; Field, Auk, 11, p. 120, 1894—Jamaica; Todd, Ann.

¹ *Thalasseus gayi* Bonaparte (Compt. Rend. Acad. Sci. Paris, 42, p. 772, 1856), quoted by authors, is a nomen nudum without nomenclatorial standing.

Carnegie Mus., 10, p. 209, 1916—Los Indios, Isle of Pines; Bent, Bull. U. S. Nat. Mus., 113, p. 221, 1921 (life hist.); Griscom, Bull. Amer. Mus. N. H., 64, p. 126, 1932—Puerto Barrios, Guatemala (Aug. 21); idem, Bull. Mus. Comp. Zool., 72, p. 322, 1932—Permé, Panama (Nov. 30).

Thalasseus sandvicensis acuflavidus(a) Ridgway, Bull. U. S. Nat. Mus., 50, (8), p. 476, 1919 (monog.; full bibliog.); Wetmore, Sci. Surv. Porto Rico and Virgin Islands, 9, p. 384, 1927—Puerto Rico (rare); idem and Swales, Bull. U. S. Nat. Mus., 155, p. 180, 1931—Hispaniola (few records); Peters, Bds. World, 2, p. 344, 1934 (range); Roberts, Trop. Agric., 11, p. 91, 1934—mouth of Oropuche River, Trinidad (Aug. 19); Griscom, Bull. Mus. Comp. Zool., 78, p. 309, 1935—Darien, Panama (two records); Murphy, Ocean. Bds. S. Amer., 2, p. 1142, 1936 (monog.); Sosa, Arch. Soc. Biol. Montevideo, 8, p. 74, 1937—coast of Uruguay; Pinto, Rev. Mus. Paul., 22, p. 153, 1938—Iguapé (June) and Piassaguera, São Paulo.

Range.—Breeds from the southern Atlantic and Gulf states to islands off the coast of British Honduras, on some of the Bahama Islands, and Cuba; winters from the Gulf coast, Florida, and the Bahama Islands south to Colombia (Carthagená), Brazil, and Uruguay, also on the Pacific coast of Mexico and Guatemala.

Field Museum Collection.—40: Texas (Cameron County, 7; Gulf coast, 1; Corpus Christi, 6; Aransas County, 5); North Carolina, Dare County (Bodie Island, 2; Pea Island, 1); Florida (Punta Rassa, 1); Bahama Islands (Acklin Island, 4; Great Inagua, 9); Cuba (Isle of Pines, 1); Lesser Antilles (Antigua, 1; Tobago, 1); Dutch West Indies (Aruba, 1).

Genus LAROSTERNA Blyth

Naenia (not of Stephens, 1829) Boie, Isis, 1844, col. 189—type, by monotypy, *Sterna inca* Lesson and Garnot.

Inca (not of Lepeletier and Serville, 1825) Jardine, Contr. Orn., 1850, p. 33—type, by tautonymy, *Sterna inca* Lesson and Garnot.

Larosterna Blyth, Cat. Bds. Mus. Asiat. Soc., p. 293, 1849 (?=1852)—type, by monotypy, *Sterna inca* Lesson and Garnot.

Sternolophota "Lesson" Bonaparte, Compt. Rend. Acad. Sci. Paris, 43, No. 21, p. 993, Nov., 1856—substitute name for *Inca* Jardine, etc.

**Larosterna inca* (Lesson and Garnot). INCA TERN.

Sterna inca Lesson and Garnot, Voy. Coquille, Zool., Atlas, livr. 3, pl. 47, April 18, 1827—"Lima, Peru"—San Lorenzo Island, Callao Bay (type in Paris Museum); Lesson, Man. d'Orn., 2, p. 383, 1828—San Lorenzo Island (descr.); idem, Voy. Coquille, Zool., 1, (2), livr. 16, p. 731, May 1, 1830—San Lorenzo Island; Fraser, Proc. Zool. Soc. Lond., 13, p. 1, 1845—Chile; Tschudi, Unters. Faun. Peru., Orn., p. 305, 1846—Fronton Islet, near San Lorenzo Island, Callao Bay, Peru.

Anous inca G. R. Gray, List Spec. Bds. Brit. Mus., 3, p. 181, 1844—Chile; Pelzeln, Reise Novara, Zool., 1, Vögel, p. 156, 1865—Chile; Sclater, Proc. Zool. Soc. Lond., 1867, pp. 337, 340—Chile; idem and Salvin, Ibis, 1870, p. 500—Coquimbo, Chile; Cunningham, Not. Nat. Hist. Str. Magellan, p. 404, 1871—Pelican Rock, Coquimbo; Pelzeln, Verh. Zool. Bot. Ges. Wien, 23, p. 159, 1873—Callao Bay, Peru.

Naenia inca Boie, Isis, 1844, col. 189; Sclater and Salvin, Proc. Zool. Soc. Lond., 1871, p. 567—coast of Peru and Chile; Saunders, l.c., 1876, p. 667 (monog.); idem, l.c., 1882, p. 520—Callao Bay, Peru (Aug.); Taczanowski, Orn. Pér., 3, p. 446, 1886—coast of Peru; MacFarlane, Ibis, 1887, p. 204—Callao, Peru; Saunders, Cat. Bds. Brit. Mus., 25, p. 132, 1896—Chile (Valparaiso), Peru (Chincha Islands, Callao Bay), and Ecuador (Guayaquil).

Noddi inca Des Murs, in Gay, Hist. Fís. Pol. Chile, Zool., 1, p. 486, 1847—coast of Chile; Philippi, Reise Wüste Atacama, p. 165, 1860—coast of Atacama, Chile; idem, Anal. Univ. Chile, 31, p. 290, 1868—Corral, Chile, to Peru; idem, Ornith., 4, p. 160, 1888—Atacama.

Inca mystacalis Jardine, Contr. Orn., 1850, p. 33—substitute name for *Sterna inca* Lesson and Garnot.

Larosterna inca Blyth, Cat. Bds. Mus. Asiat. Soc., p. 293, 1849 (?=1852)—Chile; Coker, Proc. U. S. Nat. Mus., 56, p. 460, 1919—Lobos de Afuera, Chincha Islands, and Isla Asia, Peru (breeding); Hellmayr, Field Mus. Nat. Hist., Zool. Ser., 19, p. 403, 1932—Chile (Coquimbo to Valdivia); Peters, Bds. World, 2, p. 344, 1934 (range); Murphy, Ocean. Bds. S. Amer., 2, p. 1143, 1936 (monog.; life hist.); Philippi, El Hornero, 6, p. 236, 1936—Erizera Rock, Arica Bay, Chile; idem, Bol. Mus. Nac. Santiago, 16, p. 59, 1938—Chile (Arica, Aug.; Bocca del Rio Maipo, Santiago, Sept.; San Vicente de Talcaguano, Jan.; Corral); idem, Rev. Chil. Hist. Nat., 44, p. 151, 1940—Iquique (nesting).

Noenia inca Reed, Anal. Univ. Chile, 93, p. 211, 1896—northern Chile.

Range.—Coasts of southern Ecuador (Guayaquil Bay), Peru, and Chile south to Corral, Valdivia; breeding on islands off the Peruvian coast as far south as Iquique.

Field Museum Collection.—3: Peru (Talara, 3).

Genus PROCELSTERNA Lafresnaye

Procelsterna Lafresnaye, Mag. Zool., (2), 4, text to pl. 29, 1842—type, by monotypy, *Sterna tereticollis* Lafresnaye=*Sterna teretirostris* Lafresnaye.

Procelsterna cerulea skottsbergii Lönnberg.¹ SKOTTSBERG'S NODDY.

Procelsterna caerulea skottsbergii Lönnberg, in Skottsberg, Nat. Hist. Juan Fernandez and Easter Islands, 3, p. 20, 1921—Easter Island (type in

¹ *Procelsterna cerulea skottsbergii* Lönnberg: A very pale form with breast, belly, and under wing coverts pure white; under tail coverts likewise white,

Stockholm Museum; cf. Gyldenstolpe, Ark. Zool., 19, A, No. 1, p. 103, 1927).

Procelsterna cerulea skottsbergii Peters, Bds. World, 2, p. 345, 1934 (range).
Range.—Easter Island, South Pacific Ocean.

***Procelsterna cerulea imitatrix* Mathews.¹ ST. AMBROSE NODDY.**

Procelsterna cerulea imitatrix Mathews, Bds. Australia, 2, p. 431, Nov. 1, 1912—San Ambrosio Island, off Chile (type in British Museum); Peters, Bds. World, 2, p. 345, 1934 (range).

Anous cinereus (not *Stolida cinerea* Neboux) Sharpe, Proc. Zool. Soc. Lond., 1881, p. 16—San Ambrosio Island (July).

Procelsterna cinerea Saunders, Cat. Bds. Brit. Mus., 25, p. 135, 1896—part, spec. i, k, San Ambrosio Island.

Procelsterna albigutta imitatrix Murphy, Ocean. Bds. S. Amer., 2, p. 1148, 1936 (monog.).

Range.—San Felix and San Ambrosio Islands, off Chile.

Genus ANOUS Stephens²

Anous Stephens, in Shaw, Gen. Zool., 13, (1), p. 139, 1826—type, by subs. desig. (G. R. Gray, List Gen. Bds., p. 79, 1840), *Anous niger* Stephens = *Sterna stolidus* Linnaeus.

Megalopterus Boie, Isis, 1826, col. 980—type, by monotypy, *Sterna tenuirostris* Temminck.

Noddi Berthold, in Latreille's Nat. Fam. Thierr., p. 85, 1827—type, by monotypy, *Sterna stolidus* Linnaeus.

Stolida Lesson, Traité d'Orn., p. 620, 1831—type, by tautonymy, *Sterna stolidus* Linnaeus.

Aganaphron Gloger, Gemeinn. Hand- und Hilfsbuch, livr. 7, p. 463, 1842—type, by subs. desig. (Ridgway, Bull. U. S. Nat. Mus., 50, (8), p. 544, 1919), *Sterna stolidus* Linnaeus.

Micranous Saunders, Bull. Brit. Orn. Cl., No. 23, p. xix, Jan. 29, 1895—type, by orig. desig., *Sterna tenuirostris* Temminck.

tinged with ashy only on the tips of the longest ones. Wing, 195–196½, (female) 193–194½; tarsus, 26, (female) 24½; bill, 26–27, (female) 27½.

Said to be smaller than *P. c. albivitta* Bonaparte (extralimital) and to have the under tail coverts white instead of ashy gray (Lönnerberg).

¹ *Procelsterna cerulea imitatrix* Mathews: Stated to resemble *P. c. skottsbergii* in paleness of coloring, but much larger (wing, 215; tarsus, 28; bill, 30½).

Direct comparison of adequate series of these two races is imperative to establish their status.

² Stone (Proc. Acad. Nat. Sci. Phila., 1894, p. 117) described from the sea off Montevideo, Uruguay, *Anous atrofuscus* (type, from the Rivoli Collection, in the Academy of Natural Sciences, Philadelphia). This seems to be one of the races of *Anous tenuirostris*, which has no representative in American waters, and the locality is probably erroneous.

Anousella Mathews, Bds. Australia, 2, p. 412 (in text), Nov. 1, 1912—type, by orig. desig., *Anous leucocapillus* Gould=*Anous minutus* Boie.

****Anous stolidus stolidus* (Linnaeus). NODDY.**

Sterna stolidus Linnaeus, Syst. Nat., 10th ed., 1, p. 137, 1758—based on "Hirundo marina minor, capite albo" Sloane, Voy. Jamaica, 1, p. 31, pl. 6, fig. 2 (Atlantic east of Barbados), "The Noddy" Catesby, Nat. Hist. Carolina, 1, p. 88, pl. 88 (breeding in the Bahama Islands), and "Anaethetus minor fuscus, vertica cinereo, rostro glabro" Browne, Civ. Nat. Hist. Jamaica, p. 481 (Jamaica), "in Americae Pelago" (we accept Bahama Islands [ex Catesby] as type locality);¹ Wied, Beitr. Naturg. Bras., 4, (2), p. 874, 1833—coast of Brazil south of the equator.

Anous niger Stephens, in Shaw, Gen. Zool., 13, (1), p. 140, pl. 17, 1825—new name for *Sterna stolidus* Linnaeus.

Gavia leucoceps Swainson, Nat. Hist. Classif. Bds., 2, p. 373, 1837—based on "Mouette brune, de la Louisiane" Daubenton, Pl. Enl., pl. 997.

Anous stolidus Coues, Proc. Acad. Nat. Sci. Phila., 1862, p. 557—part, America (crit.); idem, Ibis, 1864, p. 392—Glover's Reef, British Honduras; Sclater and Salvin, Proc. Zool. Soc. Lond., 1871, p. 566—Cuba, St. Bartholomew, British Honduras, coast of Brazil, and "Chile" (ex Lesson); Gundlach, Journ. Orn., 23, p. 395, 1875—cays of Cuba (breeding habits); Saunders, Proc. Zool. Soc. Lond., 1876, p. 669—part, Gulf coast of America; Penrose, Ibis, 1879, p. 280—Ascension Island (breeding); Wells, Proc. U. S. Nat. Mus., 9, p. 632, 1886—Lee Rocks, Grenada (breeding); Cory, Cat. W. Ind. Bds., p. 83, 1892—Bahama Islands, Cuba, Jamaica, Haiti, Sombrero, St. Bartholomew, Montserrat, Guadeloupe, Dominica, and Grenada; Stone, Proc. Acad. Nat. Sci. Phila., 1894, p. 116—part, Gulf coast of United States; Saunders, Cat. Bds. Brit. Mus., 25, p. 136, 1896—part, spec. a-y, Florida, east coast of Mexico, Jamaica, Nevis, St. Vincent, Grenada, Redonda Island, British Honduras (Glover's Reef, Cay Dolores Channel), St. Paul's Rock, Fernando Noronha, Bahia, and Ascension Island; Bonhote, Ibis, 1903, p. 515—Washerwoman Cays, Andros, Bahama Islands (breeding); Salvin and Godman, Biol. Centr.-Amer., Aves, 3, p. 412, 1903—coast of Mexico, British Honduras, and Honduras; Nicoll, Ibis, 1904, p. 36—St. Paul's Rock (breeding); Clark, Proc. Bost. Soc. N. H., 32, p. 259, 1905—Grenadines (breeding); Nicoll, Ibis, 1906, p. 670—South Trinidad (breeding); Ihering, Cat. Faun. Braz., 1, p. 42, 1907 (range in part); Cory, Field Mus. Nat. Hist., Orn. Ser., 1, p. 226, 1909—Los Hermanos Islands (breeding); Lowe, Ibis, 1909, p. 310—north of Chateau-Belair, St. Vincent (breeding); Noble, Bull. Mus. Comp. Zool., 60, p. 369, 1917—Guadeloupe (breeding on Les Saintes, Tête Anglaise, etc.); Ribeiro, Arch. Mus. Nac. Rio de Janeiro, 22, p. 180, 1919—South Trinidad; Bent, Bull. U. S. Nat. Mus., 113, p. 301, 1921 (life hist.);

¹ As Linnaeus also quotes "Amoen. Acad., 3, p." (which refers to *S. stolidus* Odhelius, Amoen. Acad., 4, p. 240, 1759), it is possible that he had a specimen from the Lagerstroem donation before him. This individual, however, is no longer in existence and was already missing in 1787 (cf. Lönnberg, Bihang Sv. Vetensk.-Akad. Handl., 22, Afd. 4, No. 1, p. 28, 1896).

Wilkins, Ibis, 1923, pp. 477, 510—St. Paul's Rock and Ascension Island (breeding); Pinto, Rev. Mus. Paul., 22, p. 153, 1938 (range).

Anous superciliosus Sharpe, Phil. Trans. Roy. Soc., 168, p. 468, 1879—coast of Mexico, Nevis, and Jamaica (cotypes in British Museum; descr. of young).

Anoüs stolidus stolidus Ridgway, Bull. U. S. Nat. Mus., 50, (8), p. 546, 1919 (monog.; full bibliog.); Wetmore, Sci. Surv. Porto Rico and Virgin Islands, 9, p. 385, 1927—Desecheo and Mona Islands (breeding); Bond, Proc. Acad. Nat. Sci. Phila., 80, p. 528, 1928—near Chateaubelair, St. Vincent; Wetmore and Swales, Bull. U. S. Nat. Mus., 155, p. 182, 1931—Hispaniola (occasional); Bradlee, Proc. Bost. Soc. N. H., 39, p. 293, 1931—Bermuda Islands (one record, Sept. 12, 1854); Peters, Bds. World, 2, p. 346, 1934 (range); Belcher and Smooker, Ibis, 1935, p. 296—Soldado Rock, off Trinidad, and Giles Islets, Tobago (breeding); Murphy, Ocean. Bds. S. Amer., 2, p. 1150, 1936 (monog.; life hist.); Oberholser, Bird Life Louisiana, p. 311, 1938 (casual visitor).

Range.—Breeds on small islands in the Gulf of Mexico (Dry Tortugas, Florida Keys), in the Bahama Islands (Atwood's and Gauling Cays, Dry and Booby Rocks, Acklin and Berry Islands, Washerwoman Cays, etc.), on islands off the coast of British Honduras (Glover's Reef, Cay Dolores) and in the Caribbean Sea (cays off Cuba; Jamaica; Desecheo and Mona Islands; small islets near Guadeloupe; St. Vincent; Grenadines; Lee Rocks, Grenada; Giles Islets, off Tobago; Soldado Rock, Trinidad; Los Hermanos Islands), on St. Paul's Rock, Fernando Noronha, Rocas Reef, South Trinidad; extralimitally on Ascension Island, St. Helena, Tristan d'Acunha, etc.

Field Museum Collection.—22: Bahama Islands (Brown's Cay, 3; Miraporvos Island, 4; New Providence, 2); Jamaica (Grand Cayman, 1); Virgin Islands (St. Thomas, 3); Lesser Antilles (Dominica, 4; Guadeloupe, 2); Venezuela (Orquilla Island, Nueva Esparta, 3).

Anoüs stolidus ridgwayi Anthony.¹ SOCORRO NODDY.

Anoüs stolidus ridgwayi Anthony, Auk, 15, p. 36, Jan., 1898—Socorro Island, Revillagigedo group, Mexico (type in collection of A. W. Anthony, now in the Carnegie Museum, Pittsburgh; cf. Todd, Ann. Carnegie Mus., 18, p. 336(8), 1928); idem, l.c., p. 316, 1898—Socorro (breeding); Nelson, N. Amer. Fauna, 14, p. 26, 1899—Isabella Island (breeding) and Tres Marias (habits); Snodgrass and Heller, Proc. Wash. Acad. Sci., 4, p. 507, 1902—Cocos and Clipperton Islands (descr.; habits); Ridgway, Bull. U. S. Nat. Mus., 50, (8), p. 550, 1919 (monog.; full bibliog.); Fisher and Wetmore, Proc. U. S. Nat. Mus., 79, art. 10, p. 46, 1931—Cocos Island (crit.); Griscom, Bull. Amer. Mus. N. H., 64, p. 128, 1932—off Pacific

¹ *Anoüs stolidus ridgwayi* Anthony differs from the nominate race merely by slightly darker coloration, darker gray pileum, and somewhat stouter bill.

coast of Guatemala; Peters, Bds. World, 2, p. 346, 1934 (range); Murphy, Ocean. Bds. S. Amer., 2, p. 1158, 1936 (monog.; life hist.); Bond and de Schauensee, Proc. Acad. Nat. Sci. Phila., 90, p. 156, 1938—Malpelo Island, off Colombia; Wetmore, Smiths. Misc. Coll., 98, No. 22, p. 5, 1939—Clipperton Island.

Anous stolidus (not *Sterna stolidus* Linnaeus) Selater and Salvin, Ibis, 1859, p. 233—Pacific coast of Guatemala; Lawrence, Mem. Bost. Soc. N. H., 2, p. 318, 1874—Isabella Island, Tepic, Mexico (breeding); Townsend, Bull. Mus. Comp. Zool., 27, p. 125, 1895—Cocos Island; Carriker, Ann. Carnegie Mus., 6, p. 415, 1910—Cocos Island; Gifford, Proc. Calif. Acad. Sci., (4), 2, p. 24, 1913—part, Oneal Rock (Socorro), Clipperton and Cocos Islands; McLellan, l.c., (4), 15, p. 284, 1926—Roca Partida, Revillagigedo Islands, and Isabella Island (breeding).

Anous stolidus rousseaui (not of Hartlaub) Ridgway, Proc. U. S. Nat. Mus., 19, p. 645 (in text), 1897—part, Cocos Island and Isabella Island, Mexico (meas.).

Anous pileatus (not *Sterna pileata* Scopoli) Salvin and Godman, Biol. Centr.-Amer., Aves, 3, p. 413, 1903—part, Revillagigedo Islands, Isabella Island, Tres Marias, Clipperton Island, and Pacific coast of Guatemala.

Range.—Breeds on the Revillagigedo Islands, Isabella Island (off the coast of Nayarit), Clipperton and Cocos Islands; ranges to the Pacific coast of Mexico and Guatemala and to Malpelo Island, off Colombia.

****Anous stolidus galapagensis* Sharpe.¹ GALÁPAGOS NODDY.**

Anous galapagensis Sharpe, Phil. Trans. Roy. Soc. Lond., 168, p. 469, 1879—Dalrymple Rock, Chatham Island, Galápagos (type in British Museum; descr. of young); Salvin, Proc. Zool. Soc. Lond., 1883, p. 430—Charles Island; Ridgway, Proc. U. S. Nat. Mus., 12, p. 116, 1890—Hood and Chatham Islands; Stone, Proc. Acad. Nat. Sci. Phila., 1894, pp. 116, 117—Galápagos Islands; Saunders, Cat. Bds. Brit. Mus., 25, p. 143, 1896—Dalrymple Rock (Chatham) and Charles Island (crit.); Ridgway, Proc. U. S. Nat. Mus., 19, p. 642, 1897—Albemarle, Charles, Hood, Chatham, Tower, and Wenman Islands (descr.; meas.).

Megalopterus stolidus (not *Sterna stolidus* Linnaeus) Darwin, Zool. Beagle, 3, Birds, p. 145, 1841—part, Galápagos Islands.

Anous stolidus Sundevall, Proc. Zool. Soc. Lond., 1871, p. 125—Galápagos Islands; Salvin, Trans. Zool. Soc. Lond., 9, p. 504, 1876—Dalrymple Rock; Ridgway, Proc. U. S. Nat. Mus., 12, p. 116, 1890—Dalrymple Rock and Chatham Islands; Gifford, Proc. Calif. Acad. Sci., (4), 2, p. 25, 1913—part, Galápagos Islands (habits).

Anous stolidus galapagensis Rothschild and Hartert, Nov. Zool., 6, p. 191, 1899—Culpepper and Wenman to Charles and Hood Islands (breeding);

¹ *Anous stolidus galapagensis* Sharpe: Very similar to *A. s. ridgwayi*, but slightly darker, more sooty, especially on back and upper tail coverts.

Judging from the admittedly scanty material examined we are not much impressed with the validity of the Galápagos form when compared with *A. s. ridgwayi*.

crit.; eggs descr.); iidem, l.c., 9, p. 413, 1902—Wenman Island (nestling descr.); Snodgrass and Heller, Proc. Wash. Acad. Sci., 5, p. 239, 1904—James Island (crit.; nest and eggs descr.); Ridgway, Bull. U. S. Nat. Mus., 50, (8), p. 551, 1919 (monog.); Swarth, Occ. Pap. Calif. Acad. Sci., 18, p. 66, 1931—Galápagos Islands; Fisher and Wetmore, Proc. U. S. Nat. Mus., 79, art. 10, p. 46, 1931—Tower Island; Peters, Bds. World, 2, p. 347, 1934 (range); Murphy, Ocean. Bds. S. Amer., 2, p. 1159, 1936 (monog.).

Range.—Breeds in the Galápagos Archipelago.¹

Field Museum Collection.—12: Galápagos Islands (Tagus Cove, Albemarle Island, 10; Abingdon Island, 1; Seymour Island, 1).

Anous minutus diamesus (Heller and Snodgrass).² COCOS BLACK NODDY.

Micranous diamesus Heller and Snodgrass, Condor, 3, p. 76, May 1, 1901—Cocos Island (type in collection of Leland Stanford Jr. University); Snodgrass and Heller, Proc. Wash. Acad. Sci., 4, p. 509, 1902—Cocos and Clipperton Islands (descr.; meas.); Gifford, Proc. Calif. Acad. Sci., (4), 2, p. 29, 1913—Clipperton and Cocos Islands (crit.; habits; eggs descr.).

Megalopterus minutus diamesus Mathews, Bds. Australia, 2, p. 423, 1912; Ridgway, Bull. U. S. Nat. Mus., 50, (8), p. 556, 1919 (monog.).

Megalopterus minutus minutus (not *Anous minutus* Boie, 1844) Fisher and Wetmore, Proc. U. S. Nat. Mus., 79, art. 10, p. 45, 1931—Cocos Island (crit.).

Anous minutus diamesus Peters, Bds. World, 2, p. 348, 1934 (range); Murphy, Ocean. Bds. S. Amer., 2, p. 1163, 1936 (monog.); Bond and de Schauensee, Proc. Acad. Nat. Sci. Phila., 90, p. 157, 1938—Malpelo Island; Wetmore, Smiths. Misc. Coll., 98, No. 22, p. 6, 1939—Clipperton Island.

Range.—Breeds on Clipperton and Cocos Islands and ranges south to Malpelo Island, off Colombia.

Anous minutus americanus (Mathews).³ CARIBBEAN BLACK NODDY.

¹ *Anous stolidus* has been recorded as breeding on Sala y Gomez Island by MacFarlane (Ibis, 1887, p. 210), and Lönnberg (in Skottsberg, Nat. Hist. Juan Fernandez and Easter Island, 3, Zool., p. 20, 1921) lists "*A. stolidus unicolor* Nordm." as nesting on Motu Nui, a small islet near Easter Island. The subspecific status of these forms remains to be determined. Another doubtful race breeds on San Felix Island, off Chile (cf. Murphy, Ocean. Bds. S. Amer., 2, p. 1160, 1936).

² *Anous minutus diamesus* (Heller and Snodgrass): Nearest to *A. m. melanogenys* G. R. Gray, of the Hawaiian Islands, but darker on the scapulars, lower parts and sides of neck, and sides of head, and with longer, stouter bill. Wing, 224, (female) 223–241; bill, 45, (female) 43–43½ (Heller and Snodgrass, Condor, 3, p. 76, 1901).

³ *Anous minutus americanus* (Mathews) is described as being close to *A. m. minutus* (extralimital), but "easily distinguished by its stouter bill and browner tail, while there is less bluish-plumbeous on the upper back and throat."

Megalopterus minutus americanus Mathews, Bds. Australia, 2, (4), p. 423, Nov. 1, 1912—"Caribbean Sea, British Honduras" (type presumably in British Museum).

Anous tenuirostris (not *Sterna tenuirostris* Temminck) Salvin, Ibis, 1864, p. 383—Southwest-of-all Cay, British Honduras; Coues, l.c., 1864, p. 393—Glover's Reef, British Honduras (crit.); Salvin, l.c., 1866, p. 200—Southwest-of-all Cay; Sclater and Salvin, Proc. Zool. Soc. Lond., 1871, p. 566—coast of British Honduras and Trinidad.

Anous melanogenys (not of Gray, 1846) Léotaud, Ois. Trinidad, p. 547, 1866—Trinidad; Saunders, Proc. Zool. Soc. Lond., 1876, p. 670—part, coast of Central America; Stone, Proc. Acad. Nat. Sci. Phila., 1894, p. 117—part, British Honduras (crit.).

Micranous leucocapillus (not *Anous leucocapillus* Gould, 1845) Saunders, Cat. Bds. Brit. Mus., 25, p. 145, 1896—part, spec. a-f, Glover's Reef, British Honduras; Salvin and Godman, Biol. Centr.-Amer., Aves, 3, p. 415, 1903—part, descr. and hab. British Honduras (Glover's Reef, Southwest-of-all Cay).

Megalopterus minutus atlanticus (not of Mathews) Ridgway, Bull. U. S. Nat. Mus., 50, (8), p. 554, 1919—part, British Honduras (Southwest-of-all Cay, Glover's Reef).

Anoüs minutus americanus Peters, Bds. World, 2, p. 348, 1934 (range); Belcher and Smooker, Ibis, 1935, p. 296—El Soldado Rock, Trinidad (egg).

Range.—Breeds on islands off the coast of British Honduras; also said to breed on El Soldado Rock, near Trinidad.¹

Anoüs minutus atlanticus (Mathews).² ATLANTIC BLACK NODDY.

Megalopterus minutus atlanticus Mathews, Bds. Australia, 2, (4), p. 423, Nov. 1, 1912—Ascension Island (type presumably in British Museum); Ridgway, Bull. U. S. Nat. Mus., 50, (8), p. 554, 1919 (monog., excl. of British Honduras).

Anous melanogenys (not of Gray, 1846) Saunders, Proc. Zool. Soc. Lond., 1877, p. 798—St. Paul's Rock and Inaccessible Island (breeding); Penrose, Ibis, 1879, p. 280—Ascension Island (breeding; egg descr.); Sharpe, Journ. Linn. Soc. Lond., Zool., 20, p. 479, 1890—Fernando Noronha (breeding).

Micranous leucocapillus (not *Anous leucocapillus* Gould) Saunders, Cat. Bds. Brit. Mus., 25, p. 145, 1896—part, spec. g-s, St. Paul's Rock, Fernando Noronha, Ascension Island, St. Helena, and Inaccessible Island (Tristan d'Acunha); Nicoll, Ibis, 1904, p. 36—St. Paul's Rock (breeding); Ihering, Cat. Faun. Braz., 1, p. 42, 1907—part, Fernando Noronha.

¹ The Trinidad record rests on the identification of an egg found by T. Spencer on May 12, 1928.

² *Anoüs minutus atlanticus* (Mathews): Described as differing from *A. m. americanus* by longer wings, longer, stouter bill, noticeably more blackish tail, and the restriction of the white color above to the crown of the head.

Birds from St. Paul's Rock are said to be somewhat darker, with the bills shorter and very stout.

Anoëus minutus atlanticus Peters, Bds. World, 2, p. 348, 1934 (range); Murphy, Ocean. Bds. S. Amer., 2, p. 1160, 1936 (monog.; life hist.); Pinto, Rev. Mus. Paul., 22, p. 153, 1938—Fernando Noronha.

Range.—Breeds in the tropical South Atlantic Ocean on St. Paul's Rock and Fernando Noronha, off Brazil, Martin Vas Rocks, and extralimittally on Ascension Island, St. Helena, and Inaccessible Island.

Genus GYGIS Wagler

Gygis Wagler, Isis, 1832, col. 1223—type, by monotypy, *Sterna candida* Gmelin.

Leucanous Mathews, Bds. Australia, 2, (4), p. 432 (in text), Nov. 1, 1912—type, by orig. desig., *Gygis microrhyncha* Saunders.

Alphagygis Mathews, Austr. Av. Rec., 2, p. 110, Sept. 24, 1914—new name for *Gygis* Wagler (considered to be preoccupied by *Gyges* Bory de St. Vincent, 1825).

Gygis alba alba (Sparrman). ATLANTIC FAIRY TERN.

Sterna alba Sparrman, Mus. Carls., fasc. 1, pl. 11, 1786—"in India orientali, ad promontorium Bonae Spei Insulasque maris pacifici"¹ (type in Stockholm Museum; cf. Gyldenstolpe, Ark. Zool., 19, A, No. 1, p. 104, 1927).

Gygis candida (not *Sterna candida* Gmelin) Melliss, Ibis, 1870, p. 106—St. Helena (breeding); Saunders, Proc. Zool. Soc. Lond., 1877, p. 797—Boatswain Island, Ascension Island; Penrose, Ibis, 1879, p. 279—Ascension Island (breeding; eggs descr.); Saunders, Proc. Zool. Soc. Lond., 1880, p. 163—South Trinidad Island (breeding); Sharpe, Journ. Linn. Soc. Lond., Zool., 20, p. 480, 1890—Fernando Noronha (breeding); Saunders, Cat. Bds. Brit. Mus., 25, p. 149, 1896—part, spec. a-k, Fernando Noronha, South Trinidad, and Ascension Island.

Gygis alba Sharpe, Ibis, 1904, p. 217—South Trinidad (soft parts); Ribeiro, Arch. Mus. Nac. Rio de Janeiro, 22, p. 182, 1919—South Trinidad.

Gygis crawfordi Nicoll, Bull. Brit. Orn. Cl., 16, p. 102, 1906—South Trinidad Island (type in British Museum); idem, Ibis, 1906, p. 669—South Trinidad (crit.; breeding habits).

Gygis alba alba Mathews, Bds. Australia, 2, p. 442, 1912—Fernando Noronha, Ascension, and South Trinidad (crit.); Hartert, Nov. Zool., 34, p. 20, 1927 (range); Lowe and Kinnear, Brit. Antar. (Terra Nova) Exped., Zool., 4, p. 112, 1930—South Trinidad; Peters, Bds. World, 2, p. 348,

¹ Mathews (Bds. Australia, 2, p. 441, 1912) suggests Ascension Island, South Atlantic Ocean, as type locality, and Lönnberg (in Skottsberg, Nat. Hist. Juan Fernandez and Easter Island, 3, Zool., pp. 21–22, 1921) has shown Sparrman's type to be indeed an example of the South Atlantic form with the entirely white shafts of the primaries and extensive feathering of the forehead. The locality "New Zealand" on its label is obviously erroneous. In life, the bill is wholly black, not hyacinth-blue at the base as in the other races. It is unfortunate that Nicoll's name *crawfordi* has to give way to *alba* of Sparrman.

1934 (range); Murphy, Ocean. Bds. S. Amer., 2, p. 1164, 1936 (monog.; life hist.); Pinto, Rev. Mus. Paul., 22, p. 154, 1938 (range only).

Range.—Breeds on Fernando Noronha, South Trinidad, Martin Vas Rocks, and extralimitally on Ascension and St. Helena Islands, South Atlantic Ocean.

***Gygis alba candida* (Gmelin). PACIFIC FAIRY TERN.**

Sterna candida Gmelin, Syst. Nat., 1, (2), p. 607, 1789—based on "White Tern" Latham, Gen. Syn. Bds., 3, (2), p. 363, Christmas Island and other parts of the South Sea¹ (cotypes, now in Vienna Museum, examined; cf. Pelzeln, Ibis, 1873, p. 123).

Sterna Semi-alba Bonnaterre, Tabl. Enc. Méth., Orn., livr. 38, p. 94, 1790—based on "White Tern" Latham, Gen. Syn. Bds., 3, (2), p. 363, Christmas Island, etc.

Sterna nivea Bennett, Narrative Whaling Exped., 1, p. 384, 1840—Christmas Island (breeding).

Gygis candida MacFarlane, Ibis, 1887, p. 210—Sala y Gomez Island (breeding); Snodgrass and Heller, Proc. Wash. Acad. Sci., 4, p. 511, 1902—Cocos Island (nesting) and Clipperton Island.

Gygis alba candida Mathews, Bds. Australia, 2, p. 443, 1912 (crit.; range); Ridgway, Bull. U. S. Nat. Mus., 50, (8), p. 559, 1919 (monog.); Fisher and Wetmore, Proc. U. S. Nat. Mus., 79, art. 10, p. 46, 1931—Cocos Island (crit.); Peters, Bds. World, 2, p. 349, 1934 (range); Murphy, Ocean. Bds. S. Amer., 2, p. 1168, 1936 (monog.); Wetmore, Smiths. Misc. Coll., 98, No. 22, p. 6, 1939—Clipperton Island (crit.).

Gygis alba (not *Sterna alba* Sparrman) Gifford, Proc. Calif. Acad. Sci., (4), 2, p. 32, 1913—Tower Island, Galápagos (Sept. 14), Oneal Rock (near Socorro Island, Revillagigedo Islands), Cocos and Clipperton Islands (soft parts; habits; meas.); Swarth, Occ. Pap. Calif. Acad. Sci., 18, p. 66, 1931—Tower Island (ex Gifford).

Gygis alba royana Lönnberg, in Skottsberg, Nat. Hist. Juan Fernandez and Easter Island, 3, Zool., p. 21, 1921—Easter Island (crit.).

Range.—Islands of the Pacific Ocean from the Caroline, Tonga, and Society Islands east to the Revillagigedo Islands (Oneal Rock, near Socorro Island), Clipperton, Cocos, Galápagos Islands (off Tower Island), Easter Island, and Sala y Gomez Island.²

¹ The bird seen at St. Helena was, of course, *G. a. alba*.

² We do not find any difference between birds from the Caroline Islands and two from Cocos Island, and the cotypes in the Vienna Museum seem to be also the same. Cf. also Wetmore (Smiths. Misc. Coll., 98, No. 22, p. 6). Judging from the wide individual variation in measurements observable in specimens from the same island (cf. Gifford, Proc. Calif. Acad. Sci., (4), 2, p. 34, 1913), we doubt that either *G. alba pacifica* (Lesson) or *G. alba royana* Mathews (Bds. Australia, 2, p. 443, 1912—type, from Kermadec Islands, in Tring Collection; cf. Hartert, Nov. Zool., 34, p. 18, 1927) can be maintained.

Family RYNCHOPIDAE. Skimmers

Genus RYNCHOPS Linnaeus

Rynchops Linnaeus, Syst. Nat., 10th ed., 1, p. 138, 1758—type, by monotypy, *Rynchops nigra* Linnaeus.

Ryngchopsalia Brisson, Orn., 6, p. 222, 1760—type, by monotypy, "Le Bec-en-ciseaux" Brisson=*Rynchops nigra cinerascens* Spix.

Rhynchops Latham, Ind. Orn., 2, p. 802, 1790 (emendation of *Rynchops* Linnaeus).

Psolidorhamphos Dumont, Dict. Sci. Nat., 4, p. 173, 1816—substitute name for *Rynchops* Linnaeus.

Rhincops Bonaparte, Ann. Lyc. Nat. Hist. N. Y., 2, p. 351, 1828 (emendation).

****Rynchops nigra nigra* Linnaeus. BLACK SKIMMER.**

Rynchops nigra Linnaeus, Syst. Nat., 10th ed., 1, p. 138, 1758—based principally on "The Cut Water" Catesby, Nat. Hist. Carolina, 1, p. 90, pl. 90, near the sea-coasts of Carolina;¹ Bent, Bull. U. S. Nat. Mus., 113, p. 310, 1921 (life hist.).

Ryncops borealis Swainson, Anim. Menag., p. 340, Dec. 31, 1837—new name for [R.] "*niger* auct."

Rhynchops nigra Gundlach, Journ. Orn., 23, p. 395, 1875—Santa Cruz, Cuba (one record); Saunders, Cat. Bds. Brit. Mus., 25, p. 153, 1896—part, spec. a-d', Virginia, Georgia, Florida, Texas, Mexico (Tampico, Rio Lagartos, and Progreso, Yucatan; Cozumel Island); Salvin and Godman, Biol. Centr.-Amer., Aves, 3, p. 416, 1903—part, eastern Mexico (Matamoros, Tampico, coasts of Yucatan, Cozumel Island); Lowe, Ibis, 1909, p. 322—Cariaco Peninsula, Venezuela (early January; in enormous flocks).

Rynchops nigra nigra Ridgway, Bull. U. S. Nat. Mus., 50, (8), p. 451, 1919 (monog.; full bibliog.; range in part); Peters, Bds. World, 2, p. 349, 1934 (range); Griscom, Ibis, 1935, p. 544 (breeding range from southeastern United States to Yucatan, in winter to Venezuela); Oberholser, Bird Life Louisiana, p. 311, 1938—coast of Louisiana (breeding); Dickey and van Rossem, Field Mus. Nat. Hist., Zool. Ser., 23, p. 184, 1938—Lake Olomega, El Salvador (Aug. 19, Feb. 3-15); Wetmore, Caldasia, 3, p. 112, 1944 (dist. chars.; range).

Range.—Breeds on the Atlantic and Gulf coasts of the United States from New Jersey to Texas, and locally on the Caribbean coast of Mexico (lagoons near Tampico, Tamaulipas; mouth of Rio Lagartos, Yucatan Peninsula); winters from Florida and the Louisiana coast region south to El Salvador and the north coast of Venezuela;² occasional in Cuba.

¹ The reference to Barrère pertains to another race.

² Possibly also visits Trinidad in winter. Winter birds from Cariaco, Venezuela, as also a series from Cozumel, are unquestionably *nigra*. Records from northeastern Brazil turn out to be referable to *R. n. intercedens*.

Field Museum Collection.—55: Texas (Cameron County, 6; Corpus Christi, 6; Aransas County, 2; Port Lavaca, 2; Tivoli, 1); Louisiana (Avery Island, 1); Virginia (Cobb's Island, 8); North Carolina (Hatteras, 2; Pea Island, Dare County, 12); Florida (Brevard County, 3; Pilot Town, 6; Amelia Island, 4); El Salvador (Laguna Olomega, San Miguel, 2).

***Rynchops nigra oblita* Griscom.¹ PACIFIC SKIMMER.**

Rynchops nigra oblita Griscom, Ibis, (13), 5, p. 545, July 1, 1935—Acapám, Pacific coast of Guatemala (type in British Museum examined); van Rossem and Hachisuka, Trans. San Diego Soc. N. H., 8, p. 334, 1937—Algodones Lagoon (May 1) and Guásimas Lagoon (May 12), Sonora, Mexico; van Rossem, Occ. Pap. Mus. Zool. Louisiana State Univ., 21, p. 95, 1945—Sonora (early summer visitant).

Rhynchops nigra (not of Linnaeus) Salvin, Ibis, 1865, p. 193—lagoon of Acapám, near Chiapám, Pacific coast of Guatemala; idem, l.c., 1866, p. 200—Acapám; Lawrence, Mem. Bost. Soc. N. H., 2, p. 318, 1874—Mexico (San Blas, Nayarit; Rio Zacatula, Colima); idem, Bull. U. S. Nat. Mus., 4, p. 52, 1876—San Mateo, Oaxaca; Sumichrast, La Naturaleza, 5, p. 234, 1881—coasts of the Gulf of Tehuantepec; Salvin, Ibis, 1889, p. 379—Cozumel Island; Saunders, Cat. Bds. Brit. Mus., 25, p. 153, 1896—part, spec. e'-k', Acapám, Guatemala (Jan. 29); Salvin and Godman, Biol. Centr.-Amer., Aves, 3, p. 416, 1903—part, Pacific coast of Mexico (San Blas, Rio Zacatula, San Mateo) and Guatemala (Acapám).

Rynchops nigra intercedens (not *Rhynchops intercedens* Saunders) Ridgway, Bull. U. S. Nat. Mus., 50, (8), p. 453, 1919—part, Pacific coast of Mexico (San Blas, Nayarit; Rio Zacatula and Manzanillo, Colima; San Mateo, Oaxaca) and Guatemala (Chiapám).

Range.—Pacific coast of Mexico and Guatemala, from Sonora (Algodones and Guásimas Lagoons; May 1–12, probably breeding) to Chiapám (Lagoon of Acapám).

****Rynchops nigra intermedia* Rendahl.² INTERMEDIATE SKIMMER.**

Rynchops melanura intermedia Rendahl, Ark. Zool., 12, No. 8, p. 12, March 31, 1919—Harbor Head, San Juan del Norte, Nicaragua (type in Stockholm Museum; cf. Gyldenstolpe, Ark. Zool., 19, A, No. 1, p. 104, 1927).

¹ *Rynchops nigra oblita* Griscom: About the same size as *R. n. nigra*, but axillaries and under wing coverts tinged with pale brownish gray, and white tips to secondaries narrower.

Six specimens from Acapám, Guatemala, examined.

² *Rynchops nigra intermedia* Rendahl: Nearest to *R. n. cinerascens*, of Amazonia, but light edges of lateral rectrices more broadly edged with white, and white tips to secondaries likewise conspicuously wider, while the upper parts are less deeply blackish.

It is with considerable reluctance that we adopt Rendahl's name for the Pacific race of South America. *R. m. intermedia* was based upon a single male from San Juan del Norte, Caribbean Nicaragua, which we have not seen. How-

Rhynchops nigra (not of Linnaeus) Lesson, Man. d'Orn., 2, p. 385, 1828—Concepción, Chile; Fraser, Proc. Zool. Soc. Lond., 11, p. 119, 1843—coast of Chile; Tschudi, Peru, Reiseskizzen, 1, p. 35, 1846—Valparaiso, Chile; idem, Unters. Fauna Peru., Orn., p. 306, 1846—Chile (Iquique, Tarapacá; Arica, Tacna) and Peru (Islay, Arequipa; Ilo, Moquegua); Des Murs, in Gay, Hist. Fís. Pol. Chile, Zool., 2, p. 474, 1854—coast of Chile; Kittlitz, Denkw. Reise, 1, pp. 110, 111, 1858—Concepción, Chile; Philippi, Reise Wüste Atacama, p. 165, 1860—Chañaral, Atacama, Chile; Sclater, Proc. Zool. Soc. Lond., 28, p. 290, 1860—Babahoyo, Ecuador; Pelzeln, Reise Novara, Zool., 1, Vögel, p. 151, 1865—Chile; Sclater, Proc. Zool. Soc. Lond., 1867, p. 340—Chile; Philippi, Anal. Univ. Chile, 31, p. 290, 1868—Concepción, Chile, to Peru; Sclater and Salvin, Proc. Zool. Soc. Lond., 1871, p. 566—part, Pacific coast of South America to Concepción; Pelzeln, Verh. Zool. Bot. Ges. Wien, 23, p. 159, 1873—Callao, Peru; Allen, Bull. Mus. Comp. Zool., 3, p. 359, 1876—Lake Titicaca, Peru (one spec.); Reed, Anal. Univ. Chile, 49, p. 568, 1877—Rio Cachapoal, Colchagua, Chile; Nutting, Proc. U. S. Nat. Mus., 6, p. 409, 1884—Los Sábalos, Nicaragua; Philippi, Ornith., 4, p. 160, 1888—Chañaral, Atacama, Chile; Salvin and Godman, Biol. Centr.-Amer., Aves, 3, p. 416, 1903—part, Los Sábalos, Nicaragua.

Rhynchops melanura (not of Swainson) Sclater and Salvin, Ibis, 1869, p. 284—Ancud, Chiloé, Chile; Cunningham, Not. Nat. Hist. Straits Magellan, p. 365, 1871—Ancud; Taczanowski, Proc. Zool. Soc. Lond., 1874, p. 562—Chorillos, Peru (crit.); Saunders, l.c., 1882, p. 522—Coquimbo Bay, Chile; idem, Cat. Bds. Brit. Mus., 25, p. 156, 1896—part, spec. a, m-v, Yucatan (Cozumel Island, Feb.), "Straits of Magellan," Chile (Viña del Mar, Valparaiso; Coquimbo), and Peru (Callao); Reed, Anal. Univ. Chile, 93, p. 211, 1896—Chile; Salvin and Godman, Biol. Centr.-Amer., Aves, 3, p. 417, 1903—Cozumel Island, Yucatan.

Rhynchops cinerascens (not of Spix) Chubb, Ibis, 1919, p. 258—Trujillo, Peru.

Rhynchops cinerascens Ridgway, Bull. U. S. Nat. Mus., 50, (8), p. 455, 1919—part, Pacific coast of Ecuador to Chile and Cozumel Island, Yucatan.

Rhynchops nigra cinerascens Chapman, Bull. Amer. Mus. N. H., 55, p. 187, 1926—Gulf of Guayaquil and Puná Island, western Ecuador.

Rhynchops nigra intermedia Hellmayr, Field Mus. Nat. Hist., Zool. Ser., 19, p. 403, 1932—Papudo, Aconcagua, Chile (crit.; range in Chile); Peters, Bds. World, 2, p. 349, 1934 (range); Griscom, Ibis, 1935, p. 545 (crit.; range); Murphy, Ocean. Bds. S. Amer., 2, p. 1171 (in text), 1936—Paracas Bay, Peru (meas.); Philippi, Bol. Mus. Nac. Santiago, 16, p. 62, 1938—Arica, Tacna, Chile (Sept.).

ever, a female from Cozumel Island, off Yucatan, while very nearly identical in coloration with birds from Chile, is decidedly smaller, as has been noticed by Griscom. Unfortunately, the specimen, which, by the way, was taken in winter (February) along with migratory individuals of the North American Skimmer, is immature. Without a series of breeding specimens from the Caribbean coast of Central America, the problem cannot be satisfactorily solved.

Ten specimens from Chile, two from the Peruvian coast (Trujillo, Callao), and one from Cozumel Island examined.

Range.—Pacific coast of South America from Ecuador to Chiloe Island, Chile;¹ accidental(?) on the Caribbean coast of Central America (Cozumel Island, off Yucatan; San Juan del Norte and Los Sábalos, Nicaragua); casual on Lake Titicaca, Peru.

Field Museum Collection.—4: Ecuador (Rio San Antonio, Province de los Rios, 1); Chile (Papudo, Aconcagua, 3).

****Rynchops nigra cinerascens* Spix.² DUSKY-TAILED SKIMMER.**

Rynchops cinerascens Spix, Av. Spec. Nov. Bras., 2, p. 80, pl. 102, 1825—"in locis ripariis flum. Amazonum," Brazil (descr. of immature; type lost, cf. Hellmayr, Abhandl. Math.-phys. Kl. Bayr. Akad. Wiss., 22, p. 715, 1906); Delacour, Ibis, 1923, p. 139—sand banks of the Apure River, Venezuela; Young, l.c., 1928, p. 767—Blairmont, British Guiana; Davis, l.c., 1935, p. 531—Rupununi and upper Essequibo rivers, British Guiana.

Rynchops brevirostris Spix, Av. Spec. Nov. Bras., 2, p. 81, pl. 103, 1825—[Amazon River] Brazil (descr. of young; type in Munich Museum; cf. Hellmayr, Abhandl. Math.-phys. Kl. Bayr. Akad. Wiss., 22, p. 715, 1906).

Rhyncops melanurus Swainson, Anim. Menag., p. 340, Dec. 31, 1837—coast of Demerara (type in collection of Mr. Schomburgk).

Rhynchops melanurus Cabanis, in Schomburgk, Reisen Brit. Guiana, 3, "1848," p. 761, 1849—coast region, upper Essequibo, and Rupununi River.

Rhynchops nigra (not of Linnaeus) Sclater, Proc. Zool. Soc. Lond., 26, p. 77, 1858—Rio Napo, Ecuador; Léotaud, Ois. Trinidad, p. 534, 1866—Trinidad; Pelzeln, Orn. Bras., 3, p. 324, 1870—part, Villa Bella de Matto Grosso, Matto Grosso, and Cajútuba, Pará, Brazil; Wyatt, Ibis, 1871, p. 384—Dique, Rio Magdalena, Colombia; Sclater and Salvin, Proc. Zool. Soc. Lond., 1871, p. 566—part, Rio Ucayali, Rio Napo, Matto Grosso, and Cajútuba; iidem, l.c., 1873, p. 310—lower Ucayali and Rio Huallaga, Peru; Robinson, Proc. U. S. Nat. Mus., 18, p. 654, 1895—Margarita Island, Venezuela (June–July).

Rhynchops melanura Sclater and Salvin, Proc. Zool. Soc. Lond., 1866, p. 201—lower Ucayali, Peru (egg descr.); iidem, l.c., 1867, p. 593—Mexiana Island, Brazil; Taczanowski, Orn. Pér., 3, p. 437, 1886—part, east Peruvian localities; Saunders, Cat. Bds. Brit. Mus., 25, p. 156, 1896—part, spec. b–l, Venezuela, British Guiana (Rupununi River, Ourumee), Surinam, Mexiana Island, and Peru (Ucayali River, Yurimaguas).

¹ The locality "Straits of Magellan," attached to a specimen in the British Museum, is open to doubt.

² An earlier name is probably *Rynchops fulva* Linnaeus (Syst. Nat., 10th ed., 1, p. 138, 1758), based exclusively upon "*Ryghopsalia fulva*, rostro nigro" Barrère (Orn. Spec. Nov., Perpignan, 1745, p. 20; French Guiana). The bird is described as similar in size and shape to the same author's "*Ryghopsalia dorso nigro*, ventre albo" (l.c.), but is said to have the upper parts "*fulvus*" instead of sooty black, and the bill entirely "black" (without red at the base). The color of the dorsal parts might easily be applied to the brown-backed juvenile plumage, though the dusky reddish bill can hardly be called "black" in that stage.

Rhynchops nigra cinerascens Berlepsch and Hartert, Nov. Zool., 9, p. 132, 1902—Caicara, Orinoco River, Venezuela (crit.); Ihering, Rev. Mus. Paul., 6, "1904," p. 452, 1905—Rio Juruá, Brazil; Berlepsch, Nov. Zool., 15, p. 310, 1908—French Guiana; Hartert and Venturi, l.c., 16, p. 254, 1909—San Vicente and Rio Amores, Santa Fé, Argentina (Nov. 11); Beebe, Zoologica (N.Y.), 1, p. 74, 1909—mouth of Rio San Juan, Venezuela; Snethlage, Bol. Mus. Goeldi, 8, p. 80, 1914—Marajó (Cururú, Tapera, Magoary), Brazil; Chapman, Bull. Amer. Mus. N. H., 36, p. 222, 1917—lower Magdalena up to Giradot, Colombia; Bangs and Penard, Bull. Mus. Comp. Zool., 62, p. 44, 1918—Tijgerbank, Surinam; Pinto, Rev. Mus. Paul., 22, p. 154, 1938—Rio Juruá, Brazil; Wetmore, Caldasia, 3, p. 115, 1944 (dist. chars.; range).

Rhynchops nigra cinerascens Hellmayr, Nov. Zool., 13, p. 55, 1906—Port-of-Spain, Trinidad (June; crit.); Ihering, Cat. Faun. Braz., 1, p. 43, 1907—Rio Juruá; Stone, Proc. Acad. Nat. Sci. Phila., 65, p. 192, 1913—La Pedrita, Rio Uracoa, Venezuela; Cherrie, Sci. Bull., Mus. Brookl. Inst., 2, p. 374, 1916—Orinoco Valley; Dabbene, El Hornero, 1, p. 214, 1919—Chaco Argentino (ex Hartert and Venturi) (dist. char.); Stone, Proc. Acad. Nat. Sci. Phila., 80, p. 152, 1928—Rio Pará, Pará, Brazil; Peters, Bds. World, 2, p. 350, 1934 (range); Griscom, Ibis, 1935, p. 545 (range); Danforth, Auk, 53, p. 82, 1936—Glover's Island, Grenada (July 31).

Rhynchops cinerascens Ridgway, Bull. U. S. Nat. Mus., 50, (8), p. 455, 1919—part, eastern Ecuador and Peru, Trinidad.

Rhynchops nigra subsp. Belcher and Smooker, Ibis, 1935, p. 297—Trinidad waters on Gulf of Paria side.

Range.—Northern half of South America (except the Pacific coast) from the Magdalena Valley, Colombia, the north coast of Venezuela, the island of Trinidad, and the Guianas south to the Amazon Valley and the northern confines of Matto Grosso; casual in the Lesser Antilles (Glover's Island, Grenada) and in northern Argentina (San Vicente, Rio Amores, Santa Fé; Nov. 11).¹

Field Museum Collection.—6: Peru (Lagunas, Loreto, 1); British Guiana (Buxton, 4); Brazil (Conceicao, Rio Branco, Amazonas, 1).

****Rhynchops nigra intercedens* Saunders. SOUTHERN SKIMMER.**

Rhynchops intercedens Saunders, Bull. Brit. Orn. Cl., 4, p. xxvi, March 20, 1895—"on the coast of South Brazil and Argentina, ascending the Paraná and Paraguay to their head-waters" (type, from São Paulo, Brazil, in British Museum examined); idem, Cat. Bds. Brit. Mus., 25, p. 155, 1896—São Paulo, Santa Catharina, and Buenos Aires; Kerr, Ibis, 1901, p. 236—Paraguayan Chaco; Lillo, Apunt. Hist. Nat., 1, p. 22, 1909—Ojo de Agua,

¹ Allowing the usual amount of individual variation, we find it impracticable to separate Trinidad and Venezuelan birds from those of Amazonia. Two adults from the Chaco Santafecino (San Vicente and Rio Amores, Nov. 11), with dark sooty brown axillaries and under wing coverts, can hardly be told from Amazonian skins. The occurrence of such individuals so far south is certainly remarkable.

Santiago del Estero; Hartert and Venturi, Nov. Zool., 16, p. 254, 1909—Est. San Martino Monte and Avellanedo, Buenos Aires; Scott and Sharpe, Rep. Princet. Univ. Exped. Patagonia, 2, Orn., p. 193, 1910 (descr.; range excl. Chile and Peru).

R(h)ynchops nigra (not of Linnaeus) Wied, Beitr. Naturg. Bras., 4, (2), p. 877, 1833—Espírito Santo and Belmonte rivers, eastern Brazil; Darwin, Zool. Beagle, 3, Birds, p. 143, 1841—Maldonado, Uruguay (May), and Rio Paraná; Burmeister, Syst. Uebers. Th. Bras., 3, p. 454, 1856—seacoast of southeastern Brazil; idem, Journ. Orn., 8, p. 267, 1860—Rio Paraná; idem, Reise La Plata St., 2, p. 520, 1861—Rio Paraná; Selater and Salvin, Proc. Zool. Soc. Lond., 1869, p. 634—Conchitas, Buenos Aires; Pelzeln, Orn. Bras., 3, p. 324, 1870—part, Rio de Janeiro (Sapitiba), São Paulo (Ypanemá, Irisanga), Goyáz (Araguay), and Matto Grosso (Rio de Cabaçal, Caiçara); Berlepsch, Journ. Orn., 22, p. 279, 1874—Blumenau, Santa Catharina; Durnford, Ibis, 1877, p. 200—Buenos Aires; White, Proc. Zool. Soc. Lond., 1882, p. 628—Monte Grande, Buenos Aires; Berlepsch, Journ. Orn., 35, p. 37, 1887—Rio Pilcomayo; Reiser, Denks. Math.-Naturw. Kl. Akad. Wiss. Wien, 76, p. 98, 1910—Brazil (near Sambaiba, Rio São Francisco, Bahia; Ilha Grande, Lagõa do Parnaguá, Piauhý).

Rhynchops melanura (not of Swainson) Selater and Hudson, Arg. Orn., 2, p. 193, 1889—Bahia Blanca, Buenos Aires; Grant, Ibis, 1911, p. 470—Buenos Aires (Cape San Antonio), Chaco (Riacho Ancho), and Paraguay (Colonia Risso, Puerto Braga); Gibson, l.c., 1920, p. 73—Cape San Antonio, Buenos Aires.

Rynchops nigra intercedens Ihering, Rev. Mus. Paul., 3, p. 442, 1899—Iguapé, São Paulo; idem, Cat. Faun. Braz., 1, p. 43, 1907—São Paulo (Campinas, São Sebastião, Itapura, Iguapé) and "Amazonia inferior"; Ridgway, Bull. U. S. Nat. Mus., 50, (8), p. 453, 1919—part, southern Brazil, Paraguay, Uruguay, and Argentina; Pereyra, El Hornero, 4, p. 24, 1927—Rio Luján (Escobar), Buenos Aires; Hellmayr, Field Mus. Nat. Hist., Zool. Ser., 12, p. 497, 1929—Piauhý and Maranhão, Brazil; Laubmann, Wiss. Erg. Deuts. Gran Chaco Exp., Vögel, p. 52, 1930—Lapango, Formosa (crit.; range in part); Naumburg, Bull. Amer. Mus. N. H., 60, p. 76, 1930—Matto Grosso; Stone and Roberts, Proc. Acad. Nat. Sci. Phila., 86, p. 376, 1934—Descalvados, Matto Grosso; Peters, Bds. World, 2, p. 350, 1934 (range); Griscom, Ibis, 1935, p. 545 (dist. char.; range); Wetmore, Caldasia, 3, p. 117, 1944 (dist. chars.; range).

Rhynchops intercedens Hellmayr, Nov. Zool., 15, p. 102, 1908—Rio Araguaya, Goyáz (crit.); Dabbene, El Hornero, 1, p. 214, 1919 (dist. char.; range); Tremoleras, l.c., 2, p. 13, 1920—coast of Montevideo, Uruguay; Daguerre, l.c., p. 261, 1922—Rosas, Buenos Aires; Friedmann, Bull. Mus. Comp. Zool., 68, p. 166, 1927—Rio Paraná, near Santa Elena, Entre Ríos.

Rynchops nigra subsp. *intercedens* Dabbene, Anal. Mus. Nac. Buenos Aires, 18, p. 212, 1910 (range in Argentina).

Rhynchops nigra intercedens Reiser, Denks. Math.-Naturw. Kl. Akad. Wiss. Wien, 76, p. 242, 1923—Piauhý (Lago do Parnaguá, Urubú Grande, Colonia Floriano, São Gonçalves, Queimadas) and Maranhão (Bõa Vista); Pinto, Rev. Mus. Paul., 22, p. 155, 1938—Maranhão (Bõa Vista),

Espirito Santo (Rio Doce), Minas Geraes (Pirapora, Rio São Francisco), São Paulo (São Sebastião, Campinas, Rio Paraná, Presidente Epitacio), and Rio Grande do Sul (Itaquy).

Range.—Coasts and rivers of eastern and southern Brazil, from Maranhão and Piauí to Rio Grande do Sul; Uruguay; Paraguay; and northern Argentina south to Córdoba and province of Buenos Aires.

Field Museum Collection.—4: Brazil (Lagoa Grande, Goyas, 3); Argentina (Concepción, Tucumán, 1).

² A nearly allied, larger race, *P. alle polaris* (Stenhouse), breeds on Franz Josef Land.

³ Doubtfully separable from *Alca* Linnaeus.

Torda Duméril, Zool. Anal., p. 72, 1806—type, by subs. desig. (Ogilvie-Grant, Cat. Bds. Brit. Mus., 26, p. 562, 1898), *Alca impennis* Linnaeus.

Mataoptera Gloger, Gemeinn. Hand- und Hilfsb. Naturg., 1, p. 475, 1842—type, by orig. desig., *Alca impennis* Linnaeus.

Gyalca Steenstrup, Vidensk. Medd. Naturh. Foren., 1855, p. 114—type, by orig. desig., *Alca impennis* Linnaeus.

Pinguinus impennis (Linnaeus). GREAT AUK.

Alca impennis Linnaeus, Syst. Nat., 10th ed., 1, p. 130, 1758—principally based upon Faun. Svec., No. 119, "in Europa arctica" (type locality, Norwegian seas, ex Faun. Svec.); Winge, Medd. Grønl., 21, p. 235, 1898 (former occurrence in Greenland).

Alca maior Merrem, in Ersch and Gruber, Allg. Encycl. Wissens. Künste, 2, p. 407, 1819.

Plautus impennis Ogilvie-Grant, Cat. Bds. Brit. Mus., 26, p. 563, 1898 (monog.); Bent, Bull. U. S. Nat. Mus., 107, p. 208, 1919 (life hist.).

Pinguinus impennis Ridgway, Bull. U. S. Nat. Mus., 50, (8), p. 711, 1919 (monog.; full bibliog.); Peters, Bds. World, 2, p. 351, 1934 (range).

Alca (*Pinguinus*) *impennis* Härttert, Vög. Pal. Fauna, 3, p. 1767, 1921 (monog.).

Range.—Extinct. Bred formerly on Funk Island off Newfoundland and extralimitally on Iceland, the Färoes, St. Kilda, and the Orkney Islands; occurred also in southern Greenland, on the American coast south to Massachusetts (occasionally to Florida) and on the European side of the Atlantic to the British Isles, Denmark, and southern Spain.

Genus **ALCA** Linnaeus

Alca Linnaeus, Syst. Nat., 10th ed., 1, p. 130, 1758—type, by tautonymy, "Alca"=*Alca torda* Linnaeus.

Pingouin Lacépède, in Buffon, Hist. Nat., Quadr., 14, éd. Didot, p. 313, 1799 (1802)—type, by subs. desig. (Ogilvie-Grant, Cat. Bds. Brit. Mus., 26, p. 564, 1898), *Alca torda* Linnaeus.

**Alca torda torda* Linnaeus. RAZOR-BILLED AUK.

Alca Torda Linnaeus, Syst. Nat., 10th ed., 1, p. 130, 1758—based chiefly on Faun. Svec., No. 120, "in Europae borealis oceano" (restricted type locality, Karlsö Islands, Gotland, Sweden, ex Faun. Svec.); Ogilvie-Grant, Cat. Bds. Brit. Mus., 26, p. 565, 1898 (monog., excl. of British Isles); Winge, Medd. Grønl., 21, p. 233, 1898—Greenland; Ridgway, Bull. U. S. Nat. Mus., 50, (8), p. 714, 1919 (monog.; full bibliog.); Bent, l.c., 107, p. 199, 1919 (life hist.); Peters, Bds. World, 2, p. 351, 1934 (range in part); Wynne-Edwards, Proc. Bost. Soc. N. H., 40, p. 329, 1935 (distr. in North Atlantic).

Alca glacialis Brehm, Lehrb. Naturg. Europ. Vogel, 2, p. 949, 1824—extreme north of Europe; idem, Handb. Naturg. Vög. Deuts., p. 1004, 1831—

Greenland and Färoes (type lost; type locality, as designated by Ticehurst [Ibis, 1936, p. 383], Greenland).

Alca brünnichi Billberg, Syn. Faun. Scand., 1, (2), p. 190, 1828—new name for *Alca Torda* Linnaeus.

Alca islandica Brehm, Handb. Naturg. Vög. Deuts., p. 1005, pl. 46, fig. 2, 1831—Iceland (type in Tring Collection [cf. Hartert, Nov. Zool., 25, p. 61, 1918], now in the American Museum of Natural History, New York).

Range.—Breeds in America from southern Greenland and central Labrador south to Newfoundland and Nova Scotia (Fundy Bay) and extralimittally in Iceland and northern Europe;¹ winters south to Long Island, casually to North Carolina.

Field Museum Collection.—17: Labrador (Jack Lane Bay, 2; Tinker Island, 3; Lettel Land Islands, 2); Quebec (Magdalen Islands, 6); Nova Scotia (Dover, 1); Maine (Eastport, 1); Massachusetts (Monomoy Island, 1; Duxbury, 1).

Genus *URIA* Brisson

Uria Brisson, Orn., 1, p. 52, 6, p. 70, 1760—type, by tautonymy, "*Uria*" = *Colymbus aalge* Pontoppidan.

Lomvia Brandt, Bull. Sci. Acad. Sci. St. Pétersb., 2, col. 345, 1837—type, by tautonymy, *Alca lomvia* Linnaeus.

Cataractes "Moehring" G. R. Gray, List Gen. Subgen. Bds., 2nd ed., p. 98, 1841—type, by orig. desig., *Colymbus troille* Linnaeus.

**Uria lomvia lomvia* (Linnaeus). BRÜNNICH'S MURRE.

Alca Lomvia Linnaeus, Syst. Nat., 10th ed., 1, p. 130, 1758—based on "*Lomvia*" Clusius, Willoughby, and Raius, and "Guillemot" Albin, Nat. Hist. Bds., 1, p. 80, pl. 84 (restricted type locality, Greenland [ex Albin], cf. Hartert, Vög. Pal. Fauna, 3, p. 1773, 1921).

Colymbus Troille Linnaeus, Fauna Svec., ed. altera, p. 52, 1761—based on Martens, Spitzberg. oder Groenl. Reise Besch., p. 57, pl. M, fig. A, "in alto mari septentrionali" = Magdalena Bay, Spitzbergen; cf. Jourdain, Ibis, 1923, pp. 436-439.²

Uria Svarbag Brünnich, Orn. Bor., p. 27, 1764—Iceland.

Uria Brünnichii Sabine, Trans. Linn. Soc. Lond., 12, (2), p. 538, 1819—Davis's Straits and occasionally in Baffin's Bay, Greenland (location of type unknown).

¹ Replaced in the British Isles, on the coast of Brittany, and on the Färoes by the smaller *A. torda britannica* Ticehurst (Ibis, 1936, p. 383; type, from Skomer Island, Pembrokeshire, in the British Museum).

² In this paper, the late F. C. R. Jourdain not only demonstrated that the "Lumbe" of Martens referred to Brünnich's Murre, but also unraveled the mystery surrounding A[nton] [Rollandson] Martin, whose diary of a voyage to the North Polar region was published in "Ymer" for 1882.

Uria Francsii "Leach" Sabine, Trans. Linn. Soc. Lond., 12, (2), p. 538 (in text), 1819 (cf. also p. 588).¹

Uria polaris Brehm, Lehrb. Naturg. Eur. Vögel, 2, p. 931, 1824—northern Greenland in summer (probable type in Tring Collection [cf. Hartert, Nov. Zool., 25, p. 61, 1918], now in the American Museum of Natural History, New York).

Uria lomvia Ogilvie-Grant, Cat. Bds. Brit. Mus., 26, p. 577, 1898 (in part).

Uria arra (not of Pallas) Winge, Medd. Grøn., 21, p. 222, 1898—Greenland.

Uria lomvia lomvia Ridgway, Bull. U. S. Nat. Mus., 50, (8), p. 726, 1919 (monog.; full bibliog.); Bent, l.c., 107, p. 189, 1919 (life hist.); Hartert, Vög. Pal. Fauna, 3, p. 1773, 1921 (monog.); Løppenthin, Medd. Grøn., 91, No. 6, pp. 100, 125, 1932—Scoresby Sound, Greenland; Peters, Bds. World, 2, p. 352, 1934 (range); Wynne-Edwards, Proc. Bost. Soc. N. H., 40, p. 331, 1935 (distr. in North Atlantic); Soper, Auk, 63, p. 238, 1946—Baffin Island (status).

Range.—Breeds from southern Ellësmere Island, northern Greenland, Spitzbergen, and Franz Josef Land south to Hudson Bay, islands in the Gulf of St. Lawrence, southern Greenland, Iceland, the Murman Coast, and Novaya Zemlya; winters south to Long Island, the British Isles, and the coasts of the Baltic Sea.

Field Museum Collection.—27: Arctic Canada (Resolution Island, 1); Greenland (Sukkertoppen, 2; Agpamuit, 1; Rathbone Island, east coast, 1); Quebec (Magdalen Islands, 6; Bird Rock, 1); New Brunswick (Grand Manan, 1); Nova Scotia (Dover, 2; Halifax, 2); Maine (Bangor, 3; Eastport, 1); Connecticut (Stamford, 2; New Haven County, 4).

****Uria lomvia arra* (Pallas). PALLAS'S MURRE.**

Cepphus Arra Pallas, Zoogr. Rosso-Asiat., 2, p. 347, 1811—Kamchatka.

Uria lomvia arra Ridgway, Bull. U. S. Nat. Mus., 50, (8), p. 730, 1919 (monog.; full bibliog.); Bent, l.c., 107, p. 196, 1919 (life hist.); Hartert, Vög. Pal. Fauna, 3, p. 1774, 1921 (monog.); Preble and McAtee, N. Amer. Fauna, 46, p. 28, 1923—Pribilof Islands (breeding); Peters, Bds. World, 2, p. 352, 1934 (range in part).

Range.—Breeds on coasts and islands of northeastern Siberia, from Kamchatka north to Wrangell and Herald Islands;² the Com-

¹ *Uria Francsii* can be regarded merely as a substitute name for *U. Brünnichii*, lacking, as it does, any kind of description, and this in spite of the fact that the "species" is stated (p. 588) to have been discovered by Mr. Francis "near Ferroe" and afterwards secured by Lieutenant Parry on the west coast of Greenland.

² Portenko (Mitt. Zool. Mus. Berlin, 22, pp. 226, 227, Oct. 30, 1937) separates *U. lomvia arroides*, from Franz Josef Land; *U. l. eleonorae*, from Preobrashejka Island, Chatanga Bay, Siberia; and (C. R. Acad. Sci. Moscou, n.s., 43, p. 226, 1944) *Uria lomvia heckeri*, from Wrangell Island.

mander and Kurile Islands; and in northwestern North America from Kotzebue Sound, Alaska, to the Aleutian Islands, and Kodiak Island; winters in the Bering Sea and in the North Pacific south to Japan and Vancouver Island.

Field Museum Collection.—6: Alaska (Diomed Islands, 2; St. George Island, 1; Bluff City, 1; Bethel, 1); British Columbia (Vancouver Island, 1).

****Uria aalge*¹ *aalge* (Pontoppidan). MURRE.**

Colymbus aalge Pontoppidan, *Danske Atlas*, 1, p. 621, pl. 26, 1763—Denmark and Iceland (type locality restricted to Iceland by Salomonsen, *Ibis*, 1932, p. 130); Mathews and Iredale, *Austr. Av. Rec.*, 5, p. 49, 1923 (nomencl.).

Uria alga Brünnich, *Orn. Bor.*, p. 28, 1764—no locality given.

Uria ringvia Brünnich,² *Orn. Bor.*, p. 28, 1764—Iceland; Ridgway, *Bull. U. S. Nat. Mus.*, 50, (8), p. 719, 1919 (monog.; in part).

Uria lacrymans (Lapylaie MS.) Valenciennes, in Choris, *Voy. Pitt. autour du Monde*, Aléout., p. 27, pl. 23, 1822—Newfoundland (type in Paris Museum; cf. Berlioz, *Bull. Mus. Hist. Nat. Paris*, (2), 1, p. 60, 1929).

Uria lachrymans Lesson, *Traité d'Orn.*, p. 638, 1831—Newfoundland (Lapylaie) and "Îles Aléoutiennes (Choris)," *errore* (type, from Newfoundland, in the Paris Museum; cf. Berlioz, *Bull. Mus. Hist. Nat. Paris*, (2), 1, p. 60, 1929).

Uria troile (not *Colymbus Troille* Linnaeus) Ogilvie-Grant, *Cat. Bds. Brit. Mus.*, 26, p. 573, 1898 (in part); Winge, *Medd. Grønl.*, 21, p. 221, 1898—Greenland.

Uria troille troille Ridgway, *Bull. U. S. Nat. Mus.*, 50, (8), p. 721, 1919 (monog.; full bibliog.); Bent, *l.c.*, 107, p. 172, 1919 (life hist.); Hartert, *Vög. Pal. Fauna*, 3, p. 1771, 1921 (monog.; in part).

Uria aalge aalge Salomonsen, *Ibis*, 1932, p. 130 (crit.); Peters, *Bds. World*, 2, p. 352, 1934 (range); Johnson, *Bd. Banding*, Boston, 11, p. 1, 1940 (range; population and migration in eastern North America).

Uria aalge Wynne-Edwards, *Proc. Bost. Soc. N. H.*, 40, p. 330, 1935 (distr. in North Atlantic).

Range.—Breeds from southern Labrador and southern Greenland south to Newfoundland, Magdalen Islands, and Nova Scotia (Fundy Bay), and extralimittally in Iceland and on the coasts of Norway; winters south to Maine.

¹ A critical review of the races of this species has been published by Salomonsen (*Ibis*, 1932, pp. 128–132). It should be consulted by those interested in the extralimital forms.

² The status of *Uria ringvia*, the "White-eyed Murre," has been settled by Johnson (*Auk*, 55, pp. 56–61, pl. 5, 1938). There can be no longer any question that, far from being a distinct species, it is merely an individual mutation.

Field Museum Collection.—8: Labrador (Lance au Loup, 1; Lettel Land Island, Davis Inlet, 1); Newfoundland (unspecified, 1); Quebec (Magdalen Islands, 5).

****Uria aalge inornata* Salomonsen.¹ BERING SEA MURRE.**

Uria aalge inornata Salomonsen, Ibis, (13), 2, p. 128, Jan., 1932—St. Matthews Island, Bering Sea (type in U. S. National Museum); Peters, Bds. World, 2, p. 353, 1934 (range).

Uria troille californica (not *Catarractes californicus* Bryant) Ridgway, Bull. U. S. Nat. Mus., 50, (8), p. 724, 1919 (monog.; in part, from Washington northward); Bent, l.c., 107, p. 182, 1919 (life hist.; range in part); Preble and McAtee, N. Amer. Fauna, 46, p. 26, 1923—Pribilof Islands.

Uria aalge californica Gabrielson, Auk, 61, p. 270, 1944—Semidi and Kagamil Islands, Alaska (nesting colonies).

Range.—Breeds on the coast and islands of Bering Sea and adjacent parts of the North Pacific from the Aleutian Islands south to Oregon (Three Arch Rocks), and to Sakhalin and northern Japan.

Field Museum Collection.—12: Alaska (Diomed Islands, 1; Little Diomed Island, 2; Dall Island, 2; Bethel, 2; Bluff City, 1); Oregon (Netarts, 4).

****Uria aalge californica* (Bryant). CALIFORNIA MURRE.**

Catarractes californicus Bryant, Proc. Bost. Soc. Nat. Hist., 8, p. 142, 1861—Farrelones [=Farallon] Islands, near San Francisco, California (type not now extant; cf. Grinnell, Univ. Calif. Pub. Zool., 38, p. 274, 1932).

Uria troille californica Ridgway, Bull. U. S. Nat. Mus., 50, (8), p. 724, 1919 (monog.; in part, as to California); Bent, l.c., 107, p. 182, 1919 (life hist.; in part, as to California).

Uria aalge californicus(a) Salomonsen, Ibis, 1932, p. 130 (crit.); Peters, Bds. World, 2, p. 353, 1934 (range); Bangs, in Peters, Bull. Mus. Comp. Zool., 92, p. 58, 1943 (note on type).

Range.—Resident on the coast of California, breeding on the Farallons and San Miguel Island.

Field Museum Collection.—42: California (Point Reyes, 1; Monterey, 20; Pacific Grove, 16; Carmel, 2; Moss Landing, 2; Mussel Rock, San Mateo County, 1).

Genus **CEPPHUS** Pallas

Cepphus Pallas, Spic. Zool., 1, fasc. 5, p. 33, 1769—type, by monotypy, *Cepphus lacteolus* Pallas=*Alca grylle* Linnaeus.

¹*Uria aalge inornata* Salomonsen: Similar to *U. a. californica*, but throat less reddish brown, and wings decidedly longer. Wing, 210–224 (against 195–210, in *californica*).

Grylle Leach, in Ross, Voy. Disc. Baffins Bay, App. II, p. li, 1819—based on “[Les] *Cephus*” Cuvier, Règ. Anim., 1, p. 510, “1817” (=Dec. 7, 1816), type, by tautonymy, *Colymbus Grylle* Gmelin=*Alca grylle* Linnaeus.

Pseuduria (Sharpe MS.) Coues, Osprey, 3, p. 144, “May” (=June 10), 1899; Sharpe, Hand List Gen. Spec. Bds., 1, p. 131, July 12, 1899—type, by subs. desig. (Sharpe, Zool. Rec. for 1899, Aves, p. 42, 1900), *Cepphus columba* Pallas.

****Cepphus grylle mandtii* (Mandt). MANDT’S GUILLEMOT.**

Uria mandtii (Lichtenstein MS.) Mandt, Obs. Hist. Nat. Itin. Groenl., p. 30, 1822—Spitzbergen (type in Berlin Museum).

Uria glacialis Brehm, Lehrb. Naturg. Eur. Vögel, 2, p. 924, 1824—“bewohnt die zwischen den Eisfeldern des Nordens liegenden Klippen und Felseninseln” (type, from Spitzbergen, in Tring Collection [cf. Hartert, Nov. Zool., 25, p. 61, 1918], now in the American Museum of Natural History, New York).

Uria mandti Ogilvie-Grant, Cat. Bds. Brit. Mus., 26, p. 584, 1898 (monog.).

Cepphus grylle (not *Alca grylle* Linnaeus) Winge, Medd. Grøn., 21, p. 214, 1898—Greenland (in part).

Cepphus mandtii Ridgway, Bull. U. S. Nat. Mus., 50, (8), p. 737, 1919 (monog.; full bibliog.; in part); Bent, l.c., 107, p. 162, 1919 (life hist.).

Cepphus grylle mandtii Peters, Bds. World, 2, p. 354, 1934 (range); Hørring, Rep. Fifth Thule Exped., 2, No. 6, p. 84, 1937 (tax.; range); Bray, Auk, 60, p. 530, 1943—Foxe Basin (nesting).

Uria grylle mandtii Bird and Bird, Ibis, 1935, p. 854—Jan Mayen (breeding).

Range.—Breeds from Melville Island to northern Greenland north of Lat. 75° and extralimittally on Jan Mayen, Spitzbergen, Bear Island, Novaya Zemlya, coasts of western Taimyr Peninsula, Franz Josef Land, New Siberian Islands, Herald and Wrangell Islands, and the Arctic coast of northeastern Siberia. Winters southward to Massachusetts (at least casually) and St. Michaels, Alaska.

Field Museum Collection.—4: Alaska (Point Barrow, 3; Sledge Island, 1).

****Cepphus grylle arcticus* (C. L. Brehm).¹ ARCTIC GUILLEMOT.**

Uria arctica C. L. Brehm, Lehrb. Naturg. Eur. Vögel, 2, p. 923, 1824—Greenland (type no longer extant).

Cepphus grylle (not *Alca grylle* Linnaeus) Winge, Medd. Grøn., 21, p. 214, 1898—Greenland (in part).

¹ *Cepphus grylle arcticus* (C. L. Brehm), described by Austin as being intermediate between *mandtii* and *grylle* with respect to the amount of white on the outer primaries and the extent of black at the base of the white greater secondary wing coverts, seems to be an intergrade, as has been pointed out by Gross, who challenges its claims to recognition. According to his findings, birds from the Button Islands show complete intergradation, so that the problem seems to require further investigation with the help of more comprehensive material.

Cephus grylle arcticus Austin, Bull. N. E. Bird Banding Assoc., 5, pp. 1-6, 1929; idem, Mem. Nutt. Orn. Cl., 7, pp. 136-139, 1932 (char.; meas.; range); Peters, Bds. World, 2, p. 354, 1934 (range); Gross, Auk, 54, pp. 33-34, 1937 (crit.); Soper, l.c., 63, p. 238, 1946—Baffin Island (nesting).

Range.—Breeds on both coasts of Greenland at least to Lat. 72° N., on southeastern Baffin Island, and in Labrador south to Hamilton Inlet (probably also on Iceland).

Field Museum Collection.—26: Arctic Canada (Countess of Warwick Sound, 2); Greenland (Holsteinborg, 1; Sukkertoppen, 2; Simiutak, 1; Cape Tattershall, 2; Godthaab, 1); Labrador (Gannet Islands, 2; Jack Lane Bay, 3; Port Manvers, 1; Hopedale, 2; Indian Harbor, 2; Merrifield Bay, 4; Bowdoin Bay, 2; unspecified, 1).

****Cephus grylle grylle* (Linnaeus).¹ BLACK GUILLEMOT.**

Alca Grylle Linnaeus, Syst. Nat., 10th ed., 1, p. 130, 1758—based principally on Faun. Svec., No. 124, Gotland, Sweden.

Colymbus grylloides Pontoppidan, Danske Atlas, 1, p. 621, 1763—Denmark.

Cephus lacteolus Pallas, Spic. Zool., 1, fasc. 5, p. 33, 1769—between Katwyk and Scheveningen, Holland (color variety).

Uria nivea Bonnaterre, Tabl. Enc. Méth., Orn., livr. 47, p. 37, 1791—substitute name for *Cephus lacteolus* Pallas.

Uria leucoptera Vieillot, Nouv. Dict. Hist. Nat., nouv. éd., 14, p. 35, 1817—locality unknown (no type extant).

Grylle scapularis Leach, in Ross, Voy. Disc. Baffin's Bay, App. II, p. li, 1819—evidently intended as a new name for *Alca grylle* Linnaeus.

Cephus Meisneri C. L. Brehm,² Handb. Naturg. Vög. Deuts., p. 389, 1831—Greenland (type in Tring Collection [cf. Hartert, Nov. Zool., 25, p. 61, 1918], now in the American Museum of Natural History, New York).

Cephus grylle Ridgway, Bull. U. S. Nat. Mus., 50, (8), p. 733, 1919 (monog.; full bibliog.; range in part); Bent, l.c., 107, p. 156, 1919 (life hist.); Wynne-Edwards, Proc. Bost. Soc. N. H., 40, p. 335, 1935—Gulf of St. Lawrence; Gross, Auk, 54, p. 33, 1937 (crit.; range).

Cephus grylle grylle Peters, Bds. World, 2, p. 354, 1934 (range).³

¹ For a review of the races of this species and the description of a proposed new race *Cephus grylle ultimus* (type in the Copenhagen Museum from Frozen Strait, Melville Peninsula, Canada) see Salomonsen (K. Vet. O. Vitterh. Samh., Göteborg, Handl. F. 6, Ser. B., 3, No. 5, p. 60, May 8, 1944).

² *Uria Meisneri* Brehm (Isis, 1826, col. 985) is a nomen nudum.

³ Quite doubtful is *Uria motzfeldi* Benicken (Isis, 1824, Heft 8, col. 889, Aug., 1824—Greenland), redescribed subsequently by Faber (l.c., Heft 9, col. 981) as *Uria unicolor*. Stejneger (Proc. U. S. Nat. Mus., 7, pp. 210-216, 1884) gave the whole history of this problematical *Cephus motzfeldti*, which various authors, including Hartert, regard as a melanistic mutation of *C. grylle* (or rather its Greenland representative). Cf., however, Ridgway, Bull. U. S. Nat. Mus., 50, (8), p. 742, 1919, and Salomonsen, Medd. Grøn., 131, No. 6, p. 1, 1941.

Range.—Breeds from southern Labrador and Newfoundland south to the coast of Maine and extralimittally from Scandinavia east to the White Sea and south to the British Isles and the Baltic Sea; in winter south to Long Island, New York.

Field Museum Collection.—21: Quebec (Bird Rock, 1; Magdalen Islands, 9; Grosse Ile de Kamouraska, 1; St. André, 2); Newfoundland (Codroy, 1); Nova Scotia (Seal Island, 2); New Brunswick (Grand Manan, 1; Grand Manan Island, 2; unspecified, 1); Maine (Eastport, 1).

****Cepphus columba columba* Pallas. PIGEON GUILLEMOT.**

Cepphus columba Pallas, Zoogr. Rosso-Asiat., 2, p. 348, 1811—Kamchatka and Bering Straits; Stejneger, Bull. U. S. Nat. Mus., 29, p. 21, 1885—Bering and Copper Islands (crit.; meas.); Ridgway, l.c., 50, (8), p. 740, 1919 (monog.; full bibliog.); Bent, l.c., 107, p. 167, 1919 (life hist.); Preble and McAtee, N. Amer. Fauna, 46, p. 25, 1923—Pribilof Islands (winter visitant).

Uria columba Ogilvie-Grant, Cat. Bds. Brit. Mus., 26, p. 586, 1898 (monog.).

Uria columba columba Hartert, Nov. Zool., 27, p. 130, 1920—Bering and Copper Islands (crit.); idem, Vög. Pal. Fauna, 3, p. 1777, 1921 (monog.).

Cepphus columba columba Peters, Bds. World, 2, p. 354, 1934 (range).

Cepphus columba kaiurka Portenko, Mitt. Zool. Mus. Berlin, 22, p. 228, Oct. 30, 1937—Copper Island, Bering Sea (type in Leningrad Museum).

Range.—Breeds on the islands in Bering Sea and on the Pacific coast and islands of North America from the Aleutian Islands¹ south to British Columbia (Vancouver and Queen Charlotte Islands), Washington (Puget Sound region), Oregon (Three Arch Rocks) and California (Santa Barbara Islands and the Farallons); extralimittally on Kamtchatka, the Chukchi Peninsula, and north to Herald and Wrangell Islands; winters from the Pribilof and Aleutian Islands south to California.²

Field Museum Collection.—32: Alaska (Diomed Islands, 1; Little Diomed Island, 2; St. Lawrence Island, 1; Canoe Bay, 1; Dall Island, 1; Unalaska, 1; Unimak Island, 1); British Columbia (Vancouver Island, 3); Washington (Clallam Bay, 2; Port Townsend,

¹ Subdivision of the Pigeon Guillemot on the basis of size has been attempted by Portenko, but it seems to be impracticable. Birds from the Commander Islands and the Aleutians are stated to be smaller (wing of males, 171–176, against 181–189; of females, 168–172, against 185–195). While this difference holds in a good many cases, we find the wings in a male from Copper Island to be fully 182, and in others from California (Farallon Islands) to range from 176 to 180 mm. The divergency thus seems to be too slight to be expressed in nomenclature.

² About the alleged occurrence in Unalaska of *Cepphus carbo* Pallas, cf. Stejneger, Proc. U. S. Nat. Mus., 7, pp. 225–227, 1884.

7); California (Del Monte County, 1; Point Reyes, 1; San Francisco, 1; Carmel Bay, 5; Moss Landing, 1; San Miguel Island, 1; Santa Cruz County, 2).

Genus BRACHYRAMPHUS Brandt

Brachyramphus Brandt, Bull. Sci. Acad. Sci. St. Pétersb., 2, col. 346, 1837—type, by subs. desig. (G. R. Gray, List Gen. Bds., p. 77, 1840), *B. marmoratus* (Lath.)=*Colymbus marmoratus* Gmelin.

Brachyrhamphus Brandt, Isis, 1837, col. 502 (emendation).

Apobapton Brandt, Bull. Sci. Acad. Sci. St. Pétersb., 2, col. 346, 1837—type, by subs. desig., Baird, Brewer, and Ridgway, Water Bds. N. Amer., 2, p. 498, 1884, *Colymbus marmoratus* Gmelin.

Anobapton G. R. Gray, List Gen. Bds., p. 77, 1840—emendation of *Apobapton* Brandt.

Micruria (not of Reiter, 1875) Ogilvie-Grant, Cat. Bds. Brit. Mus., 26, p. 594, 1898 (no type specified).

Endomychura Oberholser, Proc. Acad. Nat. Sci. Phila., 1899, p. 201—new name for *Micruria* Ogilvie-Grant, preoccupied (type, by orig. desig., *Brachyramphus hypoleucus* Xantus).

**Brachyramphus marmoratus marmoratus* (Gmelin).

MARBLED MURRELET.

Colymbus marmoratus Gmelin, Syst. Nat., 1, (2), p. 583, 1789—based on "Marbled Guillemot" Pennant, Arct. Zool., 2, p. 517, pl. 22, and Latham, Gen. Syn. Bds., 3, (2), p. 336, pl. 96, "in America occidentali et Camtschatea"—Prince William Sound, Alaska (ex Pennant).

Brachyramphus wrangeli(i) Brandt, Bull. Sci. Acad. Sci. St. Pétersb., 2, col. 346, 1837—Aleutian Islands (type in Leningrad Museum;=winter plumage).

Uria townsendi Audubon, Bds. Amer., folio ed., pl. 430, 1838; idem, Orn. Biogr., 5, p. 251, 1839—near mouth of Columbia River (type apparently lost; cf. Stone, Proc. Acad. Nat. Sci. Phila., 1899, p. 17).

Brachyrhamphus marmoratus Coues, Proc. Acad. Nat. Sci. Phila., 1868, p. 61 (monog.); Ogilvie-Grant, Cat. Bds. Brit. Mus., 26, p. 590, 1898 (monog.); Barber, Murrelet, 22, p. 38, 1941—Coos River (juvenile taken).

Brachyrhamphus wrangeli Coues, Proc. Acad. Nat. Sci. Phila., 1868, p. 63—Sitka and Puget Sound (monog.).

Brachyramphus marmoratus Osgood, N. Amer. Fauna, 21, p. 38, 1901—Cumshewa and Skidegate Inlets, Queen Charlotte Islands; Ridgway, Bull. U. S. Nat. Mus., 50, (8), p. 746, 1919 (monog.; full bibliog.); Bent, l.c., 107, p. 141, 1919 (life hist.); Sutton and Semple, Auk, 58, p. 580, 1941—Vancouver Island (egg).

Brachyramphus marmoratus marmoratus Peters, Bds. World, 2, p. 355, 1934 (range).

Range.—Breeds on the Queen Charlotte Islands and probably within its summer range extending from Unalaska and Kodiak Islands to the coast of Humboldt County, California; winters south to San Diego, California.

Field Museum Collection.—34: Alaska (Icy Strait, 7; Baranof Island, 2; Howkan, 1; Skagway, 1; Sitka, 1); British Columbia (Quatsino, 2; Comox, Vancouver Island, 2); Washington (Clallam Bay, 2; Port Townsend, 8); California (Monterey, 4; Pacific Grove, 2; Santa Cruz, 1; Capitola Harbor, 1).

****Brachyramphus brevirostris* (Vigors). KITTLITZ'S MURRELET.**

Uria brevirostris Vigors, Zool. Journ., 4, No. 47, Oct., 1828—Jan., 1829, p. 357, 1829—"San Blas" (Nayarit), Mexico, ~~errare~~=North Pacific Ocean (type in British Museum); idem, Zool. Voy. Blossom, Birds, p. 32, 1839 (no locality).

Brachyramphus Kittlitzii(i) Brandt, Bull. Sci. Acad. Sci. St. Pétersb., 2, col. 346, 1837—[Petropaulskij], Kamchatka (type in Leningrad Museum); Nelson, Rep. Nat. Hist. Coll. Alaska, p. 44, pl. 1, 1887—Unalaska Harbor (summer plumage).

Brachyramphus brevirostris Stejneger, Zeits. Ges. Orn., 3, p. 211, 1886 (crit.); Ogilvie-Grant, Cat. Bds. Brit. Mus., 26, p. 593, 1898 (monog.; type listed); Ridgway, Bull. U. S. Nat. Mus., 50, (8), p. 749, 1919 (monog.; full bibliog.); Bent, l.c., 107, p. 146, 1919 (life hist.); Peters, Bds. World, 2, p. 355, 1934 (range); Ford, Auk, 53, p. 214, 1936—Wales Mountain, Alaska (breeding).

Range.—Occurs in summer on the coast and islands of Alaska east to Glacier Bay (definite breeding records from Mount Pavloff, and Hill Point, near Prince of Wales), in the Aleutian Islands, and extralimittally on islands in the Bering Sea, in Kamtchatka, and northeastern Siberia; winters south to the Kurile Islands and northern Japan.

Field Museum Collection.—11: Alaska (Barrow, 2; Diomed Islands, 2; Nome, 2; Icy Strait, 2; Morzhovoi Bay, 1; Unimak Island, 1; Unalaska Island, 1).

****Brachyramphus hypoleucus hypoleucus* Xantus.¹ XANTUS' MURRELET.**

Brachyrhamphus hypoleucus Xantus, Proc. Acad. Nat. Sci. Phila., for Nov., 1859, p. 299, 1860—"Cape San Lucas," Lower California (type, from

¹*Brachyramphus hypoleucus hypoleucus* Xantus, according to Green and Arnold, is restricted to Guadalupe Island, and, while agreeing with the coastal form of California and Lower California in all essential features, may be recognized

"fourteen miles off the coast of Cape San Lucas,"¹ in U. S. National Museum).

Brachyramphus hypoleucus Brewster, Bull. Mus. Comp. Zool., 41, p. 15, 1902—part, Cape San Lucas region, Lower California; McLellan, Proc. Calif. Acad. Sci., (4), 15, p. 281, 1926—Melpomene Cove, Guadalupe Island; Peters, Bds. World, 2, p. 355, 1934 (range in part).

Endomychura hypoleuca Ridgway, Bull. U. S. Nat. Mus., 50, (8), p. 752, 1919—part, Cape San Lucas region and Guadalupe Island (descr. of "winter plumage"); Grinnell, Univ. Calif. Pub. Zool., 32, p. 56, 1928—part, Cape San Lucas region; Green and Arnold, Condor, 41, p. 25, 1939—Guadalupe Island and Cape San Lucas region (crit.; char.).

Brachyramphus hypoleucus hypoleucus van Rossem, Ann. Mag. Nat. Hist., (11), 4, p. 442, 1939 (range).

Range.—Breeds on Guadalupe Island, off Lower California; found once in the waters off Cape San Lucas.

Field Museum Collection.—2: Guadalupe Island, 2.

****Brachyramphus hypoleucus scrippsi* (Green and Arnold).²**

SCRIPPS'S MURRELET.

Endomychura hypoleuca scrippsi Green and Arnold, Condor, 41, p. 28, Jan. 17, 1939—Anacapa Island, California (type in coll. of San Diego Society of Natural History).

Brachyramphus hypoleucus (not of Xantus) Coues, Proc. Acad. Nat. Sci. Phila., 1868, p. 64—part, San Diego, California (descr.); Goss, Auk, 1, p. 396, 1884—off San Diego, California (May 20); Bent, Bull. U. S. Nat. Mus., 107, p. 149, 1919 (life hist.); van Rossem, Condor, 28, pp. 80–82, 1926—California and Lower California (excl. of Guadalupe Island) (char.); Peters, Bds. World, 2, p. 355, 1934 (range in part).

Endomychura hypoleuca Ridgway, Bull. U. S. Nat. Mus., 50, (8), p. 752, 1919—part, "breeding plumage" and range excl. of Cape San Lucas and Guadalupe Island (full bibliog.); Grinnell, Univ. Calif. Pub. Zool., 32, p. 56, 1928—Lower California (excepting Cape San Lucas region).

Brachyramphus hypoleucus scrippsae van Rossem, Ann. Mag. Nat. Hist., (11), 4, p. 442, 1939 (range).

Range.—Breeds on coastal islands of California and Lower California from Anacapa Island to Natividad Island; winters north to Point Arena, Mendocino County, California.

by the white, instead of slaty-black, color of the loreal, suborbital, and auricular regions. The type and another specimen from the waters off Cape San Lucas were found to be identical with breeding birds from Guadalupe Island.

¹ Cf. Green and Arnold, Condor, 41, p. 25 (in text), 1939.

² *Brachyramphus hypoleucus scrippsi* (Green and Arnold): Similar to the nominate race, but with loreal, suborbital, and auricular regions slaty-black instead of white.

Field Museum Collection.—21: California (Pacific Beach, 1; off San Diego, 1; Monterey County, 1; Orange County, 1; Ventura County, 3); Lower California (Coronados Islands, 14).

***Brachyramphus hypoleucus pontilis* van Rossem.¹ SAN BENITO ISLAND MURRELET.**

Brachyramphus hypoleucus pontilis van Rossem, Ann. Mag. Nat. Hist., (11), 4, p. 441, Oct., 1939—San Benito Islands, off central Lower California, Mexico (type in Carnegie Museum, Pittsburgh, Pennsylvania).

Micruria hypoleuca Ogilvie-Grant, Cat. Bds. Brit. Mus., 26, p. 594, 1898—San Benito Islands, Lower California (descr.).

Range.—Breeds on the San Benito Islands off the Pacific coast of Lower California, Mexico. Said to occur also (not breeding) along the adjacent mainland (Port San Bartolomé).

****Brachyramphus hypoleucus craveri* (Salvadori).² CRAVERI'S MURRELET.**

Uria Craveri Salvadori, Atti Soc. Ital. Sci. Nat., 8, p. 387, 1865—Gulf of California, Lat. 27° 50' 12" N., Long. 110° 10' 45" W.³ (type in Turin Museum).

Brachyrhamphus craveri Streets, Bull. U. S. Nat. Mus., 7, p. 32, 1877—Raza Island, Gulf of California (crit.; habits; nest and eggs descr.).

Micrura craveri Ogilvie-Grant, Cat. Bds. Brit. Mus., 26, p. 595, 1898 (descr. of type erroneously credited to "near Cape San Lucas, South California").

Brachyramphus craveri Brewster, Bull. Mus. Comp. Zool., 41, p. 16, 1902—San José and Espiritu Santo Islands, Gulf of California (crit.; char.); Bent, Bull. U. S. Nat. Mus., 107, p. 153, 1919 (life hist.); van Rossem, Condor, 28, pp. 80–83, 1926 (char.; range); Peters, Bds. World, 2, p. 356, 1934 (range).

Endomychura craveri Ridgway, Bull. U. S. Nat. Mus., 50, (8), p. 753, 1919 (monog.; full bibliog.); Grinnell, Univ. Calif. Pub. Zool., 32, p. 58, 1928—Lower California; Green and Arnold, Condor, 41, pp. 26–28, 1939—near Guadalupe Island and off San Diego (disc.).

¹*Brachyramphus hypoleucus pontilis* van Rossem is said to resemble most closely *B. h. scrippsi*, but to differ by having the inner webs of the outer primaries with a light brown area next to the shaft and the neck outline between dorsal and ventral areas very close to that of *B. h. craveri*. The bill shape is intermediate between that of *scrippsi* and *craveri*.

We have seen no specimens.

²*Brachyramphus hypoleucus craveri* (Salvadori) differs markedly from typical *B. hypoleucus* by longer, slenderer bill; grayish white, dusky-mottled (not pure white) quill-lining; pale grayish brown instead of pure white inner webs of outer primaries; more brownish (less sooty) upper parts; finally by the dark dorsal coloration encroaching onto the sides of the foreneck.

³ Probably Raza Island (cf. Cooke, Auk, 33, p. 80, 1910).

Brachyramphus hypoleucus craveri van Rossem, Ann. Mag. Nat. Hist., (11), 4, p. 443, 1939 (range); idem, Occ. Pap. Mus. Zool. Louisiana State Univ., 21, p. 96, 1945—Gulf of California (resident).

Range.—Breeds on various islands in the Gulf of California; occurs in post-breeding season on the Pacific coast from Monterey Bay south along the Lower California Peninsula.

Field Museum Collection.—8: Mexico, Lower California (off Idelfonso Island, 4; between Isla Estaban and Isla Rasa, 2; Rattler Island, 1; Georges Island, 1).

Genus SYNTHLIBORAMPHUS Brandt

Synthliboramphus Brandt, Bull. Sci. Acad. Sci. St. Pétersb., 2, col. 347, 1837—type, by subs. desig. (G. R. Gray, List Gen. Subgen. Bds., p. 77, 1840), *Alca antiqua* Gmelin.

Synthliborhamphus G. R. Gray, List Gen. Subgen. Bds., 2nd ed., p. 98, 1841 (emendation).

Rhamphosynthlipis Coues, Key N. Amer. Bds., 5th ed., 2, p. 1075, Dec., 1903—type, by monotypy, *Uria wumizusume* Temminck.

Synthliboramphus antiquus (Gmelin). ANCIENT MURRELET.

Alca antiqua Gmelin, Syst. Nat., 1, (2), p. 554, 1789—based on "Ancient Auk" Pennant, Arct. Zool., 2, p. 512, "from the west of North America to Kamtschatka and the Kuril Island" (type now in Liverpool Museum; cf. Forbes and Robinson, Bull. Liverpool Mus., 2, p. 52, 1899).

Uria senicula Pallas, Zoogr. Rosso-Asiat., 2, p. 367, 1811—Kurile and Aleutian Islands, Kamchatka, and Peshina Bay.

Brachyramphus brachypterus (Kittlitz MS.) Brandt, Bull. Sci. Acad. Sci. St. Pétersb., 2, col. 346, 1837—Unalaska (type in Leningrad Museum).

Mergulus cirrhocephalus Vigors, Zool. Voy. "Blossom," Birds, p. 32, 1839—no locality stated=northwest coast of America (type in British Museum).¹

Uria cana Kittlitz,² Denkw. Reise, 1, p. 288, 1858—Amachnak Island, Alaska (type in Leningrad Museum).

Synthliborhamphus antiquus Coues, Proc. Acad. Nat. Sci. Phila., 1868, p. 56 (monog.); Ogilvie-Grant, Cat. Bds. Brit. Mus., 26, p. 596, 1898 (monog.).

Synthliboramphus antiquus Ridgway, Bull. U. S. Nat. Mus., 50, (8), p. 757, 1919 (monog.; full bibliog.); Bent, l.c., 107, p. 132, 1919 (life hist.); Preble and McAtee, N. Amer. Fauna, 46, p. 24, 1923—St. Paul and St. George Islands, Pribilofs; Grinnell, Univ. Calif. Pub. Zool., 32, p. 56, 1928—near Ensenada, Lower California (Dec. 25, 1927); Peters, Bds. World, 2, p. 356, 1934 (range).

¹ Though not listed as such, spec. w (of *S. antiquus*), presented by Sir E. Belcher, First Lieutenant of the "Blossom," is without much question the type of *Mergulus cirrhocephalus* Vigors.

² In Lutké, Voy. Séniavine, 3, p. 272, 1836, *Uria cana* is a nomen nudum.

Range.—Breeds in northwestern North America from the Aleutian Islands and Kodiak Island to southeastern Alaska (St. Lazaria and Forrester Islands) and the Queen Charlotte Islands (Sangar Island) and extralimitally in northeastern Asia south to Cheefoo, Shantung, China; winters south to southern California and northwestern Lower California (one record from near Ensenada).

Field Museum Collection.—26: Alaska (Aleutian Islands, 4; Howkan, 3; Prince of Wales Island, 1; Forrester Island, 1; Dall Island, 2); British Columbia (Vancouver Island, 1); California (Monterey, 6; Pacific Beach, 1; Pacific Grove, 5; San Clemente Island, 1; Hyperion, 1).

Genus **PTYCHORAMPHUS** Brandt

Ptychoramphus Brandt, Bull. Sci. Acad. Sci. St. Pétersb., 2, col. 346, 1837—type, by monotypy, *Uria aleutica* Pallas.

Ptychoramphus Brandt, Isis, 1837, col. 502 (emendation).

***Ptychoramphus aleuticus aleuticus** (Pallas). CASSIN'S AUKLET.

Uria aleutica Pallas, Zoogr. Rosso-Asiat., 2, p. 370, 1811—"ad Oceanum orientalem"—North Pacific Ocean.

Mergulus cassinii Gambel, Proc. Acad. Nat. Sci. Phila., 2, for Aug., 1845, p. 266, pub. Dec. 5, 1845—California (type in coll. of Academy of Natural Sciences, Philadelphia; cf. Stone, Proc. Acad. Nat. Sci. Phila., 1899, p. 19, and Grinnell, Univ. Calif. Pub. Zool., 38, p. 275, 1932).

Ptychoramphus aleuticus Coues, Proc. Acad. Nat. Sci. Phila., 1868, p. 52 (monog.); Ogilvie-Grant, Cat. Bds. Brit. Mus., 26, p. 599, 1898 (monog.).

Ptychoramphus aleuticus Ridgway, Bull. U. S. Nat. Mus., 50, (8), p. 761, 1919 (monog.; full bibliog.); Bent, l.c., 107, p. 110, 1919 (life hist.); Grinnell, Univ. Calif. Pub. Zool., 32, p. 56, 1932—Lower California (resident); Peters, Bds. World, 2, p. 356, 1934 (range); Slipp, Murrelet, 23, p. 18, 1942—Puget Sound.

Range.—Breeds on the coast of North America, from the Aleutian Islands and southern Alaska south to Lat. 30° N., on the western coast of Lower California.

Field Museum Collection.—36: California (off Shore Rock, Humboldt County, 6; Farallon Islands, 2; San Francisco, 1; Pacific Grove, 14; Carmel Bay, 1; Pacific Beach, 1; San Clemente Island, 8; Catalina Islands, 1; San Miguel Island, 1); Mexico (Los Coronados Islands, Lower California, 1).

Ptychoramphus aleuticus australis van Rossem.¹ SAN BENITO ISLAND AUKLET.

Ptychoramphus aleuticus australis van Rossem, Ann. Mag. Nat. Hist., (11), 4, p. 443, Oct., 1939—West San Benito Island, Lower California (type in Dickey Collection, now in University of California at Los Angeles).

Range.—From San Benito Island south to San Roque Island.

Genus **CYCLORRHYNCHUS** Kaup

Cyclorhynchus Kaup, Skizz. Entw.-Gesch. Nat. Syst. Eur. Thierw., p. 155, 1829—type, by monotypy, *Alca psittacula* Pallas.

Ombria Eschscholtz, Zool. Atlas, Heft 4, p. 3, 1831—type, by orig. desig., *Alca psittacula* Pallas.

***Cyclorhynchus psittaculus** (Pallas). PAROQUET AUKLET.

Alca psittacula Pallas, Spicil. Zool., fasc. 5, p. 15, pl. 2, and pl. 5, figs. 4–6, 1769—Kamchatka and islands toward Japan and North America (type, from Kamchatka [ex Steller], in Leningrad Museum).

Ombria psittacula Eschscholtz, Zool. Atlas, Heft 4, p. 3, pl. 17, 1831—St. Paul Island (descr.; crit.).

Simorhynchus psittaculus Coues, Proc. Acad. Nat. Sci. Phila., 1868, p. 36 (monog.).

Cyclorhynchus psittaculus Stejneger, Bull. U. S. Nat. Mus., 29, p. 38, pl. 4, fig. 6, and pl. 5, fig. 1, 1885—Bering and Copper Island (nomencl.; crit.; habits); Peters, Bds. World, 2, p. 357, 1934 (range); Storer, Condor, 46, p. 244, 1944—Marin County, California.

Phaleris psittaculus(a) Ogilvie-Grant, Cat. Bds. Brit. Mus., 26, p. 607, 1898 (monog.); Ridgway, Bull. U. S. Nat. Mus., 50, (8), p. 764, 1919 (monog.; full bibliog.); Bent, l.c., 107, p. 116, 1919 (life hist.); Hartert, Vög. Pal. Fauna, 3, p. 1788, 1921 (monog.); Preble and McAtee, N. Amer. Fauna, 46, p. 20, 1923—Pribilof Islands.

Range.—Breeds from the northeastern coast of Siberia (Chukchi Peninsula) and northwestern Alaska (including Diomedes, St. Lawrence, Hall, St. Matthews, Pribilof, Walrus, and Otter Islands) south to the Commander, Aleutian, and Shumagin Islands; winters to Sakhalin, the Kurile Islands, and coast of central California.

Field Museum Collection.—15: Alaska (Diomedes Islands, 9; Little Diomedes Island, 2; King Island, 1; Nome, 1; Amchitka Island, 1); (?) Arctic America (Franklin Bay, 1).

¹ *Ptychoramphus aleuticus australis* van Rossem is said to differ from the typical race only by its size. Adult males have wings from 110 to 115 mm., while the like sex in *P. a. aleuticus* has them from 118 to 128. No measurements are given for females.

Genus AETHIA Merrem

- Aethia* Merrem, Vers. Grundr. Allg. Gesch. Nat. Einth. Vögel, 1, Tentamen Nat. Syst. Av., pp. 7, 13, 20, 1788—type, by monotypy, *Alca cristatella* Pallas (cf. Hartert, Nov. Zool., 23, pp. 339-340, 1916).
- Simorhynchus* Merrem, in Ersch and Gruber, Allg. Encycl. Wissens. Künste, 2, p. 405, 1819—type, by orig. desig. and monotypy, *Alca cristatella* Pallas.
- Phaleris* Temminck, Man. Orn., 2nd éd., 1, p. cxii, Oct., 1820—type, by subs. desig. (G. R. Gray, List Gen. Subgen. Bds., p. 77, 1840), *Alca tetracula* Pallas=*Alca cristatella* Pallas.
- Tyloramphus* Brandt, Bull. Sci. Acad. Sci. St. Pétersb., 2, col. 348, 1837—type, by monotypy, *Alca cristatella* Pallas.
- Cicerônia* Reichenbach, Av. Syst. Nat., p. 53, 1852 (=1853)—type, by orig. desig., *Phaleris nodirostra* Bonaparte=*Alca pygmaea* Gmelin.
- Alcella* Stone, Auk, 24, pp. 197, 198, 1907—type, by orig. desig., *Alca pygmaea* Gmelin.

**Aethia cristatella* (Pallas). CRESTED AUKLET.

- Alca cristatella* Pallas, Spicil. Zool., fasc. 5, p. 20, pl. 3, and pl. 5, figs. 7-9, 1769—Kamchatka (type in Leningrad Museum).¹
- Alca tetracula* Pallas, Spicil. Zool., fasc. 5, p. 24, pl. 4, and pl. 5, figs. 10-12, 1769—Kamchatka (type² in Leningrad Museum=winter plumage).
- Alca cristata* P. L. S. Müller, Natursyst., Suppl., p. 104, 1776—based on Pallas, Spicil. Zool., fasc. 5, pl. 3.
- Uria dubia* Pallas, Zoogr. Rosso-Asiat., 2, p. 371, 1811—Awacha Bay, Kamchatka (descr. of young).
- Phaleris superciliosa* (not *Mormon superciliosa* Lichtenstein) Bonaparte, Geog. Comp. List, p. 66, 1838—based on Audubon, Bds. Amer., pl. 402.
- Simorhynchus cristatellus* Coues, Proc. Acad. Nat. Sci. Phila., 1868, p. 37 (monog.); Stejneger, Bull. U. S. Nat. Mus., 29, p. 32, pl. 4, figs. 4, 5, and pl. 5, fig. 2, 1885—Bering Island (plumages); Ogilvie-Grant, Cat. Bds. Brit. Mus., 26, p. 601, 1898 (monog.).
- Simorhynchus tetraculus* Coues, Proc. Acad. Nat. Sci. Phila., 1868, p. 43 (monog.;=winter plumage).
- Aethia cristatella* Ridgway, Bull. U. S. Nat. Mus., 50, (8), p. 775, 1919 (monog.; full bibliog.); Bent, l.c., 107, p. 120, 1919 (life hist.); Hartert, Vög. Pal. Fauna, 3, p. 1783, 1921 (monog.); Preble and McAtee, N. Amer. Fauna, 46, p. 21, 1923—Pribilof Islands (breeding); Peters, Bds. World, 2, p. 357, 1934 (range).

Range.—Breeds on the coasts and islands of Bering Sea and contiguous parts of the North Pacific south to Kodiak Island, the Aleutian and Commander Islands, Kamtchatka, and the Kurile Islands;

¹ Pallas expressly states (p. 19) that he described and figured the specimens sent by Steller to the Academy of Sciences at St. Petersburg.

² Likewise collected by Steller.

ranges in summer north to the Arctic coast of Alaska, Herald and Wrangell Islands, etc.

Field Museum Collection.—20: Alaska (Diomed Islands, 12; Little Diomed Island, 1; St. Lawrence Island, 1; St. Paul Island, 5; St. George Island, 1).

****Aethia pusilla* (Pallas). LEAST AUKLET.**

Uria pusilla Pallas, Zoogr. Rosso-Asiat., 2, p. 373, 1811—Kamchatka (descr. excl. of synonyms).

Phaleris microceros Brandt, Bull. Sci. Acad. Sci. St. Pétersb., 2, col. 346, 1837—no locality stated (type in Leningrad Museum).

Phaleris nodirostris Audubon, Bds. Amer., folio ed., pl. 402, fig. 3, 1838; idem, Orn. Biog., 5, p. 101, 1839—said to occur on the northwest coast (type in coll. of Zoological Society of London).

Phaleris nodirostra Bonaparte, Geog. Comp. List, p. 66, 1838—based on Audubon, Bds. Amer., pl. 402 [fig. 3].

Simorhynchus microceros Coues, Proc. Acad. Nat. Sci. Phila., 1868, p. 46 (monog.).

Simorhynchus pusillus Coues, Proc. Acad. Nat. Sci. Phila., 1868, p. 48 (monog.); Stejneger, Bull. U. S. Nat. Mus., 29, p. 35, pl. 4, fig. 3, and pl. 5, fig. 5, 1885—Bering Island (soft parts; molt; plumages); Ogilvie-Grant, Cat. Bds. Brit. Mus., 26, p. 605, 1898 (monog.).

Ciceronia pusilla Ridgway, Bull. U. S. Nat. Mus., 50, (8), p. 768, 1919 (monog.; full bibliog.).

Aethia pusilla Bent, Bull. U. S. Nat. Mus., 107, p. 128, 1919 (life hist.); Hartert, Vög. Pal. Fauna, 3, p. 1786, 1921 (monog.); Preble and McAtee, N. Amer. Fauna, 46, p. 23, 1923—Pribilof Islands (breeding); Peters, Bds. World, 2, p. 358, 1934 (range).

Range.—Breeds in northeastern Siberia (Chukchi Peninsula), on islands in Bering Sea (Diomed, St. Lawrence, King, and the Pribilofs), on the Aleutians, and at Cape Lisburne, Alaska; occasional at Point Barrow, Alaska; winters south to Washington (Tacoma) and Japan.

Field Museum Collection.—36: Alaska (Diomed Islands, 16; Little Diomed Island, 3; island off Nome, 2; St. George Island, 7; St. Paul Island, 8).

***Aethia pygmaea* (Gmelin). WHISKERED AUKLET.**

Alca pygmaea Gmelin, Syst. Nat., 1, (2), p. 555, 1789—based on "Pigmy Auk" Pennant, Arct. Zool., 2, p. 513, Bird Island, Bering Sea.

Alca camtschatica Lepechin, Nov. Act. Petrop., 12, p. 369, pl. 8, 1801—"in insulis inter Americam Septentrionalem et Kamtschatcam sitis."

Uria mystacea Pallas, Zoogr. Rosso-Asiat., 2, p. 372, 1811—Kurile Islands.

Mormon superciliosa Lichtenstein, Verz. Doubl. Zool. Mus. Berlin, p. 89, Sept., 1823—new name for *Phaleris cristatella* (not *Alca cristatella* Pallas) Temminck, Nouv. Rec. Pl. Col., livr. 34, pl. 200, May, 1823.

Simorhynchus cassini Coues, Proc. Acad. Nat. Sci. Phila., 1868, p. 45—Ounimak Pass, Unalaska Island, Alaska (type in U. S. National Museum; descr. of young).

Simorhynchus camtschaticus Coues, Proc. Acad. Nat. Sci. Phila., 1868, p. 41 (monog.).

Simorhynchus pygmaeus Stejneger, Bull. U. S. Nat. Mus., 29, p. 25, pl. 4, figs. 1, 2, and pl. 5, figs. 3, 4, 1885—Bering and Copper Islands (plumages; habits); Ogilvie-Grant, Cat. Bds. Brit. Mus., 26, p. 603, 1898 (monog.).

Alcella pygmaea Ridgway, Bull. U. S. Nat. Mus., 50, (8), p. 771, 1919 (monog.; full bibliog.).

Aethia pygmaea Bent, Bull. U. S. Nat. Mus., 107, p. 125, 1919 (life hist.); Hartert, Vög. Pal. Fauna, 3, p. 1785, 1921 (monog.); Peters, Bds. World, 2, p. 358, 1934 (range).

Range.—Breeds on the Kuriles, in Kamtchatka, and on the Commander Islands, possibly on some of the Aleutians east to Unalaska; chiefly resident, but recorded in winter from northern Japan (Yesso).

Genus CERORHINCA Bonaparte

Cerorhinca Bonaparte,¹ Ann. Lyc. Nat. Hist. N. Y., 2, p. 427, 1828—type, by monotypy, *Cerorhinca occidentalis* Bonaparte=*Alca monocerata* Pallas.

Chimerina Eschscholtz, Zool. Atlas, Heft 3, p. 2, 1829—type, by [virtual] monotypy, *Chimerina cornuta* Eschscholtz=*Alta monocerata* Pallas.

**Cerorhinca monocerata* (Pallas). RHINOCEROS AUKLET.

Alca monocerata Pallas, Zoogr. Rosso-Asiat., 2, p. 362, 1811—Cape St. Elias and Kodiak Island, Alaska (type lost).

Phaleris cerorhynca Bonaparte, Zool. Journ., 3, No. 9, p. 53, Jan., 1827—west coast of North America (type, without exact locality other than North Pacific, in coll. of C. L. Bonaparte, now in Paris Museum; cf. Berlioz, Bull. Mus. Hist. Nat. Paris, (2), 1, p. 60, 1929).

Cerorhinca occidentalis Bonaparte, Ann. Lyc. Nat. Hist. N. Y., 2, p. 428, 1828—new name for *Phaleris cerorhynca* Bonaparte.

Chimerina cornuta Eschscholtz, Zool. Atlas, Heft 3, p. 2, pl. 12, 1829—St. Paul Island, Pribilof Islands (type probably in Leningrad Museum).

Cerorhinca suckleyi Cassin, in Baird, Rep. Expl. Surv. R. R. Pac., 9, p. 906, 1858—Fort Steilacoom, Washington (type in U. S. National Museum).

Ceratorhyncha monocerata Coues, Proc. Acad. Nat. Sci. Phila., 1868, p. 28 (monog.).

¹ Various "emended" by Bonaparte and others to *Ceratorrhina*, *Ceratorhina*, *Cerorhina*, *Ceratorhynchus*, *Ceratorhyncha*, and *Cerorhyncha*.

Sagmatorrhina suckleyi Coues, Proc. Acad. Nat. Sci. Phila., 1868, p. 32 (monog.).

Cerorhyncha monocerata Ogilvie-Grant, Cat. Bds. Brit. Mus., 26, p. 609, 1898 (monog.).

Cerorhinca monocerata Ridgway, Bull. U. S. Nat. Mus., 50, (8), p. 779, 1919 (monog.; full bibliog.); Bent, l.c., 107, p. 104, 1919 (life hist.); Hartert, Vög. Pal. Fauna, 3, p. 1788, 1921 (monog.); Grinnell, Univ. Calif. Pub. Zool., 32, p. 56, 1928—Lower California (winter); Peters, Bds. World, 2, p. 358, 1934 (range).

Range.—Breeds (chiefly on islands) in northwestern North America from southern Alaska (Forrester Island, St. Lazaria Island, and Egg Island) west to the Aleutian Islands and south to Washington (Destruction Island) and extralimittally in Kamtchatka, on the Kurile Islands, in Hokkaido, and Korea; winters at sea south to Lower California and Japan.

Field Museum Collection.—41: Alaska (Howkan, 2; Dall Island, 3; Forrester Island, 2); British Columbia (mouth of Skeena River, 1; Prince Rupert, 1); Washington (Puget Sound, 1); California (Monterey, 5; Pacific Grove, 13; Cypress Point, 2; Santa Cruz Island, 1; Santa Monica, 1; Hyperion, 2; off San Diego, 1; Pacific Beach, 6).

Genus FRATERCULA Brisson

Fratercula Brisson, Orn., 1, p. 52, 6, p. 81, 1760—type, by tautonymy, “*Fratercula*” = *Alca arctica* Linnaeus.

Mormon Illiger, Prodr. Syst. Mam. Av., p. 283, 1811—substitute name for *Fratercula* Brisson.

Larva Vieillot, Anal. Nouv. Orn. Elém., p. 67, 1816—type, by orig. desig., “*Macareux*” = *Alca arctica* Linnaeus.

Ceratoblepharum Brandt, Bull. Sci. Acad. Sci. Pétersb., 2, col. 348, 1837—type, by subs. desig. (Ogilvie-Grant, Cat. Bds. Brit. Mus., 26, p. 615, 1898), *Alca arctica* Linnaeus.

**Fratercula arctica naumanni* Norton.¹ LARGE-BILLED PUFFIN.

Fratercula arctica naumanni Norton, Proc. Portland Soc. Nat. Hist., 2, (5), pp. 144 (note), 145, pl. 2, fig. 3, May 20, 1901—near Hakluyt's Head, Spitsbergen (type in U. S. National Museum);² Ridgway, Bull. U. S. Nat. Mus., 50, (8), p. 788, 1919 (monog.; part, Spitsbergen); Bent, l.c., 107,

¹ *Fratercula arctica naumanni* Norton differs from the nominate race by longer wings and tail as well as larger, deeper bill. Its range seems to be restricted to Spitsbergen and northwestern Greenland.

² Although reference is made to *Mormon glacialis* (not of Temminck) Naumann, Isis, 1821, col. 782, pl. 7, fig. 2, where a bird of unspecified origin is discussed and

p. 96, 1919—northwestern Greenland (life hist.); Hartert, Vög. Pal. Fauna, 3, p. 1792, 1921 (monog.); Peters, Bds. World, 2, p. 358, 1934 (range in part); Hartert, Vög. Pal. Fauna, Ergänzungs., p. 506, 1938 (range).

Fratercula glacialis (not *Mormon glacialis* Temminck) Coues, Proc. Acad. Nat. Sci. Phila., 1868, p. 23—Port Foulke, Greenland (crit.).

Fratercula arctica (not *Alca arctica* Linnaeus) Ogilvie-Grant, Cat. Bds. Brit. Mus., 26, p. 616, 1898—part, spec. c"—g", Spitsbergen; Winge, Medd. Grønl., 21, p. 239, 1898—part, Disco Bay, Greenland (meas.).

Range.—Northwestern Greenland (from Smith Sound to Disco Bay) and Spitzbergen, possibly also Franz Josef Land.

Field Museum Collection.—3: Greenland (unspecified, 1; Rathbone's Island, 1; Lat. 68° N., 1).

****Fratercula arctica arctica* (Linnaeus). PUFFIN.**

Alca arctica Linnaeus, Syst. Nat., 10th ed., 1, p. 130, 1758—based principally on Faun. Svec., No. 118, "in rupibus et praecipitiis montium maris atlantici"—Norway.

Alca deleta Brünnich, Orn. Bor., p. 25, 1764—Iceland.

Alca labradorica Gmelin, Syst. Nat., 1, (2), p. 550, 1789—based on "Labrador Auk" Pennant, Arct. Zool., 2, p. 512, Labrador (=young).

Alca labradora Latham, Ind. Orn., 2, p. 793, 1790—based on the same.

(?) *Mormon glacialis* (Leach MS.) Temminck, Man. Orn., 2nd ed., 2, p. 933, Oct., 1820—"aux côtes septentrionales d'Amérique."¹

Mormon polaris Brehm, Isis, 1826, col. 985—Greenland (type lost).

Fratercula arctica Ogilvie-Grant, Cat. Bds. Brit. Mus., 26, p. 616, 1898 (in part); Winge, Medd. Grønl., 21, p. 239, 1898—Greenland (in part, Julianehaab, etc.); Norton, Proc. Portland Soc. Nat. Hist., 2, p. 140, pl. 2, figs. 1, 2, 4, 5, 1901—Labrador (crit.); Wynne-Edwards, Proc. Bost. Soc. N. H., 40, p. 336, 1935 (distr. in North Atlantic).

Fratercula arctica arctica Ridgway, Bull. U. S. Nat. Mus., 50, (8), p. 784, 1919 (monog.; full bibliog.); Bent, l.c., 107, p. 89, 1919 (life hist.); Hartert, Vög. Pal. Fauna, 3, p. 1792, 1921 (monog.); Peters, Bds. World, 2, p. 359, 1934 (range); Bird and Bird, Ibis, 1935, p. 855—Jan Mayen (crit.); Hartert, Vög. Pal. Fauna, Ergänzungs., p. 506, 1938 (range).

Range.—Breeds from southern Greenland and Ungava south to the coasts of Maine and Nova Scotia and extralimittally on Iceland,

figured, Norton clearly based the measurements (p. 145) and the drawing of the bill on U. S. Nat. Mus. No. 86019, from Hakluyt's Head, Spitzbergen, which consequently must be regarded as the type.

¹ Temminck's diagnosis, though rather ambiguous, appears to have been taken from specimens in the British Museum obtained by Captain Ross, as has been pointed out by Norton (Proc. Portland Soc. Nat. Hist., 2, pp. 143-144, 1901). We do not know what has become of them, and unless they can be found, the exact meaning of Temminck's name will remain in doubt.

Jan Mayen, Bear Island, northern Scandinavia, the Murman coast, and Novaya Zemlya; in winter south to Massachusetts, Long Island, and eastern Pennsylvania.

Field Museum Collection.—25: Greenland, west coast (Sukkertoppen, 2); Labrador (Gannett Island, 3; Davis Inlet, 1; Lettel Land Island, 3; Lance au Loup, 2); Quebec (Cape Whittle, 1; Magdalen Islands, 4; Bayonne Islands, 2; Bird Rocks, 4); Nova Scotia (Dover, 1); Maine (Eastport, 1); Massachusetts (Massachusetts Bay, 1).

****Fratercula corniculata* (Naumann). HORNED PUFFIN.**

Mormon corniculata Naumann, Isis, 1821, (2), col. 782, pl. 7, figs. 3, 4—Kamchatka (location of type not stated).

Fratercula corniculata Coues, Proc. Acad. Nat. Sci. Phila., 1868, p. 24 (monog.); Stejneger, Bull. U. S. Nat. Mus., 29, p. 59, pl. 3, 1885—Bering Island (crit.); Ogilvie-Grant, Cat. Bds. Brit. Mus., 26, p. 620, 1898 (monog.); Ridgway, Bull. U. S. Nat. Mus., 50, (8), p. 789, 1919 (monog.; full bibliog.); Bent, l.c., 107, p. 97, 1919 (life hist.); Hartert, Vög. Pal. Fauna, 3, p. 1796, 1921 (monog.); Preble and McAtee, N. Amer. Fauna, 46, p. 19, 1923—Pribilof Islands (breeding); Peters, Bds. World, 2, p. 359, 1934 (range).

Range.—Breeds on the coast and islands of Bering Sea and adjacent parts of the Arctic and North Pacific Ocean from Koliuchin Island and northern Alaska (Cape Lisburne) south to the Kurile and Commander Islands and Forrester Island, Alaska; winters south to Japan (Hondo) and the Queen Charlotte Islands, British Columbia, and California.

Field Museum Collection.—27: Alaska (Little Diomedé Island, 3; King Island, 1; St. Michael, 5; St. Paul Island, 1; St. George Island, 3; Bluff City, 8; Morzhovoi Bay, 3; Unimak Island, 1); California (Eureka, 1; Pacific Grove, 1).

Genus LUNDA Pallas

Lunda Pallas, Zoogr. Rosso-Asiat., 2, p. 363, 1811—type, by subs. desig. (Gray, List Gen. Subgen. Bds., p. 76, 1840), *Alca cirrhata* Pallas.

Gymnoblepharum Brandt, Bull. Sci. Acad. Sci. St. Pétersb., 2, col. 349, 1837—type, by monotypy, *Alca cirrhata* Pallas.

Sagmatorrhina Bonaparte, Proc. Zool. Soc. Lond., 19, "1851," p. 202, pub. June 29, 1853—type, by monotypy, *Sagmatorrhina lathamii* Bonaparte = *Alca cirrhata* Pallas.

Cheniscus (not of Eyton, 1838) G. R. Gray, Cat. Gen. Subgen. Bds., p. 127, 1855—type, by orig. descr., *Alca cirrhata* Gmelin (=Pallas).

***Lunda cirrhata (Pallas). TUFTED PUFFIN.**

Alca cirrhata Pallas, Spicil. Zool., fasc. 5, p. 9, pl. 1, and pl. 5, figs. 1-3, 1769—seas between Kamchatka, America, and the Kurile Islands (cotypes [ex Steller and Krascheninikof] in Leningrad Museum).

[*Fratercula*] *carinata* Vigors, Zool. Journ., 4, No. 15, Oct. 28-Jan., 1829, p. 358 (in text), 1829—no locality indicated (type not known to be extant).

Sagmatorrhina lathamii Bonaparte, Proc. Zool. Soc. Lond., 19, "1851," p. 202, pl. 44, pub. June 29, 1853—"north-western Arctic regions of America" (type in British Museum;=young); Coues, Proc. Acad. Nat. Sci. Phila., 1868, p. 31, fig. 3 (crit.).

Lunda cirrhata Coues, Proc. Acad. Nat. Sci. Phila., 1868, p. 26 (monog.); Stejneger, Bull. U. S. Nat. Mus., 29, p. 43, pls. 1, 2, 1885—Bering Island (molt; plumages; shedding of bill); Ogilvie-Grant, Cat. Bds. Brit. Mus., 26, p. 612, 1898 (monog.); Ridgway, Bull. U. S. Nat. Mus., 50, (8), p. 793, 1919 (monog.; full bibliog.); Bent, l.c., 107, p. 82, 1919 (life hist.); Hartert, Vög. Pal. Fauna, 3, p. 1790, 1921 (monog.); Preble and McAtee, N. Amer. Fauna, 46, p. 17, 1923—Pribilof Islands (breeding); Grinnell, Univ. Calif. Pub. Zool., 32, p. 235, 1928—"Lower California" (occurrence questionable); Peters, Bds. World, 2, p. 359, 1934 (range).

Range.—Breeds from the north coast of Chukchi Peninsula, Koliuchin Island, and northern Alaska (Cape Lisburne) south on the coasts and islands of Bering Sea and the North Pacific Ocean to the Kurile Islands and the Santa Barbara Islands, California.

Field Museum Collection.—23: Alaska (Little Diomedé Island, 1; Diomedé Islands, 2; St. George Island, 1; Teller, 1; Howkan, 1; Unimak Island, 1); Oregon (Tillamook County, 1); California (Farallon Islands, 1; Eureka, 7; Trinidad, 1; Westport, 5; San Miguel Island, 1).
